Fatemeh Bakhtiari is a senior researcher at the Technical University of Denmark's UNEP DTU Partnership. She obtained a Ph.D in environmental economics and management through a joint doctoral programme between the universities of Copenhagen (Denmark) and Bangor (United Kingdom). She has ten years of experience in applied research in the areas of valuation of ecosystem services, policy analysis within climate change mitigation, and sustainable natural resource management. She applies market and non-market based valuation methods to develop tools for analysing and prioritizing mitigation actions, preparing methodologies for the development of baselines (using choice experiment modelling), and quantifying and monetising sustainable development co-benefits in the context of monitoring, reporting and verification of greenhouse-gas emission reduction efforts.

Jelena Bäumlér is a Professor for Public and International Law with a special focus on sustainability at the Leuphana University Lüneburg. She is a fully qualified lawyer in Germany and holds an LL.M. from the University of the Western Cape, South Africa. Her work focuses on International Environmental Law, International Economic Law and the implementation of sustainability concepts into law at the national and international level.

Lisa Benjamin is an Assistant Professor at Lewis & Clark Law School. Her research investigates the intersection of corporate, energy and environmental law with a focus on climate change and climate risk. She researches climate change from the perspective of developing countries, with a focus on small island developing states. She is currently a member of the Compliance Committee (Facilitative Branch) of the United Nations Framework Convention on Climate Change and has been an adviser to, and member of, the Bahamian national delegation to the United Nations Framework Convention on Climate Change.

Ben Boer is a Professor at the Research Institute of Environmental Law, Wuhan University and Emeritus Professor of Environmental Law, University of Sydney. Between 2006 and 2008, he was the international Co-Director of the IUCN (International Union for the Conservation of Nature) Academy of Environmental Law and Visiting Professor based at the University of Ottawa. He is a founder and a member of the Editorial Board of the *Asia Pacific Journal of Environmental Law* (Edward Elgar, UK), and a member of the Editorial Boards of the *Journal of Environmental Law* (Oxford University Press) and the *Review of European Comparative and International Environmental Law* (Wiley Publishers, UK). He is the co-editor, with Professor Qin Tianbao, of the *Chinese Journal of Environmental Law* (published by Brill in collaboration with the Research Institute of Environmental Law).

Elisa Calliari is Research Fellow at the department of Political Science at University College London (UCL) and a consultant at the Euro-Mediterranean Centre on Climate Change (Italy). Her research focuses on the role of institutions and governance arrangements in supporting disaster risk reduction and climate change adaptation, and in the emerging policy field of loss and damage associated with climate change impacts. Elisa co-authored the Italian Climate Change Adaptation Plan and the 2017 Science for Disaster Risk Management Report of the European Union. She has background in International Relations and Diplomacy, and holds a Ph.D in Science and Management of Climate Change.

Rowena Cantley-Smith is a Senior Lecturer at Faculty of Law, University of Technology Sydney. Her academic and professional qualifications include: BEc (1989), LL.B (1993) and Grad Cert Legal Teaching (2005)(Monash University); LL.M in Public International Law (Leiden University); Doctorate of Laws (Leuven University); Admitted to practice: Supreme Court of Victoria and High Court of Australia (1995) and the Victorian Bar (1998). She teaches across a wide range of subjects including, Australian and international energy law, contract law, climate change law and private and public international law. Rowena's research is multidisciplinary and focuses on the interface between law and the energy sector, primarily in the context of sustainable transitions, distributed energy resources and new technologies, and consumer and climate change interests. An important aspect of this is the development of international and national environmental and human rights law. She is an associate-editor, with Professor Ben Boer, of the Chinese Journal of Environmental Law (published by Brill in collaboration with the Research Institute of Environmental Law).

Navraj Singh Ghaleigh is Senior Lecturer in Climate Law, Programme Director LLM in Global Environment and Climate Change, and Head of Public Law Subject Area, all at the University of Edinburgh. He is also a board member and Chair of Climate Strategies (climatestrategies.org), and advises NGOs, governments, and major philanthropies on various aspects of climate law and litigation.

Rueanna Haynes is an international climate law and governance specialist currently affiliated with Climate Analytics gGmbH as a member of the Climate Diplomacy team and team lead for Climate Analytics support to the Chair of the Alliance of Small Island States (AOSIS). Ms Haynes has a strong background in climate and other multilateral environmental negotiations, having participated in the UNFCCC, the Rio+20 process, Law of the Sea, Financing for Development and the SIDS Sustainable Development process for several years on behalf of Trinidad and Tobago. She has been a lead negotiator for the Caribbean Community (CARICOM), AOSIS and G77 and China in the climate and sustainable development fields. Rueanna holds a Master in International Legal Studies with Distinction from Georgetown University Law Centre, Washington DC, and a Master in International Environmental Policy from Paris School of International Affairs, Sciences Po, Paris.

