

Social Entrepreneurship and Community

Connections

By Natasha Bobyreff

A thesis in fulfilment of the requirements for Doctor of Philosophy

Management Discipline Group

University of Technology Sydney

2021

Certificate of Original Authorship

I, *Narasha Bobyneff*, declare that this thesis is submitted in fulfilment of the requirements for the award of Doctor of Philosophy, in the Management Discipline Group at the University of Technology Sydney.

This thesis is wholly my own work unless otherwise referenced or acknowledged. In addition, I certify that all information sources and literature used are indicated in the thesis.

This document has not been submitted for qualifications at any other academic institution.

This research is supported by the Australian Government Research Training Program.

Signature: Production Note:
Signature removed prior to publication.

Date: 27/1/2020

Acknowledgement

The research undertaking and data collected for this thesis could not have happened without the incredibly generous and open contribution of the participants. I am extremely grateful to the entrepreneurs, community members, business professionals and academics who so generously offered their time, expertise, and (at times) their hearts, to enrich the results presented here.

I am especially grateful to my supervisor Associate Professor Natalia Nikolova for her support, care and guidance. Her feedback has helped me identify what matters most to me as a researcher, and her insightful comments have shaped my understanding for how best to develop a career in academia. I would also like to acknowledge my supervisors, Professor Simon Darcy for his constructive comments while in the development stages of the thesis, and Emeritus Professor Jenny Onyx for her doctoral supervision.

My sincere thanks to professional editor Samantha Hinderling, who provided copyediting and proofreading services according to the required national university thesis editing guidelines. Samantha is not only a wonderful, thorough editor, but proved to be a kind and reassuring voice as deadlines approached.

I am grateful to the University of Technology Sydney for the scholarships and funding that supported me throughout my studies.

Thank you to Saint Marys University, Halifax, for their assistance during my visit in the data collection period in Canada.

Most importantly, I would like to warmly thank my family and friends (the life-long kind and the newly collected along the way) for their constant love and support. Thank you especially to Alex and my parents.

Abstract	x
Key Terms	xi
Chapter 1: Introduction	1
1.1 Purpose and significance of research topic.....	1
1.2 Research aims and questions	3
1.3 Research design and conceptual framework	4
1.4 Theoretical contribution	6
1.5 Thesis structure	7
1.6 Issues beyond the scope of this thesis.....	11
Chapter 2: Social Entrepreneurship in Academic Literature	12
2.1 Overview	12
2.1.1 Institutional entrepreneurship	15
2.1.2 Actor and strategy-focused discourses in entrepreneurship.....	18
2.1.3 Entrepreneurs as heroes	20
2.1.4 Social connections	22
2.1.5 Housing and social capital in the academic literature	25
2.1.6 Aligned areas of literature	28
2.2 Complexity as a conceptual framework.....	29
2.3 Literature summary	35
Chapter 3: Socio-political Research Context	38
3.1 Australia and Canada – a shared context.....	38
3.2 Government challenges and possibilities	39
3.2.1 Canada	39
3.2.2 Australia.....	39
3.2.3 Accepted classifications of housing affordability	40
3.2.4 Housing affordability: Australia	41
3.2.5 The right to affordable housing	42
3.2.6 The financial cost of not addressing housing issues	42
3.3 Housing beyond economic concerns	43
3.3.1 Housing, social support and services.....	43
3.3.2 Values and stigma.....	45
3.3.3 Voice	45
3.4 Government initiatives and organisational opportunities	45
3.4.1 Canada	46

