UNIVERSITY OF TECHNOLOGY, SYDNEY
Faculty of Business
HANDBOOK

2000

IMPORTANT YEAR 2000 NOTICE
The University of Technology, Sydney is taking all reasonable steps to identify and remedy any Year 2000 problems which might interfere with the courses and subjects it is proposing to offer during the Year 2000. Students and prospective students are advised that the University may still find it necessary in responding to any Year 2000 problem, to change the details of any course, subject, or class described in this or any other University publication. This could include not offering subjects in a particular teaching period, altering the mode of delivery for teaching, and changing assessment requirements. The University will endeavour:
• to confine such changes to the minimum necessary to address the Year 2000 problem
• to provide advance notice to students to the full extent possible, and
• where possible, to make other reasonable arrangements to minimise any disadvantage to students.

Students and prospective students should make appropriate inquiries to determine whether a course or subject has been affected by a Year 2000 problem by contacting the relevant Faculty Office.

DISCLAIMER
This publication contains information which was current at 20 August 1999. Changes in circumstances after this date may impact upon the accuracy or currency of the information. The University takes all due care to ensure that the information contained here is accurate, but reserves the right to vary any information described in this publication without notice. Readers are responsible for verifying information which pertains to them by contacting the Faculty or the UTS Information Service.

EQUAL OPPORTUNITY

It is the policy of the University of Technology, Sydney to provide equal opportunity for all persons regardless of sex, race, marital status, family responsibilities, disability, sexual preference, age, political conviction or religious belief.

FREE SPEECH

The University supports the right to freedom of speech and the rights of its members to contribute to the diversity of views presented in our society.

NON-DISCRIMINATORY LANGUAGE

UTS has adopted the use of non-discriminatory language as a key strategy in providing equal opportunity for all staff and students. Guidelines for the use of non-discriminatory language have been developed and all members of the University community are encouraged to use them.

GENERAL INFORMATION

WELCOME

Welcome to the University of Technology, Sydney (UTS), one of the largest universities in New South Wales - a university with an international reputation for quality programs and flexible learning. UTS develops, and regularly revises its programs of study in partnership with industry, government and professional bodies, so that its degrees are based on the latest professional standards and current practices. As a result, UTS produces graduates who are ready for work, and this is demonstrated in the high numbers of its students who enter the workforce within four months of finishing their degree.

UTS offers its students a lively, supportive and diverse learning environment across three campuses, and a range of social, cultural and sporting facilities to enrich each student's experience. UTS regards learning as a lifelong experience, and offers a range of programs to cater for the educational needs of people at a variety of stages in their lives, and from diverse backgrounds and cultures.

UTS offers a range of undergraduate and postgraduate degrees, which are developed by the Faculties of Business; Design, Architecture and Building; Education; Engineering; Humanities and Social Sciences; Law; Mathematical and Computing Sciences; Nursing, Midwifery and Health; and Science. Each of these faculties is responsible for a range of programs across a number of key disciplines, and many offer courses in conjunction with one another, or with the Institute for International Studies. Courses developed and delivered by these UTS faculties reflect the University's commitment to providing a relevant education to students through flexible and work-based modes of learning and through the ongoing internationalisation of the curriculum.

ABOUT THE UTS HANDBOOKS

Every year UTS produces 10 faculty/institute handbooks which provide the latest information on approved courses and subjects to be offered in the following year. These handbooks include comprehensive details about course content and structure, subject and elective choices, attendance patterns, credit point requirements, and important faculty and student information. Many of them also contain faculty policies and guidelines for participation in specific courses. This provides students with the necessary information to meet the requirements of the course, complete a program of study, and receive a degree.

UTS also produces a companion volume to these handbooks every year. The UTS Calendar contains the University Act, By-law and Rules, a list of courses offered across the University, and other useful University information. Copies of the faculty/institute handbooks and the UTS Calendar are held in the University's libraries and faculty offices and can be purchased at the Co-op Bookshop.

The information contained in the UTS Handbooks and Calendar is correct at the time of printing. However, UTS is continuously updating and reviewing courses and services to ensure that they meet the needs of students and industry, and as a result information contained in these publications may be subject to change.

For the latest information check with the information service, or on the website at: http://www.uts.edu.au/div/publications/

APPLICATIONS

**Undergraduate**
The NSW and ACT Universities Admissions Centre (UAC) processes most applications for undergraduate courses which start at the beginning of the year. Students are required to lodge these UAC application forms between August and October. To find out more about these courses and the application procedures, check the UAC Guide, or the UAC website at: www.uac.edu.au

Students can also apply for entry to some UTS courses by lodging a UTS application form directly with the University. These are usually courses that are not available to recent school leavers.

**Postgraduate**
Applications for postgraduate courses should be made directly to UTS. For courses starting at the beginning of the year, most applications are open from August to October, but some may have earlier closing dates. For courses starting in the middle of the year, applications close in May.

For more information about applying to study at UTS, contact the UTS Information Service.

**International students**
International students’ applications for both postgraduate and undergraduate courses can be made either directly to the International Programs Office or through one of the University’s registered agents. For courses starting at the beginning of the year, applications should be received by 31 December of the previous year. For courses starting in the middle of the year, applications should be received by 31 May of that year. For more information contact the International Programs Office.

**Non-award and external award study**
Students who want to study a single subject at UTS which is not part of a UTS degree or qualification, must apply for non-award or external award study. There are four application periods, and closing dates vary for each semester. Some faculties may have special application procedures which will depend on the subjects chosen. For more information contact the appropriate faculty office or the UTS Information Service.

FEES AND COSTS

**Service Fees**
Service Fees are charged to students to contribute to the cost of a range of facilities and services which are generally available to all students during the course of their study.

**Variations and exemptions**
Fees and charges may vary from year to year. In certain circumstances, students may not be required to pay all or part of one or more of the different components of the Service Fees. For full details of variations and exemptions to the fees listed below, contact the UTS Information Service.
Fee Components

Union Entrance Fee
a once-only charge for new students $20

Union Fee
a semester-based charge for currently enrolled students $100 per semester

Students' Association Fee
a yearly charge for currently enrolled students $48 per year

Student Accommodation Levy
a yearly charge for currently enrolled students $56 per year

Student Identification Card Charge
a yearly charge for students enrolled on a tuition fee basis $15 per year

Course Fees

Some courses (not local undergraduate courses) at UTS attract a course fee. This is charged to students for the course itself, in addition to the Service Fees outlined above. The level of such fees is calculated by individual faculties on a course by course basis. Payment of course fees may vary depending on a student's status, and on conditions laid down by the faculty. Please contact your faculty office for full details.

Details of course fees are outlined under each course entry in this Handbook, but are subject to change. Always check with the faculty for the latest information.

Course Fees for International Students

Annual Course Fees for undergraduate international students range from A$11,500 to A$16,500, and for postgraduate international students from A$12,000 to A$16,500. For more information contact the International Programs Office.

Other costs

Students may incur other costs while they study at UTS. These may include books, photocopying, equipment hire, the purchase of computer software and hardware, and email and internet services.

The University's recommended internet service provider currently charges $20 per month for 30 hours access or $30 per month for $70 hours access. These prices are subject to change.

HECS

(Higher Education Contribution Scheme)

HECS is a financial contribution paid to the Commonwealth Government by tertiary students towards the cost of their education. It is payable each teaching period and the amount paid will vary according to the number of credit points undertaken and the method of payment nominated by the student. Most students have three choices in the way they pay HECS:

1. Paying all of the HECS up front and receiving a 25% discount
2. Deferring all payment until a student's income reaches a certain level, or
3. Paying at least $500 of the HECS contribution up front and deferring the remainder.

Note: these options may not apply to New Zealand citizens and Permanent Residents.

Commonwealth legislation sets strict conditions for HECS over which the University has no control. HECS charges are based on the subjects in which students are enrolled on the HECS census date. It is important for students to realise that any reductions in their academic workload after the census date for a particular semester will not reduce their HECS liability.

Students who defer their HECS payments become liable to commence repayment once their taxable income reaches the repayment threshold. This does not necessarily mean at the conclusion of their studies - a student's income may reach this threshold before then.

New students, students returning from leave and students who are commencing a new or second course, must complete a Payment Options Declaration Form. This form must be lodged with the University by the census date and should show a valid Tax File Number.

For Autumn Semester the HECS census date is 31 March, and for Spring Semester the HECS census date is 31 August. HECS census dates for other teaching periods can be obtained from the UTS Information Service.

There are a number of variations to these guidelines. It is the responsibility of each student to find out which HECS conditions apply to them. Information can be obtained from the booklet HECS Your Questions Answered, which is available from the HECS office on 1800 020 108 or the UTS Information Service.
**FINANCIAL HELP**

**Austudy/Youth Allowance**

Students under 25 years old, may be eligible to receive financial assistance in the form of the Youth Allowance.

Full-time students over 25 years old may be eligible to receive Austudy which provides financial help to students who meet its income and assets requirements. Application forms and information about eligibility for Austudy are available from Student Services at Kuring-gai or City campuses.

Commonwealth legislation sets strict requirements over which the University has no control. It is important for the students concerned to understand these requirements.

Students who receive Austudy and decide to drop subjects during the semester, need to be aware that to remain eligible for Austudy they must be enrolled in a minimum of 18 credit points, or have a HECS liability for the semester of 375. The only exceptions made are for students with disabilities which interfere with their studies, students who are single supporting parents or, in some exceptional cases, those who have been directed by the University to reduce their study load.

For more information, talk to a student welfare officer in the Student Services Unit.

telephone (02) 9514 1177 (City)
or (02) 9514 5342 (Kuring-gai)

Application forms for both schemes should be lodged as soon as possible with any Centrelink office, or:

Centrelink Student Services
Parker Street, Haymarket
Locked Bag K710
Haymarket NSW 2000

**Abstudy**

Abstudy assists Aboriginal and Torres Strait Islander tertiary students by providing income support and other assistance. For more information about Abstudy, contact the staff at Jumbunna Centre for Australian Indigenous Studies, Education and Research.

Level 17, Tower Building
telephone (02) 9514 1905

**UTS LIBRARY**

The University Library collections are housed in three campus libraries which contain over 650,000 books, journals and audiovisual materials as well as a large range of electronic citation and full-text databases. Services for students include assistance in finding information through Inquiry and Research Help Desks and training programs, loans, reservations, reciprocal borrowing and copying. The Library provides as much information as possible electronically so that users can also access it remotely. More information about the Library can be found at: http://www.lib.uts.edu.au

**RESEARCH OFFICE**

The Research Office is responsible for ensuring that the University develops its research potential. It provides a broad range of services aimed at meeting the research goals of the University and its staff.

The main objectives of the Research Office include ensuring that a deep understanding of the research priorities, interests and capacity of the University, its research teams, centres and individual academics is maintained. It is involved in formulating policy and monitoring national trends in research policy and funding to position the University so that it can react to opportunities and challenges in key fields of research.

telephone (02) 9514 1252/1264/1419
UNIVERSITY GRADUATE SCHOOL

The University Graduate School is a pan-university organisation which enhances the quality of graduate courses and supports research degree students, providing leadership in framing policy for postgraduate development in partnership with the faculties. It provides a contact point for postgraduate students and supports them in their studies.

The University Graduate School is located in Building B2, Blackfriars, City campus.

telephone (02) 9314 1336

SUPPORT FOR STUDENT LEARNING

The following services and facilities are available to all UTS students.

Student Services

Transition to university programs

UTS offers a free ‘Study Success’ program of integrated lectures and activities before semester begins, to help new students manage the transition to university study. Students are informed of academic expectations, the skills needed to be an independent learner, and learning strategies which can help them successfully manage the workload. They are also provided with valuable information about how the university and its faculties operate, and the services provided.

For more information contact Student Services Unit.

telephone (02) 9514 1177 (City)
or (02) 9514 5342 (Kuring-gai)

Careers Service

The Careers Service offers career guidance, and assists with job placement for students seeking permanent or casual employment.

telephone (02) 9514 1471 (City campus)

Counselling

Counsellors are available at the City and Kuring-gai campuses for individual consultation, and group programs are also held throughout the year.

telephone (02) 9514 1471 (City campus)
or (02) 9514 5342 (Kuring-gai campus)

Health

The Health Service offers a bulk billing practice to students at two locations:

telephone (02) 9514 1166 (City campus)
or (02) 9514 5342 (Kuring-gai campus)

Housing

University Housing provides assistance to students in locating private accommodation. A limited amount of UTS-owned accommodation is also available.

telephone (02) 9514 1509 (listings)
or (02) 9514 1199 (UTS accommodation)

Special Needs Coordinator

Support is also available for students with special needs. Students with a physical, sensory or learning disability can contact the Special Needs Coordinator for information and advice.

telephone (02) 9514 1177

Welfare

Welfare officers assist students with personal financial matters, including loan and financial counselling, Youth Allowance, Austudy and other Social Security claims and appeals advice.

Level 17, Tower Building
telephone (02) 9514 1902

EQUITY AND DIVERSITY

It is the policy of the University of Technology, Sydney to provide equal opportunity for all persons regardless of sex, race, marital status, family responsibilities, disability, sexual preference, age, political conviction or religious belief. UTS has a strong commitment to ensure that the diverse nature of the Australian society is reflected in all aspects of its employment and education.

The Equity and Diversity Unit provides a range of services for students and prospective students. These include community outreach programs to support the participation of disadvantaged students/under-represented groups; coordination of the inpUTS Educational Access Scheme for students who have experienced long-term educational disadvantage; coordination of financial scholarships and awards for commencing low-income students; and the provision of confidential advice and assistance with the resolution of equity-related student grievances, including complaints about racism, sexism, sex-based harassment, homophobia, pregnancy/family responsibilities, or other equity issues.

Equity and Diversity Unit
Level 17, Tower Building
telephone (02) 9514 1084

OTHER SERVICES

UTS Union
The UTS Union is the community centre for the University. It provides food and drink services, lounges and recreational areas, comprehensive social and cultural programs, sports facilities and programs, stationery shops, a newsagency and resource centres. Off campus the Union provides access to a ski lodge, rowing club, sailing club, athletics club and basketball stadium.

Union Office (02) 9514 1444
Haymarket (02) 9514 3369
Kuring-gai (02) 9514 5011

Union Sports Centre
The centre contains multi-purpose spaces, squash courts, weights rooms, circuit training room and climbing wall.

April
7 Last day to withdraw from a course or subject without academic penalty
17 Public School holidays commence
20 Provisional examination timetable available
21 Good Friday – public holiday
24-28 Vice-Chancellors’ Week (non-teaching)
24 Easter Monday – public holiday
25 Anzac Day – public holiday
27-28 Graduation ceremonies (Kuring-gai)
28 Public School holidays end

May
1 Applications open for undergraduate and postgraduate courses, where applicable, and postgraduate courses for Spring semester 2000
15-26 Graduation ceremonies (City)
31 Closing date for undergraduate and first round postgraduate applications for Spring semester

June
2 Final examination timetable available
9 Last teaching day of Autumn semester
10-26 Formal examinations
12 Queen’s Birthday – public holiday
29 Last day to submit application for Postgraduate Equity Scholarships for Spring semester 2000
30 Closing date second round Postgraduate applications for Spring semester

July
3 Public School holidays commence
3-7 Vice-Chancellors’ Week (non-teaching)
3-7 Formal alternative examination period for Autumn semester students
4-13 Enrolments for Spring semester
10-14 International Students’ Orientation Program
13 Study Success Learning Skills Program
13 Release of Autumn semester examination results
14 Public School holidays end
14 Formal supplementary examinations for Autumn semester students
17 Spring semester classes commence
21 Last day to withdraw from full year subjects without academic penalty
28 Last day to enrol in a course or add subjects
28 Last day to submit ‘Show Cause’ appeal for Autumn semester 2000

August
1 Applications available for undergraduate and postgraduate courses for Autumn semester 2001
18 Last day to pay upfront HECS or Postgraduate Course Fees for Spring semester 2000
31 Last day to withdraw from a course, a subject, or apply for leave of absence without academic or financial penalty
31 Last day to apply to graduate in Autumn semester 2001
31 HECS census date (to be confirmed)

September
1 Applications for Postgraduate Scholarships available
8 Provisional examination timetable available
8 Last day of teaching before AVCC week/Olympics break
11 AVCC week/Olympics break (to 6 October)
11 Public School Holidays commence (to 2 October)
29 Closing date for undergraduate applications via UAC (without late fee)
29 Closing date for inpUTS Equity Access Scheme via UAC
October
2  Labour Day – public holiday
2  Public school holidays end
8  Provisional examination timetable available
9  Spring semester classes recommence
30  Graduation ceremonies (City) (to 3 November)
31  Closing date for undergraduate applications via UAC (with late fee)
31  Closing date for undergraduate applications direct to UTS (without late fee)
31  Closing date for most postgraduate courses for Autumn 2000 (some courses may have earlier closing dates in September)
31  Closing date for Australian Postgraduate Awards, the R. L. Werner and University Doctoral scholarships
31  Last day to submit application for Postgraduate Equity Scholarships for Summer semester 2001

November
1-3  Graduation ceremonies (City)
3  Final examination timetable available
17  Last teaching day of Spring semester
18-30  Formal examination period (and 1-4 December)
30  Closing date for undergraduate applications via UAC (with late fee)

December
1-4  Formal examination period (and 13-30 November)
4  Summer session commences (ends 2 February 2001)
11-15  Formal alternative examination period for Spring semester students
20  Release of Spring semester examination results
20  Public School holidays commence
25  Christmas Day – public holiday
26  Boxing Day – public holiday

1  HECS/Postgraduate course fees will apply after the HECS census date (31 March and August or last working day before).

Note: Information is correct as at 24 August 1999. The University reserves the right to vary any information described in Principal Dates for 2000 without notice.
MESSAGE FROM THE DEAN

Welcome to the Faculty of Business.
Our extensive range of undergraduate and postgraduate courses is designed to suit your needs.

As one of the largest business faculties in Australia, we offer you the resources of five discipline-based teaching schools, a school to specifically administer postgraduate studies, and two educational development units.

Approximately 8,000 students -1,200 of whom are international students - are enrolled in our courses. This accounts for nearly 30 per cent of the entire UTS student population.

With a reputation for high quality educational programs – the Faculty’s courses are taught by academic staff and experienced members of the business community who ensure you gain practical skills as well as theoretical and professional training. And, we offer you flexibility of choice – in course subjects, attendance patterns, and the opportunity to ‘fast-track’ your course.

Established partnerships with industry, the business professions and other academic institutions, both in Australia and overseas, give you opportunities for research, international exchange and work experience.

The Faculty's research activities extend from traditional fields of study - such as accounting, finance, management and marketing – to newer, more innovative fields, such as sport, leisure and tourism.

We are located in Haymarket - right in central Sydney within 100 metres from the main Sydney train lines - and also at Lindfield on Sydney’s leafy north shore.

On behalf of the Faculty of Business, I wish you every success with your studies and trust that your time here will be a rewarding experience.

Professor Bob Robertson
Dean

FACULTY MISSION STATEMENT

The mission of the Faculty of Business is to provide higher education aimed at enhancing professional practice in management-related occupations in business, industry, government and the community, and to create, apply and extend knowledge for the benefit of the community and the welfare of society.

In accordance with the University’s charter, the Faculty offers courses under different patterns of study to students from a diversity of backgrounds, interacting closely with the professions, business, government and community organisations. It provides innovative, relevant and high-quality programs of teaching, scholarship, research, consulting and continuing education and by doing so anticipates and meets the needs of its various clients and stakeholders.
INFORMATION FOR BUSINESS STUDENTS

The Faculty of Business is located on two campuses – the City campus (Haymarket) and the Kuring-gai campus (Lindfield).
The Faculty consists of five discipline-based Schools – Accounting, Finance and Economics, Management, Marketing, and Leisure, Sport and Tourism. The Graduate School of Business administers the Faculty’s postgraduate courses. The Executive Development Unit offers short courses designed to meet specific business needs.

Locations and contacts

Student Liaison Unit
The Student Liaison Unit manages the student administration activities of the Faculty and is responsible for a broad range of activities including admission, enrolment, graduation, timetabling, course information, promotion and student matters.
The Student Liaison Unit consists of the undergraduate Student Offices at Haymarket and Kuring-gai, the International Student Office and the Graduate School of Business Office at Haymarket.

Important student information on rules and procedures

The University's Rules are published in the UTS Calendar and online at the web address shown on the previous page. If you require advice about any of the following rules and procedures, please contact the relevant Student Offices on either campus.

University Correspondence

It is important that you read all information sent to you by the university.

Attendance at classes

Most subjects have prescribed attendance requirements and these must be adhered to for satisfactory completion of the subject. Subject outlines provide this information. Should you have difficulties due to work commitments or illness, contact your subject coordinator as soon as possible (Rule 2.5).

Part-time Attendance

Part-time students should be aware that attendance may require one afternoon or morning class during each teaching week.

Leave of absence

Students may apply for up to four semesters leave of absence. Students must have successfully completed at least one subject for an application to be considered (Rule 2.11). Students may only apply for two semesters of leave at one time.

Variation of Program

There are specific deadlines for adding and deleting subjects in each semester. See the Student Offices for Faculty specific dates and important details on how to vary your program.

In Autumn and Spring semesters the following dates apply:

- Last day to delete subjects without financial penalty is the HECS census date: 31 March for Autumn semester, 31 August for Spring semester.
- Last day to delete subjects without academic penalty is Friday, week six each semester.
- Dates for adding subjects are governed by the Faculty.

Relevant dates for Summer and Winter sessions are available from the Student Offices. Failure to notify the university of intended changes in program can result in subject failure and incurring HECS liability or postgraduate course fees.

In exceptional circumstances, changes to program with supporting documentation will be considered.

Examinations

Conduct of examinations

Students are strongly urged to read Rule 2.17 for details of what is required of them in relation to examination attendance and conduct.

Examination malpractice

For information on the procedures taken in a case of suspected malpractice in an examination, see Rule 2.23.

Special examination conditions

A variety of special examination conditions may be provided to students with special needs or disabilities. An extension of time in examinations may also be granted in certain circumstances for a disability or language difficulties.

Students seeking special examination conditions should contact the Faculty Academic Liaison Officer at the beginning of each semester.

Illness or misadventure during semester or examination period.

Please note that each form listed in the following procedures has important information which you must read carefully before lodging the form.

If you know you will not be able to go to a formal examination at the scheduled time submit an Advice of Scheduling Difficulties form to the Registrar (Student Information, Tower or Student Centre, Kuring-gai) before the release of the final examination timetable.
If you miss a formal examination consult a Professional Authority (doctor, counsellor, religious leader) who must complete a Request for Alternative Examination form on the day of the exam, and submit the form to the Registrar (Student Information, Tower or Student Centre, Kuring-gai) within three working days of the examination.

If you miss an informal examination submit a Professional Authority: Informal Examination form to your Subject Coordinator no later than three working days after the examination.

If you attend an examination (formal or informal) but are forced to leave before the allocated time you must have a University Doctor or Counsellor complete a Request for Special Consideration form immediately after you leave the exam. Submit the form that day to the Registrar (Student Information, Tower or Student Centre, Kuring-gai).

If you finish an examination or other piece of assessment but believe that your performance was adversely affected consult a Professional Authority (doctor, counsellor, religious leader) who must complete a Request for Special Consideration form. Submit this form to the Registrar (Student Information, Tower or Student Centre, Kuring-gai) within one working day of the examination or assessment due date.

Appeals against assessment
Provision is made for students to appeal against an assessment grade. Obtain an Appeal Against Assessment Grade form from the Faculty Student Offices, the UTS Information Service at Broadway, or the Kuring-gai Student Centre. Read the form carefully and complete it according to the criteria outlined. (Rule 2.25)

Withdrawal from a course
Students wishing to withdraw from a course should do so by the relevant HECS census date to avoid academic failure and incurring HECS liability or postgraduate course fees. (Rule 2.13)

Internal Course transfer
Students who wish to transfer from one UTS course to another must lodge a written application with the Registrar on the Internal Course Transfer form. Contact the Faculty Student Offices for information.

Students wishing to transfer to UTS from another university should apply through the Universities Admissions Centre (UAC).

Awards and graduation
All students who believe they will qualify for an award from the University at the end of their current semester must complete an Authority for Graduation Processing form (available from the Faculty of Business student offices) and an Application to Graduate form (available from the UTS Information Service at Broadway, Kuring-gai Student Centre and the Faculty of Business student offices). The closing dates to lodge these forms are:

- Autumn semester/Winter session Completions – 30 March
- Spring semester Completions – 30 August
- Summer session Completions – 15 December

The organisation of Graduation Ceremonies is complex and requires a substantial lead time. The Faculty of Business cannot guarantee students who complete an award course in Summer session will be able to graduate at the April/May Graduation Ceremonies and/or students who complete an award course in Winter session will be able to graduate at the September/October Graduation Ceremonies.

University medals may be awarded to undergraduate students who have obtained outstanding academic results and who are considered to be of exceptional merit. To be awarded the University medal, a student must achieve a level of award of 85 or greater. The University medal is presented to one student only per course, and in the case of the Bachelor of Business, to one student only per major.

Students wanting information on their level (or expected level) of award should contact the Faculty's Graduation Officer.

Concurrent study
In certain circumstances students may be permitted to undertake a limited number of subjects at another tertiary institution and have these counted towards their UTS degree. Students wishing to undertake concurrent study should contact the relevant Student Office.

Recognition of prior learning
It is possible for students to seek an exemption in a subject through recognition of prior learning. To request an exemption based on prior learning students should contact the relevant Student Office.
Summer and Winter Sessions

The Faculty of Business usually conducts a Summer Session during University summer vacation for undergraduate and postgraduate subjects. A Winter Session is usually offered in June/July for postgraduate students only. Summer and Winter Sessions are designed so that students may fast-track their studies and complete subjects in an intensive format.

Any student interested in the Summer or Winter Sessions should contact the relevant Student Office regarding details of subjects offered and timetables.

International Student Office

The Faculty has an International Student Office which offers support to international students studying at UTS and information to local students wishing to study overseas on Exchange or Study Abroad programs.

For further information on all exchange programs, contact the International Student Office on (02) 9514 3597 or (02) 9514 3517.

International exchange programs

The Faculty offers exchange programs with overseas universities, including: Oregon State University, USA; California State University, Sacramento, USA; Aarhus School of Business, Denmark; Wirtschaftsuniversität, Vienna, Austria; University of Tilburg, The Netherlands; University of Ottawa, Canada; Universiti Sains Malaysia; Yonsei University, Korea; Linköpings Universitet, Sweden; Reims Business School, France; University of Brighton, UK; Loughborough University of Technology, UK; and Senshu University, Japan.

These programs enable UTS students to enjoy travel, campus life and the challenge of studying in another country. Subjects approved for study are given full accreditation for compulsory or elective subjects.

Students are also able to make their own arrangements to study at an institution that does not have a formal exchange agreement with UTS. However, prior arrangements must be made with the Faculty of Business regarding accreditation of subjects.

International Exchange Sub-Major

Students have the option to complete four elective subjects, approved by the Faculty of Business at an approved exchange destination. These subjects will be recognised as a cohesive unit of study and approved as a sub-major in International Exchange.

Integrated Australian and French Business Program

This program is for students enrolled in the Bachelor of Business with an approved level of French language knowledge. The program involves four years of full-time study, including two years at UTS, and two years of in-country study in France, including work placement in France. Full details of this course are outlined in the Undergraduate courses section of this handbook.

Oregon State University, USA

Students can study at Oregon State University, which is a 100-year-old residential campus, for one semester or a full year. There is an extensive selection of undergraduate subjects available to UTS students at Oregon.

California State University, Sacramento Campus

The Sacramento Campus of CSU is located in northern California, and is approximately a two hour drive from San Francisco. This exchange agreement is for undergraduate students of the Faculty. Students can choose from a wide selection of subjects and undertake exchange for either one semester or one academic year.

Aarhus School of Business, Denmark

The Aarhus exchange program is open to students enrolled in both undergraduate and postgraduate business courses. Students can select from a range of subjects taught in English.

Wirtschaftsuniversität, Vienna, Austria

At Wirtschaftsuniversität students can study subjects in English which are directly equivalent to UTS subjects, or use their electives to study languages and other subjects of interest. This program is open to undergraduate students only.

University of Tilburg, The Netherlands

The School of Leisure, Sport and Tourism operates a formal exchange program with the University of Tilburg in The Netherlands. Students can take up to three subjects, taught in English, per semester. It is generally recommended that the exchange be undertaken by third-year students in the Autumn semester.

University of Ottawa, Canada

Students can study at the University of Ottawa for one semester. There is an extensive selection of both undergraduate and postgraduate subjects available.
Universiti Sains Malaysia

Universiti Sains Malaysia offers second-year business students the opportunity to study for one semester. Students complete introductory courses in the Malay language and culture while undertaking other subjects offered in English.

Yonsei University, Korea

Yonsei University in Korea offers undergraduate and graduate students the opportunity to study from a range of subjects taught in English. Students can study for one semester or one year.

Linkopings Universitet, Sweden

Linkopings Universitet offers a range of subjects in English to undergraduate and postgraduate exchange students. Students have the opportunity to study for up to one year.

Reims Business School, France

At Reims Business School in France, MBA students can undertake intensive winter school (June/July) study to accelerate their study program.

University of Brighton, UK

Undergraduate students in the Bachelor of Arts in Tourism Management are able to undertake some of their core subjects through an exchange program with the University of Brighton.

Loughborough University of Technology, UK

Undergraduate students enrolled in the Bachelor of Arts in Human Movement Studies and in the Bachelor of Arts in Leisure Management are able to participate in an exchange program with Loughborough University of Technology. Students are able to choose from a wide range of subjects and it is possible to undertake a number of core subjects in both degrees.

Senshu University, Japan

Senshu University offers undergraduate students the opportunity to study three elective subjects during Spring semester in Japan. The subjects offered are Japanese Business, Japanese Culture, and Japanese Language. Students participating in this exchange need the equivalent of HSC 2-unit Japanese.

International Studies electives

With approval from the Faculty, students are able to undertake electives offered by the Institute for International Studies at UTS. Electives are available in language studies and in the study of contemporary societies in parts of the non-English-speaking world. All subjects are taught over one semester and have a value of eight credit points.

Language studies

Language programs are offered in Cantonese, Chinese, French, German, Greek, Indonesian, Italian, Japanese, Malaysian, Russian, Spanish, and Thai. Other language programs may be available depending on demand. The individual student's level of language proficiency before entry to the program decides their level of language study. A range of entry levels to the various programs is available.

Contemporary Society

A series of subjects are offered to provide an introduction to the contemporary societies, politics, economics and culture of the countries of East Asia, South-East Asia, Latin America, and Europe. Introductory subjects are available on the contemporary societies of China, Japan, Korea, South-East Asia, Hong Kong, Taiwan, Latin America, and Europe. There are no prerequisites for these subjects. All subjects are taught in English.

For further information, contact the Institute for International Studies, located at Broadway, telephone (02) 9514 1574, fax (02) 9514 1578, or refer to the Institute for International Studies Handbook.

Insearch Institute of Commerce

Insearch Institute of Commerce, which is wholly owned by the University of Technology, Sydney, offers diploma programs in Business and Commerce, Business Studies, International Business and Trade, International Banking and Finance, and Business (Tourism Management). The programs are designed and taught in conjunction with the Faculty of Business. While the University cannot guarantee admission to its degree programs, students who have completed appropriate programs, if admitted, may be given up to one year's advanced standing in the Bachelor of Business or the Bachelor of Arts in Tourism Management. For further information contact the Registrar, Insearch Institute of Commerce, 10 Quay Street, Sydney or telephone (02) 9281 8188, or fax (02) 9281 9875, or email courses@insearch.edu.au
Continuing professional education programs

The Faculty offers a range of executive development programs and short courses in specialist professional topics. In addition to its advertised programs, in-house programs tailored to specific corporate needs can be arranged on request. Further information is available from the Executive Development Unit on:

- Telephone (02) 9514 3515 or fax (02) 9514 3510
- Email Executive.Development.Unit@uts.edu.au

Professional recognition of courses

A number of degree courses offered by the Faculty of Business are recognised by professional organisations.

The Australian Society of Certified Practising Accountants/The Institute of Chartered Accountants in Australia

Students successfully completing the Bachelor of Business (with appropriate approved subjects) or the Bachelor of Accounting will have satisfied the undergraduate Accounting major educational requirements for membership of both the Australian Society of Certified Practising Accountants (ASCPA) and The Institute of Chartered Accountants in Australia.

Students should note that the ASCPA will not, in principle, accept conceded passes in subjects required by them. However, the ASCPA will now accept a conceded pass in a first- or second-year subject, provided that a further subject in the same subject area has been passed. Further information can be obtained from the ASCPA.

Chartered Institute of Company Secretaries in Australia Ltd

The Institute is the professional association for 9,000 company secretaries and other corporate managers in Australia. It is also the Australian Division of the International Institute of Chartered Secretaries and Administrators, to which its Australian members also belong.

Special arrangements exist between the University and the Institute under which Bachelor of Business students, who have passed the University’s examinations in four prescribed subjects, can satisfy the Institute’s full-academic membership requirements without the need to sit the Institute’s two qualifying examinations.

During the course of their studies, students are encouraged to become Student Members of the Institute.

For details of the prescribed subjects and student membership, contact Associate Professor Michael Adams on (02) 9514 5418. Alternatively, contact Dr John Nelson, Director of Education and Membership, Chartered Institute of Company Secretaries, GPO Box 1594, Sydney, NSW 2001, or telephone toll-free on 1800 251 849.

The Australian Institute of Banking and Finance

Associateship or Senior Associateship status may be offered by the Australian Institute of Banking and Finance (AIBF) to students completing the Bachelor of Business with a major or sub-major in Banking, or a combined major in Banking and Management, and who have appropriate work experience.

The Australian Insurance Institute

Fellowship status is offered by the Australian Insurance Institute (AII) to students completing the sub-major in Insurance and who have appropriate work experience.

Student organisations

AIESEC is the world’s largest student organisation. Existing in 84 countries around the world, with over 70,000 members, AIESEC aims at promoting cultural awareness and international understanding, developing practical managerial skills for its members, and bridging the gap between students, academics and the business sector.

It is AIESEC’s membership base of determined and committed students who contribute to changing people’s lives and developing themselves as leaders. This is achieved through activities such as international graduate and undergraduate exchange programs, team building, marketing, project planning and national and international conferences. AIESEC also provides opportunities to gain business contacts and many new friends.

AIESEC provides students with the ability to do something, not only for themselves, but to have an impact on the lives of people around the world in many different ways, the opportunities are endless.

AYBC (Asia–Australia Youth Business Council) aims to build knowledge and understanding of the commercial environment in both Australia and the Asia–Pacific region. AYBC aims to develop business skills and provide
its associates with an international perspective by focusing on their interpersonal development and by fostering friendships and active participation in AYBC events and functions. In particular, AYBC provides the opportunity for associates to interact with corporate members, as well as to participate in the management and organisation of AYBC projects and the Council.

To find out more about AIESEC and AYBC, telephone (02) 9514 3534, or visit the AIESEC and AYBC office in Room B112 (Haymarket).

PRIZES AND SCHOLARSHIPS

A number of prizes for academic excellence are awarded to students in the Faculty of Business. Prizes are awarded in respect of each academic year and are presented annually at a Faculty ceremony. These prizes are made available through the generosity of private individuals, and organisations in the public and private sectors.

Scholarships
A number of scholarships are available at both undergraduate and postgraduate level.

Enquiries about all postgraduate scholarships, unless otherwise stated, should be directed to the University Graduate School, Level 5, Tower Building, Broadway, telephone (02) 9514 1521.

Inquiries about Honours scholarships should be directed to the appropriate School.

Accounting Honours Scholarships
The School of Accounting offers five scholarships to students for study in the Honours sequence within the School of Accounting. Each scholarship is tenable for one year and has a cash value of $5,000.

Australian Postgraduate Awards (APA)
The Commonwealth Government offers a limited number of awards to support postgraduate study at Australian universities each year. These awards are available to students enrolling in a Doctorate or a Master’s degree by research, provided they meet the University’s eligibility criteria. Applications open in September and close at the end of October in the year prior to that in which the applicant intends to commence study.

Australian Postgraduate Awards (Industry)
An academic staff member and an industrial partner apply for an Australian Postgraduate Award (Industry) with the Australian Research Council. If successful, a student is then selected to participate in a defined project. Applicants will be expected to enrol in a Master’s degree or Doctorate in an area relevant to the project. Applicants must be Australian citizens or permanent residents. These scholarships provide a stipend to assist full-time study.

Bowl Australia Honours Scholarship in Leisure Management
This scholarship was established in 1996. It is awarded to the best graduating student entering the Honours program in Leisure Management. The scholarship is a cash award of $1,500.

Commonwealth Bank Scholarship
This scholarship was established in 1988. It is awarded to a full-time, second year student in the Bachelor of Business who intends majoring in banking, finance, accounting, or management. The recipient must have a sound academic record and be interested in pursuing a career in banking. The scholarship is tenable for two years and has a cash value of $6,000. Applications open in March and close at the end of April.

Commonwealth Scholarship and Fellowship Plan Awards
These awards are intended for postgraduate study of research, and are normally tenable in the United Kingdom, Canada, Hong Kong, India, Jamaica, Malaysia, Malta, Nigeria, Sri Lanka, Trinidad and Tobago. The list of participating countries is subject to review each year. Applications from UTS graduates close in late September in the year prior to that in which the applicant intends to study abroad.

CRG Doctoral Scholarships
The Collaboration Research Group offers two full-time doctoral scholarships for innovative research into the roles of various forms of inter-and intra-organisational collaboration. Each scholarship has a cash value of $20,000 per year, tax-free. These scholarships are tenured for a period of three years, and may be supplemented by a limited amount of teaching and/or research assistant activity within the Faculty.

Dow Corning Research Scholarships in Marketing
These scholarships were established in 1994. Dow Corning Australia Pty Ltd offers four scholarships to students studying in the Honours sequence within the School of Marketing. Each scholarship is tenable for one year and has a total value of $1,100.

Faculty of Business Exchange Program Scholarships
The Faculty may offer up to ten scholarships to students (either undergraduate or postgraduate) to assist with costs incurred whilst on a Faculty-approved exchange program. Each scholarship is tenable for one semester and has a cash value of $1,000.

Faculty of Business Honours Scholarships
The Faculty may award up to four scholarships to students studying full time in the Honours program within the Faculty. The scholarships are only available to students who completed their undergraduate degree at UTS. Each scholarship is tenable for one year and has a cash value of $4,000.
Faculty of Business PhD Scholarships

The Faculty of Business offers two full-time scholarships for study in any one of the Faculty's five discipline-based Schools of Accounting, Finance and Economics, Leisure, Sport and Tourism, Management, or Marketing. Each scholarship has a cash value of $18,000 per year, tax free, and may be supplemented by limited amount of teaching and/or research assistant activity within the Faculty. These scholarships are tenured for three-year periods.

Industry PhD Scholarships

From time to time, the Faculty is able to offer scholarships made available through the generosity of individual companies for full-time doctoral studies.

Insearch Institute of Commerce Doctoral Award

As a result of the generous support of the Insearch Institute of Commerce, the Faculty of Business is able to offer a full-time PhD scholarship for study in any one of the Faculty's five discipline-based Schools: Accounting; Finance and Economics; Leisure, Sport and Tourism; Management; or Marketing. The scholarship has a cash value of $18,000 per year, tax free, and may be supplemented by a limited amount of teaching and/or research assistant activity within the Faculty.

International Postgraduate Research Scholarships (IPRS)

IPRS is available to PhD or Master's level international students who wish to undertake quality research in areas of research specialisation in Australian institutions. The scholarship covers the cost of tuition fees and basic health cover for the duration of the course only. Holders of these scholarships are, however, expected to meet their own living expenses and other associated costs during their stay in Australia. Application forms are available from the International Programs Office between July and September each year. For further information contact the UTS International Programs Office, Tower Building Broadway, telephone (02) 9514 1531.

Judith and Leslie Fritz Scholarship

This scholarship was established in 1985 as a result of the generosity of Mr Peter Fritz, 1984 winner of the BHP Award for the Pursuit of Excellence in the Commerce, Industry and Management Category. The scholarship is awarded to a graduate (either undergraduate or postgraduate) who has completed one of the International Marketing courses. The scholarship is intended to encourage enterprising and capable individuals in marketing to investigate overseas markets for Australian expertise and Australian-manufactured products. The scholarship is valued at $10,000 per annum for a minimum duration of two months.

Lindsay Croft Postgraduate Award

The Lindsay Croft Postgraduate Award is available to Aboriginal and Torres Strait Island postgraduate students studying at UTS. Applications and further information are available from Jumbunna CAISER, telephone (02) 9514 1902.

PhD Scholarships in Accounting

The School of Accounting offers two PhD scholarships to candidates to work in the areas of market-based accounting research and/or positive accounting theory. Each scholarship has a cash value of $18,000 per year, tax free, and may be supplemented by a limited amount of teaching and/or research assistant activity within the Faculty. These scholarships are tenured for a period of three years.

PhD Scholarships in Finance and Economics

The School of Finance and Economics offers two PhD scholarships. Each scholarship has a cash value of $18,000 per year, tax free, and may be supplemented by a limited amount of teaching and/or research assistant activity within the Faculty. These scholarships are tenured for a period of three years.

University Research Scholarships

The university offers the Doctoral Research Scholarship and the R L Werner Postgraduate Scholarship to applicants of the highest academic calibre, for full-time research at UTS, provided they meet the University's eligibility criteria. Applications open in September and close at the end of October in the year prior to that in which the applicant intends to commence study.

UNDERGRADUATE COURSES

Bachelor of Business

- Course codes: B01C (City campus); B01K (Kuring-gai campus)
- Testamur title: Bachelor of Business
- Abbreviation: BBus
- Course fee: HECS

The Faculty of Business offers an undergraduate degree program that leads to the award of Bachelor of Business. The Bachelor of Business program prepares graduates for a career in accounting, banking, economics, finance, international business, management, marketing, tourism and the related professions. The degree seeks to provide students with the knowledge, competencies and values necessary for a fulfilling and effective career in these areas. Further information is available from the Faculty of Business Student Offices, telephone (02) 9514 3500 (City campus) or (02) 9514 5355 (Kuring-gai campus).

Admission requirements

Assumed knowledge/HSC subject selection

For the Bachelor of Business, an assumed knowledge of 2-unit Mathematics is required. An adequate background in English is also necessary; a minimum level such as 2-unit General English in the HSC is recommended. If your secondary or tertiary education was conducted in a language other than English, you should provide evidence of your proficiency in the English language to the Universities Admissions Centre (UAC). The UTS Information Service can provide advice in this regard.

Applicants should obtain a copy of the 2000 UAC Guide.

Subject exemptions and advanced standing

Students who are enrolled in the Bachelor of Business course and have previously undertaken a course of study at a university or at some other recognised tertiary educational institution may be eligible for exemption if subjects previously studied are deemed by the Faculty to be equivalent to those specified for their course. Students should note that eligibility for credit does not guarantee a place in the course for which that credit is available.

A maximum of one third of the degree may be exempted. Requests for exemptions for more than one third and, up to two thirds of the degree, may be considered by Faculty Board. Students are required to apply for exemptions at enrolment in their first semester of study. If a student wishes to request exemptions after their first semester of study in the Bachelor of Business, they are advised to make an appointment with a Student Adviser in the relevant Student Office.

TAFE (NSW)

UTS has an articulated credit transfer policy with TAFE (NSW). Block credit may be granted for a number of completed TAFE Advanced Certificate, Associate Diploma and Diploma and Advanced Diploma courses. These courses must have been completed no earlier than three years before commencement of studies at UTS, i.e. students commencing their Bachelor of Business degrees in 2000 must have completed their TAFE courses in 1996 or later.

Insearch Institute of Commerce

Students who have completed appropriate courses through Insearch Institute of Commerce, if admitted, will be given up to one year's advanced standing in the Bachelor of Business.

Other universities

Students who have completed appropriate subjects at a recognised university may be granted credit for subjects previously undertaken. These subjects must have been completed no earlier than 10 years prior to commencement of studies at UTS - i.e. students commencing their Bachelor of Business degrees in 2000 must have completed their previous university study in 1989 or later. Students applying for exemptions on the basis of subjects completed at institutions other than TAFE should apply, at enrolment. These students will receive information on the application process after they are made an offer.
Private colleges
Students who have completed a course at a private college will not be eligible for any exemptions unless an articulation agreement between the Faculty and the college is in place. Further details can be obtained from the Student Advisors, telephone (02) 9514 3500 (Haymarket campus) or (02) 9514 5355 (Kuring-gai campus).

Transition guidelines
The Bachelor of Business was reviewed and restructured in 1995 with the revised program being offered from the beginning of 1996. The revised program offers students a more flexible structure with greater options. Transition students are able to complete their degree under one of two transition options:

Option A – complete the requirements of the revised degree structure using a combination of completed pre-1996 subjects and new subjects in the revised degree.

or

Option B – complete the requirements of the pre-1996 degree structure using a combination of completed pre-1996 subjects and new subjects in the revised degree.

Transition students who have not commenced the study of a major as part of the pre-1996 degree at the end of Spring semester 1995 will be required to follow Option A.

Credit points relating to any subject will remain those assigned to the subject at the time it was completed, regardless of any deemed equivalence.

Eligibility for Graduation
Option A
Transition students selecting Option A who have completed the requirements of the core, a major and a sub-major, and who have completed 144 credit points of study, may elect to graduate.

Transition students selecting Option A who have completed the requirements of the core, a major and a sub-major, and who have completed 28 subjects of study, but less than 144 credit points, may elect to graduate.

Option B
Transition students selecting Option B who have completed the requirements of the core, and a major or combined major, and who have completed 28 subjects of study, but less than 144 credit points, may elect to graduate.

Option C
Transition students who consider that they have met the requirements for graduation under relevant regulations applying at the time of first enrolment, and who have not met the requirements for graduation detailed in Option A or Option B, may apply in writing to the Student Liaison Manager for consideration.

Subject equivalents
Certain subjects within the Faculty’s courses, both past and present, have been allocated new subject names and/or numbers. For the purpose of administering the rules relating to double and triple failures, and in relation to the Transition Guidelines, these subjects are considered materially the same. Please refer to the Subject equivalents for Bachelor of Business table at the back of this handbook.

Attendance patterns
The Bachelor of Business course may be completed through either a full-time or part-time attendance pattern, or a combination of these. Typical attendance patterns are as follows:

- Full-time is three years (six semesters), usually undertaken at the rate of between four and six subjects per semester.
- Part-time is six years (12 semesters), usually undertaken at the rate of two subjects per semester. Part-time students must be prepared to attend one afternoon or morning class during each teaching week.
- Some subjects are offered in an optional Summer session so that students can 'fast track' their studies.

Students may change their attendance pattern with approval from the Faculty.

Course structure
The Bachelor of Business comprises 144 credit points. All students must complete 12 foundation core subjects (four credit points each), a major (48 credit points), and either a second major (48 credit points), or two sub-majors (24 credit points each), or a single sub-major (24 credit points) in conjunction with elective subjects (24 credit points).
**Bachelor of Business course structure**

- First major
- Elective (or second major)

Semester 11
- First major
- Elective (or second major)

Semester 12
- First major
- Elective (or second major)
21609  Business Strategy (Capstone)

Bachelor of Business majors

Students must undertake a major which consists of 48 credit points (eight 6-credit-point subjects) of study in a related area. Students may also elect to undertake a second major. It should be noted that not all subjects will be offered each semester, and not all majors will be available at both campuses.

Policy on Subject Substitution

Where there is an overlap between majors and sub-majors which enables students to meet the objectives of the relevant majors or sub-majors by taking less than the required credit points, students may substitute any subject chosen from the Faculty of Business to make up the required number of credit points. Students are still required to meet normal prerequisite conditions in choosing a substitute subject. Some majors have specific substitution rules, please refer to the information in specific majors.

Policy on Overspecialisation

Students are normally expected to take 18 credit points of study as sub-majors outside the area of their major to fulfil the objectives of the Bachelor of Business degree in providing a broad business education.

Accounting major

The Accounting major builds upon the core subjects to develop the knowledge, skills, values and other intellectual attributes needed by contemporary and future accountants. The major satisfies the entry requirements of the Australian Society of Certified Practising Accountants and The Institute of Chartered Accountants in Australia.

- 22320  Accounting for Business Combinations
- 22321  Cost Management Systems
- 22420  Accounting Standards and Regulations
- 22421  Management Decisions and Control
- 22520  Corporate Reporting: Professional and Conceptual Issues

plus one of the following streams

Stream 1
- 22522  Assurance Services and Audit
- 79365  Company Law
- 79462  Revenue Law
Undergraduate courses

Stream 2

31414 Information Systems
31424 Systems Modelling
31434 Database Design

or

31508 Programming Fundamentals

---

As part of the Accounting major, Bachelor of Business/Bachelor of Laws (LL02), students may undertake 70417 Corporate Law instead of 79365 Company Law, and 78212 Revenue Law (LLB) instead of 79462 Revenue Law. In turn, these students must undertake additional Business subjects to replace the Law subjects.

Notes:

Stream 1 meets the undergraduate Accounting major education requirements for membership of both the Australian Society of Certified Practising Accountants (ASCPA) and The Institute of Chartered Accountants in Australia.

Stream 2 meets the undergraduate Accounting major education requirements for membership of the Australian Society of Certified Practising Accountants (ASCPA) only. Students completing this stream would need to undertake a combined subject in company and revenue law by external study after admission to Associate Membership as one of the ASCPA's requirements before advancing to the CPA level of membership.

Students should note that the ASCPA will not, in principle, accept conceded passes in subjects required by them. However, the ASCPA will now accept a conceded pass in a first- or second-year subject, provided that a further subject in the same subject area has been passed. Further information can be obtained from the ASCPA.

Banking major

The Banking major provides students with a rigorous introduction to banking and an understanding of the current practices and developments taking place within the industry. Senior Associateship status is offered by the Australian Institute of Banking and Finance (AIBF) for students completing the major and who have appropriate work experience. The Banking major is offered at the City campus only. However, four of the subjects that are common with the Finance major may be offered at the Kuring-gai campus.

25406 Quantitative Techniques for Finance and Economics
25410 Corporate Financial Analysis
25409 Commercial Bank Management
25503 Investment Analysis (or Honours equivalent)
25522 Bank Lending Practice
25620 Derivative Securities
79366 Banking Law
25416 Economics of Money and Finance

Note: Students undertaking a double major offered by the School of Finance and Economics must substitute another Business Faculty subject for each overlapping subject in the double major.

Economics major

The Economics major provides students with the disciplinary and vocational skills needed to pursue a career as a business economist. The major will develop techniques of critical analysis and acquaint students with the evolving domestic and international economic environments. The Economics major is offered at the City campus only.

25406 Quantitative Techniques for Finance and Economics
25210 Microeconomic Theory and Policy
25309 Macroeconomic Theory and Policy
25303 Industry Economics
25315 International Economics
25304 Asian–Australian Economic Relations
25416 Economics of Money and Finance
25305 Labour Market Economics

Note: Students undertaking a double major offered by the School of Finance and Economics must substitute another Business Faculty subject for each overlapping subject in the double major.

Electronic Business major

(subject to final approval)

The focus of the Electronic Business major is on business systems, processes and relationships associated with creating and transferring value in electronic environments among and between organisations, their partners, their alliance groups and to customers or end users. There is a strong emphasis on customer relationships built on a multimedia one-to-one interactive paradigm that is a distinguishing characteristic of advanced electronic business systems.

24307 Electronic Business Principles
24408 Marketing Strategy for Electronic Business
24412 Electronic Business Project
21121 Managing Electronic Business Processes
22523 Assurance in Electronic Business
31950 Networked Enterprise Design
4xxxx Strategic Electronic Business Technologies
79102 Law and the Digital Economy

Finance major

The Finance major provides students with strong intellectual training in the foundation techniques and issues of the finance discipline, enabling them to understand finance, to think...
critically and creatively about financial problems, and to adapt to the rapidly changing financial environment.