Md Fahad Hossain is a research officer at the International Centre for Climate Change and Development (ICCCAD), where he oversees the implementation of the project "Supporting Least Developed Countries (LDCs) on Loss and Damage". Also, he works with the LDC Universities Consortium on Climate Change (LUCCC), an official capacity building initiative of LDCs hosted by ICCCAD. His research interests include climate change adaptation and loss and damage, with a focus on public policy. Fahad holds a bachelor's degree in Economics and a master's in Climate Change and Development.

Saleemul Huq has been the Director of the International Centre for Climate Change and Development (ICCCAD) since 2009. He also holds a Senior Fellow position at the International Institute for Environment and Development (IIED). Saleemul's recent activities have been focusing on building negotiating capacity and supporting the engagement of the Least Developed Countries (LDCs) in UNFCCC, including negotiator training workshops for LDCs, policy, as well as research into vulnerability and adaptation to climate change in the least developed countries. Dr. Huq has published over 100 journal articles and many book chapters and reports.

Kati Kulovesi is Professor of International Law and Director of the Center for Climate Change, Energy and Environmental Law at the University of Eastern Finland. Also affiliated with the Institute for European Studies at the Vrije Universiteit Brussels and the Erik Castren Institute for International Law and Human Rights at the University of Helsinki, Kati has published extensively on climate change and WTO law and holds a Ph.D from the London School of Economics and Political Science. She holds an European Research Council Starting Grant, was member of Finland's Climate Change Panel in

CONTRIBUTORS

2014–2019 and has followed UN climate negotiations since 2001, including as a Team Leader/Writer for the Earth Negotiations Bulletin in 2004–2018.

Benoit Mayer is Assistant Professor at the Faculty of Law of the Chinese University of Hong Kong, where he teaches climate, environmental and international law. His research focuses on various aspects of climate law, including the international law obligations on climate change mitigation, the development of environmental assessments as a tool for climate change mitigation and the climate-migration nexus. He is the author of *The International Law on Climate Change* (Cambridge University Press, 2018) and *The Concept of Climate Migration: Advocacy and its Prospects* (Edward Elgar, 2016). He is also a member of the UNFCCC roster of experts.

Michael Mehling is Deputy Director of the Center for Energy and Environmental Policy Research (CEEPR) at the Massachusetts Institute of Technology (MIT), a research scientist with the MIT Energy Initiative (MITe), and a Visiting Professor at the University of Strathclyde. He brings over a decade of experience working on energy and environmental policy with government agencies, private companies and civil society organizations in North America, Europe, and the developing world. His recent work has focused on carbon pricing and other policies to address environmental impacts of the energy system. In recent years, research interests have included the energy and climate policy of the European Union as well as the effects of the German energy transition, or ‘Energiewende’.

Gokce Mete is Evidence Lead, Leadership Group for the Industry Transition Secretariat hosted by the Stockholm Environment Institute, where she is also a Research Fellow. Gokce is a research professional with a decade of regulatory analysis, project development and stakeholder management experience focused on energy and industry transitions. She is also the honorary Head of Research and Academic Engagement of the “Women in Energy, Climate and Sustainability Foundation” and Founding Member of “Women in Green Hydrogen”. Gokce is author of “Energy Transitions and Future of Gas in the EU: Subsidise or decarbonise?”, Energy and Climate Series (Palgrave Macmillan 2020). She holds a PhD from the University of Dundee.

Linnéa Nordlander is a Ph.D fellow at the Faculty of Law at the University of Copenhagen. Her research focuses on the intersection between climate change and human rights in the law, looking particularly into the concept of climate change loss and damage. She teaches on public international law, climate change and the law, and human rights law. Linnéa has a professional and educational background in human rights, holding an LL.M in International Human Rights Law from Lund University and having worked with human rights research and capacity building at the Raoul Wallenberg Institute for Human Rights and Humanitarian Law.

Jed Odermatt is a Lecturer at the City Law School, City, University of London, where he is convenor of the International Law and Affairs Group (ILAG) and member of the Institute for the Study of European Law (ISEL). Dr Odermatt’s research interests include public international law, the law of international organizations, and EU external relations law.