3.4.2 Australia.....	47
3.5 An overview of entrepreneurial activity in affordable housing.....	50
3.5.1 Canada.....	50
3.5.2 Australia.....	51
3.5.3 Combined overview and implications.....	53
Chapter 4: Research Methods.....	56
4.1 Research framework and questions.....	56
4.1.1 Qualitative research.....	57
4.1.2 A social constructivism paradigm.....	58
4.1.3 Grounded theory.....	60
4.2 Data collection.....	61
4.3 Case studies.....	63
4.3.1 Context and recruitment.....	64
4.3.2 Interviewing informants.....	67
4.4 Research process.....	71
4.5 Observation.....	73
4.6 Using the tools of ethnography.....	74
4.7 Secondary research materials.....	75
4.8 Data analysis.....	76
4.9 Research methods summary.....	79
4.10 Research ethics.....	80
Chapter 5: Case Studies 1 and 2.....	82
5.1 Saskatchewan case studies.....	82
5.2 Data collection.....	82
5.3 The social entrepreneur.....	83
5.4 Case study 1: Saskatchewan – housing the homeless.....	84
5.4.1 Case overview.....	84
5.4.2 The partner and support groups.....	86
5.4.3 Government.....	87
5.4.4 Community and future residents.....	88
5.4.5 How partners combine to make the project happen.....	92
5.4.6 Project outcomes.....	94
5.4.7 Discussion.....	94
5.5 Case study 2: Saskatchewan case overview – Affordable housing for seniors.....	96
5.5.1 Funding and the role of government.....	98
5.5.2 How the community instigated the project.....	99
5.5.3 The social entrepreneur’s involvement.....	100
5.5.4 Community involvement - inclusion in the project’s origins and development.....	101
5.5.5 Support groups and involvement of key local businesses.....	103
5.5.6 Perceptions of future residents.....	104
5.5.7 Onsite resident community.....	105
5.5.8 Project outcomes.....	106
5.5.9 Discussion.....	107

Chapter 6: Case Study 3	109
6.1 The project overview	109
6.2 Data collection.....	110
6.3 The entrepreneur.....	110
6.4 The development model/the housing organisation	112
6.5 Individual financing.....	114
6.6 Funding and financial partners.....	116
6.7 Partnering groups and partners	118
6.7.1 Purchasers	118
6.7.2 Landowners	118
6.7.3 Coordinating future residents and governance.....	120
6.8 Community connections	121
6.8.1 Connections between resident groups or individuals	121
6.9 Influence of business structure on connectivity.....	123
6.10 Influence of the broader community – NIMBY-ism	124

Abstract

While much is known about entrepreneurial business practices, there is little research about the relational conditions under which social entrepreneurship works. This is particularly so when considering the communities in which social entrepreneurship operates. Specifically, little is known about relational aspects between social entrepreneurs who complete affordable housing developments and community stakeholders. When it comes to considering the community's ability to have a voice in these projects, it is unclear where exactly, or even if, the community is heard. To explore this theme, the research adopts the conceptual framework of complexity theory, while undertaking case studies on social entrepreneurship in the context of affordable housing projects.

The affordable housing case studies took place in both Canada and Australia, with four businesses where a social entrepreneur was a key participant. The research shows that contrary to the bulk of current literature the most effective social entrepreneurship does not and cannot exist as an autonomous practice taking a top-down approach. Making an impactful contribution is found to be significantly enhanced through social entrepreneurs closely considering the needs and 'voice' of those within the community whom they seek to serve (the future residents), and carefully navigating the broader community context in which the project takes place. Moreover, the creation of positive impact through social entrepreneurship in housing is reliant on a careful combining of several different stakeholders. It was found that in cases where a deeper connectivity between the social entrepreneur and other key stakeholders occurred, richer results ensued. Key among stakeholders must be the community or individuals being served. This urges the development of a collaborative, inclusive and connected work environment, where expertise is shared and valued from each different group.

The research for this thesis contributes to addressing a gap in the academic literature through identifying emergent themes which illustrate how social entrepreneurs interact with various community stakeholders. It considers the opportunities and challenges of each stakeholder to add to an understanding of how they are able to or restricted from collaboratively contributing. It highlights where and how the voices of community stakeholders are heard through shared expertise between all stakeholders and the implications of their inclusion in the activities of social entrepreneurship.

Key Terms

Social entrepreneur – While the exact definition of the term ‘social entrepreneur’ is a matter of debate in much academic literature, for the purpose of this thesis the term will refer to an individual working in a business with the intent of effecting social good.

Affordable housing – Affordable housing is considered, in alignment with standard accepted definitions, to be housing that costs the tenant (or owner) 30 per cent or less of their income.

Broader community members – refers to individuals within the community that may be affected by housing projects. These may be neighbours in the area of the development or relevant individuals living locally who are not a part of an organised group.

Community groups – Groups that emerge from within the community and who unite to support a shared cause. These groups may begin to formalise, even forming independent NFPs to support their cause.

Not For Profit (NFP) – refers to a business which formally runs in an NFP capacity and is (usually) the recipient of government funds to support their activities. While one case (2) involves an NFP formed by a community group, this is the only instance where the NFPs referred to are not pre-existing and long-established businesses.

Resident groups/future residents – refers to the collective group of individuals who will occupy or are intended to occupy the affordable housing building developments of the case study.

Government bodies – These may be at the level of local council, provincial/state through to federal government and will be specified as relevant throughout.