25406 Quantitative Techniques for Finance and Economics
25410 Corporate Financial Analysis
25506 Capital Budgeting and Valuation (or Honours equivalent)
25603 Investment Analysis (or Honours equivalent)
25621 Financing Decisions and Capital Market Theory
25420 Applied Financial Management
25421 International Financial Management

Note: Students undertaking a double major offered by the School of Finance and Economics must substitute another Business Faculty subject for each overlapping subject in the double major.

International Business major
The International Business major reflects the growing importance of the global economy in contemporary business activity. The major provides students with a foundation of core studies in international business, a range of international electives, and a capstone subject providing practical experiences in the international business arena.

21591 International Management
25304 Asian–Australian Economic Relations
22240 International Accounting
24220 International Marketing

plus three of the following international elective subjects

21593 International Business and Government
25315 International Economics
25421 International Financial Management
24517 Contemporary International Marketing Issues
24607 International Marketing Management Project
24440 International Promotion and Advertising
79603 International Business Law and Regulation
22309 Accounting for Overseas Transactions
21306 International Employment Relations
21530 Global Strategy
21531 Managing the International Organisation

Any other international subject, (which may include one language and culture subject) with approval of the Director of the International Business major

plus one of the following Capstone subjects

21532 Applied International Business
2518 International Marketing Country Study
21595 International Management Field Study

Notes:
Students who have completed one of the international foundation subjects as part of another major or sub-major will be required to take four international elective subjects rather than three.
24518 International Marketing Country Study and 21595 International Management Field Study involve overseas travel and related expenses (see Subject Coordinator for further details). 21532 Applied International Business does not require overseas travel.
24518 International Marketing Country Study is a 12-credit-point subject. Students who take this subject will only be required to take two of the six-credit-point international elective subjects.

Management major
The Management major provides knowledge of the theoretical basis of management and develops insights and competencies associated with the general practice of management. It covers the specific areas of employment relations, business process management and change management.

21440 Management Skills
21306 International Employment Relations
21221 Organisational Structure and Change
21210 Business, Government and Society
21365 Analysing Management Thinking
21313 Business Process Management
21591 International Management
21630 Management of the Strategy Process

Marketing major
The Marketing major develops an understanding of the role of marketing and its specific nature in different types of domestic and international markets. It examines marketing in the micro and macro environment and helps students to develop essential skills to effectively participate in the marketplace.

24202 Consumer Behaviour
24220 International Marketing
24309 Introductory Marketing Research
24235 Business Marketing
24210 Advertising and Promotions Management
24430 Applications of Marketing Research
24415 Marketing Planning and Strategy
24331 Decision Models in Marketing

or
24203 Quantitative Marketing Analysis

1 24203 Quantitative Marketing Analysis is recommended for those students intending to apply for the Honours program in Marketing.
Sport Management major
(subject to final approval)

The Sport Management major develops an understanding of management and marketing theories and practices within the increasingly dynamic and specialist context in which sport is played, organised and managed. The Sport Management major is offered at the Kuring-gai campus only.

27252 The Sport Industry
27307 Sport Management
27177 Event and Facility Management
27161 Sport Marketing
27253 Sport in the Global Marketplace
27103 The Olympic Games
27628 Law for Leisure, Sport and Tourism
27139 Social Issues in Sport and Exercise

Tourism major

The Tourism major develops an understanding of management, marketing and planning theories and practices within the context of the tourism industry. The major examines the two-way relationship that exists between tourism and its socio-cultural, economic, technological, political, legal and physical environments. The Tourism major is offered at the Kuring-gai campus only.

27184 Introduction to Tourism Systems
27648 The Tourism Industry
27327 Tourism's Environmental Interactions
27185 Introduction to Tourist Behaviour
27324 Strategic Management in Tourism
27523 Leisure and Tourism Planning
21555 Human Resource Management
27642 Tourism Marketing

Bachelor of Business sub-majors

Students who do not choose to take a second major have the opportunity to take two 24-credit-point sub-majors (total 48 credit points), or one sub-major (24 credit points) and 24 credit points of electives (total 48 credit points).

Sub-majors are available to all students except where specified.

It should be noted that not all subjects listed will be offered each semester, and not all sub-majors will be available at both campuses.

Bachelor of Business students

When choosing electives, students should be aware that all prerequisites must be met and that no elective may be materially similar to other subjects taken as part of the student's Bachelor of Business degree. Students who wish to undertake cross-faculty electives within UTS, or with other universities, should seek Faculty approval. The Faculty reserves the right to approve a student's choice of electives. Students will be accommodated in the subjects depending on the availability of class places.

Students will normally be expected to take 18 credit points of their sub-majors outside the area of their major to fulfil the objectives of the Bachelor of Business degree in providing a broad business education. Refer to Policy on Overspecialisation.

Students from other faculties applying to undertake Business electives

Students from other faculties may undertake any subject offered by the Faculty of Business as an elective if they have met all the prerequisites. Students will be accommodated in the subjects depending on the availability of class places. It is the responsibility of students to ensure that their own faculty/school approves their choice of Business electives within the context of the requirements of the program in which they are enrolled.

Sub-majors are offered by the following schools and faculties:

School of Accounting

Sub-major in Contemporary Issues in Accounting

Introduces students to a range of contemporary accounting issues including valuation, superannuation, and other specialised accounting and regulatory areas. This sub-major is offered at the City campus only.
Undergraduate courses

22311 Accounting for Valuation
22312 Accounting for Superannuation
22313 Accounting Implications of Structures and Taxation
22319 Issues in Financial Statement Analysis
22240 International Accounting
22206 Government Accounting
22610 Accounting for Insolvency

Sub-major in Financial Reporting
For students in Bachelor of Business majors other than Accounting who wish to gain a detailed working knowledge of financial reporting issues such as financial statement preparation and its regulatory framework, and international reporting.

22320 Accounting for Business Combinations
22420 Accounting Standards and Regulations
22319 Issues in Financial Statement Analysis
22240 International Accounting
22206 Government Accounting
22610 Accounting for Insolvency

Sub-major in International Accounting
Introduces students to a range of issues, focusing on the comparative development of national accounting systems, international accounting standards and transnational reporting issues. Offered at the City campus only.

22240 International Accounting
22309 Accounting for Overseas Transactions
22420 Accounting Standards and Regulations
79603 International Business Law and Regulation
25421 International Financial Management
21591 International Management
24220 International Marketing
22219 Social and Environmental Accounting

Sub-major in Management Reporting
For students in Bachelor of Business majors other than Accounting who want a detailed working knowledge of management reporting issues e.g. the preparation and management of costs, financial and operational control, performance evaluation, and information systems design and management.

22321 Cost Management Systems
22421 Management Decisions and Control
22318 Contemporary Issues in Management Accounting
31414 Information Systems
31424 Systems Modelling

31434 Database Design
31508 Programming Fundamentals

Sub-major in Professional Accounting and Auditing Practice
Provides Accounting major students with further knowledge and competencies in areas of professional accounting practice. This sub-major is offered at the City campus and, subject to demand, at the Kuring-gai campus.

22026 Ethics and Accountants
22531 Special Topics in Auditing
22517 Advanced Auditing Techniques
79411 Advanced Companies and Securities Law
79606 Advanced Revenue Law
79666 International Aspects of Australian Taxation Law
22610 Accounting for Insolvency

Note: The prerequisite structure for this sub-major can be met by completing the optional Stream 1 within the Accounting major. If Stream 2 is undertaken as part of the major, then the prerequisites for the above subjects need to be completed as part of your electives in the equivalent of the second year of full-time study.

Sub-major in Societal and Corporate Issues in Accounting
Provides students enrolled in any of the majors within the Bachelor of Business with a knowledge of financial reporting issues, legal frameworks and reporting on environmental problems and solutions faced by modern corporate enterprises. It is offered at the City campus and, subject to demand, at the Kuring-gai campus.

22219 Social and Environmental Accounting
79660 Environmental Law in Business
59635 Business and the Media
22206 Government Accounting
22319 Issues in Financial Statement Analysis
22026 Ethics and Accountants

Sub-major in Small Business Accounting
Provides students enrolled in any of the majors within the Bachelor of Business with an introduction to business planning, financial and managerial reporting, and other legal, marketing and accounting issues for small and medium-sized enterprises. It is offered at the City campus only.

22566 Accounting for Small Business 1
22515 Computer-based Accounting

### School of Finance and Economics

#### Sub-major in Banking

Enables students to acquire knowledge and skills that will develop a better understanding of intricate issues and risks facing banks and financial institutions. Senior Associateship status is offered by the Australian Institute of Banking and Finance (AIBF) for students completing the banking sub-major and who have appropriate work experience. This sub-major is offered at the City campus only.

- 25410 Corporate Financial Analysis
- 25459 Commercial Bank Management
- 25522 Bank Lending Practice
- 79366 Banking Law

1. Students undertaking a Finance major or Finance sub-major will be required to substitute 25416 Economics of Money and Finance.

#### Sub-major in Economics

Provides further studies in microeconomic and macroeconomic theory and business policy, and in the key areas of industry and labour market economics. This sub-major is offered at the City campus only.

- 25210 Microeconomic Theory and Policy
- 25309 Macroeconomic Theory and Policy
- 25303 Industry Economics
- 25305 Labour Market Economics

#### Sub-major in Finance

Provides the opportunity for Bachelor of Business students from any major to strengthen their skills in key areas of financial analysis, corporate finance, capital budgeting and investment analysis.

- 25406 Quantitative Techniques for Finance and Economics
- 25410 Corporate Financial Analysis
- 25506 Capital Budgeting and Valuation
- 25905 Capital Budgeting and Valuation (Honours)
- 25503 Investment Analysis
- 25906 Investment Analysis (Honours)

### Sub-major in Insurance

Provides in-depth studies in insurance for business students intending to work in that industry. The Australian Insurance Institute accepts this sub-major, together with requisite professional experience in the insurance industry, for membership. This sub-major is offered at the City campus only.

- 25350 Principles of Risk and Insurance
- 25553 Risk Management
- 25552 Reinsurance
- 25403 Theory of General Insurance

### School of Management

#### Sub-major in Employment Relations

Provides a broad understanding of employment relations frameworks and practices and is designed for those considering a career in either human resources management or industrial relations. This sub-major is offered at the City campus and, subject to demand, at the Kuring-gai campus.

- 21306 International Employment Relations
- 21407 Strategic Human Resource Management
- 21430 Enterprise Bargaining and Workplace Relations
- 79270 Industrial and Labour Law
- 21058 Management Project (Management majors only)

Note: All students should complete 21306 International Employment Relations before undertaking other subjects in the sub-major.

#### Sub-major in International Management

Provides participants with the opportunity to enhance their management competencies in this area through the development of an international specialisation in management. This sub-major is offered at the City campus and, subject to demand, at the Kuring-gai campus.

- 21591 International Management
- 21530 Global Strategy
- 21531 Managing the International Organisation
- 21083 Socially and Ecologically Responsible Business
- 21593 International Business and Government
- 21306 International Employment Relations (non-Management majors only)

Note: Management major students must do 21058 Management Project in place of 21591 International Management.
**Sub-major in Management Practice**

Designed for students in Bachelor of Business majors other than Management who wish to study subjects placing an emphasis on the application of management knowledge.

- 21440 Management Skills
- 21306 International Employment Relations
- 21131 Business Process Management
- 21630 Management of the Strategy Process

**Sub-major in Small and Medium Enterprise Management**

Prepares students for a management role in the small and medium enterprise business sector by providing an understanding of the peculiarities of small and new businesses which differentiate them from large corporations and government enterprises. This sub-major is offered at the City campus on demand and partially at the Kuring-gai campus on demand.

- 21131 Business Process Management
- 21409 Entrepreneurship and Innovation
- 21082 Small and Medium Enterprise Management
- 22566 Accounting for Small Business 1

*Note: Management major students must do 21058 Management Project in place of 21131 Business Process Management.*

**Sub-major in Strategic Management**

Provides students with the opportunity to enhance their management competencies in processes that will position an organisation optimally in its competitive environment. This sub-major is offered at the City campus and, subject to demand, at the Kuring-gai campus.

- 21630 Management of the Strategy Process
- 21530 Global Strategy
- 21407 Strategic Human Resource Management
- 21311 Strategic Supply Chain Management
- 21531 Business Process Management
- 21225 Organisational Structure and Change

*Note: Management major students must do 21058 Management Project in place of 21630 Management of the Strategy Process.*

**School of Marketing**

**Sub-major in Advanced Advertising**

Provides specialised study in the area of advertising and promotions management, developing hands-on experience in applying the major principles and current practices underlying contemporary advertising. This sub-major is offered at the City campus only.

- 24510 Research Methods in Advertising
- 24604 Project in Advertising
  - plus two of the following subjects offered by the Faculty of Humanities and Social Sciences
- 56013 Public Relations Principles and Process
- 59330 Advertising Practice
- 59333 Advertising Strategies

*Note: If 24510 Research Methods in Advertising was completed as part of the Introductory Advertising sub-major, then three subjects from the Faculty of Humanities and Social Sciences should be taken.*

**Sub-major in Advanced Marketing Research**

Allows students the opportunity to develop comprehensive skills in, and an understanding of, the marketing research process and the information technology that supports it. This sub-major is offered at the City campus only.

- 24203 Quantitative Marketing Analysis
- 24666 Research Methods in Marketing
- 24510 Research Methods in Advertising
- 24546 Marketing Research Project

*Note: Students undertaking this sub-major should check subject selection and content with the sub-major coordinator.*

If the Introductory Advertising sub-major or the Advanced Advertising sub-major is undertaken, then both 24546 Marketing Research Project and 55080 Information Issues should be taken, as 24510 Research Methods in Advertising will be completed as part of the other sub-majors.

If the Information Management in Marketing sub-major is undertaken, then the four subjects not yet completed should be taken.

**Sub-major in Business to Business Marketing**

Provides advanced study in the area of business marketing and focuses on the importance of quality service and communication in different organisational and cross-organisational settings. This sub-major is offered at the City campus only.

- 24333 Channels of Distribution
- 24306 Marketing of Services
- 24555 Business Marketing Project
- 21311 Strategic Supply Chain Management

*Note: If 24306 Marketing of Services was completed in the Introductory Marketing sub-major, then another subject must be completed in that sub-major if it is to be completed in addition to the Business to Business Marketing sub-major.*

**Sub-major in Electronic Business**

The Electronic Business sub-major focuses on the emerging electronic environment from a business perspective. Using the Internet as an exemplary electronic business environment,
there is a strong marketing emphasis on developing strategies and practices that promote customer relationships, create customer value, redefine channels of distribution and develop effective virtual communities, using the various technologies and services available within the emerging electronic environment.

24307 Electronic Business Principles
24408 Marketing Strategy for Electronic Business
24412 Electronic Business Project

1 Students may choose any elective conceptually related to electronic business, subject to approval by the sub-major coordinator.

Sub-major in Information Management in Marketing

Provides students in Bachelor of Business majors other than Marketing with the opportunity to develop basic skills in, and an understanding of, the marketing research process and the information technology that supports it. This sub-major is offered at the City campus and partially at the Kuring-gai campus.

24309 Introductory Marketing Research
24331 Decision Models in Marketing
24430 Applications of Marketing Research
24203 Quantitative Marketing Analysis

Note: Students undertaking this sub-major should check subject selection and content with the sub-major coordinator.

Sub-major in International Marketing

Allows in-depth study of how and why firms choose to conduct business in international markets. It provides students with experience of Australian firms’ marketing efforts in international markets and also gives them the option of experiencing international marketing first-hand overseas. This sub-major is offered at the City campus only.

Option 1

(for students not electing to do International Marketing Country Study)

24517 Contemporary International Marketing Issues
24607 International Marketing Management Project
24440 International Promotion and Advertising

— One other approved international subject (which may include a language subject offered by the Institute for International Studies)

Option 2

(for students electing to do International Marketing Country Study)

24517 Contemporary International Marketing Issues
24518 International Marketing Country Study
24440 International Promotion and Advertising or
— One other approved international subject (which may include a language subject offered by the Institute for International Studies)

1 24518 International Marketing Country Study is a 12-credit-point subject taken over two semesters.

Sub-major in Introductory Advertising

Provides students in Bachelor of Business majors other than Marketing with an introduction to the area of advertising and promotions management, focusing on consumer behaviour and management of promotional activities. This sub-major is offered at the City campus and partially at the Kuring-gai campus.

24202 Consumer Behaviour
24309 Introductory Marketing Research
24210 Advertising and Promotions Management
24510 Research Methods in Advertising

If any of the above subjects have been completed in another sub-major, an additional subject or subjects should be selected from the following:

24604 Project in Advertising
56013 Public Relations Principles and Process
59330 Advertising Practice
59333 Advertising Strategies

Sub-major in Introductory Marketing

Provides students in Bachelor of Business majors other than Marketing with the opportunity to develop basic skills in, and an understanding of, the marketing process and marketing management.

24202 Consumer Behaviour
24205 Business Marketing
24220 International Marketing plus one of the following
24309 Introductory Marketing Research
24210 Advertising and Promotions Management
24306 Marketing of Services
School of Leisure, Sport and Tourism

Sub-major in Leisure Management
Provides an understanding of the role of leisure in contemporary society, focusing on the management and marketing of leisure services. This sub-major is offered at the Kuring-gai campus only.
27126 Leisure in Australia
27216 Leisure Services Management
27523 Leisure and Tourism Planning
plus one of the following
27628 Law for Leisure, Sport and Tourism
27306 Marketing of Leisure Services
27179 Festivals and Special Events
27316 Leisure and Fitness Centre Operations

Sub-major in Sport Management
Introduces students to the increasingly dynamic and specialist context in which sport is played, organised and managed. This sub-major is offered at the Kuring-gai campus only.
27307 Sport Management
27161 Sport Marketing
27177 Event and Facility Management
plus one of the following
27628 Law for Leisure, Sport and Tourism
27103 The Olympic Games
27316 Leisure and Fitness Centre Operations
27172 Applied Sport Psychology

Sub-major in Tourism Management
Provides students with a systematic framework for understanding the tourism phenomenon in Australia. This sub-major is offered at the Kuring-gai campus only.
27184 Introduction to Tourism Systems
27648 The Tourism Industry
27642 Tourism Marketing
plus one of the following
27628 Law for Leisure, Sport and Tourism
27185 Introduction to Tourist Behaviour
27523 Leisure and Tourism Planning

Faculty-wide

Sub-major in International Exchange
Students have the option to complete four elective subjects, approved by the Faculty of Business, at an approved exchange destination. These subjects will be recognised as a cohesive unit of study and approved as a sub-major in International Exchange.

Sub-majors in Bachelor of Business offered by other faculties

Faculty of Design, Architecture and Building

Sub-major in Land Economics
Covers the study of the real estate market, examining property investment analysis, and valuation. This sub-major is offered at the City campus on demand.
16352 Valuation Methodology
16751 International Property Investment
16654 Urban Economics

Faculty of Education

Sub-major in Human Resource Development
Fosters both formal and informal learning opportunities in the workplace, and provides a basic understanding of HRD issues and practices. This sub-major is offered at the City campus on demand, and is graded on a pass/fail basis only.
015022 Human Resource Development Practices
015006 Program Development and Needs Analysis
plus two of the following
015141 Human Resource Development Strategies
015034 Program Delivery and Evaluation
015018 Workplace Practicum
015162 Competency Assessment in the Workplace
015054 Organisational Learning: An Experiential Approach

Faculty of Humanities and Social Sciences

The Faculty of Humanities and Social Sciences offers studies in a range of areas including information, journalism, media arts and production, public communication, and writing and contemporary cultures. Sub-majors for Business students are under review as a result of curriculum changes. Students who commenced a Humanities and Social Sciences sub-major prior to 2000 may complete their program by substitution for subjects which no longer exist with the approval of the Associate Dean, Undergraduate Programs. Students may take elective subjects with Humanities and Social Sciences as a part of their Bachelor of Business degree. Students are advised to check with Faculty of Business Student Information Offices for current advice on Humanities and Social Sciences approved Business sub-majors.
Faculty of Law

Sub-major in Business Law
Provides students with a comprehensive understanding of current legal developments as they affect business and develops a better understanding of intricate legal issues, facilitating the planning of current and future commercial strategies.

Choose any four of the following:

- 79161 Introduction to Insolvency Law
- 79162 Corporate Insolvency and Administration
- 79211 Law for Marketing Management
- 79270 Industrial and Labour Law
- 79365 Company Law
- 79366 Banking Law
- 79403 Law and the Manager
- 79462 Revenue Law
- 79502 Industrial and Labour Law
- 79603 International Business Law and Regulation
- 79659 Advanced Commercial Law
- 79660 Environmental Law in Business
- 79662 Business Bankruptcy

One subject from the Taxation Law sub-major

Sub-major in Foundations Law

A sub-major for students enrolled in the Bachelor of Business who are considering transferring between the different degree programs or intending to undertake law studies as a second degree. Provides students with the key legal knowledge of a lawyer and has universal recognition as substantive law subjects in any law degree. This sub-major is offered at the City campus on demand.

- 70211 Law of Contract
- 70311 Law of Tort
- 70317 Real Property

Sub-major in Taxation Law

Offers an integrated sequence of subjects focusing on taxation as the ultimate interface of law, accounting and business enterprises. This sub-major is offered at the City campus only.

- 79606 Advanced Revenue Law
- 79666 International Aspects of Australian Taxation Law
- 79667 Indirect Taxation

plus one of the following

- 79411 Advanced Companies and Securities Law
- 79264 Securities Market Regulations

Faculty of Mathematical and Computing Sciences

Sub-major in Electronic Commerce (Systems)
(subject to final approval)
Provides the analysis and design skills needed to develop electronic commerce systems in modern enterprises. This sub-major is offered at the City campus only.

- 315xx Networking Fundamentals
- 31749 Internet Commerce
- 31950 Networked Enterprise Design
- 31606 Virtual Communities

Sub-major in Mathematics

Provides students with an interest in the applications of mathematics with the opportunity to apply this to a business setting. This sub-major is offered at the City campus only.

- 35101 Mathematics 1
- 35102 Mathematics 2
- 35212 Linear Algebra
- 35231 Differential Equations

Note: 25406 Quantitative Techniques for Finance and Economics is accepted as a prerequisite for 35212 Linear Algebra. Otherwise, students must substitute 35410 Operations Research Modelling for 35231 Differential Equations.

Sub-major in Operations Research

Concerned with the application of mathematical techniques to provide decision support for industry and commerce. This sub-major is offered at the City campus only.

- 33401 Introductory Mathematical Methods
- 35241 Optimisation 1
  plus two of the following
- 35342 Optimisation 2
- 35344 Network Optimisation
- 35363 Simulation Modelling
- 35361 Probability and Stochastic Processes

Note: 25406 Quantitative Techniques for Finance and Economics is accepted as a prerequisite for 35421 Optimisation 1. Otherwise, students must include 35410 Operations Research Modelling in the sub-major, and choose only one of the final four subjects above.
Sub-major in Statistics
Focuses on statistical techniques for the analysis of data used in industry and commerce. This sub-major is offered at the City campus only.
- Introductory Mathematical Methods
- Statistics 2
- plus two of the following
- Regression Analysis
- Quality Control
- Design and Analysis of Experiments
- Probability and Stochastic Processes

Sub-major in Business Analysis and Design/Databases
Provides students with a knowledge of current state-of-the-art databases – relational, object-oriented and distributed – and analysis and design applications. This sub-major is offered at the City campus only.
- Systems Modelling
- Systems Design
- Database Design
- Distributed Databases and Client-Server Computing
- Objectbases

Sub-major in Business Information Technology
Provides a broad overview of the basics of computer hardware, software and major applications. This sub-major is offered at the City campus only.
- Programming Fundamentals
- Systems Modelling
- Systems Design
- Database Design
- Networking 1

Sub-major in Human Factors and Computing in Business
Gives insight into the effects of computers and information technology on staff and the workplace. This sub-major is offered at the City campus only.
- Systems Modelling
- Systems Design
- plus two of the following
- Human–Computer Interaction
- Networked Enterprise Design
- Business Processes and IT Strategy

Sub-major in Programming and Design
Provides skills in systems modelling and design, databases, and object-oriented and procedural programming. This sub-major is offered at the City campus only.
- Programming Fundamentals
- Systems Modelling
- Procedural Programming
- Database Design

Faculty of Nursing, Midwifery and Health
Sub-major in Health Services Management
Designed to provide students with the skills, knowledge and understanding of management as it relates to health services and settings. This sub-major is offered at the Kuring-gai campus only.
- Health Care in Australia
- Trends in Health Care
- Health Services Management
- Health Planning and Evaluation

Faculty of Science
Sub-major in Chemistry
Provides an appropriate knowledge base for business students who aim to enter chemical or related industries. This sub-major is offered at the City campus only.
- Chemistry 1C
- Chemistry 2C
- plus two of the following
- Organic Chemistry 1
- Analytical Chemistry 1
- Physical Chemistry 1
- Inorganic Chemistry 1
- Chemical Safety and Legislation

Sub-major in Health Science
Provides an appropriate knowledge base for business students who wish to enter the health industry. This sub-major is offered at the City campus only.
- Physiological Foundations of Health 1
- Physiological Foundations of Health 2
- Pathophysiology 1
- Pathophysiology 2

Institute for International Studies
Sub-major in International Studies
Uses a focus on society, politics, economics and culture as an introduction to three countries or parts of the world that play a crucial role in Australia's business environment. This sub-major is offered at both the City and Kuring-gai campuses on demand.
Choose any three of the following
- Contemporary China
- Contemporary Japan
- Contemporary South-East Asia
Sub-major in Language other than English (LOTE)
Enables students to develop communicative competence in a language other than English. Three consecutive subjects of 8 credit points each are taken from one of the following language programs: Cantonese, Chinese, French, German, Greek, Indonesian, Italian, Japanese, Malaysian, Russian, Spanish and Thai. Other language programs may be offered subject to availability and demand.
971xxx Language and Culture 1
972xxx Language and Culture 2
973xxx Language and Culture 3

For example:
Chinese
971111 Chinese Language and Culture 1
972111 Chinese Language and Culture 2
973111 Chinese Language and Culture 3

Sub-major in Specialist Country Studies
Offers the opportunity to obtain an introduction to the language and culture of one of Australia's major international economic partners. This sub-major is offered at both the City and Kuring-gai campuses on demand. Choose any one of the following:
China
971111 Chinese Language and Culture 1
972111 Chinese Language and Culture 2
976111 Contemporary China

France
971414 French 1
972414 French 2
976401 Contemporary Europe

Germany
971424 German 1
972424 German 2
976401 Contemporary Europe

Indonesia
971311 Indonesian Language and Culture 1
972311 Indonesian Language and Culture 2
976301 Contemporary South-East Asia

Italy
971434 Italian 1
972434 Italian 2
976401 Contemporary Europe

Japan
971211 Japanese Language and Culture 1
972211 Japanese Language and Culture 2
976211 Contemporary Japan

Latin America
971501 Spanish Language and Culture 1
972501 Spanish Language and Culture 2
976501 Contemporary Latin America

South China
976101 Chinese East Asia

plus
971111 Chinese Language and Culture 1

and
972111 Chinese Language and Culture 2

or
971121 Cantonese Language and Culture 1

and
972121 Cantonese Language and Culture 2

Thailand
971140 Thai Language and Culture 1
972140 Thai Language and Culture 2
976301 Contemporary South-East Asia

1 All inquiries regarding sub-majors offered by the Institute for International Studies should be directed to the Faculty of Business Student Offices at the City campus (Haymarket) (02) 9514 3500 or Kuring-gai campus (02) 9514 5355.

2 For detailed information about Language and Culture subjects, students should refer to the Institute for International Studies Handbook.

Cross-faculty
Sub-major in Aboriginal Studies
Presents a view of Australian social, political and economic life from the perspective of its indigenous people. This sub-major is offered at the City campus on demand.
015110 Aboriginal Cultures and Philosophies
54230 Aboriginal Social and Political History

plus one of the following
015111 Issues in Aboriginal Education
015112 Aboriginal Initiatives in Education: Towards Community Control
54231 Aboriginal People and the Media
54330 The Politics of Aboriginal History
54331 Aboriginal Forms of Discourse

Bachelor of Business electives
Electives or structured elective sequences (24 credit points in total) can be taken from any faculty in the University, or from another university or its equivalent, with Faculty approval.
Bachelor of Business (Honours)

- Course code: B003
- Testamur title: Bachelor of Business (Honours)
- Abbreviation: BBus(Hons)
- Course fee: HECS

The Bachelor of Business Honours program provides an opportunity for advanced study in the disciplinary areas of: accounting, finance and economics; management; or marketing. It provides the ideal foundation for students who plan to pursue a career in applied research in business and the related professions, or who plan to undertake master's or doctoral research studies.

Admission requirements
Students must have completed the Bachelor of Business, or equivalent degree, with an overall credit average and an average mark of 70 (or equivalent for non-UTS students) in the discipline area in which the Honours degree is to be awarded. Admission also requires the approval of the relevant Head of School. Applications should be made on the appropriate University admission form, as well as the Faculty questionnaire. Both forms are available from the Faculty of Business Student Offices.

Attendance pattern
The Honours degree comprises two semesters of intensive full-time study, or in approved cases, four semesters part time.

Course structure
Students must complete 48 credit points of study, comprising a 24-credit-point coursework component and a 24-credit-point thesis component.

Accounting
The Accounting sequence within the Honours program provides students with the knowledge and skills to critically evaluate accounting issues. The coursework component provides groundings in research skills necessary for the critical evaluation of both theoretical issues and empirical studies in accounting. The thesis component focuses on an original study in one of the major areas of the School’s research program, which include market-based accounting research, contracting theory, auditing, and management accounting.

</table>

Finance and Economics
The Finance and Economics sequence within the Honours program brings students up-to-date with the latest theoretical issues in finance and financial economics. It makes students aware of the variety of research methods currently in use in these disciplines. The research project component of the program involves the development of skills in formulating and executing a piece of applied research in one of the areas of finance and financial economics. The program prepares students to execute applied research in the finance and financial economics areas in either industry or postgraduate studies. It is recommended that students undertake this program on a full-time basis.

Management
The Management sequence within the Honours program prepares students to undertake applied research in many areas of management, or to undertake postgraduate research training in the area. The coursework component ensures students are up-to-date with the latest theoretical issues and are aware of the variety of research paradigms currently in use in the conduct of exemplary research. The thesis component focuses on original study in one of the major areas of the School’s research program, which include organisation studies, operations management, employment relations, public and not-for-profit sector management, strategic management and collaboration.
Autumn semester
21908 Advanced Research Methods in Management (Honours)
21910 Researching Organisations and Management
21912 Thesis in Management

Spring semester
21907 Research Methods in Management (Honours)
21909 Theorising Organisations and Management
21911 Thesis in Management (F/T) or
21912 Thesis in Management (P/T)

Marketing
The Marketing sequence within the Honours program prepares students to undertake further academic research or to conduct research in a marketing management position. The coursework component provides students with in-depth knowledge of contrasting theories of marketing, and expertise and skills in a range of research methods and analytical techniques currently in use in the conduct of exemplary research. The thesis component will demonstrate the ability to formulate and execute an original applied research project in some disciplinary area of marketing.

Autumn semester
24901 Advanced Theory in Marketing
24902 Research Methods in Marketing
24903 Readings for Thesis - Marketing
24904 Thesis in Marketing (F/T) or
24905 Thesis in Marketing (P/T)

Spring semester
24907 Advanced Research Methodology - Marketing
24904 Thesis in Marketing (F/T) or
24905 Thesis in Marketing (P/T)
Course structure

All students must complete 240 credit points of study, comprising 144 credit points relating to the Bachelor of Business and 96 credit points relating to the BA in International Studies. For full details of the Bachelor of Business component of the combined degree, please refer to the Bachelor of Business program in this handbook.

In the International Studies component the following specialisations are available: Argentina, Chile, China, France, Germany, Greece, Indonesia, Italy, Japan, Malaysia, Mexico, Russia, South China, Spain, Taiwan and Vietnam. Each includes 32 credit points (four 8-credit-point subjects) of instruction in Language and Culture; 8 credit points of study of Comparative Social Change; 8 credit points of study of Contemporary Society and its context; and 48 credit points (two semesters) of study at an institution of higher education in the country or region of specialisation. For full details of the Bachelor of Arts in International Studies component, please refer to the Institute for International Studies Handbook.

Bachelor of Business/
Diplome d’Etudes
Superieures Europeenes de Management

- Course code: B01C (City campus);
  B01K (Kuring-gai campus)
- Testamur title: Bachelor of Business
  Diplome d’Etudes Superieures Europeenes de Management
- Abbreviation: BBus DESEM
- Course fee: HECS

This program is offered jointly by the Faculty of Business and ESC-Reims Business School, France. The program is four years full-time and integrates two years of study in the Bachelor of Business with two years study in the DESEM, including work experience in France. After successful completion of the program, the student will be awarded a Bachelor of Business degree with a major in International Management and a sub-major in Language Other than English (French). Students will also meet the requirements of award for the DESEM which will be granted by the ESC-Reims Business School.

Further information is available from the Faculty of Business International Student Office, telephone (02) 9514 3597.

Admission requirements

Admission to the double degree program is limited to 10 students per annum, and is based on admission to the Bachelor of Business through normal UAC procedures. A supplementary application form, available from the Faculty of Business International Student Office, must be completed by 30 November in the year prior to applying for admission to the Bachelor of Business. Applicants will be interviewed in January should this be required. It is expected that applicants will have taken French language tuition as part of their HSC, although consideration will be given to students who have gained knowledge of the language by other means. Students will be required to take a sub-major in French as part of their Business studies degree.

Arrangements for overseas study

Payment of all tuition fees for the Bachelor of Business and DESEM will made through the HECS system. All other costs including travel, accommodation, health cover, and student union fees must be met by the student. The student, in conjunction with ESC-Reims
Business School, will arrange the work placement component in France.

Course structure
All students must complete 186 credit points in the Bachelor of Business. A component of this must be 100 ECTS credit points for study in the DESEM at ESC-Reims Business School. Students must also undertake a work placement while in France.

Semester 8
21532  Applied International Business
21609  Business Strategy

BACHELOR OF BUSINESS COMBINED DEGREES

Entry and transfer standards
For combined degree programs involving programs offered by the Faculty of Business and programs from another UTS faculty, the following entry requirements will apply:

- No student will be admitted to a combined degree with a UAI less than 5 points below the entry standard for the Faculty of Business program.
- Where the entry standard for the combined degree is below the Faculty of Business single degree program entry standard, applications for transfer from the combined degree to the single degree program must be made through official UAC procedures.

Business and Computing Sciences (Double degree)

Bachelor of Business
- Course codes: B01C (City campus); B01K (Kuring-gai campus)
- Testamur title: Bachelor of Business
- Abbreviation: BBus
- Course fee: HECS

Bachelor of Science in Computing Science
- Course code: MC02
- Testamur title: Bachelor of Science in Computing Science
- Abbreviation: BSc
- Course fee: HECS

Students initially enrol in the Bachelor of Business degree and must take the Programming and Design sub-major. On satisfactory completion of the Business degree and the Programming and Design sub-major, students may then apply for admission to the Bachelor of Science in Computing Science.
degree. If admitted, students will receive exemptions for the computing core subjects they completed in the Programming and Design sub-major. They will also receive 24 credit points worth of exemptions for electives, the equivalent of a Business sub-major in the Computing Science degree.

Further information is available from the School of Computing Sciences Office, telephone (02) 9514 1803.

Full details of the Bachelor of Science in Computing Science program are contained in the 2000 Faculty of Mathematical and Computing Sciences Handbook. Full details of the Bachelor of Business program are detailed in this handbook.

**Bachelor of Business/Bachelor of Laws**

- **Course code:** LL02
- **Testamur title:** Bachelor of Business Bachelor of Laws
- **Abbreviation:** BBus LLB
- **Course fee:** HECS

The Bachelor of Business/Bachelor of Laws program is offered jointly by the Faculty of Business and the Faculty of Law. The program provides full-time study for students wishing to obtain a professional qualification that satisfies the academic requirements of the Supreme Court of NSW for admission as a legal practitioner, and seeking a business qualification at the same time.

The Law component allows students to complete the Practical Legal Training (24 credit points as elective subjects within the LLB) and by undertaking a concurrent Graduate Certificate of Legal Practice (12 credit points), all under HECS arrangements. Upon completion of their degree students will then complete 16 weeks of practical experience as part of the concurrent Graduate Certificate of Legal Practice. Students are also able to complete up to one half of their practical experience requirements (i.e. maximum eight weeks) up to one year prior to their commencement of the Practical Legal Training. Approval for any practical experience placement must be obtained in advance from the Faculty of Law's Practical Experience Committee.

Alternatively, students may choose to complete their undergraduate degree from the choice of electives and delay Practical Legal Training for up to two years, or even forego such studies completely. Students who decide on this latter course must realise that, under the current rules of the Legal Practitioners Admission Board (LPAB), upon graduation they will not be able to practise as a solicitor or barrister in NSW unless they are able to demonstrate substantial legal experience to the satisfaction of the LPAB.

In the Business component, students have the option to major in one of the specialisations of Accounting, Banking, Economics, Electronic Business, Finance, International Business, Management, Marketing, Sport Management, or Tourism.

After successful completion of the program, the student will be awarded two testamurs i.e. BBus and LLB. The LLB component may be awarded with First or Second Class Honours.

Further information on the overall program is available from the Faculty of Law, telephone (02) 9514 3444. Specific inquiries about the Business component may be directed to the Faculty of Business, telephone (02) 9514 3500.

**Admission requirements**

All programs are offered only to current HSC applicants who attain the HSC UAI mark required for entry.

However, subject to an agreed quota, students who have completed the first or second year of the Bachelor of Business or Bachelor of Laws course with an average mark at distinction level may apply to transfer to the BBus LLB course.

Bachelor of Business students who complete the Foundations in Law sub-major may also apply to transfer to the BBus LLB course.

**Attendance pattern**

The course is of five years’ duration undertaken on a full-time basis. The Law component may require attendance at evening classes.

**Course structure**

The Bachelor of Business/Bachelor of Laws program comprises 240 credit points. All students must complete 14 core law subjects and 12 core business subjects, plus a business major, four law elective subjects, and either an additional four law electives, or the Practical Legal Training.

Bachelor of Business/Bachelor of Laws students must complete a total of 96 credit points of Business Faculty subjects to be eligible for graduation from the Bachelor of Business.
### Course program

#### Stage 1
- 79202 Business Law
- 25110 Microeconomics
- 22105 Accounting A
- 21125 International Business Environment
- 26122 Quantitative Methods for Business
- 25308 Financial Markets

#### Stage 2
- 70113 Legal Process and History
- 70105 Legal Research
- 22205 Accounting B
- 25314 Business Finance

#### Stage 3
- 70217 Criminal Law
- 70211 Law of Contract
- 25209 Macroeconomics
- 21130 Management and Organisations
- 24105 Marketing Principles

Note: Students undertaking the Accounting major must complete Stream 1 within that major. The subject 76212 Revenue Law (LUB) must be taken in the Accounting Concentration.
Bachelor of Engineering/Bachelor of Business

- Course code: E005
- Testamur title: Bachelor of Engineering Bachelor of Business
- Abbreviation: BE BBus
- Course fee: HECS

This program leads to a combined degree of Bachelor of Engineering/Bachelor of Business. Admission to the course gives students the opportunity to undertake the engineering degree in any of the majors on offer (Civil, Civil and Environmental, Computer Systems, Electrical, Environmental Systems, Mechanical, Software or Telecommunications) and similarly the business degree with any major (Accounting, Banking, Economics, Electronic Business, Finance, International Business, Management, Marketing, Sport Management, and Tourism).

Students will, if they wish, be able to gain the award BE BBus DipEngPrac by undertaking one further semester of integrated work experience. Graduates with this combination of qualifications can expect to have a wide range of career opportunities spanning the two disciplines. Obvious opportunities exist for graduates in the application of advanced technology in commercial settings to enhance business competitiveness. Other attributes of engineering graduates such as a systems perspective and skill in the use of quantitative modelling techniques will provide further business career opportunities. For graduates choosing to practice as engineers, the business knowledge will prove invaluable in providing a sound foundation for entrepreneurial initiatives and the commercialisation of engineering innovations. Students normally enter this course directly from high school. The UAI threshold is set by the BBus or the highest cut-off major in the BE DipEngPrac, whichever is higher.

Further information is available from the Faculty of Engineering, telephone (02) 9514 2671.

Full details of this program are contained in the 2000 Faculty of Engineering Handbook.

Bachelor of Medical Science/Bachelor of Business

- Course code: NO07
- Testamur title: Bachelor of Medical Science Bachelor of Business
- Abbreviation: BMedSc BBus
- Course fee: HECS

This program addresses the increasing need for scientific expertise among business practitioners. The combined program will result in the more effective management of science-based enterprises, the more effective application of science through business and the production of graduates with special capabilities in the commercialisation of technologies, inventions and other intellectual property. Graduates will have well developed critical and analytical skills necessary when making decisions in which both scientific and business matters are involved. The admission requirements will be either the UAI for the Bachelor of Medical Science or the Bachelor of Business, whichever is the higher. Non recent school leavers are also encouraged to apply. Further information is available from the Faculty of Science, telephone (02) 9514 1754. Full details of this program are contained in the 2000 Faculty of Science Handbook.

Bachelor of Mathematics and Finance

- Course code: MM03
- Testamur title: Bachelor of Mathematics and Finance
- Abbreviation: BMathFin
- Course fee: HECS

The Bachelor of Mathematics and Finance is offered as a three-year Pass degree with a fourth year Honours degree. The course structure provides for an integrated program of study in mathematics, statistics, finance economics, accounting, business law, and computing.

The mathematical component of the degree provides the necessary background for the mathematical and statistical techniques which are finding increasing usage in the management of large institutional portfolios in general, and the pricing and hedging of modern financial instruments such as futures.
and options in particular. The business components provide students with the grounding in accounting, economics and finance necessary to understand and become practitioners in Australia’s evolving financial system.

Student undertaking this degree will readily find employment with major financial institutions such as banks, insurance companies and government instrumentalities, all of which have a large unmet demand for graduates with sound training in both traditional finance and the mathematical aspects of modern portfolio management.

Further information is available from the School of Mathematical Sciences, telephone (02) 9514 2246.

Full details of this program are contained in the 2000 Faculty of Mathematical and Computing Sciences Handbook.

Bachelor of Science/Bachelor of Business

- Course code: N006
- Testamur title: Bachelor of Science Bachelor of Business
- Abbreviation: BSc BBus
- Course fee: HECS

This program addresses the increasing need for scientific expertise among business practitioners. The combined program will result in the more effective management of science based enterprises, the more effective application of science through business and the production of graduates with special capabilities in the commercialisation of technologies, inventions and other intellectual property. Graduates will have well developed critical and analytical skills necessary when making decisions in which both scientific and business matters are involved. The admission requirements will be either the UAI for the Bachelor of Science or the Bachelor of Business, whichever is the higher. Non recent school leavers are also encouraged to apply.

Further information is available from the Faculty of Science, telephone (02) 9514 1754.

Full details of this program are contained in the 2000 Faculty of Science Handbook.

Bachelor of Accounting

- Course code: BA03
- Testamur title: Bachelor of Accounting
- Abbreviation: BAcc
- Course fee: HECS

The School of Accounting offers a cooperative education program in Accounting. The course is offered on a full-time basis only and includes two semesters in industry. Students continue to study part time while undergoing industrial experience. Industry semester subjects are specially designed to be undertaken co-operatively – theoretical material is ‘fast-tracked’ before the industrial experience program commences and is followed by work-integrated project work.

The Bachelor of Accounting program is offered at the City campus (Haymarket) only.

Further details are available from the Office of Cooperative Education, School of Accounting, telephone (02) 9514 3579.

Course structure

The Bachelor of Accounting comprises 160 credit points and is completed in three years full time. All students must complete 11 foundation core subjects, a compulsory Accounting major, a choice of a second major or a sub-major plus four electives, and two Accounting Experience subjects.

Majors/sub-majors

Students can choose to complete a second major from those offered within the Faculty of Business (full details can be found within the Bachelor of Business program outlined in this handbook). The majors are:

- Banking
- Economics
- Electronic Business
- Finance
- International Business
- Management
- Marketing
- Sport Management
- Tourism

Alternatively, students can elect to complete a sub-major, plus four other elective subjects. Full details can be found within the Bachelor of Business program outlined in this handbook.

1 Fast-track studies undertaken during February.
Professional recognition

Students successfully completing the Bachelor of Accounting will have satisfied the Accounting major educational requirements for undergraduate membership of both the Australian Society of Certified Practising Accountants (ASCPA) and The Institute of Chartered Accountants in Australia.

Students should note that the ASCPA will not, in principle, accept conceded passes in subjects required by them. However, the ASCPA will now accept a conceded pass in a first- or second-year subject, provided that a further subject in the same subject area has been passed. Further information can be obtained from the ASCPA.

Bachelor of Accounting (Honours)

- **Course code:** B003
- **Testamur title:** Bachelor of Accounting
- **Abbreviation:** BAcc(Hons)
- **Course fee:** HECS

Graduates of the Bachelor of Accounting may undertake an Honours program with specialisation in Accounting or Finance. The minimum duration of the Honours program is one year (two semesters) full time and two years (four semesters) part time.

Bachelor of Arts in Leisure Management

- **Course code:** BL10
- **Testamur title:** Bachelor of Arts in Leisure Management
- **Abbreviation:** BA
- **Course fee:** HECS

The Bachelor of Arts in Leisure Management provides students with the knowledge and professional skills necessary to operate within the leisure industry. Graduates of this program develop theoretical knowledge and skills relevant to the organisation, research, planning, administration, marketing and equitable distribution of leisure services. The degree prepares graduates for employment in various leisure industry sectors including community arts, natural resource management, community development, tourism, commercial leisure and sports administration.

Further information is available from the School of Leisure, Sport and Tourism, telephone (02) 9514 5497.

Admission requirements

Admission to the Bachelor of Arts in Leisure Management is available to students who have completed their secondary education in NSW and gained the Higher School Certificate, or the equivalent qualification from another State or country, and mature-age persons where preference will be given to people with vocational experience or tertiary study in leisure or a related field.

Admission with advanced standing

An applicant who presents qualifications additional to those required for admission may be granted advanced standing. It is anticipated that applications for advanced standing will come from the following sources:

1. students who may have completed part or all of an Associate Diploma in Recreation (either at UTS or at an interstate institution);
2. students who may have completed part of a Bachelor's degree program in leisure or recreation or related area of study at another institution;
3. students who have been employed in the leisure field either in a formal capacity or by way of voluntary endeavour for a substantial period of time.

Applications for advanced standing are considered individually on their merits and students will be expected to provide supporting documentation. The granting of credit depends upon the degree of similarity to the nominated UTS equivalent subjects, the level at which the subject was completed, and the length of time elapsed since completion of the subject or attainment of experience.

Course structure
All students must complete at least 144 credit points covering 25 subjects, consisting of 21 core subjects and four elective subjects.

The Bachelor of Arts in Leisure Management is offered at the Kuring-gai campus only.

Attendance patterns
The Bachelor of Arts in Leisure Management course may be completed on either a full-time or a part-time basis. The normal time for completion is three years (six semesters) or part-time equivalent. In special circumstances, the Faculty Board may grant an extension of time to complete. Full-time students should be aware that they will be required to attend evening classes and part-time students daytime classes as part of their program of study.

Bachelor of Arts in Tourism Management

- Course code: BL11
- Testamur title: Bachelor of Arts in Tourism Management
- Abbreviation: BA
- Course fee: HECS

The Bachelor of Arts in Tourism Management provides students with a strong understanding of the distinctive features of tourism and the tourism industry, with the knowledge and range of skills that provide the flexibility to manage effectively in an environment of significant growth and change. The program also develops students' understanding of tourism as an increasingly important social phenomenon, in order to foster an appropriately critical approach to this field of study. The course is available at the Kuring-gai campus only.

The Bachelor of Arts in Tourism Management is distinctive in five respects:

1. It follows a broad and holistic approach to the study of tourism. Explicit coverage is given to all essential elements of the tourism phenomenon (including those that are non-industrial), and to the environments with which tourism interacts.

2. The program is interdisciplinary, making use of systems theory to create a framework for subsequent interdisciplinary description, analysis and inquiry.

3. The program gives full coverage to all of the tourism industry's sectors. The level and breadth of this approach enables students to develop a comprehensive awareness and understanding of tourism system elements and the tourism industry sector's significant interrelationships. Within this approach, students are free to choose whether or not to specialise in any particular industry sector or other aspect of tourism.

4. It has a practical hands-on industry operations component. This takes the form of a two-subject module with students choosing either the Hospitality Operations module or the Travel and Tourism operations module.

5. It has an industry experience component that includes a minimum of 10 weeks of work experience during the course. Students are required to carry out a major industry-related management project. These features ensure the program's tourism industry relevance.

Electives and sub-major

Electives available within the program may be chosen from a wide range of subjects offered by the School of Leisure, Sport and Tourism. Approval for electives outside the School of Leisure, Sport and Tourism should be sought from the Course Director.

Students may, if they wish, choose from a range of specified subjects to complete a sub-major in: Community Recreation; Tourism; Sport Management; or Arts and Entertainment.
Further information is available from the School of Leisure, Sport and Tourism, telephone (02) 9514 5497.

**Admission requirements**

Admission to the Bachelor of Arts in Tourism Management is available to students who have completed their secondary education in NSW and gained the Higher School Certificate, or the equivalent qualification from another State, and mature-age persons where preference will be given to people with vocational experience in tourism or a related field.

Students who have completed appropriate courses through the Insearch Institute of Commerce, if admitted, may be given up to one year’s advanced standing in the Bachelor of Arts in Tourism Management.

**Admission with advanced standing**

After admission to the School, students may apply for advanced standing in subjects in which they consider themselves eligible. Equivalence of subject matter is the main criterion for the award of advanced standing in a subject successfully completed at another institution.

**Attendance patterns**

The Bachelor of Arts in Tourism Management is taught on a full-time basis only. The normal time for completion of requirements is three years (six semesters).

Students will be required to attend some evening classes as part of their program of study.

In addition, students will be required to undertake a minimum of 10 weeks’ industry-related work experience during the course.

**Course structure**

Students must complete at least 144 credit points, consisting of 22 core subjects and three elective subjects.

**Typical full-time program**

**Semester 1**

- 27184 Introduction to Tourism Systems
- 27648 The Tourism Industry
- 22105 Accounting A
- 25222 Applied Economics

**Semester 2**

- 24105 Marketing Principles
- 22205 Accounting B

**Semester 3**

- 27185 Introduction to Tourist Behaviour
- 27327 Tourism’s Environmental Interactions
- 21130 Management and Organisations
- 27163 Tourism Industry Practicum
- 27156 Research Methods 1

**Semester 4**

- 21555 Human Resource Management
- 27323 Leisure and Public Policy
- 27157 Research Methods 2
- 27642 Tourism Marketing

**Core subjects**

- 27324 Strategic Management in Tourism
- 27166 Tourism Studies Project 2
- 2x6-credit-point subjects
  - 27184 Introduction to Tourism Systems
- 27648 The Tourism Industry
- 27185 Introduction to Tourist Behaviour
- 27327 Tourism’s Environmental Interactions
- 27163 Tourism Industry Practicum
- 27155 Research Methods 1
- 21555 Human Resource Management

### Bachelor of Arts in Human Movement Studies

- **Course code:** BL12  
- **Testamur title:** Bachelor of Arts in Human Movement Studies  
- **Abbreviation:** BA  
- **Course fee:** HECS

The Bachelor of Arts in Human Movement Studies is currently under review and proposed changes are subject to University approval. These changes will include the addition of a new BA degree in Sport and Exercise Management. Please contact the School of Leisure, Sport and Tourism for further information regarding these degrees.

The Bachelor of Arts in Human Movement Studies was developed as a result of the significant demand for professionals able to provide physical activity services to all sectors of the community.

The course provides students with a strong understanding of the processes and mechanisms underlying human movement, and with the knowledge and skills necessary to manage and plan human movement activities in the leisure and education contexts. The course will provide graduates with the necessary skills to gain initial employment in the human movement field as well as the analytical skills necessary for critical appraisal of developments in the field.