Marjan Peeters is Professor of Environmental Policy and Law at Maastricht University, and is also connected to the Maastricht Sustainability Institute and to the Research Institute of Environmental Law at Wuhan University. Core research attention goes to legal aspects of climate change, regulatory instruments for emission reduction, and environmental procedural rights. Marjan has co-edited various books in the field of EU environmental and climate law, among which *Climate Change Law* (co-edited with Daniel A Farber, Edward Elgar 2016), and she has supervised – and is still supervising – several Ph.D projects in this field. She currently acts as expert to the European Economic and Social Committee of the European Union related to its advisory work on EU climate law.

Lucia Perugini is a senior scientific manager at CMCC Foundation (Italy). Her scientific background is in forestry and climate change. Since 2003 she has been involved in the UNFCCC negotiations, as part of the Italian Delegation, dealing with issues related to LULUCF and REDD+. Expert in GHG inventories in the land sector, she is involved in the compilation of the National Inventory Report of Italy (2018, 2019). She is currently active in several national and European research projects related to the carbon cycle in forestry and agriculture ecosystems and relevant links between the scientific and policy communities (e.g., EU FP7 project LUC4C 2013–2017; H2020 project VERIFY 2018–2022).

Daniel Puig holds a PhD from the Technical University of Denmark. His thesis touched upon some of the main challenges that parties to the United Nations Framework Convention on Climate Change face in their efforts to implement the Paris Agreement. Since 2011 Daniel has been employed at the UNEP DTU Partnership, a specialised centre within the Technical University of Denmark. Among other issues, he has worked on quantifying the uncertainty around projections of greenhouse-gas emission (baseline) scenarios, has conducted an assessment of the co-benefits of energy efficiency policies in G20 countries, has coordinated the preparation of two editions of the “emissions gap report”, and has contributed to several editions of the “adaptation gap report”. At present, his work is mostly focused on climate change-induced loss and damage.

M. Feisal Rahman is an Assistant Professor in the Department of Environmental Science at Independent University, Bangladesh (IUB). He is also ICCCAD’s research coordinator. Feisal’s current work focuses on climate finance, community-based adaptation and political economy of climate change adaptation. He is an Engineer by training and completed his Ph.D in Environmental Engineering from the University of Waterloo, Canada.

Matthew Rimmer (BA/LLB ANU, PhD UNSW) is a Professor in intellectual property and innovation law at the Faculty of Law in the Queensland University of Technology (QUT). He is a chief investigator, and co-director of the legal program in the NHMRC Centre of Research Excellence on Achieving the Tobacco Endgame (CREATE) (2020–2025) – a transnational research network. Rimmer is a member of the QUT Centre for the Digital Economy – which is part of the QUT Centre for Future Enterprise; the QUT Digital Media Research Centre (QUT DMRC), the QUT Centre for Behavioural Economics, Society, and Technology (QUT BEST); the QUT Centre for Justice; the QUT Australian Centre for Health Law Research (QUT ACHLR); and the QUT Centre for Clean Energy Technologies and Processes (which is based in the Institute for Future Environments). Rimmer was previously the leader of the QUT Intellectual Property and Innovation Law Research Program from 2015–2020 (QUT IPIL).

Bryce Rudyk is Adjunct Professor and Senior Fellow of International Environmental Law and Director of the United Nations Diplomacy Clinic at the New York University School of Law. His teaching and research focuses on global environmental problems and the legal and institutional structures developed to solve them, including through the participation of non-state actors. Since 2013, he has been Legal Advisor to the Alliance of Small Island States in the United Nations negotiations on climate change, sustainable development and oceans.

Annalisa Savaresi is Senior Lecturer in Environmental Law at Stirling University, UK. She has several years’ experience researching, teaching and working with environmental law. Her research focuses on climate change, renewable energy, environmental liability, and the interplay between environmental and human rights law. Her work has been published in numerous peer-reviewed outlets and has been widely cited. Annalisa has taught at institutions all over the world, including the University of Edinburgh, the University of Copenhagen and the University of La Sabana, Colombia. She regularly serves as a consultant for international organisations and think-tanks and advises governments and governmental bodies. She is member of the IUCN World Commission on Environmental Law, Director for Europe of

CONTRIBUTORS

the Global Network for the Study of Human Rights and the Environment, and associate editor of the Review of European, Comparative and International Law.

Thomas Schomerus is a Professor for Public Law, in particular Environmental and Energy Law, at Leuphana University Lueneburg. He has worked on numerous international and national research projects and has published broadly in the fields of energy and environmental law, with a special interest in the law of renewable energies and energy efficiency, waste law and law of natural resources as well as freedom of information law. In 2014, he was appointed Judge at the Higher Administrative Court of Lower Saxony.

