Looking beyond Corporate Social Responsibility through a holistic systems lens – an Eastern and Western focus

By Isabel C. Sebastian

A thesis submitted for the degree of Doctor of Philosophy (Sustainable Futures)
Institute for Sustainable Futures, University of Technology Sydney
25 February 2018
Certificate of Original Authorship

I, Isabel C. Sebastian declare that this thesis is submitted in fulfilment of the requirements for the award of a PhD in Sustainable Futures in the Institute for Sustainable Futures at the University of Technology Sydney.

This thesis is wholly my own work unless otherwise referenced or acknowledged. In addition, I certify that all information sources and literature used are indicated in the thesis.

This research is supported by an Australian Government Research Training Program Scholarship.

Signature of Student

Date: 25 February 2018
Acknowledgments and Dedication

There are many people, places, conversations and experiences that have enabled me to write this PhD thesis, whom I want to mention here with fond gratitude and appreciation. As someone who does not squarely fit into any particular academic discipline due to my 25-year diverse career and life journey, I found a perfect academic home at the transdisciplinary Institute for Sustainable Futures (ISF) at the University of Technology Sydney. The extraordinary team of staff and researchers at ISF have been a continual inspiration and support whether I was in Sydney, the high Himalayan Mountains of Bhutan or the ancient cities of Europe. In particular, I am eternally grateful to my supervisors Professor Stuart White, Director at ISF and Dr Tho Havinh, Program Director of the Gross National Happiness Centre in Bhutan for their skilful guidance and insightful support that has allowed me to explore, discover, learn and grow as a person and researcher.

My most heartfelt thanks go to the 21 interview participants and eight focus group participants who contributed to this research study including business, government and NGO leaders from Belgium, Bhutan, Brazil, Canada, France, South Africa, UK and USA. Their willingness to share their experiences and insights is what gives this PhD thesis its life. They remain de-identified throughout this study, which gave them the freedom to be open, honest and courageous and to explore the edges of their business and/or leadership practices in our conversations that were truly inspired. They know who they are and everything I have learned and concluded from this study is due to their generosity of time and spirit. Thank you.

To all the authors, scholars, thinkers and professionals from many diverse fields and across times in history whom I am quoting and referencing in this thesis, I extend my deepest gratitude for their insights that have helped me evolve my awareness and understanding of the world and my field of study. Their wisdom has allowed me to make sense of the world in a completely new way.

There were many other people and places that provided vital support and encouragement along the way including family and friends, academic and professional friends, music and inspiring landscapes. I acknowledge them for their support in the contribution this work may make to the academic and business context.
Academic support

The conversations and support from academics stretched far and wide and in particular I want to thank:

- The Institute for Sustainable Futures (ISF) PhD program and staff – Suzanne Cronan, Barbara Courtille, Chris Riedy, Liz Jenkins, Roel Plant and Jason Prior
- All of the ISF researchers and staff in particular Scott Kelly, Alison Atherton and from the UTS Business School Melissa Edwards
- My academic review panel Professor Suzanne Benn at the UTS Business School and Sam Sharpe Research Director at ISF
- Fellow ISF PhD students especially Nivek Thompson, Emilia de la Sienra, Bron Cumbo, Verena Streitferdt, Tani Shaw, Christianthi Giotis, Sarina Kilham, Katie Ross, Tanja Rosenquist, Ian Cunningham and Matt Daly
- Exeter University Environment and Sustainability Institute, UK especially Professor Gaston and Professor Clare Saunders for accepting me as a visiting scholar for six month in 2014/15
- Exeter University Business School, UK, especially Sally Jeanrenaud, Senior Research Fellow and Jean-Paul Jenarenaud from WWF for many inspired conversations and the opportunity to present at the One Planet MBA program in 2013, 2014 and 2015
- Staff at the Academy for Innovation and Research at Falmouth University, UK
- Louvain-La-Neuve University, Belgium especially Valerie Swean at Louvain School of Management and Isabelle Cassiers Department of Economics, TPTransition team for accepting me as a visiting scholar in 2016
- Santa Fe Institute, US and the participants at the Complexity Winter School in India 2015
- Royal University of Bhutan (RUB) former VC Pema Thinley and Jamba Tobden, Manager of the RUB Institute for GNH studies,
- Fritjof Capra and the team at the Capra Course for the scholarship to participate in the ‘Systems View of Life’ course, Spring 2016
- Nick Hopwood, Associate Professor at the School of Education, UTS for conducting invaluable HDR research training programs at UTS
- International Association for Business and Society mentors at the 2015 conference in Costa Rica
- Peter Senge, MIT Sloan School of Management, US for a conversation in February 2014 that changed the course of this study
• Otto Scharmer, Professor MIT, Presencing Institute, US for his inspiring work with the Global Wellbeing and GNH Lab and for the opportunity to contribute to the program held in Bhutan in June 2013