The program not only provides a substantial academic and professional grounding in human movement, but it also allows students to focus on a particular aspect of the field through specialisations in human movement science, fitness management, sports management and outdoor education.

Further information is available from the School of Leisure, Sport and Tourism, telephone (02) 9514 5497.

### Admission requirements

Admission to the Bachelor of Arts in Human Movement Studies is available to students who have completed their secondary education in NSW and gained the Higher School Certificate, or the equivalent qualification from another State, and mature-age persons where preference will be given to people with vocational experience in the broad human movement field.

### Electives

Students are given the opportunity to choose electives from the School, Faculty or wider University. In special circumstances, students may complete electives at a university other than UTS. This option must be approved by the Course Coordinator. The electives offered by the School with specific relevance to this course include: Transportation in Tourism; International Tourism; Literature of Travel and Tourism; Tourism Project Development; Ecotourism; Events Management; Outdoor Education 1 and 2; and Tourism Recreation and Protected Areas 1 and 2.

In addition, students may choose from the core within the Bachelor of Arts in Leisure Management and Bachelor of Arts in Human Movement Studies programs, subject to meeting prerequisite requirements.
Admission with advanced standing

After admission to the School, students may apply for advanced standing in subjects in which they consider themselves eligible. Equivalence of subject matter is the main criterion for the award of advanced standing in a subject successfully completed at another institution.

Attendance patterns

The Bachelor of Arts in Human Movement Studies is taught on a full-time basis only. The normal time for completion of requirements is three years (six semesters).

Students will be required to attend evening classes as part of their program of study. The course is offered at the Kuring-gai campus only.

Course structure

Students must complete at least 144 credit points over 28 subjects, consisting of 24 core subjects and four elective subjects.

Typical full-time program

Semester 1

27183 Introduction to Human Movement Studies
65014 Chemistry (Human Movement)
27149 Functional Kinesiology
27189 Workplace Learning 1

Semester 2

- Abbreviation: BA(Hons)
- Course fee: HECS

The Faculty of Business offers an Honours program designed to provide students with the resources to further develop and apply their research skills and to pursue, in-depth, special areas of interest. It is offered only at the Kuring-gai campus.

The Honours program aims to:

1. develop, at an advanced undergraduate level, knowledge of leisure, tourism or human movement through the medium of research;
2. facilitate the completion of a substantive research thesis which focuses on theory, applied/professional issues or some combination of these;
3. provide a direct pathway to graduate level study; and
4. make contributions to knowledge in the field of leisure, tourism management or human movement.

Admission requirements

Admission to the Honours program is open to students who have successfully completed the BA in Leisure Management, the BA in Tourism Management or the BA in Human Movement Studies, and who have maintained a credit average or better in the final two full-time semesters. Graduates from other institutions who have completed a comparable course and who meet the academic criteria will be considered for admission. Final selection will be based on academic merit.

Entry to the BA (Honours) by professional experience

In exceptional cases, consideration will be given to applicants who have completed the BA in Leisure Management, the BA in Tourism Management or the BA in Human Movement Studies at Pass level. These applicants may, within a period of three calendar years from their graduation, apply for admission to the Honours program. In such cases, where applicants may not have fully met the criteria listed above, outstanding professional achievements will be taken into account. Each particular application in this category will be considered on its merits.

Attendance patterns

The Honours component of the Bachelor of Arts program will normally be completed in one year (two semesters) full time or two years (four semesters) part time.

Course structure

All students must complete three coursework subjects, each worth six credit points, and a major thesis of 30 credit points, totalling 48 credit points. Coursework subjects include Advanced Research Methods for Leisure and Tourism and two elective subjects.

The precise nature of each student's program will be determined in consultation with the Honours Course Coordinator. The aim will be to choose those subjects that will facilitate completion of the Honours Research Thesis.

Electives
1. 27154 Readings for Thesis may be substituted for an elective with the approval of the Course Coordinator.
2. Both elective subjects may be completed in the first semester.
3. Electives must be chosen from subjects available in the Graduate Diploma programs of the School of Leisure, Sport and Tourism.
4. Students may choose other graduate level or senior undergraduate level subjects as electives with the approval of the Course Coordinator. These subjects may be taken from other Schools of the Faculty or elsewhere in the University.

Bachelor of Arts in Leisure Management and in International Studies

- Course code: BL17
- Testamur title: Bachelor of Arts in Leisure Management and in International Studies
- Abbreviation: BA
- Course fee: HECS

The Bachelor of Arts in Leisure Management and in International Studies is offered jointly by the Faculty of Business and the Institute for International Studies at UTS. The five-year, full-time degree integrates Leisure Management with a major in the language and culture of another country. Students spend the fourth year of study at a university overseas.

Admission requirements
Admission to the combined degree will be on merit according to the admissions policy for the Bachelor of Arts in Leisure Management. There are no prior language requirements for the International Studies component of this combined degree, however, some majors within the International Studies program do have specific admission requirements. Entry to the Greece and Vietnam majors is restricted to students who have a sound working knowledge of the language of their selected specialisation. Study of Language and Culture depends on the individual student’s level of language proficiency before entry to the program. There is a range of entry levels to the various Language and Culture programs. Students are admitted to the International Studies program with no guarantee of entry to a specific major, although every effort is made in trying to meet students’ preferences.

Arrangements for In-country Study
All students are required to complete four consecutive semesters of the study of language and culture before proceeding to In-country Study.

The costs of tuition in host institutions overseas and travel between Sydney and the designated host institutions are borne by UTS except in cases where a scholarship has been awarded to the student with provision for these costs. Under these circumstances, the funds that would have otherwise been allocated towards the student’s tuition and travel will be redirected to support the In-country Study program in general. In most cases the cost of
living for the period of In-country Study will not exceed the cost of living away from home in Sydney. However, students should be aware that the cost of living in some countries – notably Japan – may be higher than in Sydney.

Course structure
All students must complete 240 credit points of study comprising 144 credit points relating to the Bachelor of Arts in Leisure Management and 96 credit points relating to the BA in International Studies. For full details of the Bachelor of Arts in Leisure Management component of the combined degree, please refer to the Bachelor of Arts in Leisure Management program in this handbook.

In the International Studies component, students choose one of the following specialisations: Argentina, Chile, China, France, Germany, Greece, Indonesia, Italy, Japan, Malaysia, Mexico, Russia, South China, Spain, Taiwan, Thailand and Vietnam.

Each specialisation includes 32 credit points (four 8-credit-point subjects) of instruction in Language and Culture; 8 credit points of study of Comparative Social Change; 8 credit points of study of Contemporary Society and its context; and 48 credit points (two semesters) of study at an institution of higher education in the country or region of specialisation. For full details of the Bachelor of Arts in International Studies component, please refer to the 2000 Institute for International Studies Handbook.

Bachelor of Arts in Human Movement Studies and in International Studies

- Course code: BL15
- Testamur title: Bachelor of Arts in Human Movement Studies and in International Studies
- Abbreviation: BA
- Course fee: HECS

The Bachelor of Arts in Human Movement Studies and in International Studies is offered jointly by the Faculty of Business and the Institute for International Studies at UTS. The five-year, full-time degree integrates Human Movement Studies with a major in the language and culture of another country. Students spend the fourth year of study at a university overseas.

Admission requirements

Admission to the combined degree will be on merit according to the admissions policy for the Bachelor of Arts in Human Movement Studies. There are no prior language requirements for the International Studies component of this combined degree, however, some majors within the International Studies program do have specific admission requirements. Entry to the Greece and Vietnam majors is restricted to students who have a sound working knowledge of the language of their selected specialisation. Study of Language and Culture depends on the individual student's level of language proficiency before entry to the program. There is a range of entry levels to the various Language and Culture programs. Students are admitted to the International Studies program with no guarantee of entry to a specific major, although every effort is made in trying to meet students' preferences.

Arrangements for In-country Study

All students are required to complete four consecutive semesters of study of language and culture before proceeding to in-country Study.

The costs of tuition in host institutions overseas and travel between Sydney and the designated host institutions are borne by UTS except in cases where a scholarship has been awarded to the student with provision for these costs. Under those circumstances, the funds that would have otherwise been allocated towards
the student’s tuition and travel will be redirected to support the In-country Study program in general. In most cases the cost of living for the period of In-country Study will not exceed the cost of living away from home in Sydney. However, students should be aware that the cost of living in some countries—notably Japan—may be higher than in Sydney.

**Course structure**

All students must complete 240 credit points of study, comprising 144 credit points relating to the Bachelor of Arts in Human Movement Studies and 96 credit points relating to the BA in International Studies. For full details of the Bachelor of Arts in Human Movement Studies component of the combined degree, please refer to the Bachelor of Arts in Human Movement Studies program in this handbook. In the International Studies component, students choose one of the following specialisations: Argentina, Chile, China, France, Germany, Greece, Indonesia, Italy, Japan, Malaysia, Mexico, Russia, South China, Spain, Taiwan, Thailand and Vietnam.

Each specialisation includes 32 credit points (four 8-credit-point subjects) of instruction in Language and Culture; 8 credit points of study of Comparative Social Change; 8 credit points of study of Contemporary Society and its context; and 48 credit points (two semesters) of study at an institution of higher education in the country or region of specialisation. For full details of the Bachelor of Arts in International Studies component, please refer to the 2000 Institute for International Studies Handbook.

1 The study of Language and Culture depends on the individual student's level of language proficiency before entry to the program. There is a range of entry levels to the various Language and Culture programs.

2 Students undertake one of the following pairs of subjects:
   China
   Comparative Social Change
   Contemporary China

   Indonesia, Malaysia, Vietnam or Thailand
   Comparative Social Change
   Contemporary South-East Asia

   Japan
   Comparative Social Change
   Contemporary Japan

Bachelor of Medical Science/Bachelor of Arts in Human Movement Studies
This combined degree program is under development by the Faculty of Science in conjunction with the Faculty of Business. Further details are available from the Faculty of Science, telephone (02) 9514 1754, or the School of Leisure, Sport and Tourism, telephone (02) 9514 5497.

Bachelor of Arts in Community Management
- Course code: BB07
- Testamur title: Bachelor of Arts in Community Management
- Abbreviation: BA
- Course fee: HECS

The Bachelor of Arts in Community Management is a specialised course for people already working in nonprofit organisations. The course provides students with a broad understanding of the context of nonprofit organisations and the industries in which they operate, a working knowledge of nonprofit organisations, and a comprehensive foundation in management skills applicable to nonprofit management.

Course structure
The Bachelor of Arts in Community Management comprises 144 credit points and is completed in six years part time.
All students must complete 10 core subjects that provide introductory level coverage of basic contextual issues (including the nonprofit sector, social policy and theory, economics and marketing), key features of nonprofit organisations, and basic management skills (such as financial and human resource management). A final major project-based subject in the strategic management of
nonprofit organisations will assist students to integrate theory and practice across a range of skills and knowledge areas.

A Community Management major extends these areas in several ways. Contextual understanding is extended through exploration of recent nonprofit theory, and of the particular relationship between the nonprofit sector and government. Students' understanding of nonprofit organisations is further developed through exploration of theory and practice with regard to the activities and organisational performance aspects of nonprofit management. Specific management skills in the areas of law and resource management are extended.

Students may then complete their program by taking an industry program of four work-based community management projects and an industry training program, a major from another degree, or combinations of sub-majors and electives.

Further details are available from Jenny Green, Lecturer in Community Management, telephone (02) 9514 5440.
Bachelor of Arts in Adult Education and Community Management
( Aboriginal and Torres Strait Islander Program)

- Course code: B009
- Testamur title: Bachelor of Arts in Adult Education and Community Management
- Abbreviation: BA AdEd CommMgmt
- Course fee: HECS

The Bachelor of Arts in Adult Education and Community Management addresses the professional development needs of indigenous people who are involved in community education and the management of community-based organisations.

The course provides an understanding of the context of community and nonprofit organisations, and the theoretical frameworks underpinning the role of these organisations in the political and economic environment. Key concepts are introduced and students are assisted in situating their organisations and interests within the wider environments in which they operate.

### Admission requirements

The course assumes a basic familiarity with nonprofit and community organisations that require applicants to have been involved in the sector for a minimum of one year in either a paid or unpaid capacity. As a consequence, all students will enter as mature-age students. Course entry is not based on UAI.

Students who have completed the TAFE Advanced Certificate in Community Management in the three years prior to entry to these courses will be eligible to apply for a block of exemptions that includes up to three subjects. Students should provide a TAFE Statement of Attainment attached to an Application for Exemption form.

### Course structure

The Bachelor of Arts in Adult Education and Community Management comprises 144 credit points and is completed in three years full time or six years part time. Subjects are run in block release format requiring students to attend for one week or two weeks at a time.

An Advanced Diploma may be awarded to students who choose to exit the program after successful completion of 96 credit points of core subjects.

Further information is available from Sonya Pearce, Indigenous Programs Coordinator, telephone (02) 9514 3774 or email sonya.pearce@uts.edu.au.

#### Adult Education Major

POSTGRADUATE COURSES

The Graduate School of Business offers a range of MBA programs and a number of Master’s degrees, Graduate Diplomas and Graduate Certificates by coursework. In addition, PhD programs and Master’s by thesis programs are also offered.

Office location
The Graduate School of Business Information Office is located on:
Level 5, Building 5, Quay Street, Haymarket.
The office is open from:
9.00 a.m. – 8.00 p.m. Monday to Friday
Telephone: (02) 9514 3660
Fax: (02) 9514 3554
Email: graduate.business@uts.edu.au
Online at: http://www.bus.uts.edu.au/gsb

Rules of the University
The University’s Rules are published in full in the UTS Calendar. A summary of some key Rules and Faculty policies relating to students can be found in the front section of this handbook.
The full Rules are published online at http://www.uts.edu.au/div/publications/policies/rules/contents.html

Additional rules of importance to postgraduate coursework students
Exemptions
Exemptions are granted on the basis of the successful completion of equivalent subjects from either recent undergraduate, or recent postgraduate, studies. Students should lodge an Application for Subject Exemption form if they wish to apply for exemptions from subjects within their enrolled course.

Postgraduate subject exemptions will normally not be granted where prior studies were undertaken in a course studied more than 10 years previously. Postgraduate subject exemptions will also not be granted for prior sub-degree TAFE studies. In both instances, students can apply to the Course Director for credit by substitution or to the Subject Coordinator for subject exemption by challenge, where appropriate.

Exemptions for electives will only be considered for prior postgraduate studies.
The maximum number of exemptions allowed in each course under the Faculty of Business policy are:
Graduate Certificates
Maximum of two exemptions for postgraduate level study only.
No exemptions for undergraduate study or TAFE study will be granted at Graduate Certificate level.
Graduate Diplomas
Maximum of five exemptions, of which up to two may be for undergraduate study.
Master’s degrees (excluding MBA)
Maximum of eight exemptions, of which up to four may be for undergraduate study.
MBA
Maximum of 10 exemptions, of which up to four may be for undergraduate study.
Articulation
While courses are offered as stand-alone qualifications, they are also integrated programs of study that enable students who satisfactorily complete the Graduate Certificate or Graduate Diploma to apply for entry to a higher level course within their chosen field of study. Where a student articulates from one level of study to another, only one testamur will be issued.
RESEARCH PROGRAM

Doctor of Philosophy

Accounting
- Course code: BA54
- Testamur title: Doctor of Philosophy
- Abbreviation: PhD
- Course fee: HECS or scholarship¹

Finance and Economics
- Course code: BF52
- Testamur title: Doctor of Philosophy
- Abbreviation: PhD
- Course fee: HECS or scholarship¹

Leisure and Tourism Studies
- Course code: BL80
- Testamur title: Doctor of Philosophy
- Abbreviation: PhD
- Course fee: HECS or scholarship¹

Management
- Course code: BB56
- Testamur title: Doctor of Philosophy
- Abbreviation: PhD
- Course fee: HECS or scholarship¹

Marketing
- Course code: BM52
- Testamur title: Doctor of Philosophy
- Abbreviation: PhD
- Course fee: HECS or scholarship¹

The PhD is a University-wide degree that involves an intense period of supervised study and research. The degree of Doctor of Philosophy is awarded to successful candidates who have made a distinct contribution to knowledge whether by original investigation, review or criticism.

¹ The University and the Faculty usually allocate Higher Education Contribution Scheme Scholarships to some PhD students. These scholarships are reviewed annually. There are, however, Union and Students’ Association fees to be paid for the use of student facilities.

Admission requirements
To be eligible for admission to the program, an applicant should: hold a relevant Bachelor’s degree with First or Second Class Honours, Division 1; or a Master’s degree; or possess an equivalent qualification; or be a graduate of at least two years’ standing of this University or another tertiary educational institution, whose research publications and written reports on work carried out by the applicant satisfy the Academic Board that he or she has the ability and experience to pursue his or her proposed course of study.

Further details of eligibility for admission are set out in the UTS Rules for Doctoral Degree Students published in the UTS Calendar and online at http://www.uts.edu.au/div/publications/policies/rules/contents.html

Course requirements
It is anticipated that all PhD candidates will be able to classify their area of research interest to fit primarily into one of the disciplinary areas of the Faculty’s five teaching schools which are: Accounting; Finance and Economics; Leisure and Tourism Studies; Management; and Marketing.

Candidates enrolled full-time in a PhD are required to make satisfactory progress on their research over at least four semesters to be eligible for the award of a PhD degree. However, the more usual time for completion is six semesters, and a part-time student may expect to complete their thesis in eight to 10 semesters.

Supervision
In the course of making an application, prospective PhD candidates are asked to submit a brief statement on their intended area of research. This statement and an interview with the PhD Coordinator of the relevant school will be used as the basis for allocating a supervisor who has expertise appropriate to the candidate’s interests. Co-supervisors will also be appointed and these can be drawn from other schools and faculties within the University (or other universities), depending on the PhD topic and the expertise required to ensure a high standard of supervision.

Coursework requirements
Candidates with an insufficient background in research methods and/or theoretical knowledge in the core fields of study may be required to undertake initial coursework
Final thesis

While candidates may be required to do some coursework, the final assessment for the degree is based on submission of a thesis. The thesis is examined by three examiners, of which at least two are external to the University and who are experts in the area of research addressed in the thesis. Guidelines for presentation and submission of theses are available from the University Graduate School.

Students often ask what length a thesis should be, but exact limits cannot be prescribed. Quality rather than quantity is the most important criterion. However, as an approximate guide, a thesis is typically argued and presented within the range of 50,000–70,000 words.

Assessment during candidature

Both the candidate and the candidate's principal supervisor are required to submit progress reports at the end of each semester. In addition, a student's candidature will be assessed before or at the end of the first two semesters of candidature in the case of a full-time student, or the first four semesters in the case of a part-time student. This assessment is conducted under guidelines approved by Faculty Board and the University Graduate School Board. The following components, considered by a Review Panel, constitute the assessment: satisfactory semester progress reports; successful completion of prescribed coursework prior to the assessment; a written thesis proposal; and an oral seminar on the research topic and written proposal.

The thesis proposal is a substantive piece of scholarship that should identify the research topic/questions, justify it (their) significance and original contribution to knowledge in the field of study, do the former against a critical review of the relevant literature, address resource implications, and outline the proposed research design and methods. Candidates should seek advice from School Research Coordinators on how to formulate a thesis proposal.

A student who does not satisfy the requirements for the assessment will not be permitted to proceed with their candidature, unless with the approval of the Academic Board, the student is invited to re-attempt the assessment.

Master of Business (by thesis)

Accounting
- Course code: BA70
- Testamur title: Master of Business
- Abbreviation: MBus
- Course fee: HECS or scholarship

Finance and Economics
- Course code: BF70
- Testamur title: Master of Business
- Abbreviation: MBus
- Course fee: HECS or scholarship

Management
- Course code: BB70
- Testamur title: Master of Business
- Abbreviation: MBus
- Course fee: HECS or scholarship

Marketing
- Course code: BM70
- Testamur title: Master of Business
- Abbreviation: MBus
- Course fee: HECS or scholarship

The Faculty offers a limited number of places each year to suitably qualified students to follow a program of study leading to the award of Master of Business. This program is for graduates seeking to extend and deepen their knowledge by undertaking an appropriate research investigation under supervision by academic staff of the Faculty. For each candidate a member of the University staff is appointed as principal supervisor. Additional supervisors may be appointed to cover a particular interdisciplinary need or when the location of a candidate's research makes sustained face-to-face contact with the principal supervisor difficult.

1 Course fees for Master of Business (by thesis) programs may be covered by a HECS or faculty scholarship, which is reviewed annually. There are, however, Union and Students’ Association fees to be paid for the use of student facilities.

Admission requirements

The University's general rules for Master's degrees (by thesis) apply to the Master of Business. To be eligible for admission to the Master’s degree program, applicants should...
hold a Bachelor of Business degree from the University of Technology, Sydney, or hold an equivalent qualification, or submit other evidence of general and professional qualifications which will satisfy the Academic Board that the applicant possesses the educational preparation and capacity to pursue graduate studies. Applicants must also satisfy such additional requirements as may be prescribed by the Faculty Board.

Each applicant is required, prior to admission, to discuss a thesis topic with the School Research Coordinator who will then advise whether the thesis topic is manageable. Applicants may also be required to submit a brief thesis proposal with their application.

### Course requirements

Two subject requirements have been established to assist candidates with the preparation of their theses. The first is a research techniques subject and the second involves formal seminar presentations giving an update of thesis research. Each of the four schools coordinates and organises its own two-subject sequence. These are detailed below:

**School of Accounting**
- 22785 Research Techniques in Accounting
- 22786 Research Seminars in Accounting

**School of Finance and Economics**
- 25785 Research Techniques in Finance and Economics
- 25786 Research Seminars in Finance and Economics

**School of Management**
- 21785 Research Techniques in Management
- 21786 Research Seminars in Management

**School of Marketing**
- 24785 Research Techniques in Marketing
- 24786 Research Seminars in Marketing

Students are required to complete the two-subject sequence relevant to their thesis topic. For example, a student who is researching a topic in Accounting will be required to complete 22785 Research Techniques in Accounting and 22786 Research Seminars in Accounting.

The first subject is normally taken in Autumn semester, immediately following admission to the course. This subject introduces each candidate to a range of methodologies used in researching business topics.

The second is a continuing subject, taken every semester, which allows students to present papers related to their own research and to become aware of the work of other students. Attendance at these seminars is compulsory, as is the presenting of a paper each semester as directed by the School Research Coordinator. The seminars will be held at times arranged by each school.

In addition to enrolling in the above two subjects, candidates may be required to enrol in subjects specified by their supervisors. Successful completion of these subjects will contribute towards satisfactory progress in the program.

The main requirement of the degree is the preparation of a thesis which is judged by its examiners to be "...a distinct contribution to the knowledge of the subject whether by original investigation or by review, criticism or design".

The thesis is examined by two examiners, of which at least one is external to the University, and who are experts in the area of research addressed in the thesis. Guidelines for presentation and submission of theses are available from the University Graduate School.

The thesis itself is expected to be in the vicinity of 40,000–50,000 words, and be of distinct relevance to business in areas such as accounting, marketing, finance and economics, and management.

The usual time for completion for a candidate enrolled in a Master's degree is four semesters for full-time study, and six semesters for part-time study.

### Assessment during candidature

Both the candidate and the candidate's principal supervisor are required to submit progress reports at the end of each semester. In addition, a student's candidature will be assessed before or at the end of the first two semesters of candidature in the case of a full-time student, or the first three semesters in the case of a part-time student. This assessment is conducted under guidelines approved by the Faculty Board and the University Graduate School Board. The following components, considered by a Review Panel, constitute the assessment: satisfactory semester progress reports; successful completion of prescribed coursework prior to the assessment; a written thesis proposal; and an oral seminar on the research topic and written proposal.

The object of this assessment is to ensure that the student is equipped with the knowledge to carry out their research program, and that sufficient progress has been made to enable
completion within the prescribed time. As part of this assessment the student will normally present a seminar to the University on their topic and methodology.

A student who does not satisfy the requirements for the assessment will not be permitted to proceed with their candidature, unless with the approval of the Academic Board, the student is invited to re-attempt the assessment.

**Master of Arts (by thesis)**

**Arts Management**
- Course code: BL76
- Testamur title: Master of Arts
- Abbreviation: MA
- Course fee: HECS or scholarship

**Leisure Studies**
- Course code: BL70
- Testamur title: Master of Arts
- Abbreviation: MA
- Course fee: HECS or scholarship

**Sports Studies**
- Course code: BL74
- Testamur title: Master of Arts
- Abbreviation: MA
- Course fee: HECS or scholarship

**Tourism Studies**
- Course code: BL72
- Testamur title: Master of Arts
- Abbreviation: MA
- Course fee: HECS or scholarship

The course is suitable for students who have already completed a wide range of coursework and who wish to develop in a more focused way by means of research, through:
- the development of critical and analytical skills as applied to management and theory in one of the four fields of study;
- the development of advanced research skills to enable in-depth exploration of a chosen specialisation.

**Admission requirements**

To be eligible for admission to the Master of Arts program in the Faculty of Business, applicants should: hold a Bachelor of Arts degree in Human Movement Studies, Leisure Management, or Tourism Management from the University of Technology, Sydney, or equivalent qualification, and submit any other evidence of general and professional qualifications and experience which will satisfy the Academic Board that the applicant possesses the educational preparation and capacity to pursue graduate research studies; and satisfy such additional requirements as may be prescribed by the Faculty Board.

Prior to admission, each applicant is required to discuss a thesis topic with the School Research Coordinator who will then advise whether the thesis topic is manageable. Applicants may also be required to submit a brief proposal with their application.

**Course requirements**

Two subject requirements have been established to assist candidates with the preparation of their theses. The first is an advanced research methods subject that also covers statistical analysis. The second involves reading and formal seminar presentations on current topics in the chosen area of study. The two-subject sequence is:

27941 Advanced Research Methods for Leisure and Tourism
and one of the following
27760 Leisure Management Seminar
27761 Tourism Management Seminar
27762 Sports Management Seminar
27763 Arts and Cultural Policy Seminar

In addition, candidates with insufficient knowledge in the area(s) of their proposed research may be required to complete a preparatory semester of up to four bridging subjects. This may apply to students whose first degree comes from an area other than leisure/tourism/sport or arts and cultural
policy studies. Candidates will be advised when this is deemed necessary.

The main requirement of the degree is the preparation of a thesis. The thesis presents the results of original research of a theoretical or applied nature. It should give evidence of the student's ability to engage in a sustained investigation, to identify and analyse research problems, and to present the results in a coherent and scholarly manner. Thesis preparation involves detailed group and individual supervision to ensure achievement of required standards. The thesis is examined by two examiners, at least one of whom is external to the University, who are experts in the area of research addressed in the thesis. Guidelines for presentation and submission of theses are available from the University Graduate School. The length of the thesis will be between 25,000 – 50,000 words.

Candidates enrolled in a full-time Master’s degree can complete the degree in two semesters. However, the more usual time for completion is four semesters for full-time study, and six semesters for part-time study.

Assessment during candidature

Both the candidate and the candidate’s principal supervisor are required to submit progress reports at the end of each semester. In addition, a student's candidature will be assessed before or at the end of the first two semesters of candidature in the case of a full-time student, or the first three semesters in the case of a part-time student. This assessment is conducted under guidelines approved by the Faculty Board and the University Graduate School Board. The following components, considered by a Review Panel, constitute the assessment: satisfactory semester progress reports; successful completion of prescribed coursework prior to the assessment; a written thesis proposal; and an oral seminar on the research topic and written proposal.

The object of this assessment is to ensure that the student is equipped with the knowledge to carry out their research program, and that sufficient progress has been made to enable completion within the prescribed time. As part of this assessment the student will normally present a seminar to the University on their topic and methodology.

A student who does not satisfy the requirements for the assessment will not be permitted to proceed with their candidature, unless with the approval of the Academic Board, the student is invited to re-attempt the assessment.

MBA PROGRAM

Master of Business Administration

- Course code: B055
- Testamur title: Master of Business Administration
- Abbreviation: MBA
- Course fee: $1,400 per subject

Master of Business Administration (Limited Work Experience)

- Course code: B063
- Testamur title: Master of Business Administration
- Abbreviation: MBA
- Course fee: $1,400 per subject

Graduate Diploma in Business Administration

- Course code: B055
- Testamur title: Graduate Diploma in Business Administration
- Abbreviation: GradDipBusAdmin
- Course fee: $1,400 per subject

Graduate Certificate in Business Administration

- Course code: B054
- Testamur title: Graduate Certificate in Business Administration
- Abbreviation: none
- Course fee: $1,400 per subject

The Master of Business Administration provides the knowledge and skills that are essential for superior management performance.

General management skills develop expertise in strategic thinking; critical analysis; developing and implementing plans; decision making under uncertainty; understanding organisational dynamics; motivating others; effective communication; leadership; effectiveness in dynamic environments; and promoting change.

A wide range of specialist skills are introduced through a choice of majors and sub-majors.

The Master of Business Administration (Limited Work Experience) is for graduates with three years’ or less work experience, who wish to
develop a career as a generalist or specialist manager.

The Graduate Diploma in Business Administration is designed to provide a basis for the development of careers in management for graduates who have not previously undertaken an administrative studies degree course. The Graduate Certificate in Business Administration provides foundation skills used in the general management of a business enterprise for non-graduates who have extensive business experience.

Course structure

The Master of Business Administration comprises 96 credit points—eight compulsory core subjects (48 credit points), plus eight elective subjects (48 credit points). The Graduate Diploma in Business Administration comprises seven of the core MBA subjects, plus one elective. The Graduate Certificate in Business Administration comprises four of the core MBA subjects.

Electives

Electives can be taken in one of three ways: as one major (48 credit points); as two sub-majors (2 x 24 credit points); or as one sub-major (24 credit points) plus 24 credit points of mixed electives. Successful completion of a major or sub-major is recorded on the student’s transcript upon graduation. With approval, some subjects can be chosen from other UTS faculties or other universities.

Majors (48 credit points)

Students are required to complete subjects totalling 48 credit points (e.g. 8 x 6-credit-point subjects). While most Faculty of Business subjects are 6 credit points, except for some half-subjects (3 credit points), a number of majors offered by other faculties include subjects with more or less than six credit points. Students should check the credit points listed in the subject descriptions at the back of this handbook.

Note: Subjects that require work experience as a prerequisite are not available to students enrolled in the MBA (Limited Work Experience).

Accounting

22705 Management Planning and Control
22708 Management Information Systems
22730 Assurance for Business Systems and Information
22743 Financial Statement Analysis and Financial Modelling
22744 Strategic Cost Management
22746 Managerial Accounting
22748 Financial Reporting and Analysis
22753 Business Analysis
22777 International Accounting
22751 Corporate Accounting Issues

Arts Management

27753 The Arts Environment in Australia
27755 Arts Organisations and Management
27756 Law and the Arts

21717 International Management
21832 Managing for Sustainability
21722 Leadership and Management Action
21811 Global Strategic Management

International Business
21717 International Management
21784 Global Business Competitive Intelligence
21811 Global Strategic Management
22777 International Accounting
24711 Culture, Business and Language in the Asia-Pacific Region
24738 International Marketing Management
24743 Contemporary Issues in International Marketing
25731 International Finance
79742 International Business Law

International Marketing
24738 International Marketing Management
24743 Contemporary Issues in International Marketing
24744 Competitive International Marketing Strategy
24711 Culture, Business and Language in the Asia-Pacific Region
24755 Applied International Marketing Research
24791 Business Project – International Marketing
24703 Marketing and International Trade Relations
24705 Marketing Projects and Services Overseas
24700 Promotion and Advertising Overseas

Land Economics
Work experience is required for all subjects in this major.
17701 Environment and Control
17703 Property Taxation
17704 Advanced Property Finance
17517 Research Methodology
17705 Contemporary Issues in Land Economics
17706 Research Project – Land Economics

Marketing
24710 Buyer Behaviour
24737 Marketing Information Management, or
24720 Marketing Research
24738 International Marketing Management
24730 Advanced Marketing Management
24706 Services Marketing
24707 Business to Business Marketing
24736 Marketing Communications
24790 Business Project – Marketing

Operations Management
21741 Operations Management
21742 Quantitative Management
21743 Quality Management Systems
21744 Materials Management
21832 Managing for Sustainability
21745 Service Operations Management
21749 Computer-based Information Systems for Managers
21797 Managing the Supply Chain

Organisational Learning and Change
Work experience is required for all subjects in this major.
21827 Change Management, or
21725 Organisational Change and Adaptation
21722 Leadership and Management Action
21730 Workshop in Advanced Managerial Skills
013363 Supporting Workplace Learning and Reform
013367 Cultural Diversity in the Workplace: Management and Learning
013339 Skills, Technology and Workplace Learning
plus two of the following
013337 Managing Change in Adult Education and Training
013332 Understanding Adult Education and Training

21833 Strategic Management of the Global Workforce
21724 Human Resource Management

Professional Accounting
22705 Management Planning and Control
22730 Assurance for Business Systems and Information
22743 Financial Statement Analysis and Financial Modelling
22748 Financial Reporting and Analysis
22753 Business Analysis
22754 Corporate Accounting
79733 Companies and Securities Law
77865 Introduction to Taxation Law

Project Management
Work experience is required for all subjects in this major.
17101 Project Process 1
17201 Project Process 2
17301 Project Process 3
17401 Project Process 4
17105 Industry-Specific Project Process 1
17205 Industry-Specific Project Process 2
17305 Project Technology 1
17405 Project Technology 2

Sport Management
27715 Sport Management
27716 Sport Marketing
27718 Sport and the Law
27721 Sport Globalisation
27717 Event and Facility Management
56744 Public Relations Management
27764 Analysis of the Olympic Games
27762 Sports Management Seminar

Strategic Information Technology
For students with an undergraduate IT background.
32531 Global Information Systems
32517 Commerce on the Internet
32532 Conducting Business Electronically
32533 Networking Communities
32534 Knowledge Management
the following subjects require work experience
32208 Information Processing Strategy
32604 Systems Integration
32204 Advanced Data Management

Tourism Management
27705 Tourism Systems
27708 The Travel and Tourism Industry
27700 Tourism’s Environments
27767 Tourist Behaviour
27711 Leisure and Tourism Planning
27707 Applied Research Methods
27706 Tourism Strategy and Operations
27807 Tourism Marketing
Postgraduate courses

Urban Estate Management
Work experience is required for all subjects in this major.
12511 Building Technology and Regulation
12518 Property Transactions
17701 Environment and Control
12525 Property Analysis 1
12539 Property Analysis 2
12515 Property Life Cycle
12524 Property Development
17120 Heritage and Development

Sub-majors (24 credit points)

Students are required to complete subjects totalling 24 credit points (e.g. 4 x 6-credit-point subjects). While most Faculty of Business subjects are 6 credit points, except for some half-subjects (3 credit points), a number of sub-majors offered by other faculties include subjects with more or less than six credit points. Students should check the credit points listed in the subject descriptions at the back of this handbook.

Note: Subjects that require work experience as a prerequisite are not available to students enrolled in the MBA (Limited Work Experience).

Accounting for Managers
22705 Management Planning and Control
22750 Assurance for Business Systems and Information
22743 Financial Statement Analysis and Financial Modelling
22744 Strategic Cost Management
22754 Corporate Accounting
22751 Corporate Accounting Issues
22777 International Accounting

Adult Communication Management
013343 Adult Communication Management 1
013344 Adult Communication Management 2
013205 Adult Communication Management and Teamwork
013206 Adult Communication Management and Organisational Frames

Advanced Corporate Finance
Work experience is required for all subjects in this sub-major.
25763 Corporate Treasury Management
25765 Corporate Finance
25762 Synthetic Financial Products plus two of the following
25824 Project Financing
25764 Venture Capital Finance
25807 Mergers and Acquisitions
25812 Fundraising in International Markets

Arts Management
27753 The Arts Environment in Australia

Admission requirements

Master of Business Administration (MBA)
The general admission requirements are an undergraduate degree from a recognised university or equivalent institution, and at least four years’ practical experience in industry, commerce or government; or completion of the Graduate Diploma in Business Administration (at credit level); or the Graduate Certificate in Business Administration (at credit level).

Master of Business Administration (Limited Work Experience)
The general admission requirement is an undergraduate degree from a recognised university or equivalent institution.

Graduate Diploma in Business Administration
The general admission requirements are an undergraduate degree from a recognised university or equivalent institution, and at least four years’ practical experience in industry, commerce or government; or completion of the Graduate Certificate in Business Administration (at credit level).

Graduate Certificate in Business Administration
The admission requirements are similar to the MBA, but with provision for non-graduate admission on the basis of extensive evidence of general and professional qualifications demonstrating that the applicant possesses the educational preparation and capacity to pursue graduate studies.

Transfer to the MBA
Transfer to the MBA may be granted to students completing one of the Graduate Diploma or Graduate Certificate courses offered within the Faculty of Business. The basic requirements for transfer are that at least a credit average is achieved, and that the transferee meets the work requirements of the MBA. In the case of a transfer, the student does not graduate from the original award.
Master of Business Administration (Mandarin International)

- Course code: B059
- Testamur title: Master of Business Administration
- Abbreviation: MBA
- Course fee: $1,400 per subject

Graduate Diploma in Business Administration (Mandarin International)

- Course code: B065
- Testamur title: Graduate Diploma in Business Administration
- Abbreviation: GradDipBusAdmin
- Course fee: $1,400 per subject

Graduate Certificate in Business Administration (Mandarin International)

- Course code: B064
- Testamur title: Graduate Certificate in Business Administration
- Abbreviation: none
- Course fee: $1,400 per subject

The Master of Business Administration (Mandarin International) is the first MBA program within Australia taught in Mandarin. The MBA(MI) provides the knowledge and skills that are essential for superior management performance.

General management skills develop expertise in strategic thinking; critical analysis; developing and implementing plans; decision making under uncertainty; understanding organisational dynamics; motivating others; effective communication; leadership; effectiveness in dynamic environments; and promoting change.

Functional skills develop competency in a number of key disciplines, including economics; accounting; finance; marketing; and human resource management.

The course structure of the MBA(MI) program is the same as the current MBA offered by the Faculty of Business.

The Graduate Diploma in Business Administration (Mandarin International) is designed to provide a basis for the development of careers in management for graduates who have not previously undertaken administrative studies degree courses and who require a foundation in business administration skills.

The Graduate Certificate in Business Administration (Mandarin International) provides foundation skills used in the general management of a business enterprise for non-graduates who have extensive business experience. The program serves as a mechanism for provisional entry of suitably qualified non-graduates into the MBA(MI).

Options

22753 Business Analysis
21779 Management Skills

Admission requirements

Master of Business Administration (Mandarin International)
The general admission requirements are an undergraduate degree from a recognised university or equivalent institution, English language skills with an IELTS score of at least 5.0, or a minimum total score of 510 with a TWE of 3.0 (paper-based) or a total score of 173 with an essay rating of 3.5 (computer-based) in the TOEFL test and an appropriate level of Mandarin language skills.

Graduate Diploma in Business Administration (Mandarin International)
The general admission requirements are an undergraduate degree from a recognised university or equivalent institution, English language skills with an IELTS score of at least 5.0, or a minimum total score of 510 with a TWE of 3.0 (paper-based) or a total score of 173 with an essay rating of 3.5 (computer-based) in the TOEFL test and an appropriate level of Mandarin language skills.

Graduate Certificate in Business Administration (Mandarin International)
The general admission requirements are an undergraduate degree from a recognised university or equivalent institution, or a diploma with at least five years' practical experience in industry, commerce or government. English language skills with an IELTS score of at least 5.0, or a minimum total score of 510 with a TWE of 3.0 (paper-based) or a total score of 173 with an essay rating of 3.5 (computer-based) in the TOEFL test and an appropriate level of Mandarin language skills.

Transfer to the MBA (MI)
Transfer to the MBA (MI) may be granted to students completing either the Graduate Diploma or Graduate Certificate in Business Administration (Mandarin International) who achieve a minimum of credit average. In the case of a transfer, the student does not graduate from the original award.

Students may transfer to the MBA (MI) after completing the first year of the Graduate Diploma provided a credit average has been achieved. Alternatively, transfer can be made after completing the eight subjects of the Graduate Diploma.

Students who achieve a credit average in the Graduate Diploma program are permitted to articulate into the MBA (MI) and will be given exemptions for the subjects completed in the Graduate Certificate. Students who fail to satisfy the credit average requirements for direct entry to the MBA (MI) may be permitted to articulate into the Graduate Diploma.

Further details
Further details are available from the Course Director, Mr Jonathan Yan, Graduate School of Business, telephone (02) 9514 3556.
Master of Business Administration (Professional Accounting)

- Course code: 8066
- Testamur title: Master of Business Administration
- Abbreviation: MBA
- Course fee: $1,400 per subject

The MBA (Professional Accounting) offers graduates in disciplines other than accounting, and non-university qualified accountants, such as TAFE Diplomates with extensive accounting experience, the opportunity to become accountants or to improve their accounting knowledge.

The information required to assess an organisation's performance has transcended the financial arena and now encompasses such information as: measuring environmental risk; examining the adequacy of governance and control mechanisms; addressing the effectiveness of quality management processes; assessing control over treasury operations; and benchmarking corporate strategy development.

Industry demand for well-rounded, high quality accounting managers has never been higher. As well as expecting superior professionals, employers now require accountants to be good team players with excellent interpersonal skills, and a mature understanding of the business environment in which they operate.

The program consists of eight compulsory business administration core subjects and eight professional accounting specialised subjects.

The MBA (Professional Accounting) is accredited by the ICAA and the ASCPA, as it meets the formal academic requirements for membership. All graduates must then complete the professional study programs of those bodies in order to gain full membership.

Credit points: 96

To comply with ASCPA and ICAA professional accreditation requirements, TAFE diplomates must take the alternative subjects:

1 22746 Managerial Accounting
2 22751 Corporate Accounting Issues
Admission requirements

The general admission requirements are an undergraduate degree from a recognised university or equivalent institution, or equivalent diploma or professional qualification, and at least four years' practical experience in industry, commerce or government.

Applicants not in possession of a recognised degree must demonstrate extensive work experience in accounting and evidence of a capacity to undertake tertiary education through the completion of a Graduate Certificate in Business Administration (or equivalent) with at least a credit average.

Exemptions may be granted for successful completion of subjects previously undertaken at an appropriate level.

Graduate Certificate in Business (Managing for Diversity)

- Course code: BB77
- Testamur title: Graduate Certificate in Business
- Abbreviation: none
- Course fee: $1,400 per subject

This is a new course offering possible articulation into the MBA. The four modules, designed to be taken over a twelve month period, are:

21823 People Management
21829 Understanding Diversity: An International Perspective
21830 Understanding Diversity: Within the Organisation
21831 Action Research Project

Admission requirements

Admission requirements are normally an undergraduate degree from a recognised university or equivalent institution and four years' relevant work experience. In some cases, extensive work experience may be accepted.

Inquiries should be directed to the Graduate School of Business on (02) 9514 3660.

MASTER OF BUSINESS PROGRAM

Accounting

Master of Business in Accounting

- Course code: BA56
- Testamur title: Master of Business in Accounting
- Abbreviation: MBus
- Course fee: $1,400 per subject

Graduate Certificate in Accounting

- Course code: BA62
- Testamur title: Graduate Certificate in Accounting
- Abbreviation: none
- Course fee: $1,400 per subject

The Graduate Certificate in Accounting provides a general understanding of the basic elements of accounting and related areas of study. It is designed for students without a strong undergraduate background in accounting who need to acquire or update some of the key basic building blocks before proceeding to advanced level subjects in a Master's program. The Graduate Certificate is also appropriate for students who have no undergraduate degree but extensive practical experience, and who can use the program to prove their ability to undertake postgraduate study.

The Master of Business in Accounting provides advanced level study in a range of contemporary accounting issues. The combination of core subjects and electives is designed to offer the student the flexibility of specialising in either financial or management accounting, or a combination of both. In addition, the business project offers students the option to apply their learning to a real-world problem for their employer or another organisation.

The Master of Business in Accounting may also be taken concurrently with study in the ICAA Professional Year (PY) Programme. Three of the PY modules can be taken as electives within the Master's Program (see Electives list). Students who have successfully completed either the ICAA PY Programme or the ASCPA CPA program may be granted up to three exemptions for electives within the course upon application to the Course Director.

### Electives

- 22708 Management Information Systems
- 22730 Assurance for Business Systems and Information
- 22739 Business Project - Accounting
- 22743 Financial Statement Analysis and Financial Modelling
- 22744 Strategic Cost Management
- 22748 Financial Reporting and Analysis
- 22759 Accounting and Enterprise Resource Planning
- 22760 Applied Research Skills in Accounting
- 22795 Strategic Management Accounting
  - Accounting Module 1
  - Accounting Module 2
  - Taxation Module
  - Any one other elective approved by the Course Director

1 These three subjects are the compulsory technical modules that are required by The Institute of Chartered Accountants in Australia for its Professional Year Programme, and are offered only through the ICAA.

Classes for the PY modules usually start approximately 16 weeks prior to the examination dates set by the ICAA. These classes do not coincide with the normal semester periods. Students enrolling in these classes should contact the ICAA for information about classes in early March for the Taxation Module, early July for the Accounting 1 Module, and early November for the Accounting 2 Module.

## Admission requirements

### Master of Business

The general admission requirements are a degree from a recognised university or equivalent institution and a minimum of two years' relevant work experience; or completion of a relevant Graduate Certificate (at credit level) or Graduate Diploma from UTS or other recognised university or equivalent institution. Students who are admitted under the first category may be eligible for up to four exemptions. Usually, these would be the first four subjects.

### Graduate Certificate

The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years' relevant work experience; or extensive work experience and evidence of a general capacity to undertake tertiary education.
Accounting and Finance

Master of Business in Accounting and Finance
- Course code: BA57
- Testamur title: Master of Business in Accounting and Finance
- Abbreviation: MBus
- Course fee: $1,400 per subject

Graduate Diploma in Accounting and Finance
- Course code: BA53
- Testamur title: Graduate Diploma in Accounting and Finance
- Abbreviation: GradDipAccFin
- Course fee: $1,400 per subject

Graduate Certificate in Accounting and Finance
- Course code: BA60
- Testamur title: Graduate Certificate in Accounting and Finance
- Abbreviation: none
- Course fee: $1,400 per subject

The Graduate Certificate in Accounting and Finance provides a general understanding of the basic elements of accounting and finance. It is designed for students without a strong undergraduate background in accounting and/or finance who need to acquire or update some of the key basic building blocks before proceeding to advanced level subjects in a Master’s program. It is also appropriate for students who have no undergraduate degree but extensive practical experience, and who can use the program to prove their ability to undertake postgraduate study.

The Graduate Diploma in Accounting and Finance extends the graduate certification to provide advanced level material in core contemporary accounting and finance issues. The Master of Business in Accounting and Finance provides advanced level study in a range of contemporary accounting and finance issues. The combination of core subjects and electives equally chosen from both accounting and finance subjects is designed to offer a balanced coverage of both disciplines. Within the electives structure, students have scope for some specialisation in both accounting and finance areas.

Electives
Two electives must be selected from the prescribed list of Accounting subjects and two from the prescribed list of Finance subjects.

25813 Financial Negotiation Skills
25815 Asian Capital Markets

1 Subjects 22743 Financial Statement Analysis and Financial Modelling and 25743 Corporate Financial Analysis are deemed to be equivalent.

Admission requirements

Master of Business

The general admission requirements are a degree from a recognised university or equivalent institution and a minimum of two years' relevant work experience; or completion of a relevant Graduate Certificate (at credit level) or Graduate Diploma from UTS or other recognised university or equivalent institution. Students who are admitted under the first category may be eligible for up to four exemptions. Usually, these would be the first four subjects.

Graduate Diploma

The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years' relevant work experience, or completion of the relevant Graduate Certificate.

Graduate Certificate

The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years' relevant work experience, or extensive work experience and evidence of a general capacity to undertake tertiary education.

Banking

Graduate Certificate in Banking

- Course code: BF56
- Testamur title: Graduate Certificate in Banking
- Abbreviation: none
- Course fee: $1,400 per subject

The skills required by people in the finance industry, whether in banking or corporate finance, have been changing over the last decade, under the influence of modern technology, deregulation and globalisation of the financial system.

The purpose of this course is to provide banking practitioners with the opportunity to acquire performance-enhancing skills and expertise in the finance industry. The course will provide the knowledge and skills required of the modern successful banker.

The successful completion of the Graduate Certificate in Banking may provide graduates with qualifications for Senior Associate membership of the Australian Institute of Banking and Finance.

Graduate Certificate in Business Operations Management
- Course code: BB71
- Testamur title: Graduate Certificate in Business Operations Management
- Abbreviation: none
- Course fee: $1,400 per subject

New technology, particularly in the area of information, new management approaches such as quality management, and the pressures of global competition, have placed a premium on those who have a broad understanding of how to plan and manage complex business processes. The Business Operations Management courses are aimed at those who wish to gain significant insight and skills in these areas. The courses are specifically designed to cater for the needs of those employed in service industries (e.g. banking and insurance) as well as in areas traditionally associated with business operations management (e.g. manufacturing).

The Graduate Certificate in Business Operations Management provides a solid introduction to business operations management for those wishing to gain some experience in this area. The Graduate Diploma in Business Operations extends the graduate certification and provides the opportunity for some specialisation. The Master of Business in Business Operations Management provides the opportunity for students to complete a significant project in an area of interest to them.

Course fee: $1,400 per subject

Graduate Certificate in E-Business Management

Course code: B083
Testamur title: Graduate Certificate in E-Business Management
Abbreviation: none
Course fee: $1,400 per subject

This program is subject to final approval.

The E-Business Management program equips the modern manager with the management and technological skills required to operate successfully in the Asia-Pacific region's largest growing industry, telecommunications and media. Students will gain in-depth knowledge of management theory and practice focused on the effects of e-business on the national and corporate agenda. Students will analyse key e-business technological and management issues and examine their effect on industry and corporate change. The program will integrate the interpersonal, organisational, strategic and technological skills required for managers in the global e-business environment.

Electives

Students may choose up to 18 credit points from the following electives:

Accounting
22708 Management Information Systems
22743 Financial Statement Analysis and Financial Modelling
22777 International Accounting
Computing Sciences
32517 Commerce on the Internet
32702 Contemporary Telecommunications

Credit points: 24 48 48 72

¹ Students may complete a graduate management subject in place of 79731 Industrial Law where this is more suitable to their professional needs, as approved by the Course Director. Students undertaking the Graduate Diploma in Employment Relations (Industrial Law) must take 79731 Industrial Law.

Graduate Certificate in Employment Relations

- Course code: BB69
- Testamur title: Graduate Certificate in Employment Relations
- Abbreviation: none
- Course fee: $1,400 per subject

The Employment Relations courses provide students with the in-depth knowledge and skills necessary to their contributing at a senior level to their organisation's human resources and industrial relations functions. The courses are designed primarily for individuals who are currently employed, or show the potential for employment, at senior policy-making levels in the field of employment relations, including the specific areas of human resource management, industrial relations, occupational health, affirmative action, training and development. The courses provide an opportunity to study in depth, and at a professional level, those factors contributing to the complexity of decision making in Australian and international employment relations and, as a result of this study, to improve the quality of their strategic management.

Industrial relations and human resource management are best taught, understood and practised as part of an integrated whole which
sees the improvement of human relations at work as its key objective. While the personnel and industrial functions are sometimes separately exercised within Australian organisations, each has a pervasive impact upon the other.

Courses in employment relations are ideally suited to provide individuals who possess some experience in an area related to employment relations with the knowledge and skills to further develop their career.

Students undertaking the Graduate Diploma in Employment Relations (Industrial Law) will be credited with the relevant eight subjects towards the Master of Business in Employment Relations.

**Electives**

Students may choose any subject conceptually related to the course and the student’s area of interest and responsibility. The choice of elective must be approved by the Course Director.

**Admission requirements**

**Master of Business**

The general admission requirements are a degree from a recognised university or equivalent institution and a minimum of two years’ relevant work experience; or completion of a relevant Graduate Certificate (at credit level) or Graduate Diploma from UTS or other recognised university or equivalent institution. Students who are admitted under the first category may be eligible for up to four exemptions. Usually, these would be the first four subjects.

