

ZERO-WASTE FASHION DESIGN:

a study at the intersection of
cloth, fashion design and pattern cutting

Timo Rissanen

Acknowledgments

I dedicate this project to my mum and dad. Kiitos.

My husband George: thank you for the unwavering support, the understanding amongst a sea of non-sense, the non-sense, and the untold patience.

I am eternally grateful for the astute supervision I received from Dr Cameron Tonkinwise (2005-7), Dr Sally McLaughlin (2007-12), Alison Gwilt (2005) and Dr Vicki Karaminas (2007-12). Thank you.

My family: Mum, Dad, Hilikka, Emo-mummo and Börje: you've all offered your unconditional support and encouragement. Kiitos! To my sister Heli and brothers Juha and Sami: thank you for always welcoming me. Kiitos!

Dr Zoë Sadokierski: Thank you for the naked mole rat and for being extraordinary. Thank you for standing by me all the way.

Val Horridge and Maureen Lazarus: thank you for your invaluable feedback on various sections of the thesis.

At UTS I thank Alana Clifton-Cunningham, Eric Hagen, Cecilia Heffer, Milena Ratkovic and Kate Sweetapple. I thank Professor Kees Dorst and Professor Desley Luscombe for their support of this project, and the University Graduate School for making things work. My special thanks go to Professor Peter McNeil, Ann Hobson and Jemima MacDonald.

Karen Giard: Thank you for everything you have taught me about fashion.

I owe my sanity to my friends Jackie, Nelson, Anthony, Kate, Tom, Fleur, Kim, Greg, Stephen, Justin, Cristoffer, Evette, Mari, Pat, Salla, Kalle, Taru, and Sini. Thank you also folks of room 675: Anita, Dianne, Helen, Cris, Todd and Emily.

At Parsons, I thank Gregory Climer, Yvonne Watson, Simon Collins, Joel Towers, Hazel Clark, Fiona Dieffenbacher, Francesca Sammaritano, Pascale Gatzen, Otto von Busch, Christina Moon, John Quinn, Josephine Tirado, Sara Kozlowski, Jonathan Kyle Farmer, Shelley Fox, and Heike Jenss. I also thank my research assistants Harmony Pilobello and Adrienne Perlstein.

Kate Fletcher and Lynda Grose: thank you for sharing your experiences and expertise with the world so generously. Thank you Zandra Rhodes and Yeohlee Teng for being pioneering. Thank you Julian Roberts and Holly McQuillan for the continued inspiration. Thank you Kathleen Fasanella and Sandra Ericson for all the support. All zero-waste designers around the world: thank you. To my students past and present: thank you for everything that I have learned from you.

PREAMBLE OCT 5, 2012

AT THE START OF THIS PROJECT
IN 2004 OR 2005 I WROTE
A NOTE TO MAKE A T-SHIRT
THAT HAD ALL OF ITS WASTE
APPLIED ON IT.

I DID THIS IN AUGUST 2012.

COMPLETING TO-DO-LISTS
FEELS GREAT.

LET'S DO THIS.

Abstract

This thesis examines zero-waste fashion design: design activity that results in zero-waste garments. Conventional design approaches waste approximately 15 per cent of the fabric used in the design and make of a cut and sew garment. The responsibility for this wastage belongs with manufacture, which is constrained by what has already been designed and pattern cut. The economic systems that underpin fashion design and manufacture are such that there is little economic incentive to be concerned with this wastage. An examination of the material and social investments embodied in fabrics alongside their environmental impacts, reveals that these investments are wasted in the wasted fabric.

The context of this study is contemporary fashion design within the ready-to-wear industry: fashion design that leads to the manufacturing of multiples of one design. The contextual review of this study examines different methods of fashion creation. Design ideation tools and the relationship between fashion design and pattern cutting in current industry provide the frame for design practice in this study, together with an analysis of historical and contemporary zero-waste and less-waste garments. Findings from the contextual review frame a series of briefs for design experiments. This study asks: What are the opportunities for creating zero-waste garments within contemporary menswear fashion design practice using cut and sew methods?

Fashion design practice is the primary research tool in this study. Design processes and their outcomes are documented in a journal, and the journals are transcribed and analysed. Successful strategies for zero-waste fashion design, emerging from the data, are presented. Pattern cutting emerges as integral to zero-waste fashion design. Zero-waste fashion design is examined in relation to fashion manufacture, as particular manufacturing issues such as fabric as material, and the grading of garment patterns to achieve size ranges of garments, create new kinds of opportunities for zero-waste fashion design. This study also asks: To what extent is a zero-waste approach feasible and desirable within contemporary fashion industry? This study demonstrates that zero-waste fashion design generates new opportunities for fashion design to engage with fashion manufacture that may not currently exist.

