

**THE ROLE OF KNOWLEDGE CREATION
PROCESS IN ENHANCING ORGANIZATIONAL
RESILIENCE AND PERFORMANCE**

A THESIS SUBMITTED IN FULFILMENT OF THE REQUIREMENTS FOR THE AWARD
OF THE DEGREE OF

DOCTOR OF PHILOSOPHY

BY

ALI ALHARTHY

Faculty of Engineering and Information Technology
University of Technology Sydney
City Campus

July 2018

Certificate of Original Authorship

I certify that the work in this thesis has not previously been submitted for a degree nor has it been submitted as part of requirements for a degree except as fully acknowledged within the text.

I also certify that the thesis has been written by me. Any help that I have received in my research work and the preparation of the thesis itself has been acknowledged. In addition, I certify that all information sources and literature used are indicated in the thesis.

Signature of Student:

Production Note:
Signature removed prior to publication.

Date: Tuesday, July 3, 2018

Acknowledgement

I would like to thank the Almighty God Allah, the most gracious, and ever merciful, who has enlightened my soul to complete this endeavour successfully.

This thesis would not have been possible without the help, support and patience of my principle supervisor Prof. Igor Hawryszkiewicz. I strongly believe that without his support and patience with me throughout my PhD journey, I would have never finished this PhD project. I have been very fortunate to have him as my supervisor. I would also like to thank my co-supervisors Dr. Osama Sohaib and Dr. Sojen Pradhan for their contribution, encouragement and support.

I wish to specially acknowledge the support and generosity of The Ministry of Higher Education and Saudi Cultural Mission, without which this doctoral study would not have been possible. I wish to extend my special thanks to the respondents who voluntarily participated in the study, for their generous help.

Finally, I would like to express my deepest gratitude to my family, especially my beloved mother, for being supportive and continuously praying for me. I would like to offer my special thanks to my wife for being highly supportive, understanding and the dearest friend during my study. Also, not to forget, my lovely children, Yousef, Yasir and Jody for their sacrifice, patience, understanding and inspiration during this wonderful journey.

Abstract

The banking industry has been widely plagued by global financial and economic crises despite its central role in the financial sustainability and economic life of a country. A series of deep economic reforms has been initiated to boost the productivity of the banking sector, particularly in developing countries; however, little certainty and agreement has yet to be seen with respect to the organisational performance and resilience of the banks in an ever-changing environment in these countries. The banking system may need to adopt an innovative approach in delivering efficient services while coping with environmental changes, such as global financial disorders.

The effective and efficient development, application and implementation of a knowledge management system and practices is believed to be key in the success of financial institutions, including the banking system, in the areas of operations, management, accounting and marketing.

Given this background, this study investigates the influence of knowledge creation and sharing processes (based on Nonaka and colleagues' SCEI model) on organisational resilience and performance. It explores the key role of the knowledge creation process (KCP) in enhancing organisational resilience capabilities including adaptability, agility, robustness and innovation. It also examines the mediating effect of organisational resilience on the relationship between the knowledge creation process and organisational performance in the Saudi Arabian banking system.

A correlational method, quantitative in nature, is employed to collect data in order to test the hypotheses and find the relationship between knowledge creation, organisational resilience, and organisational performance. The research design employed is the survey design in order to collect data on the views of the Saudi Arabian banking employees on issues related to the aforementioned concepts.

The correlation test and the structural equation modelling revealed that a significant and positive association exists between the knowledge creation process and overall organisational resilience. It was found that except for robustness, other capabilities of organisational resilience i.e. adaptability, agility and innovation are correlated positively and significantly with the knowledge creation process.

In addition, the current study shows a significant, direct and positive association between

the knowledge creation process and organisational performance. More specifically, statistically significant support was found for the effects of knowledge creation and sharing processes on

organisational performance in the framework of the four perspectives of the balanced score card (BSC) (i.e. financial perspective, internal business process, customer perspective, and learning and growth perspective). The relationship analysis also revealed a positive relationship between organisational resilience and organisational performance, including the four perspectives of BSC. The Structural Equation Modeling (SEM) showed that organisational resilience has a mediating effect on the relationship between the KCP and organisational performance in the Saudi banking sector.

For Saudi Arabian banks to remain resilient and maintain or sustain their performance, it is necessary for them to continue to enhance their ability in creating and sharing knowledge, and to invest in knowledge management infrastructure and technologies as it is still in its early stages.