**Graduate Diploma**

The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years’ relevant work experience, or completion of the relevant Graduate Certificate.

**Graduate Certificate**

The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years’ relevant work experience, or extensive work experience and evidence of a general capacity to undertake tertiary education.

**Graduate Certificate in Finance**

- **Course code:** BF54
- **Testamur title:** Graduate Certificate in Finance
- **Abbreviation:** none
- **Course fee:** $1,400 per subject

The Finance program provides participants with the opportunity to acquire knowledge of finance theory and techniques for leading-edge professional practice purposes.

The Graduate Certificate in Finance provides an introduction to finance theory and practice. It is of particular interest to those working in the various fields of finance and banking whose backgrounds are in a field other than business, finance, commerce or accounting. The Graduate Diploma in Finance builds on this to provide a core of financial institution knowledge and decision-making skills for executives in financial institutions, corporations and financial consultancies.

The Master of Business in Finance provides a comprehensive range of skills and expertise expected of leading practitioners in the banking and finance sectors. Participants have the opportunity to specialise in the areas of banking, funds management, corporate finance and quantitative finance through learning strategies that cover both contemporary finance theory and leading-edge techniques in the practice of finance and decision making. Under certain circumstances, participants may also select subjects to meet their own requirements, subject to the approval of the Course Director.

Completion of the Master’s or Graduate Diploma programs meets the educational requirements for professional accreditation with the Australian Institute of Banking and Finance.

¹ Graduate Diploma students can choose 25711 Securities Market Regulations as an alternative to 25721 Investment Management.

Electives

Elective subjects can be undertaken in the following sequences to make a strand:

Banking Strand

- 25711 Securities Market Regulations
- 25751 Financial Institution Management
- 25752 Financial Institution Lending
  - plus two other Finance electives

Corporate Finance Strand

- 25731 International Finance
- 25743 Corporate Financial Analysis
- 25763 Corporate Treasury Management
  - plus two other Finance electives

Funds Management Strand

- 25762 Synthetic Financial Products
- 25817 Fixed Income Securities (half subject)
- 25818 Real Estate Finance and Investment (half subject)
- 25819 Share Market Analysis (half subject)
- 25821 Yield Curve Analysis (half subject)
  - plus two other Finance electives

Quantitative Finance Strand

- 25709 Derivative Security Pricing
- 25710 Financial Time Series
- 25712 Financial Market Stochastics
  - plus two other Finance electives

Finance electives available are:

- 25709 Derivative Security Pricing
- 25710 Financial Time Series
- 25711 Securities Market Regulations
- 25712 Financial Market Stochastics
- 25731 International Finance
- 25743 Corporate Financial Analysis
- 25751 Financial Institution Management
- 25752 Financial Institution Lending

- 25753 Issues in Banking
- 25762 Synthetic Financial Products
- 25763 Corporate Treasury Management
- 25790 Business Project - Finance

The following three credit point subjects are also available:

- Abbreviation: none
- Course fee: $1,400 per subject

Graduate Certificate
The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years’ relevant work experience, or extensive work experience and evidence of a general capacity to undertake tertiary education.

This program is subject to final approval.
The Insurance courses provide students with knowledge of contemporary financial management issues confronting the Australian insurance industry, and with the skills to manage these issues within the organisations where they occur. Students will develop an understanding of the technical processes adopted in the insurance industry and the theoretical concepts underpinning those processes, together with contemporary developments in these areas. Students will gain an understanding of the regulatory regime under which the delivery of Australian insurance related services are directed.

Successful completion of the program meets the educational requirements for professional accreditation with the Australian Insurance Institute and the Australian Association of Insurance Accountants. The program is endorsed by the Insurance Council of Australia.

A rewarding exchange between suppliers of goods and services and their clients or customers is essential for the viability of all providers. The Marketing courses provide contemporary theoretical marketing knowledge and the practical skills required for superior performance in Australia and international markets.

The Graduate Certificate in Marketing introduces some of the other key dimensions of marketing and is designed for those requiring a general understanding of marketing principles. The Graduate Diploma in Marketing provides a thorough understanding of the basic principles of marketing, marketing research, the motivations of customers and marketing management. The course assists students in developing an ability to identify and analyse marketing

- 24742 New Product Management
- 24743 Contemporary Issues in International Marketing
- 24744 Competitive International Marketing Strategy
- 24750 Marketing Decision Analysis

Management problems and fosters skills in generating marketing strategies to solve problems in the marketing domain, both in Australia and overseas.

The Master of Business in Marketing provides the opportunity for students to further extend their knowledge in the areas of communications, sales management, the development and introduction of new products, business-to-business marketing, technology and marketing, as well as the legal constraints on and the ethical implications of marketing in Australia. The course also incorporates the study of computer programs specifically designed to aid the marketing decision process.

The Master of Business in International Marketing addresses the need to enhance Australia's international competitiveness in a rapidly changing global environment. The course provides a thorough grounding in the basic principles of marketing, marketing research, planning and strategy. Specific emphasis is placed on international marketing research, current issues impacting on organisations operating internationally and competitive international marketing strategies. The option exists for overseas market visits as part of the coursework.

1 24755 Applied International Marketing Research is a two-semester subject. Students enrolling for this subject must take it in both semesters. Alternatively, students may take 24791 Business Project – International Marketing plus one elective subject.
Any elective listed in the Master of Business in International Marketing

Any one other elective approved by the Course Director

1 24726 Marketing Research and 24737 Marketing Information Management: if one of these subjects is taken as a core subject then the other may be taken as an elective.

Electives for Master of Business in International Marketing
24700 Promotion and Advertising Overseas
24703 Marketing and International Trade Relations
24705 Marketing Projects and Services Overseas
24711 Culture, Business and Language in the Asia-Pacific Region

Any one other international subject approved by the Course Director

Admission requirements

Master of Business
The general admission requirements are a degree from a recognised university or equivalent institution and a minimum of two years’ relevant work experience; or completion of a relevant Graduate Certificate (at credit level) or Graduate Diploma from UTS or other recognised university or equivalent institution. Students who are admitted under the first category may be eligible for up to four exemptions. Usually, these would be for the first four subjects of the postgraduate program.

Graduate Diploma
The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years’ relevant work experience, or completion of the relevant Graduate Certificate.

Graduate Certificate
The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years’ relevant work experience, or extensive work experience and evidence of a general capacity to undertake tertiary education.

Articulation
Students who successfully complete the Graduate Diploma in Marketing may be admitted to (1) the Master of Business in Marketing and receive credit for the eight subjects completed or (2) the Master of Business in International Marketing and receive credit for the eight subjects completed provided all electives undertaken for the Graduate Diploma were approved international subjects.

Work-Based Learning

Master of Business (Work-Based Learning)
• Course code: B082
• Testamur title: Master of Business
• Abbreviation: MBus

Graduate Diploma in Business (Work-Based Learning)
• Course code: B081
• Testamur title: Graduate Diploma in Business
• Abbreviation: GradDipBus

Graduate Certificate in Business (Work-Based Learning)
• Course code: B080
• Testamur title: Graduate Certificate in Business
• Abbreviation: none

Work-Based Learning awards are offered only to employees of organisations with whom UTS has formed a partnership agreement.

In consultation with their employer, the student negotiates a program of learning based on their own interests and needs in addition to those of their employer. By developing a customised learning program relating to the student’s work role, a meaningful balance is established between a student’s development needs, organisational goals and UTS academic standards.

A customised award program may incorporate a number of elements including recognised current capabilities, related courses at a tertiary institution, in-house training and development courses, and learning from work roles.

Inquiries about this program should be directed to Nicholas Shipley, Manager Work-Based Learning Programs, on telephone (02) 9514 3070.
MASTER OF MANAGEMENT PROGRAM

Arts Management

Master of Management in Arts Management

- Course code: BL68
- Testamur title: Master of Management in Arts Management
- Abbreviation: MM
- Course fee: HECS

Graduate Diploma in Arts Management

- Course code: BL52
- Testamur title: Graduate Diploma in Arts Management
- Abbreviation: GradDipAM
- Course fee: HECS

Graduate Certificate in Arts Management

- Course code: BL54
- Testamur title: Graduate Certificate in Arts Management
- Abbreviation: none
- Course fee: HECS

The arts industry in Australia is a growing, dynamic industry that requires managers who have a comprehensive knowledge of all facets of arts management combined with the intellectual skills to develop innovative solutions to the day-to-day problems encountered in the industry.

The Arts Management courses offer a combination of core management subjects specifically designed for the arts environment, including accounting, law, marketing and organisational management, together with subjects that provide the theoretical and applied knowledge needed to enhance understanding of the arts environment in Australia.

The Graduate Certificate is a one-year, part-time course that provides a basic introduction to the arts and cultural industries in Australia and some fundamental management skills. The Graduate Diploma builds on this to develop students’ critical, interpretative and problem-solving capabilities. It provides a solid grounding in the fundamentals of arts management and cultural policy, while providing room for some specialisation and the development of specific interests. The Graduate Diploma is an extremely popular course and is held in high regard by the arts industry.

The Master of Management is an advanced, three-year, part-time course that provides students with the opportunity to further develop their specialist interests and complete a significant project in any area of the arts.

Part-time enrolment normally involves class attendance for one afternoon and evening a week, or two evenings a week.

The Arts Management program is offered mainly at the Kuring-gai campus, although some subjects are offered at the City campus (Haymarket).

UTS is Australia's premier centre for research and teaching in nonprofit or community organisations. The Community Management program forms the University's flagship teaching program for people working in these areas.

The Community Management program is designed for people who manage, or hope to manage, non-government, nonprofit organisations, and for those who wish to improve their qualifications and obtain appropriate management skills.

The courses provide an opportunity to study, at a professional level, those factors contributing to the effective management of nonprofit organisations. Participants will develop an understanding of this 'third sector' and its social and economic context, and will be introduced to ways of thinking systematically about nonprofit organisations and their management. Participants will gain knowledge of the range of nonprofit organisations, their structure and distinguishing features.

The Graduate Certificate is a one-year, part-time course that provides a basic introduction to the field and develops skills and knowledge in financial management and funding. The

Graduate Diploma is a two-year, part-time course that builds on this and extends participants' skills and knowledge in human resource and legal aspects of nonprofit management. It also offers participants an opportunity to pursue areas of special interest.

The Master of Management is a three-year, part-time course that further develops critical and analytical skills in the area of community management. It develops research skills and the opportunity to apply these to a project focusing on a specific aspect of community management.

The Community Management program is offered mainly at the Kuring-gai campus, although some elective subjects are available at the City campus (Haymarket).

Electives

Electives are available in subject strands that enable students to pursue an in-depth study of a particular area. Students may select free electives if they prefer.

Accounting Strand
- 22748 Financial Reporting and Analysis
- 22746 Managerial Accounting
- 22705 Management Planning and Control

Adult Education Strand
- 013332 Understanding Adult Education and Training
- 013333 Adult Learning and Program Development
- 013352 Adult Education and Social Movements

Employment Relations Strand
- 21769 Human Resources in the Third Sector
- 21702 Industrial Relations
- 21775 Comparative International Employment Relations

International Nonprofit Management Strand
- 21819 Managing in an Era of International Market Orthodoxy
- 21820 Managing in the Global Public Interest
- 21821 Grassroots Organising for Global Change

Leisure Management Strand
- 27702 Applied Leisure Theory
- 27701 Leisure Industry
- 27713 Leisure Management

Marketing Strand
- 24734 Managerial Marketing
- 24710 Buyer Behaviour
- 24720 Marketing Research

People Management Strand
- 21730 Workshop in Advanced Managerial Skills
- 21722 Leadership and Management Action
- 79771 Dispute Resolution

Public Policy Management Strand
- 21711 Politics and Management
- 21700 State, Market and Civil Society
- 21768 Policy Analysis and Practice

Volunteer Management Strand
(In association with the NSW School of Volunteer Management)
- 21817 Volunteering: Social and Organisational Perspectives
- 21818 Strategic Volunteer Development
- Free elective
Admission requirements

Master of Management
The general admission requirements are a degree from a recognised university or equivalent institution, or an equivalent professional qualification, and a minimum of two years' relevant work experience; or completion of a relevant Graduate Certificate (at credit level) or Graduate Diploma from UTS or other recognised university or equivalent institution. Students who are admitted under the first category may be eligible for up to four exemptions. Usually, these would be the first four subjects.

Graduate Diploma
The general admission requirements are a degree from a recognised university or equivalent institution, or an equivalent diploma or professional qualification, and, usually, a minimum of two years' relevant work experience, or completion of the relevant Graduate Certificate.

Graduate Certificate
The general admission requirements are a degree from a recognised university or equivalent institution, or an equivalent diploma or professional qualification, and, usually, a minimum of two years' relevant work experience, or extensive work experience and evidence of a general capacity to undertake tertiary education.

- Course fee: $1,400 per subject

The health industries of Australia are facing dramatic changes that call for an increasingly professional approach to management. The Health Management program is designed especially to meet the needs of managers, or potential managers, who have an interest in, are currently employed in, or intend to be employed in, the public or private sector of the health industry. Participants have the opportunity to specialise in either the public or private sector area.

The Graduate Certificate is a one-year, part-time course that provides a solid understanding of structures and management in the health management industry, and a grounding in two generic management disciplines and skills. The Graduate Diploma is a two-year, part-time course that extends this to cover the areas of politics, policy development and organisational analysis. It also offers participants an opportunity to pursue areas of specialist interest. In the fourth semester, participants choose to do either the Coursework stream or the Research Management stream.

The Master of Management is a three-year, part-time course that further develops students' critical and analytical skills in the

Leisure is one of the principal social and economic features of life. The Australian leisure industries—in the commercial, public, and nonprofit sectors—provide facilities and services, as well as manage resources to accommodate the increasing leisure demands of a growing population. As the leisure industries continue to enhance their already significant contribution to the Australian and international societies and economies, managers within the industry will require a broader understanding of the leisure phenomenon and a wide variety of skills to ensure the satisfactory provision of facilities and services for their clients.

The Leisure Management program develops knowledge and professional management skills relevant to the organisation, planning, marketing and provision of leisure services. Vocational, conceptual and research skills are developed in an educational climate that fosters intellectual and professional inquiry. Students will gain a theoretical and practical understanding of leisure in both the Australian and international context. Involvement with leisure industry practitioners is a significant feature of the courses.

The Graduate Certificate is a one-year, part-time course offering an introduction to management in the leisure industries. The four subjects of the Graduate Certificate can be completed in intensive mode. The Graduate Diploma is a two-year, part-time or one-year, full-time course that extends the student's knowledge and management skills and offers the opportunity for specialisation in an area of interest. The Master of Management is a three-year, part-time, or two-year, full-time course that offers the opportunity for further specialisation through the choice of electives and the conduct of an investigatory project. Part-time enrolment normally involves class attendance for one evening a week.

The Leisure Management program is offered at the Kuring-gai campus, although subjects may be selected from among those offered at the City campus (Haymarket).

Students may also choose any subject conceptually related to the course and the student’s area of interest and responsibility. The choice of electives must be approved by the Course Director.

Admission requirements

Master of Management

The general admission requirements are a degree from a recognised university or equivalent institution and a minimum of two years’ relevant work experience, or completion of a relevant Graduate Certificate (at credit level) or Graduate Diploma from UTS or other recognised university or equivalent institution. Students who are admitted under the first category may be eligible for up to four exemptions. Usually, these would be the first four subjects.

Graduate Diploma

The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years’ relevant work experience, or completion of the relevant Graduate Certificate.

Graduate Certificate

The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years’ relevant work experience, or some work experience and evidence of a general capacity to undertake tertiary education.
Management – General

Master of Management

- Course code: BG88
- Testamur title: Master of Management
- Abbreviation: MM
- Course fee: $1,400 per subject

Graduate Diploma in Management

- Course code: BB68
- Testamur title: Graduate Diploma in Management
- Abbreviation: GradDipM
- Course fee: $1,400 per subject

Graduate Certificate in Management

- Course code: BB67
- Testamur title: Graduate Certificate in Management
- Abbreviation: none
- Course fee: $1,400 per subject

The Management program is designed to meet the needs of individuals, client organisations and professional bodies for management education. An innovative, flexible structure provides students with maximum choice in selecting subjects and programs of study tailored to meet their personal and professional needs.

The courses provide participants with knowledge and experiences that will enhance their professional skills and understanding of the management of people, resources and organisational processes. Participants acquire conceptual and analytical skills necessary for successful management performance in a range of contexts, including the business, public and nonprofit sectors, and a variety of professional settings.

The Graduate Certificate provides a basic introduction to management skills. The Graduate Diploma extends these skills by providing the opportunity to explore them in greater breadth and depth. The Master of Management provides knowledge, skills and conceptual frameworks to enable participants to identify and resolve complex issues that will characterise the working environment of senior managers in the future. It is available as a flexible general program with a wide range of choice. The first two years focus on coursework, while the third focuses on research and consulting skills through the completion of a project.

While the program has considerable flexibility, students may wish to complete a more specialised qualification by selecting specific subjects appearing under the heading Electives. For example, students wishing to complete a Supply Management specialisation could select subjects from the electives to meet their specific specialist needs.

The Management program is offered mainly at the City campus (Haymarket), although subjects may also be selected from among those offered at the Kuring-gai campus.

Electives

Up to half the subjects can be drawn from disciplines other than management that are offered within the Faculty of Business – such as accounting, finance and economics, marketing, leisure, and tourism studies – or from other UTS faculties’ disciplines, such as computing sciences.

Participants are encouraged to select combinations of subjects to suit their background, interests and career paths. Subject patterns can be chosen to focus on areas such as general management, employment relations, community management, business operations management, public sector management, or health sector management.

Sports Management

Master of Management in Sports Management

- Course code: BL69
- Testamur title: Master of Management in Sports Management
- Abbreviation: MM
- Course fee: $1,400 per subject

Graduate Diploma in Sports Management

- Course code: BL53
- Testamur title: Graduate Diploma in Sports Management
- Abbreviation: GradDipSportsM
- Course fee: $1,400 per subject

Graduate Certificate in Sports Management

- Course code: BL60
- Testamur title: Graduate Certificate in Sports Management
- Abbreviation: none
- Course fee: $1,400 per subject

Due to the rapid expansion of the sports industry, there is an increasing demand for management professionals who can deliver sports services to all sectors of the community. There is a need for sports managers who have an understanding of the specialist context in which sport is played and organised, and the knowledge and skills necessary to effectively manage in a volatile economic, political, social and legal environment.

The Sports Management courses offer a combination of core and elective subjects designed to provide specific training in sports management, including: sport marketing, accounting practices, sport and the law, public relations management, event and facility management, and research methods. They also
provide the theoretical knowledge needed to understand the changing nature of the Australian sport environment.

The Graduate Certificate is a one-year, part-time course that provides a basic introduction to the sport industry environment in Australia and an introduction to basic management skills. The Graduate Diploma is a two-year, part-time, or one-year, full-time course designed to develop critical, interpretive and problem-solving skills and to provide a broad coverage of the sport management field. It will also provide some opportunity for the development of specific interests. The Master of Management program is a three-year, part-time, or two-year, full-time, advanced program of study providing students with the opportunity to further develop their special interests and to complete a significant project in any area related to sport management.

The Sports Management program is offered at the Kuring-gai campus, although subjects may also be selected from among those offered at the City campus (Haymarket).

### Electives

Electives available within the program may be chosen from a wide range of subjects offered by the School of Leisure, Sport and Tourism, from other schools in the Faculty of Business, or from other faculties at UTS. Approval for electives outside the School of Leisure, Sport and Tourism should be sought from the Course Director.

Tourism Management

Master of Management in Tourism Management
- Course code: BL67
- Testamur title: Master of Management in Tourism Management
- Abbreviation: MM
- Course fee: $1,400 per subject

Graduate Diploma in Tourism Management
- Course code: BL51
- Testamur title: Graduate Diploma in Tourism Management
- Abbreviation: GradDip Tourism
- Course fee: $1,400 per subject

Graduate Certificate in Tourism Management
- Course code: BL56
- Testamur title: Graduate Certificate in Tourism Management
- Abbreviation: none
- Course fee: $1,400 per subject

The tourism industry in Australia is complex, dynamic and rapidly growing. As the industry has grown, so has the demand for professionals with a high level of management expertise. The Tourism Management program has been developed to meet the demand for such professionals.

The courses cover an extensive range of elements associated with the tourism phenomenon and highlight how critically important it is for effective tourism managers in the tourism industry to understand the interrelationships among these elements. Throughout the courses, emphasis is placed on the acquisition of strategic planning skills for tourism development, management and marketing. These skills are seen as essential in order to survive in a dynamic industry operating in an often volatile environment.

The Graduate Certificate is a one-year, part-time course that provides an introduction to the tourism industry and to relevant basic management skills. The Graduate Diploma is a two-year, part-time, or one-year, full-time course designed to develop critical, interpretive and problem-solving skills, and to provide a broad coverage of the tourism management field and some opportunity for studying in areas of specific interests. The Master of Management is a three-year, part-time, or two-year, full-time advanced program of study, providing students with the opportunity to further develop their interests and to complete a significant project in any area related to tourism management.

The Tourism Management program is offered at the Kuring-gai campus, although subjects may also be selected from among those offered at the City campus (Haymarket).

Electives

Electives available within the program may be chosen from a wide range of subjects offered by the School of Leisure, Sport and Tourism, from other schools in the Faculty of Business, or from other faculties at UTS. Approval for electives outside the School of Leisure, Sport and Tourism should be sought from the Course Director.

Admission requirements

Master of Management

The general admission requirements are a degree from a recognised university or equivalent institution and a minimum of two years’ relevant work experience; or completion of a relevant Graduate Certificate (at credit level) or Graduate Diploma from UTS or other recognised university or equivalent institution. Students who are admitted under the first category may be eligible for up to four exemptions. Usually, these would be the first four subjects.

Graduate Diploma

The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years’ relevant work experience, or completion of the relevant Graduate Certificate.

Graduate Certificate

The general admission requirements are a degree from a recognised university or equivalent institution and, usually, a minimum of two years’ relevant work experience, or extensive work experience and evidence of a general capacity to undertake tertiary education.

Programs offered in conjunction with other faculties

Engineering Management

Master of Engineering Management

- Course code: EP85
- Testamur title: Master of Engineering Management
- Abbreviation: MEM
- Course fee: $9,600

Graduate Certificate in Engineering Management

- Course code: EP57
- Testamur title: Graduate Certificate in Engineering Management
- Abbreviation: none
- Course fee: $4,800

These courses form a joint program from the Faculty of Engineering and the Faculty of Business.

The Master of Engineering Management program places greater emphasis on the interface between technology and management than does the traditional MBA. The program provides opportunity for engineers who seek career prospects in engineering management to undertake a formal course of relevant study at the Master’s degree level. The course is designed for engineers or scientists who perform, or who aspire to perform, management tasks while maintaining currency in their technical specialities.

The Master of Engineering Management program comprises 10 subjects and may be articulated into the MBA program.

Full details and program outlines are contained within the 2000 Faculty of Engineering Handbook.

Inquiries about these courses should be directed to the Graduate Students Adviser, Lyn Smith, Faculty of Engineering, on telephone (02) 9514 2606.
Information Technology Management

Master of Business in Information Technology Management

- Course code: MC85
- Testamur title: Master of Business in Information Technology Management
- Abbreviation: MBus
- Course fee: $1,650 per six credit point subject

Graduate Diploma in Information Technology Management

- Course code: MC75
- Testamur title: Graduate Diploma in Information Technology Management
- Abbreviation: GradDipInfTechM
- Course fee: $1,650 per six credit point subject

Graduate Certificate in Information Technology Management

- Course code: MC63
- Testamur title: Graduate Certificate in Information Technology Management
- Abbreviation: none
- Course fee: $1,650 per six credit point subject

These courses form a joint program from the School of Computing Sciences and the Faculty of Business. They provide managers in the information technology and telecommunications industry with the opportunity to develop their business knowledge and skills. They focus on business problems of particular relevance to the IT industry and emphasise the application of knowledge to contemporary challenges in the industry.

The program provides opportunity for those professionals who seek career prospects at senior management level to undertake a formal course of relevant study at postgraduate level with a range of options and a variety of attendance patterns. Full details and program outlines are contained within the 2000 Faculty of Mathematical and Computing Sciences Handbook. Inquiries about these courses should be directed to Alison Stevens, Professional Programs Manager, on telephone (02) 9514 1925.
SUBJECT DESCRIPTIONS

Key to subject numbers
Each subject number contains the following information:
First digit indicates faculty
2 = Business
3 = Mathematical and Computing Sciences
4 = Engineering
5 = Humanities and Social Sciences
7 = Law
Second digit indicates school within Faculty of Business
1 = Management
2 = Accounting
3 = Economics
4 = Marketing
5 = Finance and Economics
7 = Leisure and Tourism
Third digit generally indicates the level of subject in the course or prerequisite sequence. Postgraduate subjects are indicated by '7' and '8'.

Guide to subject descriptions
The subject descriptions shown below indicate the subject code and name, the number of credit points for the subject (e.g. 3cp), and whether it is an undergraduate or a postgraduate subject. For some subjects there may also be practical components off campus, and this is indicated in the text. Also shown are the prerequisites or corequisites, if any, and a brief outline of the content.

Prerequisites are subjects that must be completed before taking the subject to which they refer. Corequisites may be completed before or be taken concurrently with the subject to which they refer.

21058
Management Project
Undergraduate
6cp; prerequisites: 21365 Analysing Management Thinking; first three subjects of sub-major
Provides students who have undertaken the Management major and a sub-major in Employment Relations, International Management, Strategic Management or Small and Medium Enterprise Management with the opportunity to apply the knowledge and skills acquired in these subjects to a management research project in the area of their sub-major specialisation. Further develops students' understanding of management research methodologies and provides them with the necessary skills to design, conduct and report on the project both orally and in writing.

21082
Small and Medium Enterprise Management
Undergraduate
6cp
Creates knowledge and analytical skills through applied research and involvement in the process of managing a small and medium enterprise venture in the contemporary business environment. Students collaborate with selected industry practitioners on an industry-based research project. This enables students to acquire the basic competencies necessary for entry into a career in new venture/small and medium business management. Students will appreciate the major ingredients in small and medium enterprise success, and the special problems small and medium enterprises may encounter.

21083
Socially and Ecologically Responsible Business
Undergraduate
6cp
Designed for students who are seeking to understand alternatives to traditional ways of thinking about business. Explores different moral perspectives on business, especially 'green' thinking on the ecological alternatives to the traditional imperatives of contemporary business. Explores the global challenges that confront business and the implications of global industrialism, including world environmental degradation, the marginalisation of minority groups, spiritual alienation and inhumane artefacts.
21121
Managing Electronic Business Processes
Undergraduate
6cp; prerequisites: 21130 Management and Organisations; 24307 Electronic Business Principles; corequisite: 24408 Marketing Strategy for Electronic Business
Introduces the major issues and trends impacting upon the management of electronic business processes. Provides an overview of the importance of developing and linking the electronic business strategy of an enterprise to its corporate and business objectives. Explores how electronic business can enhance the competitive advantage of the enterprise. Students analyse business processes and methodologies for business process re-engineering. Addresses major issues relating to the evaluation of IT systems investments, business performance evaluation, organisational restructuring and the management of cross-functional activities for improved efficiencies. Develops awareness of the impact of electronic business on the management of change in different environments.

21125
International Business Environment
Undergraduate
4cp
Introduces some key elements of the vibrant business environment that Australia faces in the coming decades. A review of recent developments in Australia and the Asia-Pacific region is followed by a more detailed examination of major international players in the region, their business philosophies and practices, and the implications these issues have for Australian business and government organisations wishing to succeed in the region. The development of competitive advantage, through understanding the business environment in the Pacific Rim, and developing skills in gathering business information, provide important focal points of the course.

21130
Management and Organisations
Undergraduate
4cp
Introduces students to the concept of management and the different theoretical approaches to understanding management and organisations. Examines individual and group behaviour in organisational contexts. Examines and discusses organisational issues and processes, including culture leadership, power and control, politics, communication, and the fundamentals of organisational structure and design. Develops skills in researching literature in the field of management and organisation studies.

21131
Business Process Management
Undergraduate
6cp
Raises awareness of the need to efficiently and effectively manage business processes. Students develop an understanding of how to manage business processes through examining and assessing the wide range of techniques and tools that have been developed to assist in this and related decision making. Provides a scientific basis for solving business process problems and improving the performance of business processes. The emphasis in this subject practical rather than theoretical. Students gain an awareness of contemporary approaches to organisational design and change, and the opportunities provided by modern information and communications technologies in achieving competitive advantage.

21132
Introduction to the Community Sector
Undergraduate
4cp
Provides a foundation for understanding the context of non-profit organisations, and the theoretical frameworks for understanding their role and function in social and economic environments. Examines the construction of organisational 'sectors', the relationships between various sectors, and the role and construction of the community sector in particular.

21133
Social Analysis and Community Organisations
Undergraduate
4cp
Introduces a conceptual framework for making connections between the cause and manifestation of social inequalities in Australian society and the intervention of community organisations. Students will undertake individual and group projects involving biography, and research into the historical development of Australian social policy and community organisations.
21134
Introduction to Community Management
Undergraduate
4cp
Introduces the basic features of non-profit organisations, and develops a foundation for students to develop skills in effectively organising aspects of a non-profit organisation. Examines the requirements of establishing an organisation, the principles underlying the voluntary management structure of non-profit organisations, the range of types of non-profit organisations, and their relationship to the community.

21135
Managing Human Resources in Non-profit Organisations
Undergraduate
4cp
Introduces the basic principles of personnel management and industrial relations as they relate to the community organisations. Incorporates the unique features of volunteer management alongside the consideration of management of paid staff, and examines recruitment, selection and staff development principles, industrial conditions, and dealing with industrial disputes.

21136
Resource Management in Non-profit Organisations
Undergraduate
6cp
Provides students with the opportunity to extend their understanding of and ability to apply concepts and techniques drawn from accounting and economics to peculiar problems confronted by non-profit organisations.

21137
Third Sector Theory
Undergraduate
6cp
Introduces students to the growing body of theory about third sector organisations, giving and volunteering. Focuses particular attention on theories that seek to explain the development and change in the third sector, and the interaction of the third sector with business and government. Encourages students to look at the third sector from a long-term perspective.

21138
Strategic Management of Non-profit Organisations
Undergraduate
12cp
Provides an opportunity for students to explore in some depth a particular area of strategic community management that interests them. As students undertake individual research projects, they will explore links between principles of strategic management and practice issues which may arise in the context of their workplace.

21139
Managing Volunteer Programs
Undergraduate
6cp
Introduces students to the main elements of planning and managing an effective volunteer program.
21146
Volunteering in the Community Sector
Undergraduate
6cp
Familiarises students with the importance of volunteers to non-profit organisations, with the history and principles of organised volunteering, and with the motives and recruitment of volunteers.

21147
Governance, Management and Leadership in Non-profit Organisations
Undergraduate
4cp
Assists students to manage more effectively the structural and operational aspects of their organisations, by extending their ability to develop suitable structures for organisations, to develop appropriate and effective organisational systems, and to carry out organisational reviews, problem-solving exercises and change strategies.

21148
Community Research
Undergraduate
4cp
Provides a foundation in basic research and evaluation skills, as they are applied in community organisations. Introduces students to basic research skills that might be applied to a range of activities, including the following: developing knowledge of community needs, analysis and profiles; assessing client response to services; evaluating other aspects of organisational performance; and undertaking research into social issues.

21183
Funds Development
Undergraduate
6cp
Introduces students to the variety of revenue sources utilised by third sector organisations and the variety of methods that are used to tap these resources. Particular attention is given to fundraising from individuals and corporations, but the emphasis is on effectively managing a whole variety of funding resources.

21184
Government and Community Sector
Undergraduate
6cp
Familiarises students with the ways governments operate, and relations between community organisations and governments are constructed and conducted.

21185
Social Change and Community Practice
Undergraduate
6cp
Critically appraises the contributions that community organisations and their programs and activities make to personal and societal transformation in the current social, political, and economic context. The connection of principles drawn from social and political theory to the practice of community organisations will be discussed. Students will explore these links, and develop specific skills in the organisational practice of strategic planning and program development as they undertake individual and group projects.

21186
Community Management Project 1
Undergraduate
6cp

21187
Community Management Project 2
Undergraduate
6cp
Enables students to undertake a practical project involving a specific management problem. Extends the students' capacity to apply skills to practical management problems in the workplace, drawing on experience that students have already gained in the industry and the skills they have developed during the course. The projects will involve the identification and analysis of a management problem, the development and implementation of a strategy to address the problem, and an evaluation of the impact of the strategy. The projects will be designed and proposed by the student, and will be subject to negotiation with and approval by the subject coordinator. Each subject will require a different project proposal. Students will be required to demonstrate the relevance of the project to their own learning and to the workplace. In some circumstances, students may gain approval to draw on major projects that they have already carried out.
Community Sector Project 1

Undergraduate
6cp

Enables students to undertake exploratory or applied projects focusing on particular industry problems or issues. Extends the students' capacity to apply their accumulated knowledge and skills to addressing industry issues that impact on the workplace, drawing on experience that students have already gained in the industry and the skills they have developed during the course. The projects will involve the researching and analysis of an environmental factor that impacts on community organisations, the development and implementation of a strategy to address the issues, and an evaluation of the impact of the strategy. The projects will be designed and proposed by the student, and subject to negotiation with and approval by the subject coordinator. Each subject will require a different project proposal. Students will be required to demonstrate the relevance of the project to their own learning, to the workplace and to the industry generally. In some circumstances, students may gain approval to draw on major projects that they have already carried out.

Business, Government and Society

Undergraduate
6cp; prerequisites: 21130 Management and Organisations; 21125 International Business Environment

Focuses on the relationship between business and government in Australia. Examines the structures and processes of government in Australia and the social context in which business and government operate. Students develop an understanding of techniques for the formal analysis of government/business relationships, and of the ethical and social responsibilities of business.
21224
Indigenous Community Research
Undergraduate
6cp
Provides a foundation in basic research and evaluation skills as they can be applied in indigenous community organisations. Introduces students to basic research skills which they may be able to use in a variety of ways, such as carrying out a community needs analysis, evaluating the performance of their organisation, conducting action research, assessing the community's response to the service, and undertaking research into community issues. Students are encouraged to evaluate and modify techniques for use in indigenous communities.

21225
Managing Human Resources in Indigenous Organisations
Undergraduate
6cp
Introduces the basic principles of personnel management and industrial relations and explores their applicability and application in indigenous organisations. Explores the unique features of community management and the roles and personnel practices in relation to paid staff and volunteers. Examines recruitment, selection, staff development principles, industrial conditions and resolving industrial disputes.

21306
International Employment Relations
Undergraduate
6cp; prerequisites: 21130 Management and Organisations; 21125 International Business Environment
Introduces the theories, issues and practices involved in the management of employment relations within an increasingly competitive global market. As well as gaining a broad understanding of the context and nature of different systems of international employment relations, students are encouraged to explore the cross-national similarities and differences between Australia and its geographical neighbours and trading partners through the completion of case studies and the research of current literature on the topic. Exposes students to the human resources policies and practices of multinational corporations, and explores how they are utilised for competitive advantage.

21311
Strategic Supply Chain Management
Undergraduate
6cp
Introduces a dynamic, revitalised organisational function presently enjoying a worldwide revival as a key element of competitive advantage. Relevant to students wishing to pursue a career in the private, public or non-profit sectors, this subject introduces a range of sophisticated concepts of purchasing and materials management. Covers a wide range of supply chain management activities including formation and management of strategic alliances, buyer selection and management, global sourcing, ethics in contracting situations, and applications of information technology in supply chain management.

21365
Analysing Management Thinking
Undergraduate
6cp; prerequisites: 21130 Management and Organisations; 21125 International Business Environment
Exposes students to the wide variety of frames of reference that underlie management literature and helps them to develop the critical skills necessary to understand, interpret and evaluate this literature. The broad knowledge and interpretive skills gained will be useful to students in all other management subjects as well as in the practice of management. Topics covered range from the rise of modern management thought, through to post-modern concepts of management and organisation, and include a critical evaluation of recent trends in management practice such as Total Quality Management, re-engineering and the learning organisation.

21407
Strategic Human Resource Management
Undergraduate
6cp
Focuses on the strategic nature of human resource management (HRM) functions within various organisations and builds on general issues first raised in 21306 International Employment Relations. Develops an appreciation of critical HRM issues through an exploration of conceptual issues such as alternative ways of viewing the HRM field, how HRM should relate to changes in the organisational environment, and the relationships between organisation
strategy and HRM functions. The underlying concept considered in this subject is how an organisation in a changing environment can best manage its human resources in such a way as to provide long-term benefits to the organisation.

21409
Entrepreneurship and Innovation
Undergraduate
6cp
Introduces students to the entrepreneurial process. Revolves around the preparation of a business plan for a new venture identified by students as having commercial potential. Gives students an appreciation of the opportunities for a career in small-to-medium enterprises and develops skills that will enhance their prospects as employees or as entrepreneurs.

21430
Enterprise Bargaining and Workplace Relations
Undergraduate
6cp
Examines the causes and outcomes of the recent fundamental shift in Australian employment relations from centralised arbitration and conciliation to an enterprise-focused system. Elements of this shift to be examined include the pivotal federal and State legislation, the judicial interpretation of this legislation and the major national wage case decisions. Develops students' skills in the application of conflict resolution and consultative procedures, with particular reference to the enterprise bargaining process.

21531
Managing the International Organisation
Undergraduate
6cp; prerequisite: 21591 International Management
Develops the focus of international management from a country and organisational approach to the implementation of management plans to operate an organisation in an international location.

21532
Applied International Business
Undergraduate
6cp; prerequisites: four foundation and three elective subjects in the International Business major or equivalent
This capstone subject involves applying knowledge gained from the study of prerequisite subjects in the International Business major. Students will achieve this through undertaking research and working on an international business problem while working with an Australian or international organisation. Students will develop a project proposal outlining the methodology for in-depth investigation of a particular issue; analyse primary and secondary data gathered from the client organisation and outside
sources; and prepare oral and written reports of findings in all relevant areas of international business operations.

**21555**  
**Human Resource Management**  
*Undergraduate*  
*6cp*

Introduces students to the theory and practices utilised to manage an organisation's human resources. Establishes the nature and function of the various components of typical human resource management (HRM) practices, and exposes students to the skills of HRM through the use of structured exercises. Considers the future direction and strategic application of HRM within Australia and overseas.

**21591**  
**International Management**  
*Undergraduate*  
*6cp; prerequisites: 21130 Management and Organisations; 21125 International Business Environment*

Develops an understanding of the management practices required to successfully conduct business in other countries. Develops an appreciation of the distinctive features of selected countries and their particular management practices. Explores the ways in which management theories and behaviours may be adapted to suit their application in an international setting. Aims to enhance the skills of Australian managers operating internationally through the development of a more integrated view of international business and related management practices.

**21593**  
**International Business and Government**  
*Undergraduate*  
*6cp; prerequisite: 21591 International Management*

Involves an exploration of the dimensions of the business-government relationship and the roles of these major institutional players in different societies. A fundamental question involves the direction and effectiveness of influence and control. Includes a comparative analysis of the business-government relationships in a selection of industrialised and developing countries.

**21595**  
**International Management Field Study**  
*Undergraduate*  
*6cp; prerequisites: 21125 International Business Environment; 21591 International Management or 21531 Managing the International Organisation or 21593 International Business and Government*

Offers students the opportunity to integrate previous learning in international business and management and to assess theory, practice and multicultural skills via a short, intensive field study in a foreign country. Completion of the subject will allow credit by substitution for the subject 21532 Applied International Business in the International Business major. Students will be expected to demonstrate an ability to research independently and in syndicates in a mature and highly competent manner before being accepted into the subject. Formal class sessions will be limited.

**21609**  
**Business Strategy**  
*Undergraduate*  
*4cp; prerequisites: completion of at least 36cp of a major*

Offers 'virtual experience' in the creation and application of business strategy. It is the discipline that unites and gives purposeful expression to all the skills and knowledge previously acquired. A small number of lectures and video-tutorials give background to the subject, and prepare students for a business strategy simulation. The simulation is the major component of the subject and consumes the most student time. Students work in competing teams under time pressure and with imperfect knowledge to make strategic business decisions. Important learning comes from both the need to make the team function well to achieve results which count for marks, and the requirement to bring together and integrate diverse disciplines.

**21630**  
**Management of the Strategy Process**  
*Undergraduate*  
*6cp; prerequisites: 21130 Management and Organisations; 21125 International Business Environment*

Explores how managers influence strategy processes and can effect valuable changes in organisational activities. On completion, students should be able to demonstrate an
ability to critically analyse strategy processes and understand how these processes can be influenced. Through the medium of class discussion, reflective journal and case history analysis, students test their levels of conceptual abilities and understanding of contemporary business practice.

21700
State, Market and Civil Society
Postgraduate
6cp; prerequisites: completion of Stage 1 of the Master of Management (Public) or its equivalent
Examines the concepts and practice of state, market and civil society, and the interconnections between them. It is a useful preparation for any policy or strategy studies, as it looks at the networking and interactions interweaving these three major ways of organising, both within and beyond the boundaries of the nation.

21702
Industrial Relations
Postgraduate
6cp; prerequisite: 21720 Employment Relations
Provides an in-depth knowledge of the institutions, processes and forces in Australian industrial relations. The contemporary pressures upon industrial relations and the major legislation affecting the workplace will be discussed and analysed. The practical skills required to effectively handle industrial relations will also be covered, particularly those relating to grievance procedures, negotiations and advocacy. A number of overseas industrial relations systems will also be critically analysed.

21711
Politics and Management
Postgraduate
6cp
Develops a holistic perspective of the social, political and institutional environments in which public managers operate; identifies the role and contribution of the major forces in Australia's political and government systems; and analyses particular contemporary issues. Topics include constitutional provisions and practice; Commonwealth-State relations; State and local government; the structure of government; Westminster conventions and Australian adaptations; political parties and elections; the media and politics; ministers and managers; coordination and central agencies; and administrative reform.

21715
Strategic Management
Postgraduate
6cp; prerequisites: 22747 Accounting for Managerial Decisions; 25706 Economics for Management; 24734 Managerial Marketing; 25742 Financial Management
This is an integrating subject concerned with top management strategy for, and management of, change in the economic and social environments of business. Case studies from real business situations are examined. Topics include strategy formulation, strategic planning, management audits, management of change, and social responsibility and corporate effectiveness.

21716
Employment Relations Research Project
Postgraduate
6cp; prerequisites: 21751 Management Research Methods; 21752 Employment Relations Research Proposal
The study planned in 21752 Employment Relations Research Proposal is carried out and a suitable report is submitted. The major phases will include data gathering, data analysis, interpretation of results, and establishing the relationship of these results to the literature and the purpose of the project.

21717
International Management
Postgraduate
6cp
Encourages participants to study how people in other countries go about conducting business and managing their enterprises; ascertain the reasons behind their various management practices; assess their effectiveness; and determine the implications for Australian managers. Helps develop an integrated world view to provide a better basis for decision making within the international business arena.

21718
Organisation Analysis and Design
Postgraduate
6cp
Develops skills in organisational analysis. Develops diagnostic and prescriptive skills in regard to organisations. Focuses on the description and analysis of organisations as formal structures, political systems and cultural entities.
21720
Employment Relations
Postgraduate
6cp
This subject presents an introduction to the areas of industrial relations and human resource management. Topics covered include historical steps in the development of the human resource function and the forces that have shaped its development; major functions of employment relations managers; the relationship between the human resource and industrial relations functions in the modern organisation; the nature of industrial relations and the contribution to understanding made by several conflict theorists; the structure and functioning of formal industrial relations; the form and function of the employer and employee organisations, parties to employment relations; and the nature of efficiency restructuring and enterprise bargaining and their impact upon the management of employment relations.

21722
Leadership and Management Action
Postgraduate
6cp; prerequisite: 21813 Managing People
Emphasises understanding the role of the manager as leader, decision maker and change agent. Topics include the manager’s role; transformational/transactional leadership; rational and incremental decision making; decision-making-alternative strategies; situational characteristics of decision making; creativity and problem solving; transactional analysis; the rational-emotive approach; the Gestalt approach; and dealing with interpersonal conflict.

21724
Human Resource Management
Postgraduate
6cp
Develops the ability to locate, critically analyse and explain the relevance of the recent literature in key areas of Human Resource Management (HRM). Emphasises strategic models of HRM, and the links between HRM and recent trends in management theory and practice.

21725
Organisational Change and Adaptation
Postgraduate
6cp
Develops an understanding of strategies, methodologies, and intervention techniques and skills in managing planned or adaptive organisational change. Consists of two components—a knowledge component and a skills component. The former will be presented through normal lecture discussions. The skills component will be covered through group involvement in an ongoing or potential organisational change problem, through which a group will act as a team of change agents. Results of their efforts will be presented in a two-day non-residential workshop at the end of the semester.

21728
Public Sector Management
Postgraduate
6cp
Introduces students to the theory and practice of public sector management. Explores the competing theories about management in the public sector, and examines practical management skills in the public sector in the light of these competing theories.

21730
Workshop in Advanced Managerial Skills
Postgraduate
6cp; prerequisites: 21813 Managing People and at least two years’ work experience
Provides a unique workshop-based approach for students to understand themselves and develop their managerial skills and competencies. Learning is experiential and progresses in the following way. Students first participate in a two-day seminar which provides theoretical frameworks and exercises for gaining feedback and insights into their patterns of managerial behaviour. Together with a first assignment, this enables them to focus on particular areas where they would choose to develop increased effectiveness.

A three-day workshop then provides opportunities for students to explore their managerial patterns and to experiment with new and more effective ways of improving their managerial competencies in the areas they have defined. A second post-workshop assignment builds upon and consolidates transfer of learning to work and other situations.
128 Subject descriptions

The approach used in this subject is intensive and its teaching methodology is very different from that employed in 21779 Management Skills. Students should choose either subject depending on the teaching approach they prefer. If students have completed 21779 first, it is possible to then undertake Workshop in Advanced Managerial Skills with permission from the subject coordinator.

21732
Program Evaluation
Postgraduate
6cp; prerequisites: completion of the first stage of the Master of Management (Public) or its equivalent
Covers, in some detail, evaluation of programs (broadly defined) in the government and non-profit sectors. It examines the effect of program evaluation on efficiency, effectiveness and accountability, and develops students' capacity to make informed critical assessments of evaluation techniques, use them appropriately, and draw practical information for improving organisational performance from these techniques.

21739
Health Funding Policy and Resource Management
Postgraduate
6cp
Develops basic skills in accounting and finance; analyses constraints upon revenue sources and budgetary processes in government agencies; and examines Budget papers, annual reports, Parliamentary scrutiny, Auditors-General, and internal auditors. Students will be expected to demonstrate competence in budgeting, cash management, cost minimisation, cost-volume-profit analysis, and financial statement analysis. Topics include basic accounting concepts; economic theories and concepts; policies, expenditure and issues in public health; allocation of resources; preparation of a unit budget; accountability for public resources; Case mix and related concepts; funding issues -- privatisation, managed care; financing healthcare, insurance, contracts, managed care, and reform of health insurance policy; and performance review and reporting.

21741
Operations Management
Postgraduate
6cp
Operations management is about the way organisations produce goods and services. Everything we buy, eat, read and wear has to be produced. Every service we receive from hospitals, banks, local government, the local cinema etc. has to be produced. This subject provides a broad introduction to planning, design, implementation and improvement of operations. Topics covered include operations strategy; various approaches to operations planning and control; quality management; performance measurement; supply chain management; and operations improvement. Teaching methods include case studies and a hands-on simulation exercise.

21742
Quantitative Management
Postgraduate
6cp
Provides an introduction to the application of operations research and mathematical modelling techniques to the solution of business problems. The practical application of the various techniques is stressed. Hands-on experience is gained through the use of computer software packages. Topics covered include a revision of basic statistics; project management (CPM/PERT); decision models; simulation techniques; linear programming; statistical quality control; game theory; and inventory management.

21743
Quality Management Systems
Postgraduate
6cp
Develops an understanding of the practical and managerial aspects of quality, including the fundamentals of Total Quality Management and its relationship to productivity and organisational performance. Topics include the fundamentals of quality, productivity, and organisational performance; Total Quality Management; traditional concepts and modern definitions of quality; quality management tools and techniques; quality standards; and performance measurement.
21744  
**Materials Management**  
*Postgraduate*  
*6cp*  
Presents a strategic approach to production planning and control. Topics include a framework for the analysis of production planning and control systems; different approaches to production planning and control e.g. time-phased (MRP), JIT, ROP, TOC; a strategic approach to the selection of production planning and control systems; integrating MRP and JIT; implementation issues; shop-floor scheduling techniques; benchmarking for performance measurement; and developments in EFM and their likely impact on production planning and control systems.

21745  
**Service Operations Management**  
*Postgraduate*  
*6cp*  
The management of the design, production and delivery of services, and the application of operations concepts and methods to service situations. Topics include strategic management and marketing, process analysis, and delivery systems; establishment, measuring and control of service levels; location and layout; capacity planning; quality assurance; organisational behaviour and design in services; and managing professional services.

21747  
**Operations Management Policy**  
*Postgraduate*  
*6cp; prerequisite: 22747 Accounting for Managerial Decisions*  
Based around a computer simulation of a real-world manufacturing organisation in which students make up a management team. Participants relate strategic operations management issues to other functional areas of business, to the business itself, and to relevant product/market environments. Includes briefings on the formulation and implementation of a number of business plans, and role-play exercises. A high degree of student interaction and cooperative teamwork is required.

21749  
**Computer-based Information Systems for Managers**  
*Postgraduate*  
*6cp; prerequisites: basic understanding of personal computer systems, DOS, and introduction to software packages*  
Provides an overview of computer-based information systems; examines how information systems are designed to support management functions; explores the use or misuse of information systems in the public sector. Topics include the concepts of MIS, information technology, and the uses and applications of management information systems; database management systems, design of systems, evaluation, and control of information systems; and the implications of introducing information systems in organisations.

21751  
**Management Research Methods**  
*Postgraduate*  
*6cp*  
Contributes to the students' vocational and professional competencies by giving training in the analytic and research skills that can be applied to the solution of problems encountered in their professional lives. Provides the necessary expertise in research methodology for the project-based subjects which are a part of the students' postgraduate programs. Topics include survey research, experiments and quasi-experiments, case studies, content analysis and interviews.

21752  
**Employment Relations Research Proposal**  
*Postgraduate*  
*6cp; prerequisite/corequisite: 21751 Management Research Methods*  
In this subject, students complete a thorough literature review and develop a detailed proposal for the project to be completed in 21716 Employment Relations Research Project. Students will be allocated to a supervisor appropriate to their topic area and will be expected to undertake in-depth and extensive reading in this area. The project proposal will be submitted as a written proposal covering the literature review and the aims and research methodology of the proposed project.
21754
Research Proposal (Public/Community)
Postgraduate
6cp; prerequisite: 21751 Management Research Methods or 21781 Social and Community Research

Students will specify a particular management problem within an overall context; identify fundamental issues relating to the selected problem as a result of an in-depth literature review; and apply research methodology and skills acquired in 21751 Management Research Methods or 21781 Social and Community Research. Appropriate topic areas will be determined in consultation between the student and academic supervisor. This will then be followed by clarification of problem, description of context, specification of research questions, literature review and development, and specification of research methodology.

21758
Strategic Governance and the Business of Government
Postgraduate
6cp; prerequisites: completion of Stage 2 of the Master of Management (Public) or its equivalent

Draws upon strategic management models for the public, private and non-profit sectors and the previous studies of students. It helps them to develop a capacity for 'big picture' analysis, planning and implementation of strategy.

21759
Strategic Issues in Community Management
Postgraduate
6cp; prerequisites: 21766 Managing Community Organisations; 21767 Third Sector: Theory and Context

Introduces students to strategic management in community (non-profit) organisations. Provides the opportunity for students to reflect on, extend, and integrate their knowledge of community management gained from preceding subjects in the course. Explores critical issues currently impacting on the sector, and appropriate strategic responses to those issues. Encourages a strategic perspective on the management of organisations and an ability to apply that perspective within community organisations.

