KEEP YOUR COINS,
I WANT CHANGE
Prepare before!
Loose part of the action!
Will they be ready?
Face to face sessions are risky!

Well, this is embarrassing.

Firefox is having trouble recovering your win caused by a recently opened web page.

You can try:

- Removing one or more tabs that you think may be causing the problem
- Starting an entirely new browsing session
Activity
Balance

Observation
Which variables to sample?
Privacy as currency. Users pay with privacy
Observe engagement while reading
The following figure shows the evolution for the variables in the program at different execution points. The memory addresses where the variables are stored are arbitrary.

### 5.4.1. Self-assessment questions

1. Three variables are defined, an integer \( a \), a pointer to integer \( b \) and a pointer to a pointer to integer \( c \). How can \( c \) have the address of the address of the integer \( a \)?

   - \( \times \) \( c = b; \ b = a; \)
   - \( \times \) \( c = b; \ b = &a; \)
   - \( \times \) \( c = &b; \ b = a; \)
   - \( \checkmark \) \( c = &b; \ b = &a; \)