Abstract.....	iii
CHAPTER 1 : INTRODUCTION.....	1
1.1 Statement of the Problem	1
1.2 Purpose of the Study: Research Aims and Questions	6
1.3 Significance of the Study	7
1.4 Research Method Overview	9
1.5 Research Scope	9
1.6 Thesis Structure	10
CHAPTER 2 : LITERATURE REVIEW	12
2.1 Knowledge Management.....	12
2.1.1 Definition of Knowledge	12
2.1.2 Knowledge as a competitive resource within organizations	14
2.1.3 The hierarchical view of a knowledge system: data, information and knowledge 15	
2.1.4 Tacit versus explicit knowledge	17
2.1.5 Definitions of Knowledge Management	19
2.1.6 Knowledge Management Process.....	23
2.1.7 The SECI Framework/Model of Knowledge Creation	26
2.1.7.1 Socialization.....	28
2.1.7.2 Combination	29
2.1.7.3 Externalization	30
2.1.7.4 Internalization	31
2.2 Resilience.....	32
2.2.1 The Concept of Resilience.....	32
2.2.2 Organisational Resilience.....	39
2.2.2.1 Adaptability	40
2.2.2.2 Robustness	41
2.2.2.3 Agility	42
2.2.2.4 Innovation.....	43
2.3 Organisational Performance	43
2.3.1 The Balanced Scorecard.....	44
2.3.1.1 The customer-related perspective	45
2.3.1.2 The internal business perspective	46
2.3.1.3 The learning and growth perspective	47
2.3.1.4 The financial perspective.....	48
2.3.2 The Justification of using the BSC	49
2.4 The banking industry in Saudi Arabia	50
2.5 Knowledge creation process and organisational resilience and organisational performance: A critical review	51
2.6 Chapter Summary.....	60

CHAPTER 3: THEORETICAL BACKGROUND AND RESEARCH MODEL ..	62
3.1 Knowledge Creation process.....	62
3.2 Organisational Resilience.....	64
3.3 Organisational Performance	66
3.4 Conceptual Model	69
3.5 Hypotheses Development.....	70
3.5.1 Knowledge Creation process and Organisational Resilience	70
3.5.1.1 Knowledge Creation process and adaptability	71
3.5.1.2 Knowledge Creation process and Robustness	72
3.5.1.3 Knowledge Creation process and Agility	73
3.5.1.4 Knowledge creation process and Innovation	74
3.5.2 Organisational Resilience and Organisational Performance.....	76
3.5.2.1 Adaptability and Organisational Performance	76
3.5.2.2 Agility and Organisational Performance	77
3.5.2.3 Robustness and Organisational Performance	78
3.5.2.4 Innovation and Organisational Performance	79
3.5.3 Knowledge Creation process and Organisational performance	80
3.5.4 The mediating role of organisational resilience in the relationship between knowledge creation process and organisational performance	82
3.6 Chapter Summary.....	83
CHAPTER 4 : METHODOLOGY.....	84
4.1 Research Paradigm	84
4.2 Research Design	86
4.3 Research Instrumentation/Construct Operationalization	90
4.4 Instrument Translation	91
4.5 Population and Sample.....	92
4.6 Data Collection.....	93
4.7 Quantitative Data Analysis Approach.....	94
4.8 Measurement Scale Analysis.....	94
4.8.1 Descriptive Data Analysis	96
4.8.2 Structural Equation Modeling (SEM)	96
4.9 Ethics Consideration	99
4.10 Chapter Summary.....	99
CHAPTER 5 : RESULTS	100
5.1 Questionnaire Survey and Participants Profiles	100
5.1.1 Questionnaire Survey.....	100
5.1.2 Participants Profiles	100
5.2 Verifying Data Characteristics	106
5.2.1 Missing Data Analysis and Assessment of Normality	106
5.2.2 Standard Deviation and the Mean.....	106
5.2.3 Outliers Screening.....	107
5.3 Preliminary Data Analysis	107
5.3.1 Knowledge Creation Process Factors.....	107
5.3.2 Organisational Resilience.....	110

5.3.3	Organization Performance.....	111
5.4	Measurement Scale Analysis.....	114
5.4.1	Reliability Assessment.....	114
5.4.2	Exploratory Factor Analysis.....	121
5.5	Measurement Model.....	123
5.5.1	Confirmatory Factor Analysis.....	123
5.5.1.1	Knowledge Creation Process Factors.....	123
5.5.1.2	Organisational Resilience.....	125
5.5.1.3	Organization Performance	126
5.5.2	Model Fit.....	127
5.6	Structural Model Testing	129
5.6.1	Impact of Knowledge Creation Process on Organisational Resilience.....	129
5.6.2	Impact of Organisational Resilience Factors on Performance	131
5.6.3	Impact of Knowledge Creation Process on Performance	133
5.6.4	Organisational Performance	135
5.6.5	Organization Resilience Mediation effect.....	136
5.7	Chapter Summary.....	138
CHAPTER 6 : DISCUSSION AND CONCLUSION.....		141
6.1	Revisiting the Research Aims, Research Model, Hypotheses and Questions.....	141
6.2	Discussion of the Major Research Findings	145
6.3	Quantitative Study Assessment	145
6.4	Study Contributions.....	149
6.5	Implications for Theory and Practice	151
6.6	Limitations of the Study and Recommendations for Future Research	153
6.7	Conclusion	154