Professional friends and support
I am very grateful for the invaluable support from professional friends that contributed to my thinking and development, in particular:
• Diane Osgood, Director Business Innovation, Purpose and Sustainability, Virgin Management, New York
• Mike Townsend, Founder & CEO of Earthshine Solutions, Denmark
• Mike Jordan, Knowledge Transfer Architect, SAP for many inspiring conversations
• Philippe Joubert, Advisory Board of the Cambridge Institute for Sustainability Leadership, UK
• Robert Hanser, former Managing Director of Bosch Management Support, Germany
• Climen Koechlin, former Director and the team at the World Forum for a Responsible Economy, France
• Max Player, Director and Suzanne Stanton, Director and Corporate Counsel at Mawland Group, Australia for their friendship and ongoing encouragement
• Simon McArthur, Director at SMA and Associates for his friendship, always asking challenging questions and generosity in sharing valuable insights
• Meg Hart for the many thought provoking conversations about Bhutan, for pushing me to extend my thinking and for reviewing the Bhutan Chapter (Part D) and the Discussion Chapter (Part F) of this thesis
• John Revington, for a grammatical and typographic edit of Parts A to F of this thesis.

Family and friends
Most importantly my family and friends have been my life support throughout this journey although I’m not sure how much of a friend I have been while I have been engrossed in this PhD. I thank you for your unconditional love, encouragement and patience especially during the seemingly never-ending finishing phase of this thesis. You have made it possible for me to embark on this journey and to finish it. You reminded me that there is life while and beyond doing a PhD.
I am filled with a deep sense of gratitude to the following friends and family who are a gift beyond words in my life:

- My parents, sister and extended family clan in Europe whom I love and cherish deeply
- My partner Andrew M. for his patient support, zest for life, nourishing meals and unconditional love
- My friends Nicolette B. and Maryanne C. for the many inspiring conversations, interest in my research, tough questions, refreshing laughs, restorative walks, and precious nurturing times together
- My friends whose homes I shared during my times in Sydney, especially Glenn B. and Jo T. for their love, support and cosy home in Manly; and Margaret H. for her warmth, enquiring spirit and her nest in Coogee.
- My teachers past and present for all they have taught me.

Finally, I want to acknowledge Bhutan, its people, culture and landscape for inspiring me to embark on this study and for offering such a unique view of the world, literally and figuratively. I dedicate the benefits of this work to the wellbeing of all beings, may they live a fully conscious life and discover the most beneficial worldview that ensures the flourishing of all and people and our planet.
Papers

During this research study I published three papers, which are referenced in this thesis. Some components of these papers have been included in the literature review Part B.

