

PROMOTING INNOVATION IN CORPORATE PROJECTS THROUGH LEADERSHIP PRACTICES

By

Satyamoorti Sivasubramanian

**A thesis submitted for the degree of Doctor of Philosophy,
School of Information Technology, Faculty of Engineering and
Information Technology,
University of Technology, Sydney
June 2013**

Certificate of Authorship / Originality

I certify that the work in this thesis has not been previously submitted for a degree nor has it been submitted as part of requirements for a degree.

I also certify that the thesis is written by me. Any help that I have received in my research work and the preparation of this thesis itself has been acknowledged. In addition, I certify that all information sources and literature used are indicated in the thesis.

Signature of the candidate

Acknowledgements

I would like to acknowledge the committed support and encouragement provided by my supervisor Professor Eng Chew and co-supervisor Professor Ken Dovey. They not only guided the research but were always available to assist and motivate me when necessary.

I thank the participant organisation and its members for their generosity with time and effort in letting me use their projects as case studies for this thesis.

Finally, I thank my daughter Shaambavi for her sterling editorial efforts and proofreading of the manuscript.

Table of Contents

Abstract	x
1 Introduction	1
2 Literature Survey	6
2.1 Creativity and Innovation.....	7
2.1.1 Creativity	7
2.1.2 Innovation	8
2.2 Theories of Innovation	10
2.2.1 Positivist Theories	11
2.2.2 Interpretivist Theories	11
2.2.3 Constructionist Theories	12
2.3 Role of Learning and Knowledge Creation in Innovation.....	13
2.3.1 Knowledge Creation and Social Capital	14
2.3.2 The Concept of Learning	16
2.3.3 Organisational Learning.....	16
2.4 Leadership Practices.....	20
2.4.1 Non-Conventional Leadership Practices	21
2.4.2 Practice Theory	22
2.4.3 Using Practice Theory to Explain Innovation.....	25
2.5 Summary and Conclusion	26
3 Research Methodology	28
3.1 Introduction	28
3.2 Selecting the Methodology.....	29
3.3 Ontology	30
3.4 Epistemology	31
3.5 Research Paradigm.....	32
3.6 Theoretical Perspectives	32
3.7 Methodology	34
3.8 Research Methods	37
3.9 Research Design	39
3.9.1 Investigation Focus	41
3.9.2 AR Design and Data Collection.....	42
3.10 Conclusion.....	44
4 The DAM Project	45
4.1 Introduction	45
4.2 Background.....	46
4.3 Framing Actions.....	51
4.4 The First Spiral of Action	53

4.4.1	Promote Trust	54
4.4.2	Promote Shared Purpose and Break Silo Behaviour	56
4.4.3	Alter Local Leadership Practices.....	56
4.4.4	Application of Action Research Principles.....	57
4.5	Learning from the First Spiral	58
4.5.1	Observation on Alignment to Theories	58
4.5.2	Absence of Trust	59
4.5.3	Absence of Focus	59
4.5.4	Poor Leadership Practices	62
4.6	Re-strategising for the Second Spiral	63
4.6.1	Addressing Structural Limitations.....	63
4.6.2	Addressing Narrow Focus.....	64
4.6.3	Addressing Cultural Limitations	64
4.7	The Second Spiral of Action	65
4.7.1	Reinforce the Project Goal and Create Shared Purpose.....	66
4.7.2	Improve Trust.....	68
4.7.3	Alter Local Leadership Practices.....	69
4.7.4	Application of Action Research Principles.....	69
4.8	Learning from the Second Spiral	70
4.8.1	Observation on Alignment to Theories	70
4.8.2	Trust Factors.....	70
4.8.3	Need for Appropriate Focus.....	70
4.8.4	Leadership Practices	71
4.9	Re-Strategising for the Third Spiral.....	71
4.10	The Third Spiral of Action.....	71
4.11	Post Implementation Review	73
4.12	Summary of Learning from the DAM Project	74
4.12.1	Individual Disposition as a Consequence of Wider Organisational Resistance.....	74
4.12.2	Risk Avoidance or Political Strategy?	74
4.12.3	Leadership Practices	75
4.12.4	Innovation Ecosystem or Culture.....	75
4.12.5	Role of Siva in Facilitating Innovation	75
5	The CBOY Project.....	78
5.1	Introduction.....	78
5.2	Background to the Project	79
5.3	Framing Actions.....	82
5.4	The First Spiral of Action	83
5.4.1	Application of Action Research Principles.....	86
5.5	Learning from the First Spiral	87
5.5.1	Observation on Alignment to Theories	87

5.5.2	Active Leadership Participation	89
5.5.3	Systemic Shortcomings Must be Recognised.....	89
5.5.4	Collaboration is the Bridge to Ideation.....	89
5.6	Re-Strategising for the Second Spiral.....	90

Abstract

Despite innovation being a highly researched topic and organisations embracing innovation as a part of their strategic fabric, achieving or replicating successful innovation remains largely elusive. While the literature on this topic identifies a rich set of factors that aid innovation - outlining successful innovation scenarios in case studies - it also reflects a gap in our understanding of how to replicate successful innovation. In an attempt to bridge this gap, the research outlined in this dissertation focuses on addressing the issue of a firm's capability with respect to continuous innovation, particularly in a project environment. As the knowledge sought is social in nature, the research was located within the constructionist paradigm and utilised an action research methodology. As such, the environment in which innovation is achieved and replicated is assumed to be an inter-subjectively realised social phenomenon.

The research was conducted within the three corporate projects in TNC¹, a hi-tech multinational corporation. In two of these projects successive innovative outcomes were achieved and this was shown to be primarily as a result of particular leadership practices embedded in the project environment. These practices underpinned the creation of a social environment (or project-culture) in which the team members were able to create innovative solutions to challenging assignments. In particular, such practices promoted holistic understanding of issues, encouraged calculated risk, managed delivery pressures, and facilitated cross-functional collaboration. Significantly the cultural *milieu* in which successive innovative project outcomes were achieved was very different to that of the parent organisation. The main conclusion drawn from this research is that the role of 'local leadership' (middle, and project, management) in an organisation's capacity to innovate continuously is more important than is reflected in the literature. In particular, the nature of the leadership practices that inform innovative action within the corporate project environment requires further research and scrutiny.

¹ The code name TNC is used throughout this report to preserve the identity of the actual corporation.