21760
Employment Conditions
Postgraduate
6cp; prerequisite: 21720 Employment Relations

Provides a focus and workplace application for employment relations, human resources management, industrial relations and industrial law. Topics covered include establishing wage/salary packages – legal minimal, relativities; wage and salary administration; awards of the Industrial Tribunals and Enterprise Agreements; annual leave, sick leave, other leave, penalties and loadings, over-award, incentive, productivity and other payments; health and safety conditions and legislation; and non-wage conditions of employment.

21766
Managing Community Organisations
Postgraduate
6cp

Provides an introduction to the field of community management. Develops a critical appreciation of management practices and organisational forms within the community sector, evaluates the application of different models of management, and explores key issues such as governance and accountability.

21767
Third Sector: Theory and Context
Postgraduate
6cp

Introduces students to some of the ways of thinking about the third sector and the community sector within it. Students study a growing body of knowledge about the third sector, its origins, dimensions and contribution to society, economy and polity of Australia and selected other countries. It also introduces students to ways of thinking about the dynamic interaction between third sector organisations and the social, economic and political systems in which they are embedded.

21768
Policy Analysis and Practice
Postgraduate
6cp; prerequisite: completion of Stage 2 of the Master of Management (Public) or its equivalent

Covers the different ways of analysing policy and the part that any individual might play in policy. Students explore the application of policy theory in practice, and the role that managers can play in this.
21769
Human Resources in the Third Sector
Postgraduate
6cp; prerequisite: 21766 Managing Community Organisations
Together with 21731 Resources Management (Non-profit), examines the prerequisites of good management i.e. the management of basic human and material resources. It focuses on those features and issues of human resource management that are distinctive of community or non-profit organisations, including the nature of the labour market, the use of volunteers, and the issues of leadership, control, and best practice.

21775
Comparative International Employment Relations
Postgraduate
6cp
Provides students with a knowledge of the nature and management of employment relations from an international perspective. Introduces, at a conceptual level, the major elements of human resource management and the industrial relationship, including key forces, parties and processes. Examines the impact of culture, history and other variables upon the development of employment relations practices and processes, and analyses several national systems of employment relations. Considers the nature and impact of international labour standards and the role of bodies such as the International Labour Organisation, the European Union and ASEAN. Also examines the particular employment relations issues and difficulties associated with multinationals, expatriate labour and cross-cultural management.

21778
Developing Financial Resources
Postgraduate
6cp; prerequisite: 21766 Managing Community Organisations
Introduces students to the variety of revenue sources utilised by third sector organisations and the variety of methods that are used to tap these resources. Particular attention is given to fundraising from individuals and companies, but the major emphasis is on effectively managing and developing the variety of revenue sources in the context of the organisation’s environment and in accord with the organisation’s mission.

21779
Management Skills
Postgraduate
6cp; prerequisite: a minimum of two years’ work experience
Students will develop insight into the interpersonal skills requirements of managers and establish a basis for the future development of skills. Deals experientially with the interpersonal skills needed by managers to lead teams successfully. Takes the individual’s awareness of his/her skills and interpersonal style as its starting point and goes on to examine basic communication skills such as listening, counselling and non-verbal behaviour. Deals with applied skills including interviewing, time management, goal setting, delegation, group facilitation and meetings management, decision making, conflict management and negotiation, and organisational communication.

21780
Readings in Administration
Postgraduate
6cp; prerequisites: Semesters 1 to 4 of the MBA
The reading subject is taken under the direction of a member of staff. The topic must be approved by the Coordinator of the MBA and the appropriate Head of School. Formal lectures in selected areas may be undertaken, as directed by the supervising lecturer. The subject allows a degree of flexibility in programming for specialised needs of individual students, but can only be undertaken as part of the specialty strand in the MBA program. Therefore, the subject chosen should be related to other subjects within the chosen strand.

21781
Social and Community Research
Postgraduate
6cp; prerequisites: 21766 Managing Community Organisations, 21767 Third Sector: Theory and Context
Introduces the theory and methods of social research as applied within the community sector. Explores research as a problem-solving and political tool, critically examines both quantitative and qualitative research methods, and introduces the basis of statistical analysis (using SPSS). Provides a basis of understanding for those who manage or use research projects, and provides a necessary basis for those undertaking their own research.
132 Subject descriptions

21784
Global Business Competitive Intelligence
Postgraduate
6cp
Business or competitive intelligence is increasingly used by firms seeking to improve their ability to compete globally. Traditional management information systems are often unable to keep track of global opportunities and threats, or else provide so much information that decision makers are overwhelmed. Business and competitive intelligence is an important aspect of strategic planning. As such, it draws on, develops and applies concepts from a number of disciplines.

21785
Research Techniques in Management
Postgraduate
6cp
Provides research students with the knowledge and skills to make critical methods and design choices in business research. Reviews the common problems in making choices and reviews the costs and benefits of various options available to business researchers. Applies students' existing knowledge of disciplinary theories, research methods and statistics to solving research design issues and writing.

21786
Research Seminars in Management
Postgraduate
6cp
Provides a forum each semester for students to present an update on their research efforts and review the work of others.

21792
Research Project (Public/Community)
Postgraduate
6cp; prerequisite: 21781 Social and Community Research
Students apply their knowledge and research skills to the in-depth study of a specific topic. This will occur through a search of the literature, and either an applied consultancy project, or a small-scale empirical research project. A research report will be produced which reviews the topic, presents the findings and evaluates the implications of those findings.

21794
Research Proposal – Operations Management
Postgraduate
6cp; prerequisites: completion of Semesters 1 to 4 of the Master of Business in Business Operations Management
Involves the identification of a suitable project topic, the completion of a thorough literature review in the chosen topic area and the development of research methods that address the purpose of the project. Most projects are based on a work-related problem and provide an opportunity to use knowledge and techniques learnt during the course in a practical way. The project is carried out in 21795 Business Project – Operations Management. The project proposal will be presented orally to a graduate seminar, and submitted as a written proposal covering the literature review and the aims and research methodology of the proposed project.

21795
Research Project – Operations Management
Postgraduate
6cp; prerequisite: 21794 Research Proposal – Operations Management
The study planned in subject 21794 Research Proposal – Operations Management is carried out and a suitable report is submitted. The major phases will include data gathering, data analysis, interpretation of results, and establishing the relationship of these results to the literature and the purpose of the project.

21797
Managing the Supply Chain
Postgraduate
6cp
Strategic supply chain management introduces a dynamic, revitalised organisation function presently enjoying a worldwide revival as a key element of competitive advantage. Introduces a range of sophisticated concepts of purchasing and materials management. Relevant to the private, public or non-profit sectors, this subject covers a wide range of supply chain management activities including formation and management of strategic alliances, buyer selection and management, global sourcing, ethics in contracting situations and applications of information technology in supply chain management.
21798
Strategic Supply Management
Postgraduate
6cp; prerequisite: 21797 Managing the Supply Chain

Draws together the wide range of concepts which have been covered in earlier parts of the program and enables the students to conceptualise purchasing and materials management within the framework of the corporate strategy process. Keeps practitioners up-to-date with the latest practices and policies in the business, government and non-profit sectors that ensure procurement is part of the strategic decision-making process.

21811
Global Strategic Management
Postgraduate
6cp; prerequisites: 24734 Managerial Marketing; 25742 Financial Management; 25706 Economics for Management; 22747 Accounting for Managerial Decisions

Provides an understanding of the contemporary international business environment and how business can formulate appropriate organisational strategies. A variety of strategic options available to organisations will be explored. Emphasis will be placed on the inevitability of changes in the global environment and on the need for strategic management in this changing environment in Asia, Europe and the USA.

21813
Managing People
Postgraduate
6cp

Uses a behavioural science theory and research perspective to diagnose organisational processes. Students learn to apply behavioural science ideas to analyse individual performance issues and organisational processes in the management of human performance at work; relate people management practices to developments in management thought and to changing values in the world of business and administration; critically evaluate the major theories and models that have been developed to explain individual, group and inter-group behaviour in work organisations; and appraise organisational communication practices in the context of organisational diversity.

Provides an introduction to the field of people management; basic individual psychology; motivation, job design and performance management; managing groups at work; self-managing work teams; intergroup behaviour and conflict in organisations; leadership; behavioural aspects of decision-making; and communication for people management.

21814
Management Project Design
Postgraduate
6cp; prerequisites: normally completion of the first eight subjects in the Master of Management program; corequisite: 21751 Management Research Methods

Further develops knowledge and skills in management research. Specific content will be determined by the student and his or her supervisor in relation to the specific project topic.

The major emphasis will be on defining the topic; locating the relevant literature; analysing this literature and integrating it with relevant issues; formulating conclusions and implications arising from the literature review; designing a study to explore these implications; and preparing a report.

21815
Management Project
Postgraduate
6cp; prerequisites: 21751 Management Research Methods; 21814 Management Project Design

The knowledge of research methods gained from Management Research Methods is applied in the data gathering, analysis and interpretation phases. On completion, students will be able to systematically gather, process and interpret data in the area of management; effectively relate research results to the relevant management literature; prepare a thorough and effective report on a completed management project; and demonstrate a comprehensive knowledge in the area chosen for the project.

21817
Volunteering: Social and Organisational Perspectives
Postgraduate
6cp

The level of volunteering in a society is a sign of its well being, and third sector organisations are the main beneficiaries of volunteering. This subject provides students with a comprehensive introduction to the social phenomena of volunteering and the use of volunteers by
third sector and public organisations. This is an elective subject and will be taught only if sufficient interest is expressed.

21818
Strategic Volunteer Development
Postgraduate
6cp; corequisite: 21817 Volunteering: Social and Organisational Perspectives
Designed to introduce students to the main elements in planning and managing effective volunteer programs, and assist them in integrating volunteering into the strategic planning process of third sector organisations and in raising the awareness of volunteering in a wider society.

21819
Managing in an Era of International Market Orthodoxy
Postgraduate
6cp
Seeks to provide participants with an opportunity to explore the link between government economic policies since World War II and the emergence of management responses to these policies across private, public and non-profit organisations. Takes a management approach to the problems and opportunities posed by contemporary economic policies that have seized the political agenda in more than one hundred countries. Taking a global perspective, the subject provides an international comparison of management responses to current economic, political and social issues.

21820
Managing in the Global Public Interest
Postgraduate
6cp
Examines the prevailing paradigms of public sector governance which have emerged since the late 1970s in terms of their impact on managing in the public interest. Topics include defining the public interest; public choice theory, its origins and driving values versus more centralist governments’ ideas; public choice, supra-national, national and third sector organisations; public choice, trading blocs, regionalism and the challenges for nation states; managerialism; concepts of public good, collective and individual responsibility; transferability of prevailing ideas in public sector governance; ethical dimensions of public management; service quality ideas and the post-bureaucratic paradigm; governments’ strategic responsibilities; the importance of social, environmental and other policy arenas; global case studies; and re-defining the public interest.

21821
Grassroots Organising for Global Change
Postgraduate
6cp
Within a context of globalisation, this subject critically appraises the diverse contributions an emerging global civil society in general, and non-government organisations (NGOs) in particular, make towards personal and societal global transformation. The connection of principles drawn from social and political theory such as participatory decision making and empowerment, to the practices of international NGOs, intermediate NGOs and Peoples’ Organisations towards a ‘grassroots’ or ‘bottom up’ transformation are discussed. Students will have an opportunity to explore these links and specialise in micro-skills development in specific areas such as program development and advocacy in assignment work.

21822
International Health Management
Postgraduate
6cp
Examines two main aspects of health management – trends and lessons from overseas that have relevance for Australian health managers and the potential marketing and transfer of Australian health management expertise to overseas countries. Topics include health funding policy (and epidemiological considerations), health care models and management systems; context of health management (prevailing conditions); management of health technology; ethical and legal dimensions of health management; concepts of quality management.

21823
People Management
Postgraduate
6cp
Identifies the full range of skills and experience that people in organisations can contribute from their differing cultural and social contexts. Shows how most effectively to use these skills within the organisation. Equips students to critically analyse standard approaches to human resource management that assume that
'one size fits all', as well as to help their organisations develop workplace environments that emphasise flexibility and diversity.

21824
Interpreting Management Information
Postgraduate
6cp
Contributes to the students' vocational and professional competencies by enhancing their knowledge of business through conducting, analysing, interpreting, and utilising management data in order to improve managerial decision-making and to facilitate knowledge-based management in organisations.

21825
Advanced Organisation Analysis and Design
Postgraduate
6cp; prerequisite: 21718 Organisation Analysis and Design
Provides managers with in-depth exposure to trends in new organisational practices. Managers often experience these in their work settings, but lack knowledge of the assumptions behind these practices, and evidence about their effects. Provides managers with the means to critically evaluate new organisational practices and assess their applicability to the 21st century organisation.

21826
Advanced Management Action
Postgraduate
6cp; prerequisites: 21730 Workshop in Advanced Managerial Skills; 21813 Managing People
Managers often experience a tension between their own theories-in-use and normative theories of management which frequently represent prescriptions for managerial effectiveness. This subject develops an awareness and understanding within the practicing manager of their own theories-in-use. It examines the nature of the engagement that exists between these theories-in-use, normative theories of management including empirically-derived understanding of managerial work and behaviour and seeks to develop within the practising manager a critical analytical framework which can be utilised to guide future managerial actions and behaviours.

21827
Change Management
Postgraduate
6cp; prerequisite: 21718 Organisational Analysis and Design
Provides managers with a framework for rethinking their past change management experiences, and for gaining a critical appreciation of future change management practices. Takes students through four aspects of change management: leading change; managing individual experiences of change; conceptualising the need for change; and critiquing specific change management programs.

21828
Interpreting Strategic Thinking
Postgraduate
6cp
Contributes to students' vocational and professional competencies by providing an holistic, comprehensive and applied approach to the concepts of corporate strategy that is essential to strategic thinking. Designed especially for advanced management and MBA study.

21829
Understanding Diversity: An International Perspective
Postgraduate
6cp
Provides insight into the management of diversity in an international perspective. Explores the impacts of the changing global economy and world order, demographic changes, social organisations and stratification and different politico-legal structures in business organisations and the consequences for the management of diversity.

21830
Understanding Diversity: Within the Organisation
Postgraduate
6cp
Provides insight into the management of diversity and focuses on understanding diversity within organisations. Examines competing explanations for a concern with diversity and emphasises various diversity change strategies and processes, including designing, implementing and evaluating the effects of diversity strategies.
21831
Action Research Project
Postgraduate
6cp
Reinforces previous learning and enables the student to develop skills to 'make a difference' in their own organisation.

21832
Managing for Sustainability
Postgraduate
6cp
Provides students with a framework for incorporating the natural environment into business strategies and practices. Provides an opportunity to systematically understand business-environment relationships and integrate concepts and techniques from disciplines ranging from operations management to environmental sociology. Provides a unique set of skills for future managers to transform environmental challenges into business opportunities.

21833
Strategic Management of the Global Workforce
Postgraduate
6cp
Focuses on issues relating to the management of a global flexible workforce, specifically strategic international dimensions of human resource management (HRM). Topics include the strategic link between international business and international HRM; theories of strategic international HRM; strategy, structure and the people management function; contemporary issues in international HRM; expatriate management; and critical evaluation of the international HRM function. Particular emphasis will be placed on the management of expatriates in new organisational forms, e.g. networks and joint ventures.

21834
Evolution of International Business
Postgraduate
6cp
Traces the evolution of international business over the last 200 years. Highlights the impact of trade upon the development of the modern world, particularly in the Asian region, and its impact upon wealth distribution and political influence. Integrates the various waves of technological innovation with changing trade and influence patterns. Covers the interaction of political thought with economic and trade changes. Discusses changes in business structures and management practice. Running through the subject is an attempt to identify past lessons which may be relevant to the evolution of the modern world.

21835
Human Resource Management Practices
Postgraduate
6cp
Examines key human resource management (HRM) functions and processes from the perspectives of the multiple stakeholders in the employment relationship. Develops specific HRM knowledge and skills in workforce planning; job analysis; position descriptions; staffing; training and development; performance management; and remuneration management. Develops a critical perspective to the strategic function of HRM in the strategic management process.

21836
Manufacturing Strategy
Postgraduate
6cp; prerequisite: any two subjects from the Operations Management sub-major and any two subjects from the Manufacturing Management sub-major
Explores the process of how to develop a manufacturing strategy to support the achievement of corporate objectives. Focuses on taking an integrated approach to linking all the functional areas of business operation and manufacturing to ensure an efficient and balanced production system, rather than the 'optimisation' of any single functional area's performance or output. Covers general background; industry, competition and the organisation; core concepts; produce demand forecasting and master planning; principles of production; purchasing; physical distribution; maintenance and management; the role and fit of packaged approaches; and business performance monitoring.

21837
Strategic Operations Management
Postgraduate
6cp; prerequisite: any four core MBA subjects
Provides an applied perspective to the question of how to analyse and manage business operations in both the manufactured goods and the service sectors. Adopts a
strategic focus in demonstrating how operations can be used to leverage the competitive capability of an enterprise in global markets and to increase effectiveness of public sector delivery environments. Raises awareness of the increasing interdependence between service functions as integral to the process of manufactured goods.

**21838**

**Product and Process Design**  
*Postgraduate 6cp*

Central to the integration of management with the manufacturing process is the business of simultaneous consideration of product and process design and development. The balancing of these requirements is referred to as concurrent engineering, and involves questions of product quality, economics of manufacturing, safety and environmental concerns, and choices of raw material, purchased parts and manufacturing processes. The concerns are all central to the implementation of a strategic manufacturing perspective for the firm. Covers product requirements; product engineering; concurrent engineering; and project design management in compliance with manufacturing strategy.

**21839**

**Volunteer Recruitment for Major Events**  
*Postgraduate 6cp; prerequisite: relevant work experience and good communication skills; interview by subject coordinator*

Examines the nature and scope of recruitment and selection requirements for major events and for the voluntary sector. Provides an understanding of the nature of voluntary recruitment practices and its relation to the wider human resource planning role. Examines the theory and practice of this type of recruitment. Provides an opportunity to build on the theoretical and practical aspects of job analysis and computerised recruitment techniques and allows participants to develop and implement practical interviewing, selection and decision making skills through 72 hours of practical experience.

**21842**

**Managing Responsible Business**  
*Postgraduate 6cp*

Provides a systematic examination of how business can demonstrate responsible practices toward other stakeholders, including communities and trading partners locally and globally, and the general environment. Addresses these issues from multiple perspectives and at levels ranging from the individual to the international community.

**21843**

**Managing Intelligence for Global Business**  
*Postgraduate 6cp; prerequisite: minimum two years' full time work experience*

Gaining and maintaining a competitive advantage in business and government often relies on keeping fully informed about potential developments likely to affect the future of an organisation's products and its markets both within Australia and internationally. The establishment and maintenance of a strategically designed, competitive intelligence system within an organisation is one way of keeping up to date about opportunities and threats. However, competitive intelligence involves considerations that are far broader than just maintaining details of market or industry analysis. Knowledge of the country context such as barriers to, or ease of entry, the end for strategic alliances; legislative frameworks; labour market structures; and the stability of political systems provide some key focus points for examining the global environment.

**21853**

**Strategic Competitive Advantage in the Digital Age**  
*Postgraduate 6cp*

An integrating subject concerned with obtaining competitive advantage at a strategic level in the digital age. Using a framework approach to strategic competitive advantage and change management, the subject examines the digital information age at three levels. First, at a national policy level by comparing the approach of the USA, UK and Australia. Second, at the level of tele-media industry and the organisations that supply it. Thirdly, the effect of the digital age (through e-business) on the strategic competitive advantages of
industries already affected in the USA will be reviewed, as well as changes to competitive advantage in Australia.

21854
Innovation and Entrepreneurship
Postgraduate
6cp
Presents students with a perspective on new, small and innovative enterprise in comparison with the traditional large, bureaucratic and conservative organisation. An understanding of innovation and new venture creation is provided. Students gain an appreciation of the challenges and problems of small business and develop the skills valuable for a career in small to medium enterprises.

21907
Research Methods in Management (Honours)
Undergraduate
6cp
Provides some of the analytical and practical research skills required for successful completion of the major research component of the honours program, the Thesis in Management. Topics include: surveys; experiments and quasi-experiments; content analysis; and qualitative techniques such as case studies, interviewing and action research.

21908
Advanced Research Methods in Management (Honours)
Undergraduate
6cp
Provides research students with the knowledge and skills to make critical methods and design choices in business research. Reviews the common problems in making choices and reviews the costs and benefits of various options available to business researchers.

21909
Theorising Organisations and Management
Undergraduate
6cp
Provides the critical skills, methodological judgment, and theoretical sophistication to be able to design a competent research project. Provides a forum each semester for students to present an update on the research efforts and review the work of others.

21910
Researching Organisations and Management
Undergraduate
6cp; prerequisites: 21909 Theorising Organisations and Management; 21908 Advanced Research Methods in Management (Honours)
Provides the critical skills, methodological judgment, and theoretical sophistication to be able to design a competent research project.

21911
Thesis in Management (F/T)
Undergraduate
24cp; prerequisite: admission to the Honours program
Requires the student to produce a 20,000 word (maximum) thesis based on an original problem of a theoretical or applied nature. The thesis is expected to demonstrate the student’s competency to conceptualise, conduct and present research in a scholarly and independent manner.

21912
Thesis in Management (P/T)
Undergraduate
24cp; prerequisite: admission to the Honours program
Requires the student to produce a 20,000 word (maximum) thesis based on an original problem of a theoretical or applied nature. The thesis is expected to demonstrate the student’s competency to conceptualise, conduct and present research in a scholarly and independent manner.

22026
Ethics and Accountants
Undergraduate
6cp; prerequisites: 22320 Accounting for Business Combinations or 22420 Accounting Standards and Regulations; 22321 Cost Management Systems
Students gain skills in identifying ethical issues which can arise in the accounting environment, and develop an intellectual framework within which these issues can be examined and possibly resolved. A strong emphasis will be on the development of decision-making skills and negotiation skills within an ethical context. Cases will be used and presented in a variety of formats, including text, video, role plays and hypotheticals. The group method will be used,
as it has been identified as a process which can assist in the identification and resolution of ethical issues.

22028
Accounting for Managers
Undergraduate
4cp
Introduces students to accounting from a 'user' as opposed to a 'practitioner' perspective. Focuses on effective management and decision-making through the development and application of analytical skills from accounting. Skills include analysis and interpretation of financial statements, assessment of alternative sources of finance, the costing of products and services, critical assessment of internal control systems, and planning.

22105
Accounting A
Undergraduate
4cp
Introduces accounting as an information system designed to enhance decision making, accountability and control within organisations and the marketplace. Covers three broad areas: (a) the nature of accounting and its relationships to financial and products markets, and the use of accounting information in external and some internal decision contexts of the organisation; (b) the accounting process, double entry bookkeeping, definition of the elements of financial statements, preparation of financial statements; and (c) the use of computer software packages in the analysis and presentation of accounting information, and as an aid to decision making.

22157
Australian Corporate Environment (Project)
Undergraduate
For Bachelor of Accounting students only
4cp
Introduces students to the Australian corporate environment as part of their first Industrial Experience Semester. Students undertake a variety of work-based assignments involving research into the structure of the sponsoring organisation they are training with, readings of current business journals, interviews with managers, and regular readings and homework from the set text.

22205
Accounting B
Undergraduate
4cp; prerequisite: 22105 Accounting A
Equips students with the appropriate skill in the accounting techniques necessary to participate in a managerial capacity in the analysis of accounting information as it is used to facilitate decision making. Ethical implications of decisions will be considered throughout the subject.

Cover areas in both financial and management accounting, including the preparation of accounting reports for companies and partnerships; the development of relevant cost concepts used in costing systems that also facilitate product- and activity-based costing; and the use of this information in performance evaluation. Spreadsheets will be used extensively.

22206
Government Accounting
Undergraduate
6cp; prerequisite: 22105 Accounting A
Gives a general coverage of the broad principles underlying public sector accounting, auditing and budgeting, with particular emphasis on ministerial departments and statutory bodies at federal, State and local government levels in Australia. Topics covered include the nature and environment of government accounting; implications of the fund theory of accounting for the public sector; federal, State and local government accounting processes and procedures; the role of accrual accounting in the public sector; formulating government budgets and the mechanisms of budgeting; management techniques in government business
Subject descriptions

enterprises; accounting standards in the public sector; and developments and innovations in government accounting.

22219
Social and Environmental Accounting
Undergraduate
6cp; prerequisite: 22205 Accounting B
Introduces students to the development of accounting in the wider context of society and the environment. As environmental issues come to the top of the political agenda, there is a great need for professionals to have an understanding of the new relationship that is being constructed between business and society.
Topics include an analysis of present financial accounting practices here and internationally; an exploration of current research; problems associated with liability accounting, especially contingent liabilities; measurement and valuation; environmental audit; and accounting for sustainability.

22240
International Accounting
Undergraduate
6cp; prerequisite: 22205 Accounting B
In a rapidly changing world environment, the significance of international accounting has grown substantially, along with the expansion of international business activity. This subject enables students to explore the complexity and the diversity of the international dimensions of accounting. Introduces a range of issues with special reference to the comparative development of national accounting systems, international accounting standards and transnational reporting issues. Covers a number of important areas and will not only inform students about the major issues, ideas and developments, but will also stimulate further inquiry and debate.

22309
Accounting for Overseas Transactions
Undergraduate
6cp; prerequisite: 22105 Accounting A
Introduces students to the basic concepts underlying the variety of accounting issues involved in the recording and reporting of overseas transactions. Covers relevant aspects of documentation, foreign exchange gains and losses, foreign exchange hedging, forward exchange contracts, effects of overseas inflation, financing overseas transactions and facilitation through government and non-government agencies. Provides skills and information needed to advise clients on overseas transactions. Concentration is placed on the operational and accounting treatment of foreign operations as distinct from a marketing or economic approach to the subject area.

22311
Accounting for Valuation
Undergraduate
6cp
Enables students to acquire an understanding of the accounting implications of valuation as it relates to real and intangible assets. Includes regulations and accounting standards associated with valuation, together with the presentation of valuation reports.

22312
Accounting for Superannuation
Undergraduate
6cp; prerequisite: 22205 Accounting B
Examines accounting for superannuation. Considers the economic, institutional and legal backgrounds as well as their regulation. Particular matters addressed include accounting and measuring issues concerned with superannuation assets and benefits. Relevant local and overseas accounting standards are studied. Superannuation assets and liabilities for superannuation plans, and supporting companies accounting for employee entitlements, are also considered.

22313
Accounting Implications of Structures and Taxation
Undergraduate
6cp; prerequisite: 22205 Accounting B
Examines the accounting implications in the administration of taxation. Addresses the use of accounting information in the preparation of taxation returns for various types of entities. A particular issue would be reconciliation of accounting income with taxable income. Other matters covered include issues, relating to tax effect accounting and best accounting practice in taxation matters suggested in the Accounting Guidance Releases; and accounting for taxation structures including such entities as companies, trusts and superannuation funds.
22318

Contemporary Issues in Management Accounting

Undergraduate
6cp; prerequisite: 22421 Management Decisions and Control

Introduces students to the use of contemporary management accounting ideas and techniques. The emphasis is upon developments being undertaken by Australian organisations. The subject explores, in greater depth than in the two core management accounting subjects, the design and implementation of appropriate costing systems and decision and control concepts, techniques and skills. Content at any time will reflect current developments. Illustrative topics are activity-based costing and target costing; benchmarking; costing, reporting and performance-evaluation systems design in a TQM environment; compensation systems design; capital investment decisions; and the impacts of management accounting innovation implementation.

22319

Issues in Financial Statement Analysis

Undergraduate
6cp; prerequisites: 22420 Accounting Standards and Regulations; 26122 Quantitative Methods for Business

Focuses on the relevance of financial accounting information to economic decisions such as investment and lending, includes the use of statistical techniques for understanding the relationship between accounting numbers and accounting phenomena such as financial distress and corporate failures, and for understanding the behaviour of accounting numbers over time.

Topics covered include the objectives of financial accounting; the sources of accounting information; an introduction to accounting ratios; cross-sectional and longitudinal accounting studies; and the relationship of accounting numbers to share price behaviour, corporate financial distress, mergers and acquisitions, and other corporate accounting phenomena.

22320

Accounting for Business Combinations

Undergraduate
6cp; prerequisite: 22205 Accounting B; recommended: to be taken at the same time as 22420 Accounting Standards and Regulations

Together with 22420 Accounting Standards and Regulations, this subject deals with the application and analysis of prescribed accounting treatments. Surveys the institutional and legal framework of modern Australian accounting. Refers to international accounting standards and local and overseas standards and exposure drafts. Emphasises reporting — main topics include accounting for companies including debt and equity and its restructuring, accounting for acquisition of assets including business enterprises, valuation and goodwill, consolidated accounts of complex economic entities, accounting for associate companies and joint ventures, corporate restructuring and liquidation. Deals with preparation of accounts to meet corporate law and professional disclosure requirements. Looks at emerging issues and exposure drafts. Makes extensive use of spreadsheet programs. Students will be expected to produce business-quality reports using word-processing programs.

22321

Cost Management Systems

Undergraduate
6cp; prerequisite: 22205 Accounting B

Introduces students to the basic concepts underlying management accounting with a particular emphasis on current developments. Introduces appropriate cost management concepts, techniques and skills such as cost planning, cost behaviour, cost estimation, and cost accumulation and allocation systems (job, process and activity-based costing). Emphasises using accounting information to understand and make decisions about the management of the cost structure of an organisation.

22420

Accounting Standards and Regulations

Undergraduate
6cp; prerequisite: 22205 Accounting B; recommended: to be taken at the same time as 22320 Accounting for Business Combinations

Provides students with the ability to understand, critically evaluate and apply accounting standards and interpret financial reports. Considers the financial reporting environment
and factors influencing the form of financial reporting, and addresses a range of accounting issues from within a contracting cost framework.

22421
Management Decisions and Control
Undergraduate
6cp; prerequisite: 22321 Cost Management Systems
Introduces students to the use of management accounting information to support managerial decisions and control various aspects of an organisation. Emphasises decision and control issues in a contemporary environment. Introduces appropriate decision and control concepts, techniques and skills such as short- and long-term operational decisions, target costing and life-cycle costing, inventory management and Just-in-Time, responsibility accounting systems, transfer pricing, performance evaluation systems, and the behavioural impacts of management control systems. Emphasises the ways in which accounting information can be used to understand and make decisions about the operational and strategic management of an organisation, and to control the implementation and ongoing management of such decisions.

22515
Computer-based Accounting
Undergraduate
6cp; prerequisite: 22105 Accounting A.
Application may be made to the Subject Coordinator to accept another introductory Accounting subject as satisfying the prerequisite condition.
Introduces students to the concepts of computerised accounting and the general operation of several microcomputer accounting packages; provides opportunities for students to gain experience in the installation and operation of accounting packages for the small business; enables students to evaluate and advise on the suitability of accounting packages for small and medium enterprises. Topics covered include the development of an accounting framework for small and medium enterprises; the selection of computer hardware and microcomputer accounting packages; and general ledger, accounts receivable, accounts payable, stock and cash book. Comparison and critical evaluation of various accounting packages.

22517
Advanced Auditing Techniques
Undergraduate
6cp; prerequisite: 22522 Assurance Services and Audit
Teaches skills and knowledge required to perform an audit in a computerised accounting environment; teaches the concepts and principles of computer controls and security, and auditing methodology for reviewing and testing the adequacy, effectiveness and reliability of computer systems and internal controls; and develops knowledge of the application of cryptography in the design and implementation of communication network and electronic funds transfer systems. Covers topics which are examinable in Accounting 2 and Advanced Auditing modules for the professional examination of The Institute of Chartered Accountants in Australia. These include the use of communication networks, cryptographic security and risk analysis, to evaluate threats and risks posed by computer crime and other fraudulent activities.

22520
Corporate Reporting: Professional and Conceptual Issues
Undergraduate
6cp; prerequisites: 22320 Accounting for Business Combinations; 22420 Accounting Standards and Regulations
This is a capstone subject involving the conceptual framework for the accounting theory underlying the information content and disclosure requirements of contemporary corporate reporting. Topics covered include the evolution of accounting thought and language; the development of accounting principles and structure; the nature and role of theory; theory construction and verification in accounting; positive accounting theory and methodology; accounting information and securities markets; information asymmetry – creative accounting practices and insider trading information; accounting earnings and security prices; accounting disclosure regulation rationales; contracting process and agency relationships; the role of accounting numbers in management compensation plans and corporate debt contracts; accounting and the political process; and accounting ethics and behavioural research, in accounting.
22522

Assurance Services and Audit

Undergraduate
6cp; 22420 Accounting Standards and Regulations or 22320 Accounting for Business Combinations

Addresses the provision of assurance services. Focuses mainly on the attest services offered by auditors to provide credibility of information in company and other organisation financial statements. Also considers the expansion of assurance services beyond the traditional financial statement audit into such areas as risk assessment, information system reliability, asset protection, detection and prevention of fraud and electronic commerce. Deals with the methodology necessary to complete a financial statement audit or to provide other assurance services, and the criteria and professional standards used to measure information quality and integrity. Studies the audit process of understanding client's operations and risk, analytical review and the pivotal importance of evaluation of the quality of client internal control. Evaluates internal control in a COSO framework. While internal control systems are evaluated assuming a business environment where information systems are an integral part of control systems and client operations, a variety of information technology environments (including the use of enterprise resource planning (ERP) systems such as SAP e-commerce applications) are introduced. Provides an understanding of professional, ethical and legal requirements and responsibilities in completing and reporting on assurance tasks. Accredited by the accounting professional bodies.

22523

Assurance in Electronic Business

Undergraduate
6cp; prerequisites: 22205 Accounting B; 24307 Electronic Business Principles

Addresses the accounting and assurance implications of doing business electronically including accounting’s role in attesting to the credibility of information. Considers consumer to business and business to business e-commerce transactions in traditional and ERP (such as SAP) environments. Examines services such as WebTrust for attesting reliability and integrity of web sites, and researches and develops methodologies to attest that credibility of information. Students will gain substantial first-hand experience in undertaking assurance and auditing services for e-commerce, and will develop skills to understand, provide and communicate assurance services for e-commerce.

22531

Special Topics in Auditing

Undergraduate
6cp; prerequisite: 22522 Assurance Services and Audit

Builds on the knowledge gained by students in 22522 Assurance Services and Audit and enables them to study some of the topics covered briefly in the earlier subject. Topical issues in auditing which are examinable in Accounting 2, and Advanced Auditing modules for the professional examination of the Institute of Chartered Accountants in Australia, will be emphasised. These include comprehensive auditing and the changing focus of the internal audit function; ethics and environmental audits; fraud control; program audits; auditors' liability; expectation gap; and EDP control and audit. Students select two special topics for research after discussion with the Subject Coordinator. Students are required to write two major reports, and present one of these in class.

22532

Auditing Project

Undergraduate
For Bachelor of Accounting students only
6cp; prerequisite: 22320 Accounting for Business Combinations or 22420 Accounting Standards and Regulations; corequisite: 22320 Accounting for Business Combinations or 22420 Accounting Standards and Regulations

Provides students with an understanding of the role of auditors and auditing in providing assurances to diverse parties interested in the entity under audit that the information presented about the entity is properly drawn up in accordance with prescribed criteria; and of the economic, social and ethical context in which auditors and auditing operate. Students use the conceptual issues of risk analysis and systems-based auditing in both EDP and manual environments and analyse internal control systems, identifying both internal control strengths and weaknesses within an organisation, and suggest improvements in the system. Students complete an audit simulation in which they design and partially complete an audit of a system within the organisation in which they are working.
22566
Accounting for Small Business 1
Undergraduate
6cp
Develops the knowledge and skills required by accountants in dealing with the problems which are unique to their professional work in the small business sector. Highlights and emphasises the practical matters associated with the initiation and growth of a small business.
Topics covered include an overview; the requirements of establishing a business – the steps and structures; economic business cycles’ growth and future; acquiring and/or financing the business; accounting – records, control, costing and pricing; financial analysis and management; appraisals and acquisitions; the growing trend towards franchising as a form of small business; taxation and tax planning; insurance and risk; business disaster planning and recovery; and business and financial planning and budgeting.

22567
Accounting for Small Business 2
Undergraduate
6cp; prerequisite: 22205 Accounting B
Provides students with the skills and knowledge of the techniques used to analyse financial data for small and medium enterprises; how to apply these techniques with the aid of microcomputers and appropriate software; and how to develop integrated business plans to assist in the decision-making process in those enterprises.
Topics covered include an outline and a revision of basic spreadsheet terminology and function; data collection and analysis; cost-volume-profit relationships; budgeting and other planning models; cash-flow analysis and capital expenditure budgets; business valuation; and performance evaluation.

22560
Accounting for Insolvency
Undergraduate
6cp; prerequisite: 22205 Accounting B
Provides students with the accounting knowledge needed for businesses which are being liquidated; studies the characteristics and financial management mistakes leading to the failure of such businesses; and introduces the accounting requirements of deceased estates. Topics covered include executorship; bankruptcy; the practice of termination accounting; and case studies, including financial management aspects of failed businesses.

22615
Accounting Information Systems
Undergraduate
6cp
Details available from the School of Accounting.

22677
Capstone Project: Financial Strategy and Leadership
Undergraduate
For Bachelor of Accounting students only
10cp; prerequisites: 22321 Cost Management Systems; 22421 Management Decisions and Control
Integrates previous studies in accounting, finance and management in the context of the role of the financial control system in a large organisation. Emphasises the development and application of analytical skills in identifying and solving organisational problems. Develops the leadership and teamwork skills required from a person in an executive role within a large organisation.

22705
Management Planning and Control
Postgraduate
6cp
Examines the role of management accounting in organisations and society. The ‘conventional wisdom’ in management views accounting as an information system which assists managers in organisational planning and control, when, in fact, its role is to increase the effectiveness and efficiency of organisations. Functionalist theory of accounting such as activity-based costing, agency theory and contracting cost theory will be considered. In recent years there has been increasing criticism of mainstream functionalist accounting research because of its inability to provide an adequate understanding of the actual functioning of accounting in organisations. The subject also looks at recent accounting studies which have attempted to redress this deficiency by locating accounting in its organisational, societal and historical contexts.
**22708  
Management Information Systems**
Postgraduate  
6cp  
Introduces students to the conceptual and practical guidelines for dealing with the management of the modern information systems function. Teaches practical techniques to be used by managers to control the development and deployment of information systems. Introduces the basics of IT architecture and the development of software. Discusses the process of Gating to ensure that the development of IT takes place in a timely and cost-effective manner and accomplishes the objectives of the business. The material will be based on articles in the *EDP Analyser* - a journal widely read by practising information systems managers. Areas of particular interest will be cases in IT architecture, IT and business transformation, and IT-driven changes in organisational structure.

**22730  
Assurance for Business Systems and Information**
Postgraduate  
6cp  
Addresses the provision of assurance and auditing services for internal and external auditing. Sets out the professional and legal expectations and responsibilities of assurance services and financial statement audits. Deals with the control framework in accounting information systems for the ensuring of security of information and other assets and the integrity of these systems. These controls are evaluated from the perspective that they permeate the entire organisation and are pervasive and inherent in the management of a business. Issues considered include, COSO and COBIT, the nature and purpose of control, its design and operation and management. Application control framework, safeguarding assets and data integrity, cryptography and encryption, electronic business environment (EDI systems), and business continuity planning and disaster recovery plans. Provides students with competencies in audit methodology of risk and control evaluation, evidence collection and evaluation in various accounting information systems environments including enterprise resource programming (ERP) systems such as SAP. Develops and expands these competencies into providing assurance services on information other than financial information. Accredited by the accounting professional bodies.

**22739  
Business Project – Accounting**
Postgraduate  
6cp; corequisite: 22760 Applied Research Skills in Accounting  
The project will preferably be undertaken in an applied setting and will be related to the techniques and practices used in the applied research skills subject. The project will allow examination of a perceived interest area. Resolution or elucidation of the interest area will review the use of skills, procedures and knowledge acquired in the course.

**22743  
Financial Statement Analysis and Financial Modelling**
Postgraduate  
6cp; prerequisite: 25742 Financial Management or 25765 Corporate Finance; Students undertaking this subject should not enrol in the equivalent subject 25743 Corporate Financial Analysis.  
Introduces students to the latest techniques of financial statement analysis, and develops an appreciation for alternative financial modelling techniques in students. Topics include credit rating systems; prediction of corporate failure; takeovers and financial statements; risk assessment and financial ratios; and corporate planning models and financial statements.

**22744  
Strategic Cost Management**
Postgraduate  
6cp; prerequisite: 22747 Accounting for Managerial Decisions or 22746 Managerial Accounting  
Develops knowledge and skills in the design of cost systems of firms to improve the effectiveness of pricing, product and customer mix decisions, and product and process design. Incorporates the latest developments in the field of cost management accounting, such as value chain analysis, activity-based costing, new technology such as FMS and its impact on the design of cost management systems, and the design of non-financial performance measures used in benchmarking quality.
Managerial Accounting
Postgraduate
6cp
Management accounting information systems are one of the main decision-support systems in organisations. This subject equips students with the skills and knowledge to design and use effective management accounting information for planning and controlling organisational activities. Topics include absorption costing, cost behaviour and cost-volume-profit analysis, budgetary planning and control, differential costs, activity-based costing, and standard costing and variance analysis.

Accounting for Managerial Decisions
Postgraduate
6cp
Introduces students to the basics of financial and management accounting. Topics include the nature and purpose of accounting – accounting reports (balance sheets, profit and loss statements, cash flow statements) and analysing accounting; accounting reports and financial reports – the nature of management accounting and cost concepts; strategic planning and budgeting; cost accumulation systems (traditional costing systems and activity-based costing systems); and responsibility accounting (the management control structure, and analysing and reporting on performance).

Financial Reporting and Analysis
Postgraduate
6cp; prerequisite: 22747 Accounting for Managerial Decisions
Provides students with the skills and competencies to undertake accounting analysis. Accounting analysis is a tool in performing business analysis using financial statements. In making accounting analyses, students will distinguish between the information revealed by management on the firm’s underlying business activities, the sources and effects of distortions of this information that can be induced into the accounting numbers and the errors that can arise in accounting estimates used in the accounting numbers. This is an intermediate level financial accounting subject.

Business Project – Accounting and Finance
Postgraduate
6cp; corequisite: 22760 Applied Research Skills in Accounting
The project will preferably be undertaken in an applied setting and will be related to the techniques and practices used in the applied research skills subject. The project will allow examination of a perceived interest area. Resolution or elucidation of the interest area will review the use of skills, procedures and knowledge acquired in the course.

Corporate Accounting Issues
Postgraduate
6cp
Examines the issues surrounding the provision of corporate reports to external users. Topics considered include the role of a conceptual framework of financial reporting, the role of financial reporting in promoting the efficient allocation of scarce resources, corporate social responsibility in accounting, and the ‘public interest’ role of accountants.

Business Analysis
Postgraduate
6cp
Provides an introduction to the analysis of management information to support decision making. The subject will develop proficiencies in the use of information systems in the analysis of businesses and business problems. Emphasises modelling and analysis techniques in the functional areas of accounting, finance, general management, operations and marketing, including the use of relevant PC-based or Mac-based software packages. Topics include concepts of information and systems, humans as information processors, planning and control applications, and data analysis and forecasting techniques.

Corporate Accounting
Postgraduate
6cp
Examines the institutional and legal framework of modern Australian accounting including reference to international accounting standards and local and overseas standards.
and exposure drafts. The main topics include: accounting for acquisition of assets including business enterprises; valuation and goodwill; consolidated accounts of complex economic entities; accounting for associate companies and joint ventures; accounting for financial instruments; corporate restructuring and liquidation.

22759

Accounting and Enterprise Resource Planning

Postgraduate
6cp; prerequisites: 22747 Accounting for Managerial Decisions; 22746 Managerial Accounting

Introduces accounting students to the ‘world of enterprise-wide systems’ and provides an integrated view on accounting, information management, and business processes in companies. Presents the major issues in accounting data management, enterprise resource planning (ERP), and modelling of business processes. Introduces and applies SAP R/3 as an example of a comprehensive, sophisticated ERP-system. Analyses two dimensions of integrated standard software: ERP-systems serving as (1) accounting information systems, and as (2) business re-engineering tools for processes relevant for accounting.

22760

Applied Research Skills in Accounting

Postgraduate
6cp; prerequisites: Semesters 1 to 3 of the Master of Business

Provides a basis for the knowledge required to understand and use research methods and techniques. Areas of study include research methods, observational studies, data analysis techniques and computer-based statistical packages, which include experimental and case studies.

22765

Environmental Accounting

Postgraduate
6cp

Combines conceptual and theoretical issues relating to corporations and environmental accounting. Highlights practical issues, such as problems associated with measurement and the analysis of the effects of environmental regulations on a business. Discusses alternative paradigms. Assesses implications for the supply of appropriate financial information to all stakeholders.

22771

Accounting for Public, Leisure and Community Organisations

Postgraduate
6cp

Concerned with accounting from a ‘user’ rather than from a ‘practitioner’ perspective. Focuses on effective management and decision making through the development and application of analytical skills from accounting and finance. Equips graduates with appropriate skills in accounting, finance and management. Topics include the nature and purpose of accounting; basic accounting concepts and key financial statements; analysis and interpretation of financial statements; finance, financing and financial vulnerability; audit and external review; costing products and services; internal control and internal control systems; and strategic and business planning.

22777

International Accounting

Postgraduate
6cp; prerequisite: 22747 Accounting for Managerial Decisions

In the context of many corporations experiencing a strongly developing global business environment, this subject explores the causes and effects of diversity in corporate financial accounting and evaluates the efforts undertaken to harmonise accounting standards and practice internationally. Considers the identities and interests of stakeholders in this process. Equips students with the knowledge and skills to appreciate the characteristics and limitations in the interpretation of accounting reports originating from various countries and that arise from cultural and other factors impacting on each country’s national accounting profession.

22785

Research Techniques in Accounting

Postgraduate
6cp

Exposes students to a selection of research techniques of potential relevance in preparing a thesis in the area of accounting.
22786
Research Seminars in Accounting
Postgraduate
6cp; prerequisite: 22785 Research Techniques in Accounting (unless otherwise approved by Head of School)
Provides a forum each semester for students to present an update on their research efforts and review the work of others.

22795
Strategic Management Accounting
Postgraduate
6cp
Provides the management accounting skills, competencies and understanding necessary to support the strategic positioning of an organisation. Emphasises the future orientated and outward looking role of management accounting in organisations in dynamic environments. Considers the role of the management accountant in evaluating alternative courses of action to promote a more adaptive strategic stance for the organisation.

22796
Strategic Information Management
Postgraduate
6cp
A key role of management accountants is to design, operate and manage financial management and information systems. This subject provides the information systems management skills, competencies and understanding necessary for management accountants and other managers to develop and implement systems to evaluate and support the strategic direction of the organisation.

22901
Research Methods in Accounting
Undergraduate
6cp
Introduces the notion of scientific and applied research. Develops ability to identify research questions, develop theoretical frameworks and empirically test theories. Provides insight into structuring of research reports.

22902
Advanced Theory in Financial Accounting
Undergraduate
6cp
Introduces current developments in financial accounting research. Examines, in-depth, key areas of economics-based research in financial accounting. Provides the knowledge base essential for undertaking independent financial accounting research.

22903
Advanced Theory in Management Accounting
Undergraduate
6cp
Introduces students to the current developments in management accounting research. Various roles of management accounting in organisations and society are considered. Students who have taken this subject will acquire the knowledge base essential for conducting independent management accounting research.

22906
Thesis in Accounting
Undergraduate
24cp; prerequisite: admission to the Honours program
Requires the student to produce a 20,000 word (maximum) thesis based on an original problem of a theoretical or applied nature. The thesis is expected to demonstrate the student's competency to conceptualise, conduct and present research in a scholarly and independent manner.

22908
Advanced Auditing and Assurance Theory
Undergraduate
6cp
Introduces students to the current developments in auditing and assurance research. The research embraces economics-based and judgment-based research in these areas. Students completing this subject will acquire the knowledge base essential for conducting audit and assurance research.
24105
Marketing Principles
Undergraduate
4cp
Covers the basic principle of marketing. Develops an understanding of the overall processes of marketing planning, implementation and control in the contemporary international environment, as well as a basic understanding of marketing information systems, market research and marketing ethics, market segmentation, buyer behaviour, product development and the development of product, distribution, promotion and pricing strategies for both goods and services domestically and internationally.

24202
Consumer Behaviour
Undergraduate
6cp; prerequisite: 24105 Marketing Principles
Provides a basic theoretical grounding in the field of consumer behaviour, by drawing upon the contributing disciplines of psychology, social psychology, sociology, anthropology, communication and economics. Develops a better understanding and awareness of consumers as the central focus of marketing action and encourages students to appreciate the value of models as tools of conceptual analysis. Marketing strategy is considered within a broader social framework involving public policy formulation and embracing such issues as ethics, regulations and consumerism as necessary considerations in an increasingly competitive and constrained social, political and economic environment.

24203
Quantitative Marketing Analysis
Undergraduate
6cp; prerequisites: 24105 Marketing Principles; 26122 Quantitative Methods for Business
Introduces students to quantitative methods used in marketing, concentrating on the analysis of survey data and use of multivariate statistical techniques. Combines a theoretical but non-mathematical understanding of the statistical techniques with their practical application in a marketing context. A computer statistical package - SPSS - is used to illustrate the lectures and allow students to develop practical data-analysis skills. Emphasises the 'when' and 'how' of multivariate analysis and the interpretation and implications of results.

24205
Business Marketing
Undergraduate
6cp; prerequisite: 24105 Marketing Principles
Focuses on the buying and selling of goods and services between firms, which constitutes 60-80 per cent of all marketing activity. Develops the special skills and concepts needed to function effectively in this setting, including personal selling, negotiation, preparation of bids, the sales-purchasing interface, relationship marketing and relationship management. Introduces the wider context in which business marketing sits - the distribution channel and network of connected firms in the wider domestic and international markets.

24210
Advertising and Promotions Management
Undergraduate
6cp; prerequisites: 24105 Marketing Principles; 24202 Consumer Behaviour
Examines advertising, promotion and other marketing mix communications decisions from an applied viewpoint based on theory and current practice.
Provides students who might be potential brand managers, advertising managers or executives with systematic approaches to setting advertising and promotion objectives, establishing budgets, identifying relevant target audiences, formulating and testing strategies, and evaluating campaign results. Considers contemporary issues in advertising, together with reference to complementary aspects such as publicity, sponsorship and direct marketing.

24220
International Marketing
Undergraduate
6cp; prerequisite: 24105 Marketing Principles
Introduces international marketing using the marketing concept, and considers how international marketing strategies are affected by environmental factors. Students are expected to develop international marketing strategies for Australian firms which reflect the way marketing concepts and marketing mix elements need to be modified when applied to overseas markets because of differences in the political, economic, legal and cultural environments.
24306
Marketing of Services
Undergraduate
6cp; prerequisite: 24105 Marketing Principles
Builds upon existing marketing knowledge by increasing students' understanding and awareness of issues that are distinct to services. Examines marketing objectives and tasks for services and/or service divisions within companies. Critically assesses current marketing approaches by service sector operators.
Topics covered include services marketing as a field of study; developing frameworks for services marketing; customer focus; the nature of service quality; creating and delivering new services; measurement of customer perceived quality; marketing to existing customers; marketing to your internal customer; managing the evidence; marketing communication and promotion of services; implementing a service marketing culture; and services marketing strategy.

24307
Electronic Business Principles
Undergraduate
6cp; prerequisite: 24105 Marketing Principles
Introduces students to emerging electronic business environments. Presents an overview of the technological elements of electronic environments using the internet as an exemplar for emerging electronic business initiatives within the World Wide Web. Emphasises the ways in which organisations are rethinking their building of customer relationships. Explores, at an introductory level, the legal, social and organisational issues related to the development of virtual communities and corporations within emerging electronic environments.