9 Contribution of this study ................................................................. 26

PART B - Literature review .................................................................... 29

1 Business and society - ethics, sustainability and CSR literature ............ 32
  1.1 Brief background to historic market economies .................................. 33
  1.2 The modern capitalist market economy............................................. 36
  1.3 Beyond-GDP debate – do metrics matter most?.................................... 40
  1.4 Business responsibility versus business sustainability literature ........ 44
  1.5 Business ethics and responsibility literature ..................................... 47
  1.6 Evolution of business responsibility – phase models ......................... 51
  1.7 Recent developments in business sustainability and responsibility .... 56
  1.8 Motivations for corporate social responsibility ................................ 59
  1.9 CSR in economically less developed countries .................................. 62
  1.10 Business ethics .............................................................................. 64
  1.11 Ethical theories and their application in business............................... 69
  1.12 Ethics of care ................................................................................. 75
  1.13 Ethics of care in business ............................................................... 82
  1.14 Ethics of relational responsibility .................................................... 84
  1.15 Ethics of relational responsibility in business ................................ 88
  1.16 Buddhist ethics ............................................................................. 90
  1.17 Summary of business ethics ........................................................... 94
  1.18 Business and society summary ...................................................... 96

2 The philosophies of happiness literature .............................................. 97
  2.1 Introduction to happiness and wellbeing literature ............................ 98
  2.2 Context of selected Eastern and Western conceptions of happiness .... 99
  2.3 Scope of this section of the literature review ....................................... 101
  2.4 How desirable is happiness – Is it the purpose of life for everyone? .... 104
  2.5 Is happiness enough? .................................................................... 111
  2.6 Eastern philosophies on happiness .................................................. 112
  2.7 Western ancient philosophies on happiness ..................................... 128
  2.8 Western contemporary happiness discourse and literature ............... 141
  2.9 Summary of Western theories of happiness ..................................... 178
  2.10 Consolidation of insights from happiness philosophies and studies ... 180
2.11 Happiness and wellbeing literature review and synthesis ........................................... 187

3 Systems thinking and change theories ................................................................. 190

3.1 Socio-ecological systems and the Anthropocene ................................................... 193
3.2 Two examples of ancient approaches to systems thinking ...................................... 196
3.3 Overview of contemporary approaches to systems thinking .................................... 201
3.4 Systems thinking in management ........................................................................... 204
3.5 Systems thinking skills and practices ....................................................................... 208
3.6 Tools for holistic systems thinking .......................................................................... 210
3.7 Process for systems thinking ................................................................................... 212
3.8 Systems change models ......................................................................................... 214
3.9 The New Development Paradigm and the business sector ...................................... 229
3.10 Synthesising systems change frameworks .................................................................. 230
3.11 Conclusion of systems thinking and systems change models ................................. 233

4 Connecting the transdisciplinary concepts of this study ........................................... 235

PART C – Methodology .............................................................................................. 237

1 Ontological and epistemological stance ................................................................. 239

2 Theoretical framework and research design ......................................................... 240

2.1 Ontological view ..................................................................................................... 240
2.2 Epistemological view ............................................................................................ 241
2.3 Research strategy – a transdisciplinary approach .................................................... 242
2.4 Theoretical perspective – interpretivism and systems theory .................................... 244
2.5 Research approach – more inductive than deductive ................................................. 245
2.6 Qualitative methods and sampling ......................................................................... 246
2.7 Data collection ....................................................................................................... 247
2.8 Analytical approach ............................................................................................... 255
2.9 Research gaps ....................................................................................................... 262
2.10 Research objectives .............................................................................................. 264
2.11 Research questions .............................................................................................. 265

3 Ethical considerations .............................................................................................. 270

4 Summary of research process .................................................................................. 271
PART D – Bhutan research ................................................................. 273

1 Bhutan’s history, culture and development ................................. 275
   1.1 Key milestones in Bhutan’s history ......................................... 276
   1.2 Bhutan’s cultural values and ethics ....................................... 280
   1.3 Bhutan’s development since the 1960s ................................. 286
   1.4 Bhutan’s development approach – Gross National Happiness ....... 289
   1.5 Criticism of GNH .................................................................. 303

2 Business, ethics, sustainability and GNH in Bhutan ....................... 309
   2.1 State of the business sector in Bhutan .................................... 310
   2.2 State of CSR and GNH in business in Bhutan ....................... 311
   2.3 GNH of Business certification tool ....................................... 314