This study calls for fashion design to consider pattern cutting an integral part of the fashion design process. Such an approach to fashion design creates new opportunities for the fashion industry and fashion design education. Zero-waste fashion design is part of a larger picture of beauty for everyone, that fashion is capable of being the source of.

CONTENTS

Certificate of authorship	iii
Acknowledgments	iv
Preamble	v
Abstract	ix
CHAPTER 1: Introduction to zero-waste fashion design	1
1.1 Fabric waste: an emerging problem for fashion design and manufacture	2
1.1.1 Fabric waste and the waste management hierarchy	5
1.1.2 From embodied economic investments to embodied environmental investments	10
1.2 On the possibility of fabric waste elimination by design: existing literature and documentation of zero-waste fashion design	13
1.2.1 An emerging interest in zero-waste fashion	13
1.2.2 Changing the culture of pattern cutting: on the need to integrate zero-waste pattern cutting techniques into design practice	15
1.3 Towards an approach to fabric waste elimination that can be integrated into contemporary fashion design and manufacturing processes	19
1.3.1 Fabric waste elimination from a fashion design perspective	19
1.3.2 Rationale for the approach taken to the investigation of fabric waste elimination from a fashion design perspective	20
1.3.3 Fabric waste elimination from a manufacturing perspective	22
1.3.4 Rationale for the approach taken to the investigation of fabric waste elimination from a manufacturing perspective	23
1.4 Overview of thesis and structure of the investigation	23
1.4.1 Definitions of terms	24
CHAPTER 2: Towards a zero-waste fashion design practice	27
2.1 Fashion creation methods and fabric waste	28
2.1.1 Fashion creation methods from a fabric waste perspective	28

2.1.2	Hierarchies of roles in current industry	35
2.1.3	Design tools in fashion design ideation	37
2.1.4	Communication between the fashion designer and pattern cutter	44
2.2	Zero-waste fashion design: past and present	45
2.2.1	Zero-waste fashion design without fashion designers	46
2.2.2	Modern zero-waste fashion design	50
2.3	Method of enquiry adopted in this project	58
2.3.1	From design briefs to frames for practice	58
2.3.2	Journaling	62
2.3.3	Overview of coding and categories	66
2.3.4	Exhibitions	66
2.3.5	Other voices	67
2.3.6	Student projects and exhibitions	67
	 CHAPTER 3: Opportunities for zero-waste fashion design	 69
3.1	Overview of coding process and categories	71
3.2	Garment appearance, fit, cost and fabric waste in designing fashion	76
3.2.1	Criteria in designing fashion without fabric waste	77
3.2.2	Fabric waste as a criterion in designing fashion	82
3.2.3	Hierarchies of fabric waste: Garments of multiple fabrics	83
3.3	Pattern cutting the body: Tailored and square-cut	86
3.4	Fashion design and pattern cutting: strategies for integration	88
3.4.1	Contemporaneous sketching and pattern cutting	88
3.4.2	Hierarchies of garment elements: Building a shape library	89
3.4.3	Shape awareness and designing garment details	93
3.4.4	Visualization strategies and managing scale	95
3.4.5	Breaking pattern cutting “rules”	99
3.5	Fabric Quantities	102
3.5.1	Space awareness and marker-making in zero-waste fashion design	102
3.6	Sustainability issues not directly addressed through practice	106
3.6.1	The need for visual presentations of garments and their patterns in fashion publications	106
3.6.2	Zero-waste fashion – acknowledging a history of practice and research	108
3.6.3	Reflective and contemplative time in fashion design	109

CHAPTER 4: Opportunities for manufacturing zero-waste garments	112
4.1 Fabric and zero-waste garment manufacture	114
4.1.1 Cutting fabric	115
4.1.2 Fabric selvages	116
4.1.3 Cutting time	118
4.1.4 End-of-ply losses	118
4.1.5 Fabric flaws	120
4.2 Zero-waste garments and grading patterns	121
4.2.1 Pathway 1: One-size-fits-most	123
4.2.2 Pathway 2: Conventional grading	123
4.2.3 Pathway 3: Designing each size	124
4.2.4 Pathway 4: Using a different fabric width for each size	130
4.2.5 Pathway 5: A hybrid method	131
4.3 Zero-waste garment construction	132
4.4 Zero-waste fashion design and CAD/CAM	133
4.5 Zero-waste fashion design and fashion industry hierarchies	137
CHAPTER 5: Conclusion: Designing a future for fashion design	140
5.1 Zero-waste fashion design and pattern cutting	142
5.2 Zero-waste fashion design in fashion education	146
5.3 New research areas in fashion design	150
5.4 Reflecting on practice in research	153
5.5 Sustainability as a creative catalyst in fashion design?	154
5.6 Beauty: a paradigm shift for fashion?	156