24309
Introductory Marketing Research
Undergraduate
6cp; prerequisites: 24105 Marketing Principles; 26122 Quantitative Methods for Business
Introduces students to the concepts and practices of marketing research. Topics covered range from research problem definition to research design, implementation and finally interpretation of research results. Specifically focuses on Australian practices, procedures and ethics. Considerable focus is placed upon the microcomputer and its role in modern research. Skill development in both spreadsheet and statistical applications software is a key aim.

24311
Decision Models in Marketing
Undergraduate
6cp; prerequisites: 24105 Marketing Principles; 26122 Quantitative Methods for Business
Introduces students to the conceptual and practical issues in developing models to aid in decision making in marketing. Considers a wide range of problems, with students developing practical skills in model building in applied computer sessions.

24333
Channels of Distribution
Undergraduate
6cp; prerequisites: 24105 Marketing Principles; 24205 Business Marketing
Distribution problems are a leading cause of product/market failure and distribution practices are among the main determinants of firms' short- and long-term financial performance. Focuses on the partnering necessary to achieve effective distribution as well as on the design, management and evolution of different distribution configurations. Studies contemporary wholesaling and retailing trends and their impact upon Australian distribution - both domestic and international.

24408
Marketing Strategy for Electronic Business
Undergraduate
6cp; prerequisite: 24307 Electronic Business Principles
Further develops electronic business and marketing strategy models and frameworks. Students will critically analyse current electronic and marketing strategy models and frameworks in different competitive environments, using case studies. As electronic business and marketing strategy concepts are still in the emerging and formative stages, students will be rigorously challenged to rethink and redefine concepts of strategy for electronic business environments. Students will be introduced to new strategic thinking concepts, tools and processes applicable to highly uncertain and rapidly changing high-technology industries and environments. Students will apply their perspectives to electronic business and marketing strategy through an academic paper and a group case study project.
24412
**Electronic Business Project**
*Undergraduate*
6cp; prerequisite: 24408 Marketing Strategy for Electronic Business
Involves applying knowledge gained to an electronic business problem faced by a firm. Students will develop a project proposal defining the problem, and outlining the methodology for the investigation of the problem; prepare a critical literature review from secondary data sources; conduct a primary research project working with the client firm; produce a written report on the project; and conduct a seminar to present the key findings, conclusions and recommendations from the project. Students will be expected to conclude the project with an executive briefing on the project to their client firms.

24415
**Marketing Planning and Strategy**
*Undergraduate*
6cp; prerequisites: 24202 Consumer Behaviour; 24309 Introductory Marketing Research; 24205 Business Marketing
Integrates marketing knowledge gained in previous marketing coursework within a strategic marketing framework. Contemporary marketing management decision-making techniques and models are applied through case studies and the development of a comprehensive marketing plan.
Develops the ability to identify, evaluate, recommend, communicate and defend long term strategies. Presents, analyses and develops marketing strategies that will positively and ethically progress the firm's objectives.

24430
**Applications of Marketing Research**
*Undergraduate*
6cp; prerequisites: 24105 Marketing Principles; 24309 Introductory Marketing Research
Provides a capstone experience in marketing research, drawing on the skills students have developed in 24309 Introductory Marketing Research. Students will work together in teams to undertake an investigation of a marketing management problem. Each team will be responsible for the identification of the research problem, designing and implementing a suitable research process and interpreting data and making recommendations to resolve the research problem.

This subject features a small number of compulsory lectures. Focus is instead on team meetings geared to the specific problems of the research being undertaken.

24440
**International Promotion and Advertising**
*Undergraduate*
6cp; prerequisite: 24220 International Marketing
Helps students acquire an understanding of the complexities which surround the successful undertaking of promotional and advertising campaigns overseas, with particular reference to the roles of promotion intermediaries, promotion infrastructure, legal impediments and government involvement. In-depth study will be undertaken of the appropriateness of different forms of promotion according to the market, the product/service offered and the situation of the supplier. Enables students to acquire an understanding of the way in which advertising campaigns need to be modified to suit overseas markets; and develops an appreciation of the various forms of promotion which are appropriate to developing international business.

24510
**Research Methods in Advertising**
*Undergraduate*
6cp; prerequisites: 24309 Introductory Marketing Research; 24210 Advertising and Promotions Management
Exposes students to research methods and techniques used to develop, test and evaluate advertising campaigns. Focuses more on message and market research rather than media and money research. Students form syndicates to conduct secondary research on an advertising topic or issue that has been studied using an experimental design, and will use the Internet as one research tool to investigate an Internet-related advertising issue. Students must attend the first class in order to qualify for a place in a research syndicate.

24517
**Contemporary International Marketing Issues**
*Undergraduate*
6cp; prerequisite: 24220 International Marketing
Builds upon and applies knowledge gained in 24220 International Marketing to specific
conceptual and empirical issues in international marketing. Increases awareness and understanding of issues beyond the scope of topics covered in traditional international marketing subjects.

Topics covered include overseas market selection; internationalisation; globalisation; networks and international marketing; international strategic alliances; international competition theory; setting international prices; and international negotiation from a cultural perspective.

**24518**  
*International Marketing Country Study*  
*Undergraduate*  
*12cp; prerequisite: 24220 International Marketing; corequisite: 24517 Contemporary International Marketing Issues*

Broadens and develops students' awareness and appreciation of international marketing, and develops practical skills in various international research activities.

In undertaking international marketing research projects, students engage in secondary research in Australia, undertake primary research while visiting target overseas markets, and analyse data and report to project sponsors in business in Australia.

**24546**  
*Marketing Research Project*  
*Undergraduate*  
*6cp; prerequisites: 24105 Marketing Principles; 24309 Introductory Marketing Research; corequisite: 24430 Applications of Marketing Research (unless previously completed)*

Provides a closure experience to students who have previously completed or who are currently completing 24430 Applications of Marketing Research. Students undertake a marketing research project which augments the research skills developed in Applications of Marketing Research. Students work alone or in small groups to undertake an investigation of a marketing management problem. Each group is responsible for the identification of the research problem, designing and implementing a suitable research process, and interpreting data and making recommendations to resolve the research problem.

**24555**  
*Business Marketing Project*  
*Undergraduate*  
*6cp; prerequisites: completion of at least two subjects in the Business to Business Marketing Sub-major*

Integrates the material presented in the preceding sub-major subjects. Students will develop a project topic that allows both amalgamation of this material and specialisation in a subject area of interest. The emphasis is on individual learning through the amalgamation of writing in the project area and liaison with relevant industry representatives.

**24604**  
*Project in Advertising*  
*Undergraduate*  
*6cp; prerequisite: 24510 Research Methods in Advertising*

Provides a hands-on opportunity to apply all of the key advertising management and related research concepts studied in earlier subjects. Operating as 'advertising agency' teams, students undertake a multi-stage group project involving the initial client communications brief, target-market research, creative strategy, executional development and testing, and media planning stage; and conclude with a presentation of the validated campaign recommendations.

**24607**  
*International Marketing Management Project*  
*Undergraduate*  
*6cp; prerequisites: 24220 International Marketing; 24517 Contemporary International Marketing Issues*

Involves applying knowledge gained in other international marketing subjects to an international marketing problem faced by a firm. Students develop a project proposal outlining the theoretical basis and methodology for in-depth investigation of a particular international marketing problem; students then analyse primary and secondary data gathered from the client organisation and outside sources; prepare oral and written reports of findings in areas such as entry strategies, international product, pricing, promotion and distribution strategies and control of overall international marketing programs. Students will be required to isolate one critical international marketing problem faced by the firm and prepare a case study on that issue.
24666
Research Methods in Marketing
Undergraduate
6cp; prerequisite: 24203 Quantitative Marketing Analysis
This subject represents an advanced course in research design and multivariate statistical analysis of survey data. It extends and develops a broad understanding of the theoretical basis and practical implementation of multivariate analysis.

24700
Promotion and Advertising Overseas
Postgraduate
6cp; prerequisites: 24734 Managerial Marketing desirable: 24738 International Marketing Management
Develops an understanding of the complexities surrounding the successful undertaking of promotional and advertising campaigns overseas, with particular reference to the roles of promotion intermediaries, promotion infrastructure, legal impediments and government involvement. In-depth study will be undertaken of the appropriateness of different forms of promotion according to the market, the product/service offered and the situation of the supplier. Also develops an understanding of the way in which advertising campaigns need to be modified to suit overseas markets; and builds on appreciation of the various forms of promotion which are appropriate to developing international business.

24703
Marketing and International Trade Relations
Postgraduate
6cp; prerequisites: 24734 Managerial Marketing desirable: 24738 International Marketing Management
Assists students in acquiring an understanding of the influence governments can have on doing business overseas; develops an ability to evaluate the opportunities and constraints on marketing overseas that arise from international trade relations activities; and creates an awareness of the procedures involved when business persons seek to secure the support of governments to improve access and overcome barriers to the entry of their products and services overseas.

24704
Managing Client Relations
Postgraduate
6cp; for Master of Business in Information Technology Management students only
Enables students to understand the particular needs of clients in the IT industry, and strategies for marketing to such clients. Examines the role of marketing in business development. Examines and evaluates the role and scope of client needs specific to the IT industry. Explores particular vendor and customer issues, such as product marketing; account management and expansion; the maintenance ‘building’ of customer/client relationships; and loyalty programs. Using case studies, discusses the international dimension of marketing Australian IT. Students will develop marketing proposals and business cases as applied exercises.

24705
Marketing Projects and Services Overseas
Postgraduate
6cp; prerequisites: 24734 Managerial Marketing desirable: 24738 International Marketing Management
Enables students to acquire an understanding of the complexities that surround the successful negotiation of project work overseas from a marketing perspective, with particular reference to the roles of governments, aid agencies, financial institutions and multilateral bodies. Covers the ‘packaging’ of the project proposal, strategic alliance possibilities and the marketing of the proposal to those influencing the award of the project.
Develops an understanding of the differences between marketing services in Australia and marketing services overseas. Develops the ability to evaluate the opportunities and constraints facing Australian firms endeavouring to market services overseas, both in general and with specific reference to education, health, legal services, accounting services, insurance, tourism and intellectual property.

24706
Services Marketing
Postgraduate
6cp; prerequisite: 24734 Managerial Marketing
Enables students to broaden their understanding of marketing by focusing on the marketing of services. Major areas of economic activity such as tourism, banking, transpor-
tation and health care services are not significantly considered in traditional marketing, literature and courses that concentrate on product marketing. The case study method allows students to attain a first-hand understanding of service marketing within a wide variety of industries.

24707

Business to Business Marketing

Postgraduate
6cp; prerequisite: 24734 Managerial Marketing
Focuses on the buying and selling of goods and services between firms, which constitutes 60-80 per cent of all marketing activity. Focuses on development of the special skills and knowledge needed to function effectively in this setting, including specialised communication modes, negotiation, preparation of bids, the sales-purchasing interface, relationship marketing and relationship management. Introduces the wider context in which business marketing sits – the distribution channel and network of connected firms in the wider domestic and international market.

24709

Clients and Markets

Postgraduate
6cp
Examines the social and historical forces that create specific markets and client groups for public sector and non-profit organisations; critically evaluates the role and scope of marketing operations in these organisations as contrasted with private, profit-seeking organisations; develops an understanding of changes in organisational markets and patterns of distribution for the products of the public and non-profit sectors; develops skills and the techniques and methods of marketing management in public sector and non-profit organisations; examines consumer and client responses to public and non-profit sector products; addresses equity and social issues in public and social marketing strategies. Topics include the marketing concept; strategic marketing; social marketing; client, customer and consumer behaviour; marketing information systems; communication and promotion; marketing decisions; and the marketing plan.

24710

Buyer Behaviour

Postgraduate
6cp; corequisite: 24734 Managerial Marketing
Provides an insight into buyer behaviour as the foundation for marketing strategy. Examines individual, social and environmental determinants of buyer behaviour within an overall conceptual framework that includes information processing, learning, motivation, attitudes, personality, lifestyle, and social and cultural group influences.

24711

Culture, Business and Language in the Asia-Pacific Region

Postgraduate
6cp
Aims to create cultural and linguistic sensitivity when doing business with countries in the Asia-Pacific. Introduces cultural norms, basic business language and business practices and the view in the region of issues in the global business scene – such as human rights, the environment and employment practices. Linguistic sensitivity will be further developed by twenty hours' study of an Asian language. Languages offered are Indonesian, Mandarin or Japanese. Special programs in each have been developed focusing on basic business conversation.

24713

Sales Management

Postgraduate
6cp; prerequisite: 24734 Managerial Marketing
Considers the management of sales in the wider sense, being concerned not only with the management of the sales force by the sales manager, but also the management of the sales function by the entire organisation. To achieve this, not only are the areas of sales force design, organisation, training and motivation considered, but also the nature and role of selling as it relates to business relationship building and sustenance. Introduces students to the theories underlying this area of marketing and presents practical applications.
24714
Marketing Creativity
Postgraduate
6cp; prerequisite: 24734 Managerial Marketing
Builds a bridge between creativity and marketing. Designed to complement and build on participants' previous marketing study. In marketing, creativity can be effectively applied in many areas including new strategies, new product development, new channels and new customer segment definition. An intellectually challenging and highly interactive subject. Of particular benefit to practising marketers.

24715
Strategic Marketing in Electronic Business
Postgraduate
6cp; prerequisite: 24734 Managerial Marketing
Examines the alternative marketing strategies used in electronic commerce and evaluates relevant strategic marketing concepts in different competitive environments. The challenge managing the transformation and business migration strategies from 'place' to electronic marketing 'space' is experienced using a business simulation.

24716
Research Project in Electronic Business
Postgraduate
6cp; prerequisite: 24715 Strategic Marketing in Electronic Business
Students engage in an in-depth field investigation of an electronic marketing initiative in a specific industry environment. Appropriate research methodologies are evaluated and applied to the project.

24717
Marketing Entrepreneurship in Electronic Business
Postgraduate
6cp; prerequisite: 24715 Strategic Marketing in Electronic Business
Students identify issues and compile case studies of marketing entrepreneurship in electronic business. This includes review of the current literature and on-site discussions with managers involved in innovative, entrepreneurial electronic initiatives.

24719
Advanced Marketing Strategy
Postgraduate
6cp; prerequisites: 22747 Accounting for Managerial Decisions; 24710 Buyer Behaviour; 24737 Marketing Information Management or 24720 Marketing Research
Marketing strategy involves gaining a favoured position when providing goods or services to selected groups of clients. The attractiveness of alternative strategies within the marketing arena is affected by the interaction of all exchange elements of the marketing program in the context of a variety of situational factors (within the company, the industry and the broader environment). Further strategies evolve and change to match new market dynamics with client demand. The alignment of owned or accessed competencies and capabilities to deliver superior customer value is the challenge for effective strategy development. A combination of approaches will be listed in the study program.

24720
Marketing Research
Postgraduate
6cp; prerequisite: 24734 Managerial Marketing
Provides a comprehensive account of the marketing research process, from problem recognition and definition through all the procedural steps of findings and recommendations for marketing decision making. Specific treatment of the nature, role and management of marketing information in a corporate setting will provide a basis for discussion and development of research methodology. Covers a fundamental component of the marketing process: the generation and management of the marketing information resources of an organisation. In this sense the subject is critical to discussion of specific, functional decision areas of marketing in other subjects in the course. The practical emphasis will further contribute to the student's understanding of the problems and potentials inherent in the collection and analysis of marketing data.
24721
Scenario Planning – New Technology Change Agents
Postgraduate
6cp; prerequisite: 24737 Marketing Information Management

Introduces students to the concept of developing views of the future within the context of a business organisation. Various business planning tools and concepts commonly used to develop future views are considered, with an emphasis on their application to technological forecasting. Scenario planning is presented as an exemplary methodology, with students participating directly in formal planning processes focused on technological issues. New tools that facilitate emergent thinking processes essential in an innovative, dynamic and uncertain business environment will also be examined.

24730
Advanced Marketing Management
Postgraduate
6cp; prerequisite: 24734 Managerial Marketing

Develops the student’s ability to apply marketing theory and the principles of decision making to problems in marketing strategy. Organisational resources are finite. The attractiveness of various alternatives for individual decisions within the marketing area is affected by the interaction of all elements of the marketing program. In addition, situational factors (within the company, the industry and the broader environment) affect the attractiveness of alternative marketing solutions. Articles on strategy, case studies and a business simulation which introduces the dynamic nature of market places will be extensively used.

24734
Managerial Marketing
Postgraduate
6cp

Recognises marketing as a key managerial decision-making area, in particular relating the organisation to its environment to bring about change. Drawing extensively on the literature in marketing and marketing management, the subject will adopt a range of teaching approaches to demonstrate the nature and complexity of managerial marketing decision making, and at the same time develop knowledge and skills for effectively managing the complexity of exchange processes.

24736
Marketing Communications
Postgraduate
6cp; prerequisites: 24734 Managerial Marketing; 24710 Buyer Behaviour is recommended

Examines advertising, promotion and business communication decisions from an advanced viewpoint based on theory and research findings. Provides managers with systematic approaches to setting advertising and promotion objectives, establishing budgets, identifying relevant target audiences, formulating and testing strategies and evaluating campaign results. Considers contemporary issues in advertising, together with reference to complementary aspects such as publicity and direct marketing. Includes an applied project covering these decision factors.

24737
Marketing Information Management
Postgraduate
6cp; prerequisite: 24734 Managerial Marketing

Introduces students to electronic markets and marketing information systems by building on the concepts of interaction, relationships and networks. As a starting point the student is acquainted with the societal trends in the information economy and marketing information as a strategic asset as well as its discovery, creation, dissemination, quality and retrieval. This foundation helps to better understand the network-based business model (the Virtual Corporation) and the supporting inter-firm information exchanges. A critical component will be project work pertaining to the alignment of key technologies with marketing strategies especially at market entry; an ethnographic research study on the use of new marketing information technology in the workplace; and the practical aspects of information exchange and utilisation in major industries.

24738
International Marketing Management
Postgraduate
6cp; prerequisite: 24734 Managerial Marketing

This subject is managerial in the sense that it focuses on the problems and decisions facing managers of international marketing. It is comprehensive in that it covers the problems of marketing across national boundaries as well as those arising from marketing within a number of different national markets. Treats
at length the situation of the Australian firm engaged in multinational marketing activities. The level of involvement ranges from exporting to licensing, to joint ventures, to wholly owned subsidiaries. The student will be given the opportunity to apply the theoretical knowledge gained to a detailed analysis of a particular foreign market environment, and to develop marketing strategies required in that market by an Australian organisation.

24742
New Product Management
Postgraduate
6cp; prerequisite: 24734 Managerial Marketing
Exposes students to the literature on, and the nature of, the marketing task involved in the development and launch of new products. Students will also be required to carry out a project whereby a marketing feasibility study and strategy are developed for an actual new product innovation calling on knowledge gained in previous marketing subjects.

24743
Contemporary Issues in International Marketing
Postgraduate
6cp; prerequisites: 24734 Managerial Marketing; 24738 International Marketing Management
Builds upon existing knowledge in the areas of multinational or international marketing and relates it to specific conceptual and empirical issues in international marketing. Increases awareness and understanding of issues beyond the scope of topics covered in traditional international marketing subjects. Issues covered include overseas market selection, internationalisation, globalisation, networks and international marketing, international strategic alliances, international competition theory, international countertrade, setting international prices, and international negotiation from a cultural perspective.

24744
Competitive International Marketing Strategy
Postgraduate
6cp; prerequisites: 24734 Managerial Marketing; 24738 International Marketing Management; 24743 Contemporary Issues in International Marketing
Enhances the problem solving, decision making and general management skills of students in the context of an international organisation operating in a competitive and changing global environment. Involves a PC-based international business simulation exercise and case studies/ readings. Decision areas covered include company organisation, products and improvements, management of innovation, area operations, competitive analysis, marketing research, pricing, promotion, distribution, inventory management and intercompany and intra-company transactions.

24750
Marketing Decision Analysis
Postgraduate
6cp; prerequisites: 24734 Managerial Marketing; 24720 Marketing Research or 24737 Marketing Information Management; 24730 Advanced Marketing Management
Studies marketing management decision processes and procedures from a product manager's viewpoint. An increasingly complex marketing environment offers product managers new challenges and opportunities. To take advantage of the opportunities and meet the challenges, computer-aided decision procedures provide additional conceptual and applied tools for decision making. This course builds and expands on the material covered in earlier postgraduate courses in Marketing by way of learning about computer models which aid a product manager in the task of managing markets.

24755
Applied International Marketing Research
Postgraduate
12cp; prerequisites: 24734 Managerial Marketing; 24738 International Marketing Management; corequisite: 24743 Contemporary Issues in International Marketing
Develops skills in conducting international marketing research and marketing management activities. Involves a study tour of one or two overseas countries. Enables the student
to develop an appreciation of the ways in which marketing systems might be compared and evaluated across national boundaries. A greater understanding of the role and significance of Australian business in the international economy will also be achieved.

24780
Readings in Marketing
Postgraduate
6cp; prerequisite: prior permission from the School
Undertaken under the direction of a member of staff. The topic must be approved by the Head, School of Marketing. Formal lectures in selected areas may be required, as directed by the supervising lecturer. Allows a degree of flexibility in programming for specialised needs of individual students, but can only be undertaken as part of the Master of Business in Marketing program. Topics chosen should be related to other subjects within the student's area of specialisation.

24785
Research Techniques in Marketing
Postgraduate
6cp; prerequisite: completion of a relevant Bachelor of Business degree
Exposes students to a selection of research techniques of potential relevance in preparing a thesis in the area of marketing.

24786
Research Seminars in Marketing
Postgraduate
6cp; prerequisite: 24785 Research Techniques in Marketing (unless otherwise approved by the Head of School of Marketing)
Provides a forum each semester for students to present an update on their research efforts and review the work of others.

24790
Business Project – Marketing
Postgraduate
6cp; prerequisites: all core subjects of the Master of Business in Marketing
A capstone subject for Master of Business in Marketing or MBA Marketing major students. Students complete an applied marketing project, integrating and utilising the skills and knowledge acquired in their previous marketing subjects.

24791
Business Project – International Marketing
Postgraduate
6cp; prerequisites: all core subjects of the Master of Business in International Marketing
A capstone subject for the Master of Business in International Marketing. Designed to enable students to apply the range of skills and knowledge gained in the rest of the course. Students are required to conduct a project on international marketing related to a particular organisation. It is an alternative to 24755 Applied International Marketing Research.

24901
Advanced Theory in Marketing
Undergraduate
6cp; prerequisite: admission to the Honours program
Introduces students to the basics of scientific method and shows how to apply it to the evaluation and development of marketing theory in teaching, practice and research. The evolution of marketing thought is used as the primary way of considering what marketing theories there are, their quality and their usefulness in progressing research in marketing.

24902
Research Methods in Marketing
Undergraduate
6cp; prerequisite: admission to the Honours program
Introduces students to various advanced research methods in the marketing discipline, with an emphasis on quantitative and multivariate analytical techniques. Adopts an applications-oriented approach to applying advanced statistics and computer software to theory development and theory testing in marketing. Develops considerable expertise in conducting sound and rigorous research projects in both theoretical and applied research settings.

24903
Readings for Thesis – Marketing
Undergraduate
6cp; prerequisites: 24901 Advanced Theory in Marketing; 24902 Research Methods in Marketing
Provides an opportunity to engage in a structured literature review to assist in selecting a thesis topic. Improves awareness
of up-to-date research in marketing by exploring current research activities of recently published authors.

24904 (F/T) and 24905 (P/T)
Thesis in Marketing
Undergraduate
24cp; prerequisite: admission to the Honours program
Requires the student to produce a 20,000 word (maximum) thesis based on an original marketing problem of a theoretical or applied nature. The thesis is expected to demonstrate the student’s competency to conceptualise, conduct and present research in a scholarly and independent manner. The topic may be derived from any marketing-related area. The replication and extension of a published academic marketing article could also be considered.

24907
Advanced Research Methodology – Marketing
Undergraduate
6cp; prerequisites: 24901 Advanced Theory in Marketing; 24902 Research Methods in Marketing
Individually supervised subject to provide knowledge, understanding and experience with research methodologies and the analysis techniques which will be utilised in the research thesis.

25110
Microeconomics
Undergraduate
4cp; prerequisite: 25110 Microeconomics
Develops an understanding of microeconomic theory as a basis for further business-related studies; an ability to analyse microeconomic issues; and a capacity to explain and predict microeconomic consequences of economic activities. Other topics include: basic demand and supply theory; elasticity of demand and supply; simple applications of partial equilibrium; short-run and long-run cost theory; market behaviour including perfect competition; resource market theory; market failure; and income distribution.
Subject descriptions

Takeovers in a theoretical and empirical context. Emphasis is placed on practical analysis of firm behaviour in a market.

25304
Asian-Australian Economic Relations
Undergraduate
6cp; prerequisites: 25110 Microeconomics; 25209 Macroeconomics

Gives an overview of the Asian region and its developing economic relationship with Australia. The rapid growth experience of Japan – especially during the 1950s and 1960s – will be analysed initially. The so-called four Asian tigers (Korea, Taiwan, Hong Kong and Singapore) will be reviewed next. Their individual performances (as well as their sociopolitical climates) will be analysed. Various explanations advanced for their rapid growth over the last couple of decades will be assessed. Second generation ‘NIC’ (Newly Industrialised Countries) such as the ASEAN economies will be similarly examined. Finally, the Chinese economy – the so-called ‘awakening giant’ – will be analysed.

25305
Labour Market Economics
Undergraduate
6cp; prerequisite: 25209 Macroeconomics

Builds on earlier microeconomic and macroeconomic theory to review current theories of the labour market. Looks at changes in Australian labour markets, and issues such as the role of gender, ethnicity, trade unions, technology, education and discrimination in labour market outcomes. Discusses contemporary issues and debates related to the operation of labour markets – such as wage determination and unemployment.

25308
Financial Markets
Undergraduate
4cp; corequisite: 26122 Quantitative Methods for Business

Provides an understanding of the functioning of Australia’s financial system and its relationship to global financial markets. Introduces students to the principles of intermediation and professional financial markets; the forces that influence interest and exchange rates; the roles of the Reserve Bank; and the instruments (futures, forwards, options and swaps) that can be used for financial risk management purposes.

25309
Macroeconomic Theory and Policy
Undergraduate
6cp; prerequisite: 25209 Macroeconomics

Further develops the material covered in the introductory subject 25209 Macroeconomics. Traces the development of classically-oriented and Keynesian-oriented theory and seeks to identify how these theoretical developments have affected the way policies are put into practice when addressing key macroeconomic issues. These issues include: the operation of monetary and fiscal policy; inflation and unemployment; business cycle theory; and international influences on the domestic economy.

25314
Business Finance
Undergraduate
4cp; prerequisites: 26122 Quantitative Methods for Business; 22105 Accounting A; 25110 Microeconomics; corequisite: 25308 Financial Markets

Financial mismanagement is a leading reason for business failure. Many firms invest in business ventures at prices that are not justified and then borrow huge amounts of money to finance the venture only to find that they cannot pay the interest. It is therefore critical that all business students understand, and can use, a set of analytical tools to make sound financial decisions.

Equips students with the necessary skills and knowledge to make sensible financial decisions. Reviews the traditional approaches to investment and financing decisions.

25315
International Economics
Undergraduate
6cp; prerequisites: 25309 Macroeconomic Theory and Policy; 25210 Microeconomic Theory and Policy

Addresses two areas of international economics: First, the pure theory of trade which examines basically why countries trade, and the benefits to be gained, examining associated issues such as commercial policy, real wages and customs unions; second, international investment issues particularly as these relate to the small open economy.
25350
Principles of Risk and Insurance
Undergraduate
6cp; prerequisites: Bachelor of Business core subjects in Semesters 1 and 2
Introduces students to the theory of risk and examines the history and evolution of insurance together with its contemporary functioning. Students are exposed to the study of insurance as a commercial, economic and social institution. The subject also deals with the principal statutory controls governing the transaction of insurance business in Australia.

25403
Theory of General Insurance
Undergraduate
6cp; prerequisites: Bachelor of Business core subjects in Semesters 1 and 2
Develops students' competence in the application of statistical and quantitative methods to the rating and pricing of general insurance products. Also deals with the application of underwriting principles to the management of an insurance portfolio.

25406
Quantitative Techniques for Finance and Economics
Undergraduate
6cp; prerequisites: Bachelor of Business core subjects in Semesters 1 and 2
Enables students to move from the ability to cope with concrete concepts to the ability to apply abstract concepts by providing a range of quantitative skills that will enable the completion of projects in concurrent and later courses.

Linear functions, linear algebra, optimisation in economics and finance, linear programming (a graphic approach, simplex algorithm, the dual), nonlinear (quadratic) programming, and multiple linear regression (selected procedures to deal with breakdown in assumptions — multicollinearity, heteroscedasticity and serial correlation) will all be examined.

25409
Commercial Bank Management
Undergraduate
6cp; prerequisites: Bachelor of Business core subjects in Semesters 1 and 2
Develops students' ability to understand the dynamics of modern bank management and the risks involved in managing a bank. Introduces students to a broader view of the changing banking environment, and helps them develop an understanding of financial decision making in banking.
Provides an introduction to a commercial bank's finance reports and bank performance; cost of funds and capital adequacy; the risk of domestic banking; banks' foreign exchange risks; managing bank risks; managing a bank's foreign exchange operations; liquidity management; banks' use of synthetic products; economics of banking operations; and bank management and strategic planning.

25410
Corporate Financial Analysis
Undergraduate
6cp; prerequisites: Bachelor of Business core subjects in Semesters 1 and 2
Examines the use of financial statements in assessing a firm's financial 'health', its strengths, weaknesses, recent performance and future prospects. Examines financial statement forecasting and modelling with an emphasis on cash-flow reconstructions from financial statements. Special issues dealing with financial statement information are emphasised in some depth. These issues include market efficiency, asset pricing, corporate restructuring and business valuation, debt ratings and financial distress.

25416
Economics of Money and Finance
Undergraduate
6cp; prerequisites: 25409 Commercial Bank Management; Bachelor of Business core subjects in Semesters 1 and 2
Encompasses the theoretical aspects of monetary economics as well as its application both to the practice of monetary policy and the prediction of likely future trends in funds flows, credit aggregates and other macro-economic statistics. Other topics include: special issues dealing with monetary policy in Australia; systemic crises; international
comparisons of monetary policy as practised by other central banks; and the prediction of interest rate movements.

25420
Applied Financial Management
Undergraduate
6cp; prerequisites: 25506 Capital Budgeting and Valuation; 25621 Financing Decisions and Capital Market Theory; 25503 Investment Analysis
Provides students with the opportunity to integrate, apply and extend their study of finance to realistic problems in both financial management and portfolio management. Financial decision skills will be developed in an environment characterised by complex and incomplete information, uncertainty and a competitive environment. This is achieved through a financial management simulation and management of a security portfolio. There is a heavy workload for this subject.

25421
International Financial Management
Undergraduate
6cp; prerequisite: Bachelor of Business core subjects in Semesters 1 and 2
Develops and extends the corporate finance framework into the arena of foreign exchange markets, multinational working capital management, international investment and cost of capital, international financial decisions and Euromarkets. Examines political risk issues and their impact on international finance. The measurement and management of foreign exchange exposure and hedging are interrelated with capital expenditures, special financing vehicles and risk-return profiles of companies.

25503
Investment Analysis
Undergraduate
6cp; prerequisites: 25406 Quantitative Techniques for Finance and Economics; 25314 Business Finance
Introduces the conceptual and theoretical framework of the portfolio approach to investments. Applies the techniques of mean variance diversification to investment management. Reviews the capital asset pricing model together with the arbitrage pricing model and their application to investment management. Other topics are: pricing of bonds and the term structure of interest rates and hedging strategies to minimise interest rate risk.

25506
Capital Budgeting and Valuation
Undergraduate
6cp; prerequisites: 25406 Quantitative Techniques for Finance and Economics; 25314 Business Finance
Consolidates and further develops the concepts introduced in Business Finance. Includes an extensive examination of various analytical techniques for capital budgeting decisions. Other topics are: estimation of the cost of capital; capital structure and valuation; and empirical evidence on capital structure and dividend policy.

25522
Bank Lending Practice
Undergraduate
6cp; prerequisites: Bachelor of Business core subjects in Semesters 1 and 2
Develops students’ ability to understand the lending process and the risks involved in lending. Introduces students to a broader view of the changing banking environment and develops an understanding and appreciation of sound and practical banking practices. Other topics are: lending, international trade, current issues, lending principles and practice, loans, advances and other financing instruments, corporate lending practices, project finance, international financing, and problem loans.

25552
Reinsurance
Undergraduate
6cp; prerequisites: Bachelor of Business core subjects in Semesters 1 and 2
Develops an understanding of the history, function and legal principles relating to reinsurance, concentrates on the various methods of reinsurance available, examines quantitative and qualitative assessments of the most appropriate forms of reinsurance protection for a given portfolio or company.

25553
Risk Management
Undergraduate
6cp; prerequisites: Bachelor of Business core subjects in Semesters 1 and 2
Develops an understanding of the conceptual framework of risk management. In addition, students will develop an understanding of the operational aspects of risk management.
ranging from the techniques of setting objectives, the determination of funding mechanisms, the development and use of information systems, and the preparation of risk management programs.

25606
Financial Time Series

Undergraduate
6cp; prerequisites: 25906 Investment Analysis (Honours); 25905 Capital Budgeting and Valuation (Honours)

A number of theoretical models have been developed in the area of corporate finance. Students will have been exposed to the major models in preceding courses. This subject investigates the techniques that are required to empirically test these models and conducts a number of empirical tests using Australian financial markets data.

25620
Derivative Securities

Undergraduate
6cp; prerequisites: 25406 Quantitative Techniques for Finance and Economics; 25503 Investment Analysis

Provides students with the techniques needed to analyse and price derivative securities. An introduction to derivative securities follows, together with discussion of basic arbitrage arguments, the pricing of futures, properties of options, pricing of differing financial instruments and hedging strategies using derivatives.

25621
Financing Decisions and Capital Market Theory

Undergraduate
6cp; prerequisites: Bachelor of Business core subjects in Semesters 1 and 2; 25406 Quantitative Techniques for Finance and Economics

Provides an understanding of the theory, empirical evidence and practice of corporate financing decisions. On completion of the subject, students should be able to critically evaluate a company's existing capital structure and proposed methods of raising new finance. Other topics considered review the theoretical and empirical research relating to the efficient market hypothesis.

25705
Financial Modelling and Forecasting

Postgraduate
6cp

Introduces students to various models and tools used in financial planning. Students will learn basic forecasting techniques as well as the fundamentals of risk analysis and how risk may be incorporated into financial simulation models. Develops students' ability to implement theoretical concepts developed and used in other subjects.

25706
Economics for Management

Postgraduate
6cp

Provides an intensive introduction to the two major components of economic theory - microeconomics (which deals with the behaviour of individuals, firms and industries) and macroeconomics (which deals with the behaviour of the national and international economies). Provides a working knowledge of the economic environment for managers.

25707
Government-Business Relations

Postgraduate
6cp

Examines government policies relating to the behaviour of firms. Begins by considering the rationale for government intervention in private sector activities, with emphasis on current developments in the corporatisation and privatisation of government business enterprises. Specific government policies and the formation of such policies are then examined. Policies looked at include economic aspects of competition policy, industry policy, protection of the national interest, foreign investment, small business policy, research and development targeted sectoral policies.

25708
Strategic Financial Management

Postgraduate
6cp

A key role of a financial manager is to assess and evaluate investment opportunities using the latest financial techniques. Having assessed the viability of an investment, the financial manager needs to arrange the financing of the investment in debt and/or equity markets. Risk and return considerations are crucial in
164 Subject descriptions

these processes. This subject provides the
financial insight and skills for a financial
manager to make an effective financial decision
for the corporation.

25709
Derivative Security Pricing
Postgraduate
6cp; prerequisite: 25712 Financial Market
Stochastics
Builds on the techniques and concepts
developed in the subject 25712 Financial
Market Stochastics to develop a consistent
approach to derivative security pricing. Both
the classical (Black-Scholes) and modern
(Martingale) approaches are discussed and
compared. Deterministic and stochastic
interest rate environments are considered.

25710
Financial Time Series
Postgraduate
6cp; prerequisites: a strong quantitative
background through a first degree (e.g.
mathematics, econometrics, statistics, physical
sciences or engineering) as deemed satisfactory
by the Head of School of Finance and
Economics
Introduces students to the concepts and
techniques from the econometrics and time
series literature relevant to a statistical
description of financial time series. Topics
include stochastic properties and distributions
of financial time series, ARIMA models,
modelling volatility, the ARCH class of models,
estimation, testing market efficiency, long-
memory processes, nonlinear stochastic
models, option pricing applications, modelling
term structure of volatility expectations and
forecasting volatility.

25711
Securities Market Regulations
Postgraduate
6cp
Develops an understanding of the regulatory
nature of securities markets, including the
process of regulation of the various players
involved. Reviews the different theoretical
frameworks within which regulations can be
analysed—providing both a legal and financial
perspective. Critically evaluates current issues
of regulatory debate and reform in securities
markets, such as insider trading and takeovers.
Exposes students to the different research
methodologies of finance and law, and
demonstrates the ways in which financial
markets change rapidly. One major factor
affecting the prices of firms assets and the
financial decisions of management is the
degree to which such assets and decisions are
regulated.

25712
Financial Market Stochastics
Postgraduate
6cp; prerequisites: a strong quantitative
background through a first degree (e.g.
mathematics, econometrics, statistics, physical
sciences or engineering) as deemed satisfactory
by the Head of School of Finance and
Economics
Provides students with the background in
stochastic methods necessary to approach the
technical literature in modern quantitative
finance. Starts with the modelling of financial
prices as stochastic processes and develops
concepts up to Ito’s lemma, Girsanov’s
theorem and Wiener chaos expansions.

25713
International Capital Markets
Postgraduate
6cp; prerequisite: 25706 Economics for
Management
Provides participants with a basic
understanding of the operations of financial
institutions and capital markets. Presents a
first-level treatment of the payment, financing
and financial risk management systems
provided by financial systems and the
economic forces that cause movements in
interest and exchange rates.

25714
Insurance Compliance
Postgraduate
6cp; prerequisites: Graduate Certificate in
Insurance, or Executive Certificate in Insurance,
or Fellow of the Australian Insurance Institute
Develops an understanding of compliance
processes operating within the Australian
general and life insurance industries. Identifies
the nature and scope of contemporary external
compliance requirements either from
Regulators or from external benchmarks.
25715
Insurance Economic Issues
Postgraduate
6cp; prerequisites: Graduate Certificate in Insurance, or Executive Certificate in Insurance, or Fellow of the Australian Insurance Institute
Develops an understanding of the social, political, legal and financial forces which may impact upon the autonomy of insurance industry participants. Identifies the nature, scope and volatility of these influences.

25716
Insurance Portfolio Management
Postgraduate
6cp; prerequisites: Graduate Certificate in Insurance, or Executive Certificate in Insurance, or Fellow of the Australian Insurance Institute
Develops an understanding of contemporary general insurance underwriting and portfolio management techniques and the theoretical concepts which support these processes. Examines the changes that are occurring to those processes, the impact of varying market cycles and the response of the industry to these issues.

25717
Insurance Risk Financing
Postgraduate
6cp; prerequisites: Graduate Certificate in Insurance, or Executive Certificate in Insurance, or Fellow of the Australian Insurance Institute
Develops an understanding of contemporary risk financing techniques available to both insurers and insureds. Directs attention to the extent to which these alternative risk-financing techniques are structuring ongoing insurance relationships.

25718
Insurance Financial Management
Postgraduate
6cp; prerequisites: Graduate Certificate in Insurance, or Executive Certificate in Insurance, or Fellow of the Australian Insurance Institute
Develops an understanding of the financial management reporting processes in the general insurance industry, the changes that are occurring to those processes and the response of the industry to emerging issues.

25721
Investment Management
Postgraduate
6cp; prerequisite: 25742 Financial Management
Introduces the conceptual and theoretical frameworks of the traditional and portfolio approaches to investments, and provides practice in the techniques of portfolio analysis and management. Complements 25765 Corporate Finance in the sense that the concept of risk analysis developed there is applied to asset allocation in a portfolio context. Relates to the subject 25762 Synthetic Financial Products in the sense that the risk management techniques learnt there can be integrated in portfolio risk management.

25731
International Finance
Postgraduate
6cp; prerequisite: 25742 Financial Management
Examines foreign exchange markets, multinational working capital, international investments and the financing of international operations. Students will be able to understand how firms operate in the international financial environment. International financial management seeks to extend the corporate finance framework. Consideration of foreign exchange markets and parity relationships forms a basis to subsequent subjects dealing in Corporate Treasury Management and Synthetic Financial Products. International investment and financing issues impact on overall investment management decisions and strategies.

25736
Asian–Australian Economic Relations
Postgraduate
6cp; prerequisite: 25706 Economics for Management
The objective of this subject is to gain an understanding of Australia’s developing economic relations with Asia; the history of the economic development of selected Asian economies; and future prospects for Australia within the Asian region.
Topics include an overview of Australia and Asia; a review of selected fundamental economic concepts: output, growth, inflation, indexes, comparative statistics, exchange rates; the development of China’s political economy before, during and (more importantly) after Mao; Australia’s developing trading relations with China after Mao; the development of
Japan's political economy; Australia-Japan economic relations; the economic development of Asia's newly industrialised economies (NIEs) - South Korea, Taiwan, Hong Kong and Singapore; Australian trading relations with these NIEs; ASEAN history and economic relations with Australia; aspects of macroeconomic management in Asia and Australia; and possible special interest topics.

25741
Capital Markets
Postgraduate
6cp
Assists students in developing a broad knowledge of the instruments, institutions and markets that comprise the financial system, and an understanding of the dynamics that influence the behaviour of financial markets and the value of financial instruments. Develops skills in financial mathematics that are useful in pricing, securities and in financial decision making.

25742
Financial Management
Postgraduate
6cp
Provides the analytical framework for corporate financial decisions. Introduces students to financial theory and to the tools of financial decision making. Concerned primarily with investment project evaluation and determining the financing mix necessary to achieve the firm's financial objectives. Topics include the conceptual basis of financial decisions, accounting statements and cash flow, net present value, the valuation of debt and equity, capital budget issues, risk and return, the capital asset pricing model (CAPM), capital structure - determinants of the optimal balance of debt and equity, dividend policy, and leasing.

25743
Corporate Financial Analysis
Postgraduate
6cp; prerequisite: 25742 Financial Management
Students undertaking this subject should not enrol in the equivalent subject 22743 Financial Statement Analysis and Financial Modelling.
Develops students' ability to conduct corporate financial analysis, both for lending and investment purposes. Students will be able to reconstruct cash flow statements from other financial statements, analyse reasons for corporate failure and determine which financial ratios are crucial. Develops the ability to conduct expert corporate financial analysis which will become a highly desired and critical skill with growth in the role of the banking and managed investment trust sector.

25744
Current Issues in Finance
Postgraduate
6cp; prerequisite: 25742 Financial Management
Builds upon the knowledge students have gained in previous finance subjects. Introduces students to relevant topics in the field of finance through readings from recent journal articles. Topics include anomalies in equity pricing; re-examination of market efficiency; performance evaluation; asset and liability management; risk assessment and management; corporate control; capital structure; capital raising; and corporate restructuring.

25751
Financial Institution Management
Postgraduate
6cp; prerequisite: 25742 Financial Management
Introduces students to a broader view of a changing banking environment; develops an understanding of financial decision making in banking; develops decision-making skills in policy formulation and implementation. Topics include: economics of financial institutions; capital adequacy and implications; yield curves and gapping in money markets; liquidity management; asset/liability management; interest rate risk management; foreign exchange risk management; strategic planning. Emphasises the practical aspects of managing a bank today.

25752
Financial Institution Lending
Postgraduate
6cp; prerequisite: 25742 Financial Management
Develops understanding and appreciation of sound and practical bank lending practices, including corporate and consumer lending, international trade, current issues, and legal matters. Topics include lending to business firms and individuals, international trade, problem loans, current issues, relationship, and legal matters.
25753
Issues in Banking

Postgraduate
6cp; prerequisites: 25751 Financial Institution Management; 25752 Financial Institution Lending

Examines major matters of current concern relating to the practice of banking and finance. The topics will also be related to material covered previously in the course. This subject aims to increase awareness and improve understanding of issues beyond the scope of topics covered in traditional banking courses.

25762
Synthetic Financial Products

Postgraduate
6cp; prerequisite: 25721 Investment Management

Provides an introduction to the management of portfolios using options in financial markets. Stock, index, debt and foreign currency options are discussed, as well as forward and futures contracts and options on these instruments. Discusses the role of such instruments as risk-transferring devices.

25763
Corporate Treasury Management

Postgraduate
6cp; prerequisite: 25742 Financial Management

Deals with the management of financial price risk in a corporate treasury environment. Students will be able to understand and identify financial price risk, measure exposure, set objectives, measure performance and adopt appropriate tactics and strategies, via use of forwards, futures, swaps and options.

25764
Venture Capital Finance

Postgraduate
3cp; prerequisite: 25742 Financial Management

Examines the nature of the venture capital market and investment processes, and the growing number of financial institutions involved as venture capital suppliers. Analyses the various types of new ventures appropriate for venture capital finance, including start-up, expansion and management buy-out.

25765
Corporate Finance

Postgraduate

6cp; prerequisite: 25742 Financial Management

Introduces and exposes students to corporate financial management; basic investment decision-making techniques and financing decisions both short term (current) and long term. Topics include risk analysis; capital asset pricing; capital structure and valuation; bankruptcy risk; and cost of capital.

25785
Research Techniques in Finance and Economics

Postgraduate

6cp; prerequisite: completion of a relevant Bachelor of Business degree

Introduces and exposes students to a selection of research techniques of potential relevance in preparing a thesis in the area of finance and economics.

25786
Research Seminars in Finance and Economics

Postgraduate

6cp; prerequisite: 25785 Research Techniques in Finance and Economics (unless otherwise approved by the Head of School)

Provides a forum each semester for students to present an update on their research efforts and review the work of others.

25790
Business Project - Finance

Postgraduate

6cp; prerequisites: any four subjects in the Master of Business in Finance

This project should be undertaken in an organisational setting and should be integral to the elective subjects in the specialisation chosen by the student. It allows students to examine a financial organisation or market through the stages, definition, resolution, decision making and implementation using the financial skills, procedures and knowledge acquired during the course.
25805  Exotic Derivatives
Postgraduate
3cp; prerequisite: 25816 Computational Finance
Provides participants with an in-depth understanding of recently developed practical and computationally efficient techniques for the modelling, pricing and hedging of exotic derivative securities which are in general path-dependent. Valuation techniques will be applied to Log and Power contracts, Asian, Chooser, Compound, Barrier, Rainbow and Quanto options. The more difficult case of incorporating stochastic volatility will be considered. Some comparison with alternative valuation methods, such as partial differential equation solutions and Monte Carlo simulation techniques will also be made. To facilitate learning, computer software will be provided to supplement the theoretical aspects of the course and provide a practical hands-on approach to a number of case studies.

25806  Interest Rate Derivatives
Postgraduate
3cp; prerequisite: 25712 Financial Market Stochastics
Provides participants with an in-depth knowledge and understanding of the state-of-art techniques for the pricing and hedging of interest rate derivative securities such as zero and coupon bonds, European and American bond options, forward and futures contracts, options on futures, interest rate swaps, caps and floors and swaptions and some interest rate exotics. The evaluation of such derivatives will be considered in a consistent arbitrage free term structure model. Also discusses issues related to term structure modelling and parameter estimation. Sophisticated computer software will provide participants with hands-on and practical solutions to a number of realistic, market-related problems in the management of interest rate risk.

25807  Mergers and Acquisitions
Postgraduate
3cp; prerequisite: 25742 Financial Management
Examines all aspects of the process by which one organisation is subsumed into another. Topics covered include valuation, leveraged buyouts, asset sales and restructuring and defeasance. Legal and tax aspects of mergers and acquisitions are also examined.

25808  Credit Risk
Postgraduate
3cp; prerequisite: 25712 Financial Market Stochastics
Examines risk management from the perspective of credit risk – which is the risk arising in the event of one counterparty defaulting on a transaction when the value of the transaction is positive to the other party. Several techniques involved in the study of credit exposures on individual transactions and the aggregation exposures in the case of portfolios will be discussed. In particular, the Monte Carlo approach, the scenario-based method for measuring credit exposure, and the factor approach to exposure measurement. The translation of a credit exposure amount (maximum or expected) to a credit loss amount will be discussed with reference to the probabilities of default and the rate of recovery will be considered. The effect of counterparty netting will be studied. The evolution of exposure amounts over the life of a transaction will be considered in terms of diffusions and amortisation. The relationship between market risk and credit risk will be examined as the two concepts can be viewed as two sides to the same coin. The allocation of reserves and capital required in light of the credit risk measurements will also be studied with respect to the distribution of potential losses and institutional policies. Analytical and technical problems arising in the modelling of counterparty exposures will be discussed, including the modelling of market variables, effects of counterparty netting, correlation of market risk, correlation between default and exposure and the correlation of default among counterparties. A Monte Carlo-based risk management system incorporating credit risk, CARMA, will be discussed.

25809  Technical Analysis
Postgraduate
3cp; prerequisite: 25721 Investment Management
Familiarises students with all aspects of technical analysis – a major force in financial markets. Topics include types of charts, reversal and continuation patterns, congestion/consolidation, Elliot and Krondratieff wave theory, and cross confirmation.
25810

Market Risk
Postgraduate
3cp; prerequisite: 25712 Financial Market Stochastics

Considers useful yet practical measures of market risk. A widely used summary measure of market risk is value-at-risk or VAR. Describes the concept and reviews the methods of calculating VAR and discusses its applications. In particular, studies the calculation of VAR using historical simulation methods, Monte Carlo simulation techniques, scenario based methods and analytical (variance/covariance) methods. Also discusses issues related to handling of instruments with non-linear pay-offs, such as options. Reviews implementation issues resulting in model risk. Several recent research papers by leading researchers in this area will be synthesised and presented. Discusses the widely used parametric model of J P Morgan, RiskMetrics. Provides sophisticated stochastic simulation based software.

25811

Swaps
Postgraduate
3cp; prerequisite: 25742 Financial Management

Covers all aspects of the Australian and international swaps markets. Topics include evolution of the swaps market; swap valuation; FRAs vs swaps; and a practical assessment of interest rate swaps, currency swaps and currency-interest rate swaps.

25812

Fundraising in International Markets
Postgraduate
3cp; prerequisite: 25742 Financial Management

Examines practical aspects of raising funds in offshore markets. Examines the evolution and structure of international financial markets. Covers in detail Eurocurrency, debt and equity markets. Topics include international bond issues, equity link bonds and Eurobonds.

25813

Financial Negotiation Skills
Postgraduate
3cp; prerequisite: 25742 Financial Management

Effective negotiation requires good technique, practice and confidence. Topics include effective negotiating with authority, reading the opposition and closing the deal. Students will be able to assess opponents needs, plan strategies that work, break ‘deadlocks’, develop and encourage concessions.

25814

Banking and Business Ethics
Postgraduate
3cp; prerequisites: 25752 Financial Institutions Management

The exact nature of the subject material will be determined by each presenter.

25815

Asian Capital Markets
Postgraduate
3cp; prerequisite: 25742 Financial Management

Examines the rapidly expanding Asian capital markets. Examines the structure and institutions of the major capital markets and their interconnections. Through an examination of the many recent academic studies that have focused on the emerging Asian financial system. These studies examine efficiency and market anomalies in markets such as Singapore, Malaysia and Hong Kong.

25816

Computational Finance
Postgraduate
3cp; prerequisites: 25712 Financial Market Stochastics; 25762 Synthetic Financial Products

Demonstrates the application of classical techniques of numerical analysis to the solution of pricing and hedging problems in derivative security analysis. Topics include the partial differential equations of financial economics, explicit methods, implicit methods, lattice models and trees, benchmarking of the various methods, evaluation of European, American and exotic options.

