The Research Project

My Home, My Community

We are asking:

How do local councils include people with intellectual disability in their communities?

How could they do it better?

What have we learnt?

**What would
we do
differently?**

Tips!

Do what it takes to make it happen

Inclusive teams can work in 'non disability spaces'

It's going to look different for different teams

Some is good, more is better – eg time, resources

Be open to not knowing stuff or being in-control

Thank you!
