THE GRAPHIC GIFT:
A study of the map of Australia’s visual qualities

Kate Dilanchian
Master of Design (Research)
2011

University of Technology, Sydney
Certificate of Authorship Originality

I hereby declare that this submission is my own work and to the best of my knowledge it contains no materials previously published or written by another person, nor material which to a substantial extent has been accepted for the award of any other degree or diploma at UTS or any other educational institution, except where due acknowledgement is made in the thesis.

I also certify that the intellectual content of this thesis is the product of my own work, except to the extent that assistance from others in the project’s design and conception or in style, presentation and linguistic expression is acknowledged.

Signed
Acknowledgements

First I wish to offer my most sincere thanks to my principal supervisor Dr Louise McWhinnie, and my co-supervisor Dr Kate Sweetapple. I have been particularly fortunate to have such a supportive, constructive and positive supervisory team. Their consistent support has contributed to my confidence as a researcher and the enjoyment and satisfaction I have experienced while conducting this research. I would also like to thank the University of Technology and the DAB for extending me this opportunity to pursue my research.

In addition, I express my most sincere thanks to my husband, Heros, and my four gorgeous girls, Olivia, Ani, Salbi and Alisha for their enormous amount of patience and support. It has been a pleasure to experience my girls’ understanding of this research and their remarkable ability to identify Australian map logos. This brings a big smile to my face, as I know they will continue to collect well into the future.

I would also like to offer a big thank you to: Gabi Duigu, who has been an amazing shoulder to lean on throughout this process and an invaluable help with chapter structure and editing skills; Toni, who provided much needed support at the beginning and the end of this research and who generously read through my work and offered interesting suggestions; my closest friends Heather, Karine, Annie, Rosemarie and Lynne, you have all provided much encouragement at various stages of this journey; and to Sandra Nichols for proofreading the final thesis.
## Contents

Abstract
List of Figures and Tables
List of Appendices

Chapter One: **Introduction**
  1.1 Motivation 1
  1.2 The meaning of symbols 2
  1.3 Understanding the historical use of the map as a symbol 4
  1.4 Visual timeline 8
  1.5 Overall aims, research question and chapter overview 13

Chapter Two: **Literature Review**
  2.1 Impact of the cartographic form 15
  2.2 Conclusion 18

Chapter Three: **Preliminary Study: Shape Comparison**
  3.1 Establishing distinct characteristics 19
  3.2 Logo comparison 26

Chapter Four: **Visual Research**
  4.1 Balance 31
  4.2 Rhythm 36
  4.3 Contrast 42
  4.4 Scale 47
  4.5 Conclusion...Unity 51

Chapter Five: **Visual Database**
  5.1 Research data collection 55
  5.2 Background to the classification process 57
  5.3 Industry categories 57
  5.4 Developing a typology of shapes 58

Chapter Six: **Conclusion**

Appendix 1: List of logos in database (including company specifications) 71
Appendix 2: Visual research matrices (x4) included in pocket folder

Abstract

This thesis examines the shape of the map of Australia, and analyses how its inherent visual qualities contribute to its recognition and ubiquity as a symbol. It is argued that the effectiveness of the map of Australia as a widely used graphic symbol stems from the characteristics of its shape, and that its attributes relate to those fundamentals of form and composition commonly accepted by graphic designers as necessary for creating an effective design. However, there is a paucity of literature that discusses or analyses maps in general and specifically the map of Australia, from this perspective. Whilst there has been some recognition from the cartographic discipline, this has simply hinted at the potential of shape as a contributing element in the recognition of maps as symbols. This literature has also been undertaken from a cartographic perspective and lacks the particular insight and understanding as to why and how the characteristics of shape can contribute to the effectiveness of a symbol.

A preliminary study of the shape of the map of Australia compared to other countries of similar size or shape, initially identifies how the visual and graphic uniqueness of cartographic maps create a recognisable and memorable form, and subsequently, how these elements can contribute to the flexibility of a map to adapt as a graphic symbol. Identifying these elements is the first step in determining whether the map’s shape can serve as an effective graphic symbol.

The heart of the study builds on this understanding and examines how, by applying the principles of design, we are able to understand why the map works as a symbol. This analysis develops a cohesive set of principles, which are used as an analytical tool to evaluate the map of Australia in terms of its effectiveness as a graphic symbol. This thesis is guided by my own personal knowledge as a practising designer of many years’ standing and also draws on graphic design literature that provides an insight into the specific design principles, visual identity and creative process involved in developing a symbol. Through an understanding of these core principles it can be demonstrated how and why the map of Australia serves as an effective graphic symbol.

Finally, this thesis presents a series of matrices that presents the sizeable collection of logos in the research database, and which reveals the versatility, and graphic adaptability, of the map of Australia’s unique form.