Harro van Asselt is Professor of Climate Law and Policy with the University of Eastern Finland Law School, affiliated researcher with the Stockholm Environment Institute, and a Research Fellow with the Copernicus Institute at Utrecht University. He has over 15 years of research experience in international climate change law and governance. He is author of *The Fragmentation of Global Climate Governance* (Edward Elgar 2014) and has more than 100 publications in academic journals and books. He is the editor of *Review of European, Comparative & International Environmental Law* (RECIEL). He holds a PhD with distinction from the Vrije Universiteit Amsterdam.

Lisa Vanhala is a Professor of Political Science at University College London and PI on the European Research Council-funded project ‘The Politics and Governance of Climate Change Loss and Damage’ (CCLAD). Her recent research on loss and damage has been published in *Global Environmental Change*, *Global Environmental Politics* and *Law & Policy*.

Cleo Verkuijl is a Research Fellow in climate governance at the Stockholm Environment Institute in Oxford, UK. Also a team leader and writer for *the Earth Negotiations Bulletin*, she has expertise across a range of UN sustainable development processes. She was a policy officer with the NGO network Climate Action Network International during the Paris climate negotiations, and has previously worked for the UN Environment Programme in Brussels, and as a Lecturer in Energy, Resources and Environment at Johns Hopkins University’s School of Advanced International Studies.

Matthieu Wemaëre is a Senior Lawyer admitted at the Paris and Brussels Bar Associations. He is Managing Partner of the Law Firm Matthieu Wemaëre Association d’Avocats. With 27 years of experience, he specializes in international and EU environment and climate law and policy. Since 1999, he participated in 17 COPs, including 11 COPs as an official delegate and special adviser to the Moroccan Presidency of COP 22. He used to work in the Climate Change Unit of the European Commission between 1999 and 2003 where he was involved in the drafting of the EU ETS Directive. Matthieu Wemaëre is Research Associate at the Institute of International Relations and Sustainable Development (IDDRI). He lectures on climate law and carbon markets at the Law Faculty of Aix en Provence in France.

Cathrine Ramstad Wenger is an experienced renewable energy and climate lawyer. She has experience with renewable energy law in a top tier law firm and has been Norway’s lead negotiator for adaptation and loss and damage under the Paris Agreement negotiations. She also led the inter-departmental work in Norway for the ratification of the Paris Agreement. Her experience includes reviewing complaints under the EU ETS and CO₂-compensation scheme; ministerial work drafting the Norwegian Climate Change Act; issues related to REDD+ carbon rights and RBP-schemes; and project based legal advice, due diligence work and license applications for renewable energy companies.

Leonie Reins is an Assistant Professor at the Tilburg Institute for Law, Technology and Society ("TILT") at Tilburg University in the Netherlands. Leonie obtained her PhD from KU Leuven, Belgium. The monograph based on her dissertation is entitled *Regulating Shale Gas – The Challenge of Coherent Environmental and Energy Regulation* (Edward Elgar, 2017). Leonie obtained private sector experience whilst working for a Brussels-based environmental law consultancy, providing legal and policy services for public-sector clients such as the European Commission and the European Parliament. Leonie's research focuses on the intersections of energy and environmental law. She is particularly interested in the regulation of new technologies that are capable of mitigating, or providing means of adaptation to, global problems such as climate change and the associated risks and uncertainty that manifest themselves at the local level. Leonie regularly speaks at international conferences and her works have been published in journals such as *Energy Research & Social Science*, *Environmental Liability and Oil, Gas, Energy Law Intelligence* (OGEL).

Geert Van Calster is full professor (Professor Ordinarius) in the University of Leuven and Head of Leuven Law's department of European and international law. Geert is also senior fellow at Leuven's Centre for Global Governance Studies. Geert is on the indicative list of WTO Panelists, and a board member of Academische Stichting Leuven, an academic charity. He is an independent legal practitioner at the Brussels Bar. His practice, teaching and research focus is on conflict of laws (private international law), EU and international regulatory law (especially environment), and international and EU economic law. He is a Visiting Professor and Senior Fellow at Monash University's Law faculty (Melbourne), Visiting Professor at the China-EU School of Law in Beijing, Visiting Professor at King's College, London, and Adjunct Professor at the Brussels Campus of American University. He was previously a visiting lecturer at Oxford University. He was called to the Bar in 1999 after having worked as of counsel to a City law firm since 1995.