3 In conversation with Bhutanese leaders ..................................... 317
   3.1 Definitions and perceptions of happiness in Bhutan ................. 317
   3.2 Bhutanese leaders’ perspectives on GNH and the NDP .............. 324
   3.3 Bhutanese leaders’ perceptions of GNH and CSR in business ...... 346
   3.4 Does GNH foster a ‘beyond CSR’ approach in business? .......... 373

4 Conclusion and recommendations – Bhutan research ................. 378
   4.1 GNH in business is a ‘beyond CSR’ approach ......................... 378
   4.2 Implications and recommendations ...................................... 381
   4.3 Limitations of the Bhutan study and further research ............. 386

PART E – In conversation with international business leaders ........... 388

1 Enablers of a ‘beyond CSR’ business approach ........................... 390
   1.1 Worldview, values, attitudes and outlook on time .................. 390
   1.2 Business vision, strategy, operations and organisational culture .... 397
   1.3 Relationships and relational responsibility ............................ 410
   1.4 Tools used to learn and expand awareness ............................ 418
   1.5 Measures of success, happiness and wellbeing ...................... 424
   1.6 Systems thinking and the ‘beyond CSR’ approach .................. 428
   1.7 Summary of ‘beyond CSR’ enabling characteristics .............. 434

2 Barriers to moving ‘beyond CSR’ and expanding responsibility .......... 438
   2.1 Worldview, attitudinal and values-based barriers .................. 438
   2.2 Business mind-sets and models ......................................... 440

RUB – Royal University of Bhutan
SAP – Systems Applications and Products (software company)
SDG – Sustainable Development Goal
SNDP – Secretariat for the New Development Paradigm, Thimphu, Bhutan
SPIRAL - Societal Progress Indicators and Responsibility for All
ST – Stakeholder Theory
SWB – Subjective Wellbeing
SZ - Sueddeutsche Zeitung (German Newspaper)
TED – Technology, Entertainment and Design conferences where short 18-minute talks are given
TGTBTU – The Good, The Bad and The Ugly (Blog)
TV - Television
TWO CAGES – A mnemonic for a systems thinking process: Transformation,
    Weltanschauung, Owners, Customers, Actors, Guardians, Environmental
    constraints and Subsystems of activity.
UK – United Kingdom
UN – United Nations
UNDP – United Nations Development Program
UNGC – United Nations Global Compact
UNHCR – United Nations High Commissioner for Refugees
UNNC – United Nations News Center
UNPRME – United Nations Principles for Management Education
US / USA – United States of America
USD – United States Dollar
UTS – University of Technology Sydney
VC – Vice Chancellor
VP – Vice President
VW – Volkswagen
WBSCD – World Business Council for Sustainable Development
WFRE – World Forum for a Responsible Economy
WHO – World Health Organisation
WHR – World Happiness Report
WVS – World Values Survey
WWF – World Wildlife Fund

List of Terms

Akrasia - the weakness of the will (Aristotle)
Anthropocene - geological time period since the industrial revolution of accelerated socio-
    ecological changes with planetary scale impacts
Arhat - term describing a saint in Theravada Buddhism
Artha - External conditions and resources in life such as wealth, fame, power and
    success in Hinduism
Ataraxia - a peaceful state of mind (Epicurus)
Atman - the soul in Hinduism
Bhakti - devotion in Hinduism
Bodhisattvas – a person on the path to achieving enlightenment who chooses to forgo nirvana to help end suffering of other beings (in Mahayana Buddhism)

Brahmavihāras – four qualities or values of love, compassion, sympathetic joy, equanimity (in Theravada Buddhism)

Buddha – monk and teach who lived ca. 552 – 483 BCE in Northern India on whose teachings the philosophy of Buddhism was founded

Cetanā - intention of an action (Buddhism)

Chi - universal life force or vital force that emerges from the interplay of yin yang