25817

Fixed Income Securities
Postgraduate
3cp; prerequisite: 25821 Yield Curve Analysis

Provides the concepts and techniques necessary for the management of fixed income securities. Topics include bond analysis techniques, non-standard bonds and investment and dealing strategies.
25818
Real Estate Finance and Investment
Postgraduate
3cp; prerequisite: 25742 Financial Management
Examines real estate/property as an asset class. Various property sectors are considered as well as mainstream techniques of finance such as discounted cash flow, modern portfolio theory and efficient market hypothesis which are applied to the selection, evaluation and management of real estate.

25819
Share Market Analysis
Postgraduate
3cp; prerequisite: 25742 Financial Management
Examines all aspects of share market analysis. Topics include valuation, fundamental analysis and stock selection. The fundamental approach to equity valuation and selection focuses on book value, replacement value and discounted cash flows and price to earnings ratio. Technical analysis highlights some of the procedures used by technical analysts to forecast increases in equity valuation.

25820
Stochastic Simulation in Finance
Postgraduate
3cp; prerequisite: 25712 Financial Market Stochastics
Expounds the concepts and techniques of stochastic simulation as applied to the pricing and hedging of complex financial instruments. Topics include numerical solution of stochastic differential equations, Monte Carlo methods, quasi Monte Carlo methods, derivative security pricing and hedging via simulation, applications to stock options, interest rate options, exotic options and American options.

25821
Yield Curve Analysis
Postgraduate
3cp; prerequisite: 25721 Investment Management
Discusses the practicalities of yield curve analysis in Australian markets. Topics include the pricing of yield curve measures for bonds, the price volatility of option free bonds and duration measures.

25822
Industry Economics
Postgraduate
3cp; prerequisite: 25706 Economics for Management
Provides students with skills in analysis of industry conduct and behaviour. Enables the prediction of market performance of firms and industries. Topics include introduction to industrial organisation, market definition; economics of scale, dominance and entry; price discrimination and oligopoly pricing; vertical integration; market power; and price, profits and efficiency.

25823
Resource Economics
Postgraduate
3cp; prerequisite: 25706 Economics for Management
Provides an understanding of the economics of resource development and its environmental impacts. Topics include an outline of the resource sector; principles of sustainable economic development; market and market-failure principles; cost-benefit analysis and estimating environmental values; and major environmental issues, such as global warming.

25824
Project Financing
Postgraduate
3cp; prerequisites: 25741 Capital Markets; 25765 Corporate Finance
Provides students with an understanding of particular risks involved in project financing. Develops abilities to overcome the risks involved in project finance through analytical techniques. Looks at the role of project financing in the modern economy with reference to recent projects in Australia and South-East Asia. Topics include identification and management of project risk; project financing; evaluation of projects; structuring; and documentation.

25825
Principles of Risk and Insurance
Postgraduate
3cp
Develops an understanding of the fundamental principles of risk and use of insurance in the management of risk exposures. Directs attention to the insurance process and the regulation of that process.
25826
Risk Management
Postgraduate
3cp
Develops an understanding of the concepts and processes utilised in the management of corporate risk exposures. Directs attention to the analytical processes by which corporate risk exposures may be identified and the availability of strategies to control identified exposures.

25827
Liability Insurance
Postgraduate
3cp; prerequisites: 25825 Principles of Risk and Insurance; 25826 Risk Management
Develops an understanding of the fundamental principles of liability insurance, underwriting and claims management. Directs attention to contemporary liability risk exposure trends and the related liability insurance portfolio management issues.

25828
Reinsurance
Postgraduate
6cp; prerequisites: 25825 Principles of Risk and Insurance; 25829 Property Insurance; 25827 Liability Insurance
Develops an understanding of the fundamental principles of reinsurance, reinsurance underwriting and portfolio management. Directs attention to identification and analysis of contemporary reinsurance trends and issues.

25829
Property Insurance
Postgraduate
3cp; prerequisites: 25825 Principles of Risk and Insurance; 25826 Risk Management
Develops an understanding of the fundamental principles of property insurance, underwriting and claims management. Directs attention to contemporary risk exposure and the related property insurance portfolio management issues.

25830
Theory of General Insurance
Postgraduate
6cp; prerequisites: 25825 Principles of Risk and Insurance; 25829 Property Insurance; 25827 Liability Insurance
Develops an understanding of the application of statistical and quantitative methods to the general insurance underwriting process. Identifies both the techniques and issues to be addressed in the management of a general insurance portfolio and the regulatory regime within which such portfolios operate.

25905
Capital Budgeting and Valuation (Honours)
Undergraduate
6cp; prerequisites: 25406 Quantitative Techniques for Finance and Economics; 25314 Business Finance
Presents the technical tools to master the traditional as well as the more recent approaches to capital budgeting and valuation.

25906
Investment Analysis (Honours)
Undergraduate
6cp; prerequisites: Bachelor of Business core subjects in Semesters 1 and 2; 25406 Quantitative Techniques for Finance and Economics
A few minutes at the beginning of every lecture will be allocated to analyse any significant local or global event over the past week that may have an impact on macroeconomic variables and thus may affect investment decisions. Students will be required to scan all possible sources of financial and economic information to be able to contribute to this effectively.

25910
Thesis in Finance and Economics
Undergraduate
12cp; prerequisite: admission to the Bachelor of Mathematics and Finance Honours program
A thesis on a topic chosen by the student in consultation with his or her supervisor.

25921
Theory of Financial Decision Making
Undergraduate
6cp; prerequisite: admission to the Honours program
Introduces the foundations of modern portfolio theory and how it is applied. Topics
Subject descriptions

covered include: theory of choice; mean-variance criterion; capital market equilibrium; Capital Asset Pricing Model and Arbitrage Pricing Theorem; and equilibrium evaluation of derivative securities.

25922

Financial Econometrics
Undergraduate
6cp; prerequisite: admission to the Honours program
Extends knowledge of financial econometrics and model building to enable comprehension of advanced research literature and confident use of econometric techniques in research. Topics include: maximum likelihood estimation and inference in linear and nonlinear models; modern time series methods of dealing with integrated variables; modelling volatility with the ARCH class of models; and econometrics packages.

25923

Derivative Security Pricing
Undergraduate
6cp; prerequisite: admission to the Honours program
Provides the techniques needed to analyse and price derivative securities and to understand some of the key associated quantitative arguments. Topics include: derivative securities; arbitrage arguments; geometric Brownian motion model of asset prices; Ito's lemma; risk neutral pricing; Black Scholes option pricing model; currency, index and futures options; hedging techniques; and interest rate derivative securities.

25924

Advanced Corporate Finance
Undergraduate
6cp; prerequisite: admission to the Honours program
Through study of the research literature, provides an understanding of the motivation, construction and empirical testing of theories in corporate finance. Covers a selection of classic papers in corporate finance, some current research work, and a significant quantity of Australian empirical work. Research studied is concerned with the major issues involved in a company's investment and financing decisions and the interaction of these activities with the formation of prices in the markets for the company's securities.

25925

Thesis in Finance
Undergraduate
24cp; (2 semester subject); prerequisite: admission to the Honours program
Requires the student to produce a 20,000 word (maximum) thesis based on an original problem of a theoretical or applied nature. The thesis is expected to demonstrate the student's competency to conceptualise, conduct and present research in a scholarly and independent manner.

26122

Quantitative Methods for Business
Undergraduate
4cp; includes topics in two related areas – Mathematics of Finance and Business Statistics
Mathematics of Finance: simple and compound interest – annual percentage rates and annual effective rates; annuities – mortgages and financial leases; perpetuities; amortisation schedules; discounted cash flow procedures – net present value and internal rate of return techniques, the cost of capital issue, sensitivity analysis, and applications in business.

Business Statistics: this area of study uses SPSS extensively as the teaching software package. Topics include: descriptive statistics – central tendency and dispersion, exploratory data analysis, graphical techniques, probability and probability distributions, especially Binomial, Poisson and Normal; statistical inference – central limit theorem, sampling distributions of the mean, confidence intervals for sample means; hypothesis testing – Type I and Type II errors, one and two sample z and t tests for sample means; correlation, covariance and linear regression; statistical process control and statistical quality control; and applications of all these topic areas in business generally.

27103

The Olympic Games
Undergraduate
6cp
The Olympic Games is a significant phenomenon in contemporary sport, tourism and culture with a growing research literature. Covers the cultural, sociological, economic and media impacts on the Games, and the philosophy of Olympism and impacts of the Sydney 2000 event.
27104
Recreation Leadership
Undergraduate
6cp
On completion, students will appreciate the different roles played by leaders in the provision of leisure programs and services; have developed a basic understanding of prevailing theories of leadership and considered their relevance and application to leisure professionals; be familiar with a range of practical recreation/leadership skills; and have demonstrated an ability to apply these skills in a small group situation.

27105
Nutrition for Physical Activity
Undergraduate
6cp; prerequisite: 27173 Efficiency of Human Movement 1
Examines the role of nutrition in maintaining a healthy lifestyle and in exercise and sports performance. Focuses on dietary guidelines for exercise prescription and sports performance and on the relationships between physical activity and eating disorders such as anorexia, bulimia and obesity.

27106
Social Psychology of Leisure
Undergraduate
6cp; prerequisite: 27187 Leisure Concepts
Provides students with a basic grounding in the principles of social psychology and how these can be understood and applied within a leisure context. Specific reference is made to the role of social psychology within a range of professional contexts including tourism, sport and the outdoors. Builds a critical awareness in students of the methods and assumptions that underpin social psychological inquiry.

27108
Lifestyle Analysis
Postgraduate
6cp; prerequisite: 27752 Marketing for the Arts or 27807 Tourism Marketing or 27716 Sport Marketing or 27710 Popular Culture or an approved general marketing subject
Draws on a variety of disciplinary perspectives and provides the opportunity to explore the possibilities of interdisciplinary studies as exemplified by Leisure Studies and Tourism Studies subjects. Covers approaches to conceptualising and theorising lifestyle, including Weber and Weberian school of thought; sub-cultural studies; psychological approaches; market research/psychographics studies; spatial/geo-demographic approaches; leisure styles; health research and lifestyle; the idea of quality of life, 'socialist lifestyles', the elderly, communes and 'alternative' lifestyles; analysing the concept of lifestyle and its dimensions; methodological issues; lifestyle as a research/marketing/policy tool; lifestyle in leisure/tourism research; lifestyle in the marketing of leisure and tourism; and lifestyle in leisure policy formulation and service delivery.

27115
Arts and Entertainment Management
Undergraduate
6cp; prerequisite: 27187 Leisure Concepts
Examines the concepts of 'art' and 'entertainment' and their changing roles in social life; the theories of culture and their relevance to the contemporary analysis of leisure; and the organisation of the arts and the entertainment industry in Australia with particular reference to access and equity, the politics of patronage, and the composition of audiences. Familiarises students with current issues shaping the future of arts and entertainment in Australia.

27126
Leisure in Australia
Undergraduate
6cp
Provides students with the opportunity to investigate and account for the leisure patterns of Australians. Builds a framework for analysing the development of 'industrial' responses to this behaviour and provides a grounding on which subsequent contextual knowledge is built later in the course. Provides students with the opportunity to learn a range of information retrieval and reporting techniques central to the development of scholarship.

27131
Community Arts
Undergraduate
6cp; prerequisite: 27187 Leisure Concepts
Provides an understanding of the role of community arts in Australian society. Students become familiar with the organisations that administer and fund community art forms, and develop a practical appreciation of the
skills and resources necessary to organise and lead a community art activity.

27134
Outdoor Education 1
Undergraduate
6cp
Examines the scope and significance of outdoor education from leisure education, environmental education and personal development perspectives. These three areas are taught within a holistic framework that also takes account of the social, political and economic frameworks which influence and shape the ‘outdoors’. Provides students with the personal competencies to organise and lead lightweight camping and bushwalking programs in the environs of Sydney.

27135
Outdoor Education 2
Undergraduate
6cp; prerequisite: 27134 Outdoor Education 1
Develops the substantive content from Outdoor Education 1 and focuses specifically on understanding the environmental, personal and social development, and program management aspects, of outdoor experiences. Provides students with the competencies necessary to organise and manage outdoor education programs selected from the following: abseiling, rock climbing, caving, canoeing, cross-country skiing, canyoning, orienteering and expeditioning.

27137
Water-based Recreation
Undergraduate
6cp
Examines the growth and extent of water-based recreation in Australian society; the administrative structures which have evolved to cater for water-based recreation; and the skills and resources necessary to program for selected water-based activities.

27149
Performance Studies 1
Undergraduate
4cp
Provides students with the knowledge and skills necessary to understand the relationships between the anatomical bases of human movement and performance in physical activity. Competence in a range of dance and gymnastics activities is required.

27151
Popular Writing on Travel and Tourism
Undergraduate
6cp
Develops an understanding of the travel writing genre and its relationship to the growth and development of tourism, both internationally and in Australia. Builds on the knowledge students have of tourism from earlier subjects to develop a comprehensive understanding of the tourism phenomenon. Exposes students to representative examples of travel writing of the past two centuries, with an emphasis on 20th century travel writing. Develops skills in critical analysis, research, written communication and oral presentation.

27152
Measurement and Development of Physical Capacity
Undergraduate
6cp; prerequisite: 27175 Energetics of Human Movement
Examines the interrelationships between physical activity and the physiological and anatomical development of the individual, with emphasis on the measurement and development of physical capacity (strength, flexibility and endurance) and basic training methodology. Provides students with proficiency in the skills required to measure fundamental human-movement-related capacities.

27154
Readings for Thesis
Undergraduate
6cp; prerequisite: admission to Honours program; corequisite: 27941 Advanced Research Methods for Leisure and Tourism
Provides Honours students with the opportunity to explore in greater depth the major themes and issues pertaining to their area of research. Enables students to recognise the contribution of the literature relevant to their research problem. Allows students to use the literature to develop the theoretical and conceptual framework of the Honours thesis.
27155
Research Design and Statistics for Human Movement
Undergraduate
4cp
Introduces students to the concepts and skills necessary to understand and conduct research in the human movement context. Provides an essential understanding of research procedures and statistical concepts and techniques applicable to professional practice and academic inquiry in human movement.

27156
Research Methods 1
Undergraduate
6cp
Introduces students to the skills necessary to conduct research in the leisure and tourism contexts. Provides an essential understanding of research procedures and statistical concepts and techniques applicable to professional practice and academic inquiry in the leisure and tourism fields.

27157
Research Methods 2
Undergraduate
6cp; prerequisite: 27156 Research Methods 1
Provides students with the knowledge and skills to both systematically examine existing research material and conduct small-scale research projects. Provides students with the opportunity to learn and integrate software programs into industry-based research projects and undertake a research project which has ‘real-life’ application.

27158
The Small Leisure/Tourism Business
Undergraduate
6cp; prerequisites: 22028 Accounting for Managers; 24105 Marketing Principles; 27628 Law for Leisure, Sport and Tourism (BA in Leisure Studies and BA in Human Movement Studies); 22105 Accounting A; 27642 Tourism Marketing; 27628 Law for Leisure, Sport and Tourism (BA in Tourism Management)
The private sector of the leisure and tourism industries is characterised by the large and growing number of small businesses. Increasingly, it can be expected that graduates from the School’s courses will work in or establish their own small business. The opportunity to study the small business phenomenon and its operation is therefore seen as beneficial to such students.

27159
Social Issues in Sport and Exercise
Undergraduate
4cp; prerequisite: 27186 Leisure and Sport in Social Context
Examines contemporary issues which influence sport and exercise practices in Australia and overseas. Students will develop research, analytical and professional skills in a context which will allow them to arrive at and justify informed positions regarding selected issues in the fields of sport and exercise.

27160
Sport and Exercise Behaviour
Undergraduate
6cp; prerequisite: 27106 Social Psychology of Leisure
Examines sport performance in relation to cognitive and social psychological constructs. Emphasises the utilisation of sport psychology for performance enhancement in sport. Examines the psychological responses involved in exercise with an emphasis on how these responses influence future exercise behaviour. Employs a contextual learning strategy where students are required to both examine and apply psychological theories in the exercise and sport environment. Focuses on developing a strong theoretical understanding as well as developing proficiency in the skills required for measurement and assessment in exercise and sports psychology.

27161
Sport Marketing
Undergraduate
6cp
Examines the nature of market relations and marketing processes for sport. Focuses on the application of generic marketing skills to sports-specific contexts including sports sponsorship, franchising and merchandising. Examines marketing strategies for special events and considers issues relating to corporate sponsorship, fundraising, sales and public profiling.
27162
Tourism in Social Context
Undergraduate
6cp
Introduces students to the literature and practice of sociological and cultural analysis. Selected sociological and cultural studies perspectives are used to inquire into, and critically appraise, aspects of tourism such as the authenticity of tourist attractions, travel photography and images, the social impacts of tourism on host cultures, and the reshaping of urban environments around tourism/leisure precincts.

27163
Tourism Industry Practicum
Undergraduate
6cp; prerequisite: completion of the first year of the BA in Tourism Management
Provides students with an understanding of career paths within the tourism industry as well as basic job-seeking skills such as resume writing. Introduces students to matters associated with occupational health and safety, employee rights and equal employment opportunity within the context of the tourism industry. Provides students with the opportunity to gain first-hand experience of firms/organisations in which they are considering seeking employment upon graduation. Allows students to see directly how the content of their program can be applied in a practical setting. Expands the professional network of students which can later be used to facilitate job placement. Students are required to complete 10 weeks (400 hours) of industry experience (in Years 2 and 3 of their program) to fulfil the work placement component of this subject.

27165
Tourism Studies Project 1
Undergraduate
6cp; prerequisite: 27157 Research Methods 2. This subject is only available to students in their final year of study.
The subjects Tourism Studies Project 1 and 2 act as capstone subjects for the BA in Tourism Management by bringing together knowledge and skills developed throughout the course. Students select a problem, issue, or opportunity of interest to both themselves and a specific client organisation and prepare a detailed research proposal. As a prelude to the preparation of this document, students are required to undertake an analysis of their chosen problem using the Tourism System model. A critical appraisal of the chosen client organisation's decision-making processes is also conducted.

27166
Tourism Studies Project 2
Undergraduate
8cp; prerequisite: 27165 Tourism Studies Project 1
The subjects Tourism Studies Project 1 and 2 act as capstone subjects for the BA in Tourism Management by bringing together knowledge and skills developed throughout the course. Students carry through the activities outlined in the research proposal prepared in Tourism Studies Project 1 and produce a final report for submission to their supervisor and client.

27168
Women and Leisure
Undergraduate
6cp; prerequisite: 27187 Leisure Concepts
Enables students to follow up the introductory material provided in 27187 Leisure Concepts and to study the growing literature on women/gender and leisure which has developed over recent years in response to the 'gender blindness' of early leisure research and policy. Covers theoretical, empirical, critical and applied perspectives on women and leisure, including radical and reformist perspectives on patriarchy; research on women, sport and leisure; and policy implications for leisure provision and management.

27169
Ageing and Leisure
Undergraduate
6cp; prerequisite: 27326 Leisure and Diversity
 Enables students to follow up the introductory material provided in 27326 Leisure and Diversity. Reflects the increasing significance of the elderly in the demographic structure of Australia, and recognises the increasing employment opportunities and professional responsibilities in relation to services for the elderly. The focus is on people over the age of 55 years and covers theoretical, empirical, critical and applied perspectives on ageing and leisure, including theories of ageing and retirement; the ageing of the Australian population; research on ageing and leisure; and policies for leisure provision for older adults.
27170
Analytical Procedures in Human Movement
Undergraduate
6cp; prerequisite: 27173 Efficiency of Human Movement 1
Provides students with theoretical and practical knowledge of paradigms and methodologies pertaining to human movement research. Examined are skills relevant to a diversity of contexts in which analysis of the human response to exercise is undertaken, with an emphasis on fitness or health screening and physiological assessment of specific populations.

27171
Applied Kinesiology
Undergraduate
4cp; prerequisite: 27180 Functional Kinesiology
Develops an understanding of how human movement is affected by the body’s structure. Detailed study of musculoskeletal and neuromuscular anatomy is applied to the human movement context.

27172
Applied Sport Psychology
Undergraduate
6cp; prerequisite: 27160 Sport and Exercise Behaviour
Examines the field of applied sport psychology. Focuses primarily on performance enhancement through the understanding and implementation of psychological principles in sport situations.

27173
Efficiency of Human Movement 1
Undergraduate
6cp; prerequisite: 27175 Energetics of Human Movement
Examines human physiological responses and adaptations to exercise with emphasis on metabolism, ventilation, cardiorespiratory function, muscle metabolism, and exercise training methodology. Focuses on developing a strong theoretical understanding as well as developing proficiency in the skills required for fundamental assessment in exercise physiology.

27174
Efficiency of Human Movement 2
Undergraduate
6cp; prerequisite: 27223 Mechanics of Human Motion
Examines techniques for quantifying aspects of human motion and explores applications of biomechanical principles and methodologies in ergonomics, orthopaedics, sport, exercise and rehabilitation.

27175
Energetics of Human Movement
Undergraduate
4cp; prerequisites: 91429 Physiological Bases of Human Movement; 65014 Chemistry (Human Movement)
Examines the interactions between the bioenergetic, metabolic, neurological and hormonal aspects of human movement, muscular control, and cardiorespiratory function and performance.

27176
Environmental Influences in Sport and Exercise Performance
Undergraduate
6cp; prerequisite: 27173 Efficiency of Human Movement 1
Examines the effects of environmental influences such as heat, cold, high and low pressure, and pollution on physical performance. Focuses on developing a strong theoretical understanding as well as developing proficiency in the practical skills required for sport and exercise performance in specific adverse environmental conditions.

27177
Event and Facility Management
Undergraduate
6cp
Analyses the procedures necessary for the efficient management of events and facilities in regional, State and international sports contexts. Considers planning an operational strategies, financing, supervision and evaluation, concept development and organisational structures.
27178
Exercise Rehabilitation
Undergraduate
6cp; prerequisite: 27173 Efficiency of Human Movement 1
Examines the role of physical exercise as a therapeutic adjunct in the amelioration of certain chronic medical conditions. Focuses on developing a strong understanding of the physiological, biomechanical, psychological and sociological limitations of these chronic medical conditions as well as developing proficiency in the skills required for individualised prescription of exercise programs for special populations.

27179
Festivals and Special Events
Undergraduate
6cp
Enables students to assess the range of perspectives and definitions central to the study of festival- and event-based leisure; determine the roles played by festivals and special events; identify the costs and benefits, along with mechanisms for maximising benefits and ameliorating costs; demonstrate skills associated with the development, marketing and management of festivals and special events; and develop an understanding of methods used to evaluate outcomes.

27180
Functional Kinesiology
Undergraduate
6cp
Incorporates a detailed examination of the structure and function of bones, joints, muscles and nerves with emphasis on the identification of anatomical structures and their relevance to human motion. Forms the basis for subsequent study of the physiological and kinesiological aspects of human movement.

27181
Human Motor Development
Undergraduate
4cp; prerequisite: 27180 Functional Kinesiology
Introduces students to the effects of physical activity on child and adolescent growth and development. Provides a basis for the study of the physiological, biomechanical and behavioural aspects of human growth and development.

27182
International Tourism
Undergraduate
6cp; prerequisites: 27184 Introduction to Tourism Systems; 27648 The Tourism Industry
Provides students who are interested in international tourism with the opportunity to develop the knowledge and skills appropriate for effective management positions in the industry sectors involved in this form of tourism. Involves a high level of interaction with tourism industry firms and organisations, usually in the ‘Australia-to-Bali/Indonesia’ tourism system, and a compulsory 14-day field study tour, in most cases to Bali, the full cost of which is borne by the students.

27183
Introduction to Human Movement Studies
Undergraduate
6cp
Introduces students to the study of human movement through a conceptual approach. Presents basic research techniques as well as an exploration of professional opportunities in various areas of human movement.

27184
Introduction to Tourism Systems
Undergraduate
6cp
Analyses the essential elements of tourism in terms of their functional, structural, operational and interrelational attributes, and examines the nature of the interrelationships between tourism and the significant environments with which it interacts. Provides students with knowledge and understanding of the specific and general contexts within which management in, and management of, tourism are practised.

27185
Introduction to Tourist Behaviour
Undergraduate
6cp; prerequisite: 27184 Introduction to Tourism Systems
Introduces conceptual and methodological approaches to the study of tourist behaviour. Seeks to develop an understanding of the relationships that exist between tourists and the various environments – social, cultural and physical – with which they interact. Discusses various approaches to managing tourist
behaviour. Content is largely based on contributions from social psychology and environmental psychology with input from the other social sciences.

27186
Leisure and Sport in Social Context
Undergraduate
6cp; prerequisites: 27126 Leisure in Australia (BA in Leisure Studies); 27183 Introduction to Human Movement Studies (BA in Human Movement Studies)
Students will examine the meaning of leisure and human movement in a social context through an introduction to the literature of sociology and sociological analysis. They will be required to apply these specifically to the phenomena of human movement and leisure and thus develop critical understandings of the roles of leisure and human movement in society with specific reference to Australian society.

27187
Leisure Concepts
Undergraduate
6cp
Introduces the concept of ‘leisure’ as freedom and control from various disciplinary frameworks and perspectives. Gives students a broader and deeper understanding of the concepts of leisure and the ability to recognise and articulate the frameworks and perspectives that inform these concepts.

27188
Youth and Leisure
Undergraduate
6cp; prerequisite: 27326 Leisure and Diversity
Enables students to follow up the introductory material provided in 27326 Leisure and Diversity. Focuses primarily on young people from approximately the ages of 12 to 20 years, and covers theoretical, empirical, critical and applied perspectives on youth and leisure, including theories of youth/adolescent development; research on youth and leisure; youth subcultures; the commercial sector and youth leisure - marketing and provision; and policies for youth leisure provision and education for leisure.

27189
Workplace Learning 1
Undergraduate
6cp
Provides students with practical experience through which they can further develop their professional and personal skills. Professional practice experiences help to prepare students for a career position when they complete of their course of study. Gives students the opportunity to connect theory with practice and critically analyse the outcomes.

27190
Workplace Learning 2
Undergraduate
6cp; prerequisite: 27189 Workplace Learning 1
Provides practical opportunities through which students can further develop professional and personal skills in the leisure and human movement field. Through a 180-hour placement, students will be able to apply and test the various theories and concepts learnt during their course of study in a practical setting. Project management, report writing and presentations are the major assessment components. Career planning and job application skills are an additional element of this subject.

27216
Leisure Services Management
Undergraduate
6cp
Provides an understanding of the management issues emanating from the special nature of service industries; examines the role and importance of leisure services in a contemporary society, and the economic implications arising therefrom; and explores the different perspectives on the quality of service operations and their respective applications to leisure services.

27221
Principles and Practices of Sports Coaching
Undergraduate
6cp; prerequisites: 27173 Efficiency of Human Movement 1; 27223 Mechanics of Human Motion; 27160 Sport and Exercise Behaviour; 27331 Motor Learning and Control
Analyses the coaching process in sport. Focuses on leadership strategies, coaching responsibilities, skill development strategies, utilising psychological and biomechanical
processes in sports coaching and principles of training for performance enhancement.

27222
Exercise Prescription
Undergraduate
6cp; prerequisite: 27173 Efficiency of Human Movement 1
Examines principles related to the prescription of exercise to non-risk individuals. Considers exercise adherence, program development and evaluation, and special populations.

27223
Mechanics of Human Motion
Undergraduate
6cp
Enables students to develop an understanding of the fundamental concepts of mechanics applicable to the study of human motion, with implications for equipment design, injury prevention and performance optimisation.

27249
Performance Studies 2
Undergraduate
4cp; prerequisite: 27149 Performance Studies 1
Provides students with the knowledge and skills necessary to understand the effects of human growth and development on performance in physical activity. It will provide students with the knowledge and skills necessary to understand the development of human physical capacities, strength, power, flexibility and cardiorespiratory fitness. Competence in a range of exercise, sport and gymnastics activities is required.

27252
The Sport Industry
Undergraduate
6cp
As the Australian sport industry becomes more complex, the number of agencies involved in the delivery of sport products and services multiplies. Examines individual agencies to determine their respective input into the sport environment and explores the relationships and interconnectedness between such groups. Assesses and analyses the impact of business, technology and the various arms of government on both mass and elite sport to provide a coordinated perspective of the sport industry.

27253
Sport in the Global Marketplace
Undergraduate
6cp
Examines similarities and differences in the production and consumption of sport in the international environment. Provides students with a critical understanding and the essential skills necessary for leaders of sport and leisure industries to prosper in a rapidly emerging global marketplace.

27306
Marketing of Leisure Services
Undergraduate
6cp; prerequisite: 24105 Marketing Principles
Develops a comprehensive awareness of marketing in the leisure environment. Gives students the opportunity to develop applied skills in the construction of a marketing plan and the management of the marketing mix in the leisure industry.

27307
Sport Management
Undergraduate
6cp; prerequisite: 21130 Management and Organisations
Examines the scope and role of sport in contemporary Western societies with particular reference to Australia. Seeks to understand and account for policy development and implementation across the commercial, public and voluntary sectors. Addresses a number of professional issues surrounding contemporary trends in Australian sport.

27311
Sociology of Sport and Leisure
Undergraduate
6cp; prerequisite: 27187 Leisure Concepts
Exposes students to the specialised sociological literature on sport and leisure to encourage disciplined critical and creative thinking about these phenomena. Students engage with various perspectives in sociology — conflict, symbolic interaction, figurational, formal etc. — with a view to developing clear and insightful analyses of sport and leisure.
27313
Human Ecology
Undergraduate
6cp
Examines the interrelated nature of the social, political and natural environments in which we live. Discusses the implications for humanity of major disruptions to the global ecosystem and current responses to these world-wide problems. Analyses the above with a view to developing opportunities for personal action.

27315
Leisure Facility Design
Undergraduate
6cp
Seeks to provide students with an understanding of the design and physical planning processes involved in developing leisure facilities; an overview of typical operating procedures associated with the management of leisure complexes and the reasons why these should be considered in the design process; and a familiarity with a range of evaluation models that have been developed to gauge the effectiveness of leisure facilities.

27316
Leisure and Fitness Centre Operations
Undergraduate
6cp
Provides students with a basic understanding of the operational requirements, issues and evaluation methods involved in leisure and fitness centre management. Of interest to those students aiming to pursue careers in sports administration and commercial leisure services.

27321
Leisure Management Project 1
Undergraduate
6cp; prerequisite: 27323 Leisure and Public Policy; corequisites: 27526 Leisure Theory; 27523 Leisure and Tourism Planning
Together with Leisure Management Project 2, this subject is the culmination of the theoretical and professional studies stream of the BA in Leisure Management. Upon conclusion, students will be able to identify, articulate, and debate professional issues which they will confront in their future careers. Students will combine academic and management skills into consultative expertise.

27322
Leisure Management Project 2
Undergraduate
6cp; prerequisite: 27321 Leisure Management Project 1
Together with Leisure Management Project 1, this subject is the culmination of the theoretical and professional studies stream of the BA in Leisure Management. Upon conclusion, students will be able to identify, articulate, and debate professional issues which they will confront in their future careers. Students will combine academic and management skills into consultative expertise.

27323
Leisure and Public Policy
Undergraduate
6cp
Examines the rationale for government involvement in leisure, tourism, sport, the environment and the arts. Examines political ideology, power processes in the community and methods of policy analysis, including performance indicators, cost-benefit, economic impact analysis and performance appraisal.

27324
Strategic Management in Tourism
Undergraduate
8cp; prerequisites: 27648 The Tourism Industry; 21130 Management and Organisations or its equivalent
Assesses the applicability of generic management theories and concepts to various tourism industry settings. Examines the functions and levels of management in tourism industry organisations through the use of case studies. Develops in students an ability to formulate strategic plans and management strategies, particularly with respect to the provision of a given level of service quality.

27326
Leisure and Diversity
Undergraduate
6cp; prerequisite: 27126 Leisure in Australia
Examines the philosophical and theoretical issues related to 'specific populations'. Traces the historical evolution of treatment of specific populations and discusses contemporary practice. Selected specific populations (e.g. people with physical disabilities, youth at risk) are covered in detail with the focus of study.
on leisure lifestyle and opportunities. Students will have direct contact with specific populations through field visits.

27327
Tourism’s Environmental Interactions
Undergraduate
6cp
Examines the breadth and significance of tourism’s interactions with its economic, physical, social, cultural, political and legal environments; the implications of these interactions for the development and management of tourism; contemporary environmental issues which affect tourism in Australia; and the application of basic economic and environmental evaluation techniques to tourism-related problems.

27331
Motor Learning and Control
Undergraduate
6cp; prerequisite: 27181 Human Motor Development
Examines the processes underlying skilled motor performance, how skilled performances are learnt, and how to apply the principles of skilled performance and learning in instructional settings in human movement.

27349
Performance Studies 3
Undergraduate
4cp; prerequisites: 27149 Performance Studies 1; 27249 Performance Studies 2
Provides students with the knowledge and skills necessary to understand biomechanical, physiological and behavioural analysis procedures in dance and sport. Competence in various dance, swimming, track and field and team sport activities will be required.

27449
Performance Studies 4
Undergraduate
4cp; prerequisites: 27149 Performance Studies 1; 27249 Performance Studies 2; corequisite: 27349 Performance Studies 3
Provides students with the knowledge and skills necessary to understand biomechanical, physiological and behavioural analysis procedures in high-performance sport. Examines exercise prescription and sport participation for special populations (e.g. cerebral palsy, amputees, visually impaired, developmentally disabled). Competence in various sport activities will be required.

27501
Tourism, Recreation and Protected Areas 1
Undergraduate
6cp; prerequisite: 27126 Leisure in Australia
Covers the history and organisation of the provision of park systems in Australia and overseas; the principles and procedures of park planning, including the roles of public involvement and design; and the ability to apply the Recreation Opportunity Spectrum (ROS) in the development of a park plan of management. Students will acquire a basic understanding of the relationships between demand, supply and management in the provision of outdoor recreation opportunities; and be familiar with a number of case studies dealing with selected park and recreation management issues in Australia.

27523
Leisure and Tourism Planning
Undergraduate
6cp; prerequisite: 27323 Leisure and Public Policy (for Leisure and Tourism students only)
Examines the various forms of planning interventions as they apply to leisure and tourism, specifically State environmental planning legislation and practice, relating to development control and environmental impact assessment; selected planning techniques, strategies and principles; and the evaluation of planning proposals, reports and practices.

27526
Leisure Theory
Undergraduate
6cp; prerequisites: 27186 Leisure and Sport in Social Context; 27187 Leisure Concepts
Familiarises students with a cross-section of the literature which informs different aspects of leisure theory. The literature addressed will draw from sociology, psychology, history, philosophy and leisure studies. Familiarises students with contemporary debates and issues in leisure theory, and with the relevance of the leisure theories and theorists to contemporary leisure services and provision.
27601
Tourism, Recreation and Protected Areas 2
Undergraduate
6cp; prerequisite: 27501 Tourism, Recreation and Protected Areas 1
Covers various systems of natural area protection in Australia and internationally, the advantages and limitations of these, and the role of recreation in natural area management. Discusses the application of systems for recreation planning in the natural environment. Undertakes an analysis of critical case studies dealing with selected issues in the recreation management of natural areas in Australia and overseas.

27608
Prevention and Care of Athletic Injuries
Undergraduate
6cp; prerequisite: 27171 Applied Kinesiology
Examines the recognition, treatment and prevention of injuries related to sport and physical activity. Emphasis is placed on immediate recognition and on-site treatment of athletic injuries and the role of the human movement specialist in rehabilitation and prevention of athletic injuries.

27620
Leisure Studies Special Project
Undergraduate
6cp; prerequisites: 27156 Research Methods 1; 27157 Research Methods 2; and approval of the Course Director
Provides students with the opportunity to develop specific project-based vocational or theoretical knowledge in an area of personal interest. Open to students who have attained a credit average or above and who have demonstrated a capacity to engage in self-directed work.

27628
Law for Leisure, Sport and Tourism
Undergraduate
6cp; prerequisites: 27126 Leisure in Australia; 27648 The Tourism Industry; 27183 Introduction to Human Movement Studies (for Leisure and Tourism students only)
Introduces students to legal principles and laws as they relate to leisure, sport and tourism activity and its management. Covers law as it affects the leisure participant, the tourist and the sportsperson, the leisure professional, the tourism manager and the sports administrator.
27645
Tourism Project Development
Undergraduate
6cp; prerequisite: 27523 Leisure and Tourism Planning
Examines the environment and conditions under which the development of specific tourist facilities takes place, especially within Australia; the motivations and behaviour of developers of tourism properties, particularly as embodied in the development process; the interactions and interrelationships between tourism developers and other significant participants in the development process, including financiers, investors, facility managers, and planners; and the nature and functions of development feasibility studies and the appreciation of basic associated techniques. Develops an ability to critically evaluate tourism development proposals and their associated feasibility studies.

27646
Tourist Attractions Management
Undergraduate
6cp; prerequisite: 27184 Introduction to Tourism Systems or 27648 The Tourism Industry
Examines the distinctive aspects of tourist attraction management and marketing. Examines a range of selected case studies, which in the past have included Gledswood Homestead, Manly Aquarium and the Australian Museum. Reviews the relationship between tourist attractions and inbound tour operators, coach tour operators, and local, regional and State tourist organisations. Involves a number of field visits. The course is of interest to students seeking to develop knowledge and skills relevant to the pursuit of careers in the tourist attraction area, or in tourism industry sectors which interact closely with tourist attractions.

27647
Transportation in Tourism
Undergraduate
6cp; prerequisite: 27648 The Tourism Industry
Introduces students to management within the context of the carrier sector. Deals with the environmental (particularly regulatory) context in which carriers operate; general principles of transportation and transport economics; strategic planning; marketing and service delivery issues; the employment of quantitative techniques in the carrier sector; and collaborative linkages between the carrier sector and other sectors of the tourism industry.

27648
The Tourism Industry
Undergraduate
6cp
Introduces students to the study of the tourism industry. Identifies and systematically analyses the various sectors of the industry in terms of their functional, structural, operational and interrelational attributes. Examines the nature of the interrelationships between the tourism industry and the significant environments with which it interacts. Provides students with an understanding of the specific context within which intra-industry management, and public sector policy aimed at the overall management of tourism, are practised.

27649
Ecotourism
Undergraduate
6cp
Provides students with an awareness of the philosophical and ideological bases that have led to the concept of ecotourism; an appreciation of the interrelated nature of the socio-cultural, political, economic and natural environments in which ecotourism operates; an awareness of the implications ecotourism has for ecosystems; an understanding of cultural biodiversity and the effect it has on people's individual lifestyles; and an ability to understand the costs and benefits of ecotourism to society.

27653
Travel and Tourism Operations 2
Undergraduate
6cp; corequisite: 27643 Travel and Tourism Operations 1
Introduces students to management within the context of the tour wholesaler and inbound tour operator sub-sectors of the tourism industry. Describes the characteristics of both the tour wholesaler and inbound tour operator sub-sectors; identifies key resources employed in the operation of tour wholesalers and inbound tour operators; develops operational level skills associated with running both an inbound tour operator and tour wholesaler business; discusses interrelationships that exist between inbound tour operators and tour wholesalers and other sectors of the tourism industry.
27654
Hospitality Operations 2
Undergraduate
6cp; corequisite: 27644 Hospitality Operations 1
Provides students with skills and knowledge relevant to operational level positions in accommodation establishments. Deals with procedures associated with the operation and management of the front office section of an accommodation establishment; operational level tasks associated with the housekeeping department of an accommodation establishment; procedures associated with cash control, budgeting and costing; and legal and regulatory influences on the hospitality sector.

27690
Honours Thesis
Undergraduate
30cp; prerequisite: admission to Honours program; corequisite: 27941 Advanced Research Methods for Leisure and Tourism
The Honours Thesis requires the student to produce a 20,000-word thesis based on an original problem of a theoretical or applied nature. The thesis is expected to demonstrate the student’s competency to conceptualise, conduct and present research in a scholarly and independent manner.

27700
Tourism’s Environments
Postgraduate
6cp
Provides students with an awareness of significant contemporary issues arising from tourism’s impacts on its economic, physical, social and cultural environments, and appropriate policy, planning and management responses to these issues. These issues form a significant part of the context in which modern tourism as a whole and specific firms within it operate.

27701
Leisure Industry
Postgraduate
6cp
Examines the history of organised leisure provision in Australia by the public, private and voluntary sectors; explains the efforts of these three sectors to cater to, as well as shape and control, the leisure behaviour of Australians; describes the ramifications of the provision of organised leisure in Australia and examines linkages with other aspects of public, private and voluntary activities; and analyses the response of contemporary leisure organisations to the economic, political, social and cultural environment in Australia.

27702
Applied Leisure Theory
Postgraduate
6cp
Familiarises students with a cross-section of the literature which explains different aspects of leisure theory. The literature addressed will draw from sociology, psychology, history, philosophy and leisure studies. Students will also become familiar with contemporary debates and issues in leisure theory, and with the relevance of the leisure theories and theorists examined to contemporary leisure services and provision.

27703
Events Management
Undergraduate
6cp; prerequisites: 27184 Introduction to Tourism Systems; 27648 The Tourism Industry
Provides students with the skills and knowledge necessary for management positions within the area of event-based tourism. Particular emphasis is placed on conferences, festivals and special events. Describes the broad characteristics of the events sub-sector of the tourism industry, and discusses the roles played by events in the development of tourist destination regions. Examines the broad functions performed by events from the perspective of communities, organisers, participants and attendees. Reviews the planning, marketing, organising and evaluation tasks associated with events.

27704
Economics of Leisure and Tourism
Postgraduate
6cp
Provides an introduction to the language, concepts, basic principles and analytical techniques of economics and their application to leisure and tourism, including the structure and characteristics of leisure and tourism markets. Explores ways in which economics can be applied to various sectors of, and issues in, leisure and tourism. Also examines the role of the state as leisure and tourism provider and regulator; the means of assessing the value and viability of leisure and tourism investments in
the public and private sectors; and the means of determining the economic impact of leisure and tourism activities.

27705
Tourism Systems
Postgraduate
6cp
Provides students with knowledge and understanding of the specific and general contexts within which management in, and management of tourism are practised. Systematically analyses the essential elements of tourism in terms of their functional, structural, operational, and interrelational attributes. Examines the nature of the interrelationships between tourism and the significant environments with which it interacts.

27706
Tourism Strategy and Operations
Postgraduate
6cp; prerequisites: 27705 Tourism Systems; 27708 The Travel and Tourism Industry
Enables students to demonstrate a knowledge and understanding of management as a social process; the ability to analyse management theories and empirical studies and assess their applicability to various tourism industry settings and management structures; a knowledge of the functions and levels of management in tourism industry organisations; the ability to formulate management strategies and perform management functions appropriate to sectors of the travel and tourism industry; and, a knowledge and understanding of the necessary ethics and responsibilities of tourism managers in relation to external environments and publics.

27707
Applied Research Methods
Postgraduate
6cp
Covers social science research methods: project design; literature review; secondary data; observation; qualitative methods; in-depth interviewing; participant observation; and questionnaire design, sampling and survey analysis (using SPSS computer package). Assessment involves individual assignments and a group project involving three or four students and consisting of a ‘live’ research project, usually for a client, in an area of the students’ interest.

27708
The Travel and Tourism Industry
Postgraduate
6cp
Introduces students to the study of the tourism industry. Identifies and systematically analyses the various sectors of the industry in terms of their functional, structural, operational, and interrelational attributes. Also examines the nature of the interrelationships between the tourism industry and the significant environments with which it interacts. Provides students with an understanding of the specific context within which intra-industry management, and public sector policy aimed at the overall management of tourism, are practised.

27710
Popular Culture
Postgraduate
6cp
Familiarises students with the historical idea of popular culture as collective social formation and the contemporary idea of popular culture as mass culture. Students will learn techniques and theories of cultural analysis and will inquire into the relationship between cultural production, popular culture and leisure. The literature on popular culture guides the subject through an analysis of historical material, mass culture, magazines, comics, music, television, sport and tourism.

27711
Leisure and Tourism Planning
Postgraduate
6cp
Covers the principles and practices of environmental planning as they relate to leisure and tourism; the nature and components of planning problems (environmental, economic, social, legal, and political) and related data requirements; aspects of state environmental planning legislation and associated instruments that govern leisure and tourism planning including those which relate to development control, particularly in NSW; and critical assessment and evaluation of the outcomes of planning and design policies, decisions and practices.
27713
Leisure Management
Postgraduate
6cp; prerequisites: 27702 Applied Leisure Theory; 27701 Leisure Industry
Analyses management theories in the context of the leisure industries in the public, non-profit and voluntary sectors. Legal implications and strategies are considered in leisure industry practices with the focus on case analysis. Considers leisure management in its wider social and political context.

27714
Tourist Attractions Management
Postgraduate
6cp; prerequisite: 27705 Tourism Systems or 27708 The Travel and Tourism Industry
Examines the distinctive aspects of tourist attraction management and marketing. Examines a range of selected case studies, which in the past have included, Gledswood Homestead, Manly Aquarium, and the Australian Museum. Reviews the relationship between tourist attractions and inbound tour operators, coach tour operators, and local, regional and state tourist organisations. It should be noted that this subject involves a number of field visits.
Students seeking to develop knowledge and skills relevant to the pursuit of careers in the tourist attraction area, or in tourism industry sectors which interact closely with tourist attractions, will find this subject of interest.

27715
Sport Management
Postgraduate
6cp
Explores basic management concepts as they relate to the sports environment. Examines context, structures and processes through the major themes of: background to sport administration; theories of management; strategic planning; human resource issues; and management skills and processes.

27716
Sport Marketing
Postgraduate
6cp
Examines the nature of market relations and marketing processes for sport. Focuses on the development of professional skills relevant to marketing strategies in sports management. Covers sport marketing: coordinated activities, product, price, place and promotional of sport; meeting client needs: products, programs and services in sport; selling and marketing orientations in various market sectors; market research, criteria for effective market segmentation; promotional tools – advertising, publicity, incentives; special event marketing in sport. Corporate sponsorship, fundraising, sales and public relations are also covered.

27717
Event and Facility Management
Postgraduate
6cp; prerequisite: 27715 Sport Management
Analyses the procedures necessary for the efficient management of events and facilities in the sport context. Considers planning and operational strategies, financing, supervision and evaluation, concept development and organisational structures.

27718
Sport and the Law
Postgraduate
6cp; prerequisite: 27715 Sport Management
Introduces students to legal principles and law as they relate to sport activity and its management. Considers the sportsperson and the sports manager in terms of the possible risks, duties and responsibilities within the legal system. Examines contracts, incorporation, directors' liabilities, negligence and risk management, antidiscrimination, consumer protection, and business organisation, in their relevance to sports management.

27719
Master's Study Unit
Postgraduate
6cp
Available for those students who wish to pursue a particular topic of special interest which is not covered by existing core subjects or electives. Can be pursued only with the agreement of the Course Director, who will advise on a suitable supervisor to be appointed by the Head of School, on the basis of an agreed program of work.
27720
Management Development Outdoors
Postgraduate
6cp
Students will undertake a program of experiential learning based in the outdoors to develop a range of management skills, particularly in the areas of leadership and team dynamics. The program consists of a variety of experiential tasks and challenges set in the outdoors which must be overcome through individual and team effort. Most of these problems will place participants in situations which involve certain amounts of perceived stress, uncertainty, ambiguity and risk. Facilitated discussion follows the activities.

27721
Sport Globalisation
Postgraduate
6cp
Examines the production, meaning, and consumption of sport and leisure activities across contrasting social, political, and economic systems. Develops a clear understanding of, and sensitivity to, the shared values, beliefs, attitudes, customs and traditions in potential foreign markets which are fundamental to success in the international sport industry.

27751
Accounting, Finance and Management
Postgraduate
6cp
Develops skills in recording and processing accounting information and generating accounting reports; analysing accounting reports; and evaluating investment opportunities and means of financing. Develops an appreciation of the elements of cost and management accounting. Topics include an introduction to accounting, finance and management; sources of business information; the accounting cycle; computer-based accounting systems; accounting for inventory, receivable and fixed assets; sources and applications of funds; analysis of financial statements; investment evaluation and computer-assisted techniques; management accounting – cost-volume-profit analysis; product costing systems; and budgeting.

27752
Marketing for the Arts
Postgraduate
6cp
Provides an understanding of the role of marketing in contemporary society and an understanding of the basic concepts in marketing management. Enables students to identify the particular characteristics and skills necessary for successful arts marketing, and to be familiar with market/audience research techniques in the arts.

27753
The Arts Environment in Australia
Postgraduate
6cp
The central premise of this subject is that art is a social product. This challenges romantic and mystical notions that represent art as ‘above’ society, as transcending social and historical forces. In arguing against these idealist notions this subject explores how social, political and economic factors distinguish art from a wide range of regulated cultural practices. The specific focus is on the structures of arts organisations and policy in Australia. Particular issues considered include the politics and history of public support for the arts, the formation of audiences and publics, the economic impact of the arts, the interaction of the public and private sectors and theories of culture and art.

27754
Arts Management Research Project
Postgraduate
6cp; prerequisites: at least three of the Graduate Diploma in Arts Management core subjects
Provides students with the opportunity to undertake a substantial applied research project through which they may develop and test their project design and managerial skills; encourages students to consolidate and reflect on knowledge gathered in the course and bring this to bear on a contemporary arts issue; enables students to test their capacity for self-direction and management; develops skills in writing and, if possible, publishing research in arts-related areas.
27755

Arts Organisations and Management
Postgraduate
6cp; prerequisite: 27753 The Arts Environment in Australia

Develops within students a critical appreciation of management practices and organisational forms in the arts and culture industries. Examines the impact of different modes of managing and creative problem solving. Creates an awareness of behavioural issues within arts organisations, including power, control, conflict, negotiation, decision making and strategic planning. Addresses a range of contemporary issues which impact upon managing within these organisations, including leadership, employment relations, cutback management, and corporatisation.

27756

Law and the Arts
Postgraduate
6cp

Considers the law as it impacts on: arts managers and their clients. Examines the legal responsibilities that may be found in day-to-day practice and considers the appropriate responses. Familiarises students with those laws that they can expect to encounter in their professional life. A mock trial is held on topical areas and on issues relevant to practice.

27757

Ecotourism Planning and Management
Postgraduate
6cp

Addresses the range of management and planning issues appropriate to the operation of ecotourism in Australian society. Provides students with an understanding of key aspects of ecotourism project and operations. Explores principles and practices for commercial and public agencies that work but still include the underlying principles and ethics of ecotourism. Examines the management skills that are needed to establish a successful ecotourism project or operation. Considers issues such as ethical marketing and community relationships. Explores the context for management, planning and operation in this area such as conservation, protected area management and organisational relationships in the tourism industry.

27758

Cultural Politics: The Arts and the City
Postgraduate
6cp

Cultural policy makers have become increasingly concerned with notions of place and local identity, and are introducing strategies designed to create a sense of place and belonging, involving the work of artists, architects, planners and local communities. By focusing on the city, this subject considers the symbolic and material past, present and future of place as it has been interpreted through the arts, architecture, story-telling and popular culture and recent developments in cultural and urban policy designed explicitly to constitute and affirm local cultural identities. Using the explanatory and methodological insights of cultural studies, this subject will give students an understanding of the negotiated nature of art and place and the complex relationships which exist between its production, consumption and representation. This knowledge will be enhanced through the study of selected case studies where students will be called upon to connect theory and practice by evaluating the contribution these spaces make to the arts and to the cultural 'life' of the city.

27759

Accounting and Finance for the Arts
Postgraduate
6cp

Gives students a basic appreciation of the role of financial management in arts administration. Some cultural bodies have difficulty delivering services to the community simply because their management is ill-equipped to balance artistic outputs within available financial resources. Lectures and workshops cover basic financial analysis and reporting, compiling charts of accounts, using personal computers to solve everyday problems and working with boards, committees and funding authorities.

27760

Leisure Management Seminar
Postgraduate
6cp

This subject is relevant to students who wish to pursue a thesis or research into specialist areas of the field of leisure studies. The subject can be used by students to shape and inform
their research proposals. The specific focus of the seminar – sociology, policy, theory etc. – will vary according to student demand.

27761
Tourism Management Seminar
*Postgraduate*
*6cp*
Allows students to pursue a detailed study of the facets of tourism in which they have a particular interest. Involves the supervised, independent development of a program of reading and analysis and preparation of a report. Furthers students’ understanding of one or more elements of the tourism system.

