

THOROUGHLY MODERN THESES  
EXPLORING THE PHENOMENON OF THESES  
WITH MULTIPLE FORMS OF MEDIA

## Certificate of Authorship/Originality

I certify the work in this thesis has not previously been submitted for a degree nor has it been submitted as part of requirements for a degree except as fully acknowledge within the text.

I also certify that the thesis has been written by me. Any help I have received in my research work and the preparation of the thesis itself has been acknowledge. In addition, I certify all information sources and literature used are indicated in the thesis.

Within this thesis, I have complied with all participants' wishes regarding identity or anonymity.

## Acknowledgements

I would like to acknowledge my Supervisor, Dr Janette Griffin and express my thanks to her for her steadfast patience and guidance during my M.Ed. and this Educational Doctorate.

My special thanks goes to the doctoral candidates and the academic staff members who participated in this research. I have tried to represent their experiences faithfully and do justice to this exploration. To all the many other candidates, academic staff and authors with whom I have conversed over the years – I extend my heartfelt thanks.

Dr. Laura Brearley's work inspired me to write verse for this thesis. She showed me the value of connecting with the humanity of peoples' experiences. Her work connected me with the spirit of her journey and enabled me to understand that mine was not only about doing research but also about being changed by the experience.

My sincere thanks also goes to Dr Mark Perko whose excellent surgery fixed my wretched wrists during my candidacy.

To my dear friend, Diana Cucvara – I shall always be grateful to you for your generous help with transcribing interview tapes and proofreading.

For their ongoing encouragement and support, I thank my sister Suzanne Sherwood, her husband 'Howie' and my brother Ted Sherwood.

I would also like to acknowledge the love and support of my children: Jared, Adrian, Megan, Benjamin, his wife Rachel and their six daughters and Christopher, his wife Jenna and their five children.

To my dear new husband, Richard Parker, who bore the brunt of my ups and downs during this doctoral endeavour and whose love, patience and kindness are exemplary – I hold you in the highest esteem.

I dedicate this work to creativity and courage.

*all ultimo lavoro!*

## TEXT FORMATTING

Normal text

“Quotations from literature”

Titles of theses, poems, sections, papers, etc.

*Pseudonyms: Marion or Stewart University*

Transcribed content, Century Gothic

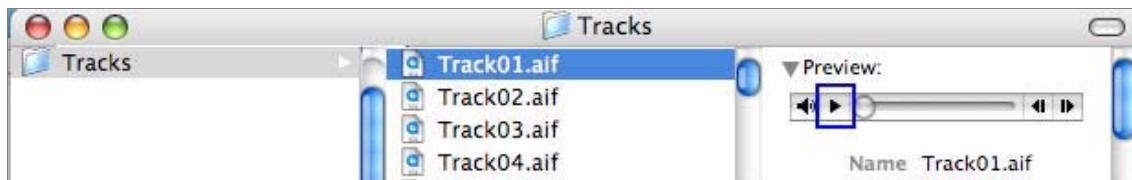

Text transcription of sound tracks

## SOUND TRACKS

This thesis includes a CD Rom in the front cover containing sound tracks of verses and research participants’ voices.

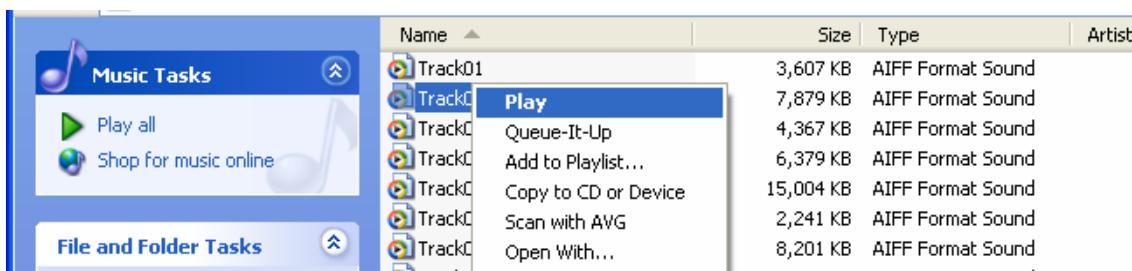

**For Macintosh**, a program does not need to be opened to listen to them.

- Open the Tracks folder on the CD Rom.
- View the tracks in Columns.
- Single click on a Track.
- Click on the play button. 
- Adjust the volume next to the play button and in the Finder menu bar on the right hand side, to an appropriate listening level.