Dalai Lama - spiritual leader of the Gelug school of Tibetan (Vajrayana) Buddhism

Dharma - In Hinduism, renunciation of pleasure, wealth and power to be at service to something greater than oneself

Dharma - In Buddhism, the teachings of the Buddha

Driglam namzha – cultural code of etiquette (in Bhutan)

Dzongkha - national language of Bhutan

Eudaimonia – from Greek ‘good spirit’ reaching one’s full potential and meaning in life

Hatha - umbrella term for a range of physical yoga styles with the intention to create balance of mind and body

Hedonism - term derived from the ancient Greek mythology, *hedonē* the goddess of sensual pleasures, hedonism refers to self-indulgence and the that pleasure is the highest aim and purpose of life

Jana yoga- the path of knowledge

Kama - pleasure of the senses, love and emotions in Hinduism

Karma yoga – the path of work and action

Lhotsampas – people of Nepali descent mostly in Southern Bhutan

Mahāyāna - one of the two main Buddhist traditions, includes Vajrayana Buddhism (mostly prevalent in Tibet, China, Bhutan, Nepal, Mongolia, Taiwan, Japan and Korea)

Mandarin - Chinese language mostly prevalent in northern and south western China

Mettā - a meditation practice focussed on loving-kindness

Moksha - In Hinduism infinite being, complete awareness and joy

Ngalopas - people of Western Bhutan

Nirvana - highest state of consciousness and ultimate happiness

Pāramitās - six or sometimes ten ethical values in the Mahāyāna Buddhist tradition

Prajñā - wisdom

Purusarthas - the four life goals including kama, artha, dharma and moksha)

Raja yoga - the path of mental and physical discipline

Abstract

Corporate Social Responsibility (CSR) strategies, activities and reporting are often considered an indication of businesses’ good intentions and corporate citizenship. However, repeated corporate scandals like the recent Volkswagen emissions falsification demonstrate that good CSR performance is not synonymous with good business ethics and responsibility. A phenomenon referred to as ‘conventional CSR’ in this study.

Inspired by Bhutan’s development philosophy of Gross National Happiness (GNH) and the author’s interest in how this influences business ethics, conduct and sustainability, the study explores how Bhutanese and international businesses move beyond ‘conventional CSR’. The topic is also explored within the context of the United Nations 2030 Sustainable Development Goals (SDGs) and the implications for businesses and their CSR approach.

The study’s transdisciplinary and constructed grounded theory methodology draws on three broad fields of literature including business ethics, Eastern and Western philosophies of happiness and systems theories. From these, three lenses are synthesised in the literature review and used to analyse qualitative data from 21 semi-structured interviews with Bhutanese and international business leaders and a focus group of eight international CSR professionals.

The research shows a number of dimensions of ‘beyond CSR’ businesses. What differentiates them from ‘conventional CSR’ business is:

a) their commitment to societal and/or planetary wellbeing beyond financial performance
b) ethics based on relational responsibility
c) stakeholders are considered as part of the business purpose
d) their leaders draw on intrinsic rather extrinsic motivation
e) they have a long-term outlook
f) they focus on slow and steady growth to ensure social and planetary impact, and
g) they have a systems or interdependent worldview recognising the interdependence and mutual causality of causes, effects and societal and planetary conditions.

These insights were formulated as a ‘Beyond CSR Maturity Model’ (BCMM) to illustrate five key dimensions that differentiate ‘beyond CSR’ from ‘conventional CSR’ businesses. One of the major conclusions from this study is that a systems or interdependent worldview offers the highest potential leverage for change towards a ‘beyond CSR’ business approach.
The study concludes that systems thinking provides a contemporary access point for business leaders to create organisational cultures with an interdependent worldview that can assist in enabling a ‘beyond CSR’ business approach. The implication of this study is illustrated with an example using the VW emissions scandal to demonstrate how businesses can use the SDGs and systems view to understand their impact in an interdependent way and step into a ‘beyond CSR’ mode of thinking.