**For PC:**

- Insert the CD Rom and open the My Computer icon on the desktop.
- Locate the CD Rom drive and double click on it.
- Double click to open the Tracks folder
- Right click on a Track, roll to play and the PC’s media program will open.
- Adjust the volume to an appropriate listening level.

**ABSTRACT****THOROUGHLY MODERN THESES****Exploring the phenomenon<sup>1</sup> of theses with multiple forms of media**

Modern technologies have changed the way doctoral candidates create theses and present knowledge. The traditional thesis has evolved to include a range of dynamic components. Inroads made by technologies and multiple forms of media provide for “a dazzling array of research and scholarly possibilities for emerging Ph.D.s” (Lang, 2002, p.681). This activity forms a new research paradigm of research literacies and identities in knowledge production and a unique research epistemology.

In order to create knowledge about such ‘thoroughly modern theses’, this qualitative study explores the experiences of fourteen candidates from Australian universities. Literature scarcely publishes the voice of those who take unconventional approaches to creating their theses, so this explorative study uses phenomenology to seek enlightenment and understanding by asking in what ways candidates’ experiences reveal the phenomenon of media theses. ‘Media theses’ is the term used in this thesis to describe those which include narratives, poetry, multimedia, artworks, etc.

Candidates’ individual accounts are represented in case studies using narrative, verse, prose, participants’ voices, and reflection and insight. The exploration found that in most cases, candidates’ boundary pushing endeavours led to successful outcomes. Some considered their enterprising, courageous and inspirational journeys were ‘life-affirming’. Other candidates encountered challenges which reflected their choice of thesis construction. Primarily, these related to unclear guidelines for using media in theses, finding appropriate supervisors and examiners, justifying the inclusion of media elements to research boards, being misunderstood and accessing technological training and expertise. These circumstances sometimes led to candidates’ feelings of insecurity and isolation, and hindered the development of their theses.

To learn what was occurring in this social research activity from a wider perspective, the study also asks how the experiences of academic staff enhance understanding of the phenomenon of media theses. This phase of the research is an interpretive exploration of ten academic staff members’ experiences, opinions and attitudes. They discussed the qualities of media theses and the new languages they brought to research. They shed light on issues relating to supervision and examination and technological skills development. They offered advice to candidates and discussed their ideas for the future of research. There was often consistency of attitude and consensus that the way of the future involved media theses. However, inconsistencies of thought and an underestimation of what was

---

<sup>1</sup> Holian (2001), Brown (2002) and Fineman (2004) describe the emerging practice of submission of theses containing non-text components as a ‘phenomenon’.

## ABSTRACT

possible and of what was occurring could prove to be detrimental for media thesis candidates and the creation of dissertations.

This investigation found that media theses offer more potential for authentic presentation of thesis content. They create the need for amended thesis submission policies and guidelines. They alter candidature and supervisory practices and need specific examination criteria. They also transcend conventional modes of knowledge categories. Based on its evidence, the study suggests advice for candidates and makes recommendations for supervisors, examiners and universities.

This dissertation leads to understanding about candidates' experiences with their media theses and how academic staff and universities contribute to their support. This exploration should benefit doctoral candidates and supervisors who are involved in creating a media thesis. It should contribute to innovative research practices by providing research communities insight into the phenomenon of theses with multiple forms of media and their impact on knowledge creation.