27762
Sport Management Seminar
*Postgraduate*
*6cp*
Examines current research in selected fields of the sport and exercise sciences and/or sport management. Considers topical research concerns, methodologies, instrumentation and related issues in the biomechanical, psychological, sociological and motor learning and control aspects of the sport and exercise sciences and/or in the area of sport management. The syllabus is organised around the interests of the students enrolled.

27763
Arts and Cultural Policy Seminar
*Postgraduate*
*6cp*
Explores theoretical and conceptual frameworks within which to discuss and critically evaluate current and ongoing issues within the arts industry. Enables students to pursue their own research interests, which should be related to ongoing professional arts involvement, and supported through regular seminar participation. The field of cultural studies forms the basis of the subject’s critical focus. Draws broadly upon sociology, social anthropology, political economy and post-structural theories with regard to art theory, and cultural formations. Encourages students to investigate a cultural object or form in relation to its audience. Content and format varies from year to year, depending on student interest.

27764
Analysis of the Olympic Games
*Postgraduate*
*6cp*
Provides students with knowledge and understanding of the Olympic Games phenomenon in general and its impact on host cities and countries. Covers the history of the ancient Olympics; the origins and development of the modern Olympic Games; political dimensions, including examination of the Olympic Games under fascist, communist, and capitalist regimes; boycotts, terrorism and international politics; cultural, sociological and media aspects of the Games; the idea of the ‘Olympism’ – its origins, construction and cultural significance; social impacts of the Games in host communities; financing of the Olympic Games and their economic impact; the Games as a tourism phenomenon; political, social and economic analysis of hallmark events (festivals and major sporting events) in general; and issues facing the Olympic Games, such as drugs, discrimination and commercialisation.

27765
Tourist Event Management
*Postgraduate*
*6cp; prerequisite: 27705 Tourism Systems*
Events play a significant role in the development of tourist-destination regions, acting as, amongst other things, tourist attractions and catalysts for infrastructure development. This subject examines these roles and then addresses: the marketing, management and evaluation of meetings, festivals and other special events; the functions performed by events from the perspective of organisers and participants; the costs and benefits of events from a community viewpoint. Allows students to develop specific skills and knowledge in order to take up positions in this rapidly expanding sector of the travel and tourism industry. Individuals seeking employment in meetings and events management firms, federal, State, and local tourism organisations, with inbound tour operators, and in the accommodation sector, will find this subject of particular interest.

27766
Managing Transportation for Tourism
*Postgraduate*
*6cp; prerequisite: 27708 The Travel and Tourism Industry*
Examines the role of transportation in the tourism industry. Introduces the student to
analytical techniques, environmental and regulatory forces and the unique characteristics of service delivery in tourism transportation. Focuses on strategic implications for tourism transportation firms.

27767
Tourist Behaviour
Postgraduate
6cp; prerequisite: 27707 Applied Research Methods or demonstrated research capabilities
Examines the conceptual and methodological approaches to the study of tourist behaviour. Based on contributions from social psychology and environmental psychology with input from the other social sciences. Relates the tourist to the environments in which he or she operates. Application of the knowledge to the management of tourism is central to the subject.

27768
Arts Audience Research Methods
Postgraduate
6cp
Examines the methods, results and uses of empirical research on actual and potential arts audiences. Addresses the role of research in arts management and cultural policy, including policy studies, feasibility studies, market demand studies, and program evaluation. Develops practical skills in report writing, the use of the literature, secondary data analysis, observation, qualitative methods, and questionnaire surveys, including the use of the SPSS computer package for survey analysis.

27769
Professional Practice for Graduates
Postgraduate
6cp; prerequisites: at least two Graduate Diploma core subjects
Designed for those students who have limited work experience in the leisure/tourism/arts/sports industries. Provides the opportunity, through a placement, to gain such experience and to relate it to theoretical and applied learning. For those students who are already working in a relevant industry, it provides the opportunity for the student to utilise that experience in a specific way, to reflect on the experience and to relate it to theoretical and applied learning. Based on evaluation of an existing or arranged period of work experience and an individual learning contract developed in association with a supervisor.

27770
Project Preparation
Postgraduate
6cp; prerequisite: 27707 Applied Research Methods or 27768 Arts Audience Research Methods
Covers the selection of a research topic; the process of conceptualising research problems and asking research questions; reviewing the literature; selecting the appropriate research method; devising a research strategy; and preparing a research proposal. In the latter half of the semester students work with an allocated supervisor to prepare their own research proposal to be executed in the 27946 Master’s Project or in the 27754 Arts Management Research Project. Assumes a basic knowledge of the range of qualitative and quantitative research methods used in leisure and tourism research and of a survey and statistical analysis package such as SPSS.

27771
Leisure and the Law
Postgraduate
6cp; corequisite: 27713 Leisure Management
Introduces students to legal principles and laws as they relate to leisure and its management. Covers law as it affects the leisure participant and leisure manager. Students will come to understand the way the law impinges on themselves as leisure professionals and on their clients – both the planners and entrepreneurs, and those ‘at leisure’ – the recreationists, the players and tourists.

27772
Natural Area Management
Postgraduate
6cp
Of particular interest to leisure management students. Topics include a review of natural area management systems, including historical development and present status; fundamental problems confronting management of recreation in natural areas – the use and preservation dilemma; alternative approaches for recreation management in natural areas, including public involvement, site management and visitor management; selected issues and case studies in natural areas, e.g. tourism in National Parks, conflicts between traditional users and recreational users and the need to integrate recreation with nature conservation.
27773
Guiding and Interpretation Management
*Postgraduate*
6cp
Develops students' skills as interpretative tourism guides and in understanding the management of this area of a company/agency. Focuses on the roles of leadership and small group communication to develop an understanding of the skills that are required of a guide and to manage this area. Explores interpretation and the forms it takes in areas such as heritage, museums and protected areas, to enable students to meet the needs and expectations of potential clients when operating or managing guiding. Presents environmental, outdoor and experiential education methods and techniques to develop skill in the areas of guiding and interpretation such as an understanding of ecological concepts, risk management and liability. An experiential learning approach based in a variety of settings, particularly the outdoors, will be used.

27787
Accounting Practices for Management
*Postgraduate*
6cp
Develops skills in the accounting recording process; introduces students to annual reports as a source of information; develops skills of analysis and interpretation of a corporation's financial position; introduces students to the goals of financial decision making, sources of finance and long-term investment decision making; examines the contemporary financial accounting and reporting environment and the accounting standards-setting process; examines the elements of cost and management accounting; and examines the elements of computer-based accounting systems.

27806
Tourism Management Project
*Postgraduate*
6cp; prerequisites: 27708 The Travel and Tourism Industry; 27707 Applied Research Methods
The aim of this subject is to bring to fruitful completion an applied management project which relates to a tourism industry opportunity or problem; demonstrate the ability to integrate the knowledge and skills acquired in the course and apply them to managerial decision making; demonstrate the ability to function effectively in a management team; and produce original work in an appropriate format which demonstrates abilities in the field of tourism management. The study will involve an actual tourism industry firm or organisation wherever possible.

27807
Tourism Marketing
*Postgraduate*
6cp; prerequisites: 27705 Tourism Systems; 27708 The Travel and Tourism Industry
Marketing is seen as a key function in tourism management, with a growing specialist literature. This subject provides basic grounding for tourism management students. Topics include: introduction to marketing; marketing systems and their elements; tourism environments; marketing practice; and case history analysis.

27808
Travel and Tourism Law
*Postgraduate*
6cp
Conveys basic knowledge and understanding of general legal principles and processes that affect business activities in Australia; and assists students to demonstrate knowledge and understanding of laws and regulations which have particular significance for the tourism industry, and recognise legal obligations in management contexts in the tourism industry. Topics include contracts, travel brochures, tour packages, international conventions, travel agents act, loss of enjoyment, risk management, incorporation, consumer protection, and trade practices.

27809
Leisure Studies Project
*Postgraduate*
6cp; prerequisite: 27707 Applied Research Methods
Provides students with the opportunity to undertake a substantial applied research project through which they may develop and test their project design, managerial and analytical skills.

27811
Cultural Tourism
*Postgraduate*
6cp; prerequisite: one core graduate subject
Explores the shifting meanings of culture in the history of tourism; and examines the idea of contemporary tourism as a culture industry i.e. an industry where cultural forms, processes, artefacts and spectacles are exchanged,
consumed or experienced in various ways. Explores the major traditions of analysis of cultural tourism: the sociological, anthropological and semiotic perspectives, specifically in terms of their value in making a critical evaluation of the cultural dimensions of tourism. Applies the major theoretical debates and concepts to a series of Australian case studies. Examines the possibilities for sustainable tourism, that is: regionally and culturally appropriate and non-exploitative tourism.

27915
Applied Studies A
Postgraduate
2cp; prerequisite: approval of Program Coordinator
Students complete a contract in advance with the Program Coordinator undertaking to complete a project requiring 50 hours of work (2cp) during the semester. The project work allows students to extend their knowledge of the field of leisure studies, apply general knowledge and skills to the field of leisure and recreation, and/or practise professional skills in a field setting.

27925
Applied Studies B
Postgraduate
4cp; prerequisite: approval of Program Coordinator
Students complete a contract in advance with the Program Coordinator undertaking to complete a project requiring 100 hours of work (4cp) during the semester. The project work allows students to extend their knowledge of the field of leisure studies, apply general knowledge and skills to the field of leisure and recreation, and/or practise professional skills in a field setting.

27935
Applied Studies C
Postgraduate
6cp; prerequisite: approval of Program Coordinator
Students complete a contract in advance with the Program Coordinator undertaking to complete a project requiring 150 hours of work (6cp) during the semester. The project work allows students to extend their knowledge of the field of leisure studies, apply general knowledge and skills to the field of leisure and recreation, and/or practise professional skills in a field setting.

27941
Advanced Research Methods for Leisure and Tourism
Postgraduate
6cp; prerequisite: 27707 Applied Research Methods
Assumes a basic knowledge of the range of qualitative and quantitative research methods used in leisure and tourism research and of a survey and statistical analysis package such as SPSS. Covers two areas: conceptual/theoretical/qualitative and quantitative. The first of these addresses the nature of social science research and its relationship to policy and the development of knowledge and the conceptualisation and design of research projects. The quantitative part involves the application of statistical methods and exploration of the more advanced capabilities of the SPSS package.

27943
Sociology of Leisure
Postgraduate
6cp; prerequisite: 27702 Applied Leisure Theory or 27753 The Arts Environment in Australia
For students who seek to pursue a thesis or do research in the sociology of leisure or cultural studies applied to leisure. Draws selectively from the sociology of leisure literature and identifies contemporary debates and developments. Focuses on one or two theorists in detail. Moves into the work of broader social theorists such as Simmel, Freud, Barthes, Foucault or Lyotard and examines the way in which their more general social theory can be used to understand aspects of leisure.

27944
Leisure Policy
Postgraduate
6cp; prerequisites: 27701 Leisure Industry; 27711 Leisure and Tourism Planning
This subject is based on an in-depth examination of policy analysis methods and their application to issues in leisure and tourism; theories of decision making; and political philosophies and their implications for leisure and tourism. A series of case studies in sport, the arts, tourism and outdoor recreation are examined.
27945
Leisure and Tourism Futures
Postgraduate
6cp
Examines forecasting techniques and their application to leisure and tourism and their use to examine alternative social, political and environmental futures and their implications for leisure and tourism. Examines influences on the future of leisure and tourism, including demographic change, national and international income growth, technological change, post-industrialism, leisure time, fashion/taste, environmental factors, political perspectives and the role of public and private sector leisure/tourism organisations.

27946
Master's Project
Postgraduate
6cp; prerequisites: 27707 Applied Research Methods; 27770 Project Preparation
It is expected that this Project will result in a project report approximately 10,000 words in length. The Project can be theoretical or applied in nature and could therefore be based entirely on reading of published material or it could involve collation and interpretation of secondary data or a limited collection of primary data. The Project is not expected to advance knowledge but is expected to demonstrate the student's familiarity with relevant theory, ideas and literature, and to present evidence of powers of reasoned exposition, logical structuring of arguments and scholarly presentation.

27947
MA Thesis
Postgraduate
36cp; prerequisites: 27941 Advanced Research Methods for Leisure and Tourism; plus one elective chosen from 27943 Sociology of Leisure or 27944 Leisure Policy, or an elective approved by the Course Coordinator
Students will be required to complete a thesis, which is considered to involve an amount of study equivalent to six 150-semester-hour taught subjects. It is expected that the length of the thesis will normally be in the range of 20,000–30,000 words. The thesis is expected to present original research of a theoretical or applied nature. It will not be expected to advance knowledge, as is required in the case of a PhD thesis, but it should give evidence of the student's ability to engage in a substantial investigation, identify and analyse research problems, and present the results in a coherent and scholarly manner.

28701
Business and the Changing Environment
Postgraduate
6cp; for MBA (Mandarin International) students only
An introductory subject for students who have not undertaken previous business studies and which should be undertaken in the first semester. Examines current and potential environmental changes which can influence the conduct of business, particularly in the Asia-Pacific region. Specifically addresses the major currents of change which are likely to affect the way businesses are managed in the future; business strategies for coping with these changes; the need for multidisciplinary skills in problem solving; and for the creation of new possibilities and alternatives in business. The subject is presented over five full days, split into two modules of three and two days each. The first module is conducted before the commencement date of formal lectures in each semester.

28790
Business Consultative Project
Postgraduate
6cp; prerequisites: all core subjects of the MBA program
Provides the opportunity for in-depth, hands-on application of the MBA curriculum. Student groups acting as management consultants choose a project within a business unit, review its activities, diagnose problems and make recommendations. These studies may focus on functionally oriented projects such as financial analysis; specific industries such as biotechnology; or assignments such as entrepreneurship centred on small and medium enterprise (SME) clusters.
Subjects Offered by Other Faculties

013205
Adult Communication Management and Teamwork
Postgraduate
6cp
Uses the adult communication management perspective to examine applied theory and research on developing a contemporary organisation team. In particular, investigates team leadership and strategies for building and maintaining best performing teams.

013206
Adult Communicational Management and Organisational Frames
Postgraduate
6cp
Uses the adult communication management perspective to examine the applicability of a select number of organisational frames for mapping and transforming the culture of human systems. In particular, investigates the variables influencing the successful implementation of specific frames for organisational design and analysis.

013332
Understanding Adult Education and Training
Postgraduate
6cp
Assists adult educators to think more clearly about their work and to act on it more effectively. Begins with an exploration of students' practical theories and conceptual frameworks. Students are then introduced to a variety of theories relating to the core activities of teaching, group work, learning facilitation, program design and evaluation, policy formation and implementation. Examines debates related to such significant contemporary issues as the relationship of adult education and workplace change, and the mass media as a force for propaganda or education. Enables students to make the transition to postgraduate study by providing them with opportunities to write in both experiential and scholarly ways.

013333
Adult Learning and Program Development
Postgraduate
6cp
Allows students to explore the skills needed to become competent in designing and facilitating adult learning experiences and to become familiar with significant literature in this area. Provides an introduction to the areas of adult learning and program development for students with no previous academic experience in these areas.

013337
Managing Change in Adult Education and Training
Postgraduate
6cp
This subject will enable teachers, trainers and managers in a range of educational contexts to manage the change process in education more efficiently and effectively. Practice-based research on effective management of program change and on how best to develop a workplace supportive of continuous improvement and innovation will be outlined, illustrated and tested. The attributes of effective change leaders will be discussed and the implications for students identified. The subject addresses the urgent need to enhance educators' capability to manage the relentless demands for change now faced by all educational institutions and groups across Australia.

013339
Skills, Technology and Workplace Learning
Postgraduate
6cp
This subject examines a number of issues relating to the links between skill formation and changing workplace technologies. Specific focuses include changing skill requirements, the social dimension of skill, factors that influence choices about technology and ways in which technology is used to control us to facilitate learning.

013343
Adult Communication Management 1
Postgraduate
6cp
Develops participants' ability to apply the adult communication management conceptual framework to professional practice. Particular attention is given to core abilities: language,
non-verbal communication, listening, assertiveness and inter-cultural communication competence.

013344
Adult Communication Management 2
Postgraduate
6cp; prerequisite: 013343 Adult Communication Management 1
Uses the adult communication management perspective to examine applied theory and research on management practices and organisational development strategies. In particular, investigates the various roles of the communication manager in learning organisations and systems.

013363
Supporting Workplace Learning and Reform
Postgraduate
6cp
This subject examines the process by which an enterprise becomes more like a learning organisation against a backdrop of the current industry and enterprise reform agenda. It introduces a number of conceptual shifts that need to occur in areas like work organisation, employee relations and training in order to move in the direction of a learning organisation.

013367
Cultural Diversity in the Workplace: Management and Learning
Postgraduate
6cp
Cultural diversity is a critical issue in the contemporary workplace. This is in part due to the rapid pace of globalisation and the increasing local demographic diversity as a result of immigration and a more fluid international labour market. At the same time the restructuring of work puts a greater emphasis on culture as a management concept. This subject examines the consequences of these changes for workplace learning whether located in educational institutions or in the workplace.

015002
Adult Teaching and Learning
Undergraduate
6cp
Introduces participants to the major schools of teaching and learning theory that inform the practice of adult education in its major forms in Australia. Examines a number of key practitioners and theorists who have contributed to, or are identified with, the various schools.

015003
Portfolio Development
Undergraduate
6cp
This subject is designed to provide participants with the knowledge and skills to identify, document and present their prior and current learning in a portfolio. This subject while providing participants with a tangible record of their personal learning achievements also models the process of portfolio development that is now a common feature of monitoring and recording workplace learning in organisational contexts.

015004
Communication and Learning
Undergraduate
6cp
Develops knowledge and skills in interpersonal communication for adult educators who work effectively in face-to-face situations as teachers of adults, coordinators of teachers or managers of adult education organisations. Extends participants' understanding of the relationship between culture, context and language by exploring contemporary perspectives on the nature of human communication and by applying selected communication strategies to enhance teaching and learning.

015006
Program Development and Needs Analysis
Undergraduate
6cp
Provides participants with the knowledge and skills to conduct needs analysis and develop and implement adult education and training programs in the context of the contemporary education and training environment and to critically evaluate these processes within the context of teaching and learning.

015007
Adult Learning in Social Context
Undergraduate
6cp
This core subject aims to assist the educator of adults to understand how adult learning is shaped by social context, and to understand
and respond appropriately to social influences on their professional practice. Context is examined at different levels of the group, the organisation, community and society, introducing the participant to a range of social theories and perspectives.

015009
Analyzing Current Issues in Australian Education
Undergraduate
6cp
This subject examines key issues that impact on adult learning in the contemporary Australian context. It is designed to give an overview of the relationship of these issues to developments in the wider Australian society. Participants will critically analyse these issues in terms of current educational and economic policies and their impact on educational practices and contemporary debates.

015011
Research and Inquiry
Undergraduate
6cp
The subject will offer a range of perspectives on research from the contexts of adult and workplace education. It will deal with a range of different types of research (formal, policy-related and informal) and illustrate different research paradigms and perspectives. It will also form one pathway to a research-based Honours year. The subject will extend the participant’s ability to evaluate current research and to reflect critically upon their practice by developing their understanding of research and inquiry processes.

015018
Workplace Practicum
Undergraduate
6cp
Draws on theoretical principles and practical skills considered in other subjects to further develop practical human resource development (HRD) skills. A major component of this subject is the requirement for students to successfully complete an observed practicum conducted in their workplace working with a group of trainees/staff members. Students will develop skills in reflecting on and critically analysing aspects of their own practice and will enhance their own skills in and understandings of the nature of effective HRD practice.

015021
Adult Educational Practices 1
Undergraduate
6cp
Draws on the theoretical principles explored in core subjects to develop the practical teaching and facilitation skills of participants in their roles as community educators.

015022
Human Resource Development Practices
Undergraduate
6cp
Extends the students’ understanding of the theoretical principles which underlie human resource development practice. Allows participants to apply their insights gained in this area and develop their practical training, development and facilitation skills. The relationship of teaching to learning will be explored in the context of participants’ concurrent role in the workplace as teachers and learners.

015033
Program Planning in Community Settings
Undergraduate
6cp
This subject introduces students working in community settings to the practice of planning strategies and programs to help people learn. Students will study various methods for identifying education needs in community settings and a wide range of possible teaching and learning strategies. Emphasis will be placed on helping students make informed decisions about choosing an appropriate combination of needs-analysis techniques and teaching and learning strategies. This subject has a focus on practice and is a stepping stone to the more theoretical core subject Program Development.

015034
Program Delivery and Evaluation
Undergraduate
6cp
Provides the opportunity for students to examine and apply models of program delivery to their own workplace. Through workplace activities and negotiated learning tasks, students will develop competence in implementing, managing and evaluating training programs.
015054
Organisational Learning: an Experiential Approach
Undergraduate
6cp
The capstone subject provides an interactive learning environment, using a structured simulation to represent a hypothetical organisational setting within which students work together to develop an understanding of the forces at work within groups and organisations. Provides resources for learning about professional development and learning interventions within the organisation in order to support and sustain continuous improvement and lifelong learning.

015066
Leading and Facilitating Change
Undergraduate
6cp
Provides the knowledge, skills and attributes necessary for adult educators to monitor and facilitate changes in their own organisations. Focuses on how theories, models and current research about change management impact on the participants’ field of practice.

015107
Individualised Project B
Undergraduate
4cp
Individualised projects are delivered through the learning contract method. A learning contract is a structured method whereby each participant in consultation with a staff adviser designs and implements manageable learning activities. The emphasis is on making the activity relevant to those professional and personal needs of the participant which are consistent with the aims of the course.

015110
Aboriginal Cultures and Philosophies
Undergraduate
8cp
Introduces students to Aboriginal culture and social organisation as expressions of Aboriginal cosmology. Contemporary Aboriginal culture is presented as an evolving response to colonialism and as a reassertion of cultural empowerment.

015111
Issues in Aboriginal Education
Undergraduate
8cp; prerequisite: 015110 Aboriginal Cultures and Philosophies
Provides opportunities for students to develop a critical understanding of a range of issues concerning Aboriginal education. Explores the historical background of, and contemporary factors affecting, Aboriginal education.

015112
Aboriginal Initiatives in Education: Towards Community Control
Undergraduate
8cp; prerequisite: 015111 Issues in Aboriginal Education
Provides opportunities for students to critically explore Aboriginal initiatives in education. Students undertake field visits and complete an extended internship.

015113
Teaching Aboriginal Studies
Undergraduate
8cp
Provides an opportunity for students to become competent teachers of Aboriginal studies in a practical hands-on way. Explores a number of ways of translating social content in learnable/teachable episodes.

015141
Human Resource Development Strategies
Undergraduate
6cp
Examines the diversity of practices that contribute to effective human resource development in organisational settings. Extends students’ skills in developing practical, targeted, human resource development strategies which are appropriate for individual, team and organisational development. It also introduces concepts of learner and performance assessment.

015162
Competency Assessment in the Workplace
Undergraduate
6cp
Provides participants with the knowledge and skills to develop and implement workplace assessment strategies in order to measure both the achievement of learning outcomes and competent performance in the workplace.
015189
Adult Education Practices 2
Undergraduate
6cp
Explores the relationship of teaching to learning in the contexts of participants’ concurrent roles in the workplace and as teachers and learners. Explores this relationship in one-to-one and group learning events.

015198
Individualised Project A
Undergraduate
4cp
Individualised projects are delivered through the learning contract method. A learning contract is a structured method whereby each participant in consultation with a staff adviser designs and implements manageable learning activities. The emphasis is on making the activity relevant to those professional and personal needs of the participant which are consistent with the aims of the course.

015395
Aboriginal Social and Political History
Undergraduate
8cp; prerequisites: 015110 Aboriginal Cultures and Philosophies or Social and Political Theory
Examines and analyses the impact of colonialism on indigenous peoples, with particular reference to the Aboriginal inhabitants of this region. Presents the emergence of Aboriginal social and political movements as the basis for repossession of traditional heritages in land and culture.

023001
Psychology of Secondary Students
Undergraduate
3cp
Provides students with an understanding of the principles and patterns of human growth and development in the secondary school years; with knowledge of types of learning and their interaction with teaching approaches and strategies; and with a knowledge of effective ways of interacting with students.

023002
Meeting Special Needs in the Secondary School
Undergraduate
3cp
Provides students with effective ways of interacting with students; with strategies for identifying students with learning or behavioural difficulties; with knowledge of how secondary school teachers can meet the challenges presented by students with special needs, including those with learning or behavioural difficulties, as well as those of gifted and talented students; and with an understanding of the educational issues relevant to the use of alternative curricula and learning contexts, including alternative pathways in post-compulsory education.

023003
The Secondary School: Social Bases and Critical Issues
Undergraduate
4cp
Students learn about the nature of educational problems in the school and the education system in New South Wales in terms of their social and philosophical underpinnings. Examines the role of the Federal Government in education; explains how social characteristics influence the educational outcomes of certain social groups and identify appropriate policies and programs which address these outcomes; identifies and analyses the direction of social and educational change and the interaction between schools and society in this regard; analyses and evaluates alternative viewpoints in relation to some critical issues raised. Students will determine their own reasoned and logically supported position in relation to such issues; move towards a commitment to specific policies and practices that follow from the position they have adopted.

023191
Secondary Practicum 1
Undergraduate
12cp; pre/corequisite: 027001 Learning in PDHPE; 028001 Learning in Science 1
Introduces students to professional practice in the secondary school by drawing together the theory and practice necessary for an effective educational practitioner. Enables students to discuss skills, insights, procedures and policy issues that are essential to effective professional
practice by all teachers in present-day secondary schools, and assists them to combine the knowledge and insights which are provided by all of the other subjects which they undertake in the program.

023192
Secondary Practicum 2
Undergraduate
12cp; prerequisite: 023191 Secondary Practicum 1; corequisite: 027001 Learning in PDHPE
Prepares students to implement current developments in learning and teaching by addressing a range of policy issues and their implications for professional practice in the school. Emphasises the development of professional commitment and its implications for life-long learning. Further integration of theory and practice occurs as students engage in and reflect upon their school-based practice.

027001
Learning in Personal Development, Health and Physical Education
Undergraduate
14cp
This year-long subject is presented in a number of compulsory modules which develop the theoretical and practical content and skills needed for teaching the key learning area of personal development, health and physical education in schools. It involves a detailed analysis of relevant school syllabuses and policy documents and the application of these in the preparation of programs and lessons. It is taught in a way which provides a model for students and is linked to the practicum in order to develop the professional insights and competencies of a reflective practitioner in this area.

12515
Property Life Cycle
Postgraduate
6cp
A strategic and responsible approach to management of property assets requires the ability to understand and respond to economic and social influences which affect the performance of property through a life cycle which begins with raw land and includes development, management and redevelopment. Marketing and effective property management techniques are examined in this subject as responses to changing economic and social forces in the strategic management of property assets.

12518
Property Transactions
Postgraduate
6cp
This subject looks at the following topics: the nature of the ownership of personal property including intellectual property; the nature of ownership of real property including the related concepts of title, leases, mortgages and conveyancing transactions, options to purchase; an overview of the law of contract with emphasis on construction industry contracts and joint venture agreements; the law of negligence including liability for negligently given advice or certification, the operation of the statute of limitations; and the manner in which local government building, planning and subdivision approvals are given including the mechanisms for appeal to the Land and Environment Court.

12524
Property Development
Postgraduate
6cp
This subject provides a framework, tools, techniques and practical approaches for individuals and organisations involved in property development. Material covered will include the following: strategic planning; introduction to project management of property developments; team formation; development and management; project initiation, planning, procurement and completion; the property development process; organisational structure and culture; human resource management; industrial relations; and characteristics and needs of different property development types.
12525

Property Analysis 1
Postgraduate
6cp

In this subject students study the following: general accounting principles; capital budgeting techniques; discounted cash-flow analysis; risk analysis techniques; interest rate theory and discount rates; traditional and contemporary principles and methods of valuation, advanced capitalisation and other valuation methods; valuation of different classes of property; and sources of finance. A basic knowledge of a spreadsheet program such as Microsoft Excel is assumed. Students will need to bring a financial calculator to class.

12535

Property Analysis 2
Postgraduate
6cp

This subject covers the following topics: site identification and analysis; financial feasibility analysis for both residential and nonresidential properties; estimation of development feasibility components; sensitivity and risk analysis; preparation of development business plans and finance proposals; investment market and portfolio analysis; property investment portfolio management including impact of economic size, market constraints, physical constraints, maintenance of market position, reappraisal and culling; risk exposure, profiles, gearing and management; current issues in property and non-property asset investment; and the use of basic computer applications.

16554

Urban Economics
Undergraduate
8cp (two semesters); prerequisites: 25110 Microeconomics; 25209 Macroeconomics

Topics covered include: economic theories of land use including location theory, urbanisation, demographics of cities, role of levels of government, urban services, privatisation, urban problems, urban renewal and decentralisation.

16751

International Property Investment
Undergraduate
8cp

The subject analyses the globalisation of real estate markets and examines the factors that determine such foreign investment. Particular focus is on the Australian and the Asia Pacific property markets.

17101

Project Process 1
Postgraduate
6cp

This subject forms an introduction to, and overview of, generic project management. It covers characteristics of projects and project management; generic project phases and life cycles; an introduction to project management processes; the context of project management; and teams and teamwork in project management.

17105

Industry-Specific Project Process 1
Postgraduate
6cp

Each subject in this strand presents a project management case study for a specific industry or project type. This one examines and critically evaluates industry-specific project processes and practices and compares them with generic process models. Building and construction industry projects will form the basis of one subject in this strand. Other specific industries and project types which may be examined in a subject in this strand are information technology, 'soft' projects such as research and development; change management or organisation change; and product development.
17120
Heritage and Development
Postgraduate
6cp
This subject is centred on the development of sites of heritage significance, including both statutory and strategic planning issues and practice and the evaluation of the statutory and community processes involved in heritage conservation issues. The economics of heritage conservation is discussed and an emphasis is placed on the creation of innovative solutions to the development of heritage buildings and sites.

17201
Project Process 2
Postgraduate
6cp
Examines the first, or initiation and concept phase, of a four-phase generic project process or life cycle. Topics include: stakeholder identification; identification of needs and opportunities; internal and external factors affecting projects; project appraisal; project objectives and performance measures; generation and analysis of options; feasibility studies and sensitivity analysis; initial project time, cost, risk and quality plans; testing and approvals; and assessment of process capability.

17205
Industry-Specific Project Process 2
Postgraduate
6cp
See 17105 Industry-Specific Project Process 1

17301
Project Process 3
Postgraduate
6cp
Examines the second, or planning and development phase, of a four-phase generic project process or life cycle. Topics include: project scope management; project scheduling; development of project budgets; project quality management; project organisation and resourcing; project communication planning; project risk management; project documentation; change management; asset management; and value management.

17305
Project Technology 1
Postgraduate
6cp
Covers one or more project management topics which may be drawn from the following: the latest research and development in project management; managing project interfaces; project human resource management; project organisation; project leadership; risk management; project information management; advanced project cost and scheduling; value engineering and management; risk management; quality management and quality assurance; financial management; marketing; projects and the environment.

17401
Project Process 4
Postgraduate
6cp
Examines the third (implementation) and fourth (completion) phases of a four-phase generic project process or life cycle. Topics include: management of internal and external project environments; management of stakeholder relationships; project scope and change control; project time and cost control; quality control and quality assurance; management of project human resources; project information management; contract management; conflict management; project commissioning and handover; post-project evaluation; and continuous improvement.

17405
Project Technology 2
Postgraduate
6cp
Covers one or more project management topics which may be drawn from the following: the latest research and development in project management; managing project interfaces; project human resource management; project organisation; project leadership; risk management; project information management; advanced project cost and scheduling; value engineering and management; risk management; quality management and quality assurance; financial management; marketing; projects and the environment.
17506
Industry-Specific Project Process 3
Postgraduate
6cp
See 17105 Industry-Specific Project Process 1

17517
Research Methodology
Postgraduate
4cp
This subject covers research methods and includes a study of the research process, research design, sampling, and estimation of sample size. Students study computer applications, with an introduction to computer analysis using the SPSS-X package. Students also study statistical methodology, which incorporates elementary statistical analysis, with emphasis on non-parametric statistics. Theory generation is also part of the subject.

17540
Facility Economics
Postgraduate
24cp
This subject explores issues affecting the economic evaluation and operation of existing built facilities in the context of improved business performance and worker productivity. It includes an understanding of facility strategies, organisational responsibilities and appropriate decision-making tools. Specific areas of focus include computer-aided facility management, risk analysis techniques, maintenance planning and value-adding methodologies.

17550
Environmental Economics
Postgraduate
24cp
This subject explores issues affecting the interaction between economic development and environmental protection. It includes an understanding of the importance of ecologically sustainable development and the provision of strategic advice on the most effective use of resources over a project's life cycle. Advanced selection criteria and a methodology for the measurement of sustainability are discussed in the context of political, legal, ecological and societal considerations.

17560
Research Project
Postgraduate
24cp
This subject comprises the preparation and submission of a dissertation concerning the detailed study of an individual topic related to the field of facility economics. Research methodology and use of quantitative analysis are part of the course content. The dissertation shall involve identification of a problem, a thorough literature review of the topic and development of a solution based on a selected research methodology. The recommended solution should make a contribution to existing knowledge in the field.

17701
Environment and Control
Postgraduate
6cp
This subject covers the following topics: property development and statutory control processes, including both statutory and strategic planning issues and practice; alternative solutions and approaches to environmental issues and sustainable development; community consultation and dispute resolution; and communication of strategic advice to stakeholders on environmental issues.

17703
Property Taxation
Postgraduate
4cp
This subject involves the following: the analysis of various forms of taxation relating to property holdings and property investment; income tax, capital gains taxation, depreciation allowances, land tax and stamp duties; taxation of trusts; negative gearing; and alternative forms of taxation and their likely impacts on the property industry.

17704
Advanced Property Finance
Postgraduate
6cp
This subject covers the following topics: sources and types of finance available for various property developments; debt versus equity; specialised financing techniques, including hybrids, long-term and offshore finance; project finance; and evaluation techniques and risk management.
17705
Contemporary Issues in Land Economics
Postgraduate
6cp
The content and topics of this subject will vary from year to year, depending on the topicality of particular issues. In 2000, topics to be presented include the following: property cycles, the impact of the Sydney Olympics 2000 upon the property industry; the growth of managed funds and their implications for the property industry; and international influences upon the property industry.

17706
Research Project – Land Economics
Postgraduate
18cp
In this subject students will undertake a detailed, in-depth and supervised study of an individual topic related to the field of land economics. They will prepare and submit a 25,000 word thesis which will comprise identification of a problem, a thorough literature review of the topic and development of a solution based on a selected research methodology. The work should make a contribution to existing knowledge in the field.

31414
Information Systems
Undergraduate
6cp
Deals with information systems in their organisational context. Uses the effects of information systems on society, organisations and individuals to illustrate information systems concepts. Introduces techniques for analysing and describing user requirements. Emphasises human activities, the importance of the user in the analysis phase and the usability of systems. Also emphasises communication skills – the ability of the analyst and designer of an information system to work as part of a team in problem-solving, to design efficient and effective interfaces and to give presentations on the system.

31424
Systems Modelling
Undergraduate
6cp
Introduces information system concepts including their static and dynamic components. Describes how these concepts can be used to model systems to capture correctly their structure and needs. Outlines how the ability to capture information about the system in ways understood by its eventual users will improve the final quality of the system. Introduces analysis using various approaches found in contemporary system development including object-oriented methods, data flow diagrams and Entity-Relationship modelling and describes the relationships between these techniques and their application.

31429
Procedural Programming
Undergraduate
6cp; prerequisite: 31415 Principles of Software Development A or 31508 Programming Fundamentals
Focuses on top-down structured program design techniques, and their application to the development of commercial programming applications. Emphasises quality and usability of the resultant systems and develops debugging and testing skills. The language used will be C.

31434
Database Design
Undergraduate
6cp; prerequisite: 31424 Systems Modelling or equivalent
Introduces students to basic database design and implementation concepts. Presents database design techniques including relational design and Entity-Relationship analysis. Covers database programming using SQL. Introduces object database and distributed database concepts.

31443
Distributed Databases and Client-Server Computing
Undergraduate
6cp; prerequisite: 31434 Database Design or equivalent
Covers a range of topics in distributed databases and client-server computing. Describes in detail the classical approach to distributed databases and supports this approach with both theoretical and practical exercises. Introduces modern client-server and database-server techniques.
31508
Programming Fundamentals
Undergraduate and Postgraduate
6cp
Students learn programming concepts, and learn to write medium-size programs in an object-oriented language.

31511
Systems Design
Undergraduate
6cp; prerequisite: 31424 Systems Modelling
Develops students' practical skills in designing medium-scale computer applications.

31512
Networking 1
Undergraduate and Postgraduate
6cp
Introduces students to data communications concepts and provides detailed information about the physical and data link layers for several network types.

31606
Virtual Communities
Undergraduate
6cp
Describes ways in which computer networking components can be integrated into workspaces that foster virtual communities. Concentrates on the formation of virtual communities that focus on common interests of their members. Considers factors that influence the growth and success of such communities both within large enterprises and within widely distributed community groups. Describes ways to use information technology to combine a variety of components into workspaces that support such communities.

31736
Business Processes and IT Strategy
Undergraduate
6cp
Covers the restructuring of organisational processes through the innovative use of information systems and information technology. Introduces current proposals for organisation restructuring and evaluates these through comparison with previous theories of restructuring.

31749
Internet Commerce
Undergraduate
6cp
Exposes students to internet commerce. Develops an understanding of the stakeholders and their capabilities and limitations in the strategic convergence of technology and business. Topics include business models for internet commerce, security, legal and ethical issues. Develops skills in identifying the advantages and disadvantages of the various electronic payment options. Students complete computer-based activities on internet commerce.

31777
Human – Computer Interaction
Undergraduate
6cp
Focuses on human factors and information systems aspects of user-centred systems development and design. Provides students with HCI principles, concepts, tools and techniques needed to build user-centred systems, particularly in terms of the design of interfaces that satisfy user needs and create usable products that support user tasks and goals. Major topics include: the role and scope of HCI; HCI methods such as requirements analysis; task analysis and usability testing; usability evaluation and user-centred design support.

31921
Objectbases
Undergraduate
6cp; prerequisite: 31434 Database Design
Introduces the students to OODB concepts. Reviews the basic OO principles and discusses their application to databases. Supports the theoretical discussion of the topic with practical exercises using a commercially available OODBMS.

31950
Networked Enterprise Design
Undergraduate
6cp; prerequisite: some knowledge of computer networks
Describes the evolution of systems towards distributed environments with more emphasis on working together over distance. Describes how people work together and the changes to work practices resulting from the distribution of such work, including telework and mobile
workers. Covers collaboration technologies, such as email, video-conferencing, co-authoring and workflows, needed to support distributed work. Emphasises the design process and describes how to choose and implement collaborative technologies based on systems such as World Wide Web or Lotus Notes to meet the needs of distributed groups both across organisations as well as using Intranets within organisations.

32204

Advanced Data Management

*Postgraduate*

6cp; prerequisite: undergraduate level database experience

Covers a range of advanced database topics, including: relational, object-oriented database systems and distributed databases. The subject area is treated mainly from a technological viewpoint, but also includes discussions of management issues.

32208

Information Processing Strategy

*Postgraduate*

6cp; prerequisite: 32207 Information Management

Provides students with an awareness of the problems in developing corporate strategies for information processing and to develop skills in the selection and use of appropriate techniques. Topics include: tools for strategic planning and a review of strategic planning tools such as business systems planning, economic analysis and critical success factors; corporate needs for information technology, covering the potential role of information technology in organisations of the 1990s, such as competitive strategies, client-server systems, multimedia and outsourcing; and strategic planning, a review of state-of-the-art methodologies and frameworks for developing information processing strategies.

32509

Human-Computer Interaction in Information Systems

*Postgraduate*

6cp

Provides students with an understanding of the principles, concepts, tools and techniques needed to manage the development of information systems from a human-computer interaction perspective. Usability is considered throughout information systems development from initial systems concepts to implementation.

32517

Commerce on the Internet

*Postgraduate*

6cp

Recent advances in computer networking, particularly the Internet, have accelerated the development of electronic commerce. Global networking and other technological innovations are able to give organisations a competitive edge in their day to day business dealings. This is critical in three interrelated dimensions: customer to business connections, intra-business interactions and business to business links. Examines the current status and potential of digital commerce. Explains what electronic commerce is, outlines the history of digital commerce including Electronic Data Interchange (EDI), examines business strategies and management issues, and looks at relevant technology standards and protocols. Examines a range of issues for implementing electronic commerce on the Internet such as electronic mail, WWW, Java, Electronic Commerce Framework (JECF). Studies government regulations, taxation of internet commerce and legal and privacy issues.

32531

Global Information Systems

*Postgraduate*

6cp

Introduces the new dimensions arising out of the growth of global information systems. Covers the specific technical issues of implementing systems across distance and introduces additional factors that must be considered, in particular, the bridging of different cultures, work environments and practices. Includes new ways of doing business within global environments and the impact on the design of information systems.

32532

Conducting Business Electronically

*Postgraduate*

6cp; prerequisite: a general understanding of systems modelling methods

Describes how to select and develop applications that can benefit from web and groupware technologies. Goes beyond marketing and managing electronic transactions, and concentrates on web and groupware technologies to provide service and advice; distribute knowledge throughout the enterprise; support task oriented groups; and
encourage organisational learning. Emphasises matching technical solutions to work practices and ways to support the evolution of work practices. Describes how to design applications to realise the identified benefits in terms of shared workspaces and ways to implement the workspaces using web technologies and groupware.

32533
Networking Communities
Postgraduate
6cp
Describes how information and networking technologies can be used to support wide-ranging communities.

32534
Knowledge Management
Postgraduate
6cp
Introduces knowledge management, systems support for knowledge management, knowledge discovery and data mining, and relates them to the corporate environment.

32602
Impact of Information Technology
Postgraduate
6cp
The role of the IT manager is expanding. Considers the reasons for, and the implications of, the change. Analyses the impact of IT with respect to the organisation, the employee and the client. Develops awareness of the issues involved and the options available for managing all of the available resources. Topics include organisation and job structures; environmental requirements; workplace design; human/computer interface and interaction; disaster recovery; and legal consideration. Assignments relevant to current IT management issues provide an opportunity both to identify problem areas and to explore management options. The IT manager needs to achieve a wide range of business benefits from effective management and utilisation of all resources.

32603
Software Quality Management
Postgraduate
6cp
Explores how to identify and sell the benefits of software quality within an organisation. Teaches how to establish quality in software, how to obtain the corporate commitment to quality, and how to review and improve on the effectiveness and cost of software quality to the organisation. Discusses the importance of software quality to the management of IT. Covers the advantages and benefits to the organisation in both the national and international context. Presents the Australian and International Standards relevant to IT management and views the implementation of these standards from a corporate perspective. Emphasises the relevance of these issues to Australian organisations trading overseas. Case studies and guest lecturers will highlight successes in adopting SQA standards. Examples of various SQA standards will be provided. Provides the opportunity for students to consolidate learning by directly applying this knowledge to their own organisation.

32604
Systems Integration
Postgraduate
6cp; prerequisite: appropriate IT work experience
Systems integration can be defined as the business of adding value to a specific project, by assuming responsibility for combining information products and services into a specified business solution. The system integrator takes the responsibility and risk for the project. This subject examines the project from the set of user requirements right through to the final output solution, delivered on time, within budget and having achieved the expected performance criteria.

32605
Managerial Analysis and Evaluation of Information Systems
Postgraduate
6cp
For IT managers to excel in their field, it is essential that they are aware of the benefits which may be achieved through the competent management of information systems. They need to have a knowledge of how to rate them, and of their impact on the IT organisation. Provides enhanced knowledge of the analytical and financial skills required for the efficient handling of information systems. Teaches how to assess and select information systems, and evaluate their role in IT management. Furthers knowledge of policy development for effective vendor selection, including the award of IT contracts.
208 Subject descriptions

32606
Database
Postgraduate
6cp; prerequisite: 32607 Systems Analysis
Introduces the basic database design and implementation concepts. Presents database design techniques including relational design and E-R modelling. Discusses the implementation of relational database and describes database query techniques using the Structured Query Language (SQL). Introduces object-oriented databases and discusses their applicability to various problem domains.

32607
Systems Analysis
Postgraduate
6cp
Introduces information system concepts including their static and dynamic components. Describes how these concepts can be used to model information systems to correctly capture their structure and needs. Outlines how the ability to capture information about the system in ways understood by its eventual users will improve the final quality of the system. Introduces analysis using various approaches found in contemporary system development, including object-oriented methods, data flow diagrams and Entity-Relationship modelling, and describes the relationships between these techniques and their application.

32701
Advances in Information Technology
Postgraduate
6cp
Considers the technology trends affecting information processing and delivery. Develops the vision and competencies necessary to undertake assessment of emerging information technologies such that companies will be well served by today's technology environment and will also be positioned to take up future opportunities.
Reviews fundamental, emerging trends in information technology, such as recent advances in neural computing, parallel processing, human interfaces, multimedia, client/server computing and object oriented technologies. Presents case studies in the application of such new technologies in organisations and its management implications. Students will undertake an analysis of the costs and opportunities of adopting an example technology in their own company.

32702
Contemporary Telecommunications
Postgraduate
6cp
Assesses business opportunities and technological trends in telecommunications and computer networking. Reviews emerging local and wide area networking technologies and services, including FDDI and broadband ISDN. Describes open interconnection architectures such as OSI, Internet and SNA, along with the impact of GOSIP procurement and migration policies. Discusses distributed applications and analyses them in terms of their costs and benefits: client/server computing; distributed file and database systems; team support tools; etc.
Places particular emphasis on the networking environment, regulatory framework and value added services available in the Australian market place. Presents communication technologies from both a technical and business perspective, with case studies presented by industry practitioners. Students will undertake a major communication technology assessment applied to their own enterprise.

32703
Information Technology Strategy
Postgraduate
6cp; prerequisite: IT experience
Designed to provide students with an awareness of the problems in developing corporate strategies for information processing, and to develop students' skills in the selection and use of appropriate techniques.

32704
Strategic IT Contract Management
Postgraduate
6cp
Develops a deeper understanding of the typical business drivers which inform the perspectives of contract negotiation participants, and how to exploit those drivers to achieve strategic objectives in a win-win environment.
Topics covered include the legal framework; structuring major IT projects; IT contracting; customer, vendor and financier perspectives; vendor evaluation; government contracting; maintenance and support; competitive advantage through IT; and IT contract negotiation.
**33401**

**Introductory Mathematical Methods**

*Undergraduate*

6cp; prerequisite: a knowledge of calculus at the HSC 3-unit level is assumed

**35101**

**Mathematics 1**

*Undergraduate*

6cp; prerequisite: a knowledge equivalent to the content of HSC 3-unit Mathematics is assumed

**35102**

**Mathematics 2**

*Undergraduate*

6cp; 6hpw; prerequisite: 35101 Mathematics 1; corequisite: 35140 Operations Research Modelling

**35140**

**Operations Research Modelling**

*Undergraduate*

6cp; 4hpw

An introduction to operations research methodology. A variety of problems from manufacturing, construction, transportation and finance will be considered, together with approaches to the formulation of the corresponding mathematical models. Solutions for the models will be obtained using decision support software with particular emphasis on spreadsheets and their uses in business applications. The art of model building will be discussed in conjunction with an introductory description of several important solution methods. This description will include the introduction of matrices, determinants and vectors.

**35151**

**Statistics 1**

*Undergraduate*

6cp; 6hpw

**35212**

**Linear Algebra**

*Undergraduate*

6cp; prerequisite: 35140 Operations Research Modelling

**35231**

**Differential Equations**

*Undergraduate*

6cp; prerequisite: 35102 Mathematics 2

35241
Optimisation 1
Undergraduate
6cp; prerequisites: 35212 Linear Algebra; 35232 Advanced Calculus or 33401 Introductory Mathematical Models

35252
Statistics 2
Undergraduate
6cp; prerequisite: 35151 Statistics 1 (or equivalent introductory tertiary studies in statistics including 26122 Quantitative Methods for Business)

35342
Optimisation 2
Undergraduate
6cp; 4hpw; prerequisite: 35241 Optimisation 1

35353
Regression Analysis
Undergraduate
6cp; prerequisite: 35252 Statistics 2

35355
Quality Control
Undergraduate
6cp; 4hpw; prerequisite: 35252 Statistics 2
Total quality management. Process control for attributes and variables, introducing Shewhart, Cusum, and EWMA control charts and covering regular, short, multiple-stream and serially correlated processes. Acceptance sampling for attributes and variables. Process capability analysis, including nonconforming ppm, capability ratios and Taguchi quality loss. Tolerance analysis covering linear and nonlinear combinations of components, and Taguchi’s method. Reliability analysis, including reliability measures, bounds and estimation for individual components and systems, and spare parts provisioning.

35361
Probability and Stochastic Processes
Undergraduate
6cp; prerequisite: 35212 Linear Algebra; 35252 Statistics 2
Introduction to general concepts of the design of experiments. Completely randomised, randomised complete block and Latin square designs. Multiple comparisons. Factorial designs. Introduction to Taguchi designs and response surface designs.
35363
Simulation Modelling
Undergraduate
6cp; 4hpw; prerequisite: 35170 Introduction to Computing; corequisite: 35361 Probability and Stochastic Processes
Bayesian statistics and Bayesian decision making, Monte Carlo simulation, prior distributions, decision trees and influence diagrams, conjugate distributions. Various queuing models and applications. Simulation studies, modelling systems and various representations, statistical modelling, input data analysis, verification and validation, output analysis, comparison of systems designs, random number generation and tests, random variate generation, variance reduction techniques.

49001
Judgment and Decision Making
Postgraduate
6cp
Develops an understanding of rational decision aids in the light of modern descriptive theories of judgment, choice and decision in organisations. Presents the methods of management science, decision analysis and judgment analysis. Critically assesses models of individual, group and strategic decision making.

49002
Project Management
Postgraduate
6cp
The emphasis is an interdisciplinary one of relevance to all fields of engineering. Considers the management, financial and contractual responsibilities of engineering managers and organisations from the establishment of a project team and the instigation of a contract. The perspective of all parties, including principal contractors and subcontractors is considered.

49003
Economic Evaluation
Postgraduate
6cp
This subject deals with the application of economic concepts to engineering decision making. Main topics include: Macroeconomic issues and policies; microeconomic market theory; theory of the firm; project evaluation and cost-benefit analysis; intangibles and risk.
Assessment: three assignments 40 per cent; two quizzes 60 per cent.

49004
Systems Engineering for Managers
Postgraduate
6cp; prerequisite: 49001 Judgment and Decision Making or its equivalent; corequisite: 49002 Project Management
The underlying process of problem solving through engineering projects is interpreted as a unifying discipline. Drawing on contemporary scholarship and best practice, the philosophy, concepts, techniques and tools of this systems engineering process are examined in the context of engineering management, and their domain of applicability explored. Provides extensive opportunity for individual and group
encounters with the challenges of the systems approach, and is illustrated by case studies presented by guest lecturers.

49006
Risk Management in Engineering
Postgraduate
6cp; prerequisite: 49145 Engineering Statistics or equivalent
Develops students’ abilities to identify, assess, ameliorate and limit risk in the management and practice of engineering through the application of the concepts and tools of risk engineering. On completion, students are able to identify the main hazards in an engineering project and to design an appropriate risk management strategy. Topics supported by case studies include: semantics of risk and hazard; risk as a social construct; principles of risk management; steps in risk engineering; integration with engineering process; risk perception, risk communication, and the acceptability of risks; statutory provisions in NSW relating to some engineering risks; legal principles relating to engineering risks (contract, liability etc.); checklists and scoping for risk identification and assessment; design criteria and code provisions for various risks; comparing risks; quantified and qualitative risk assessment methods; risk assessment in emergencies; and financial tools in the management of engineering risks.

49012
Project Management Support Systems
Postgraduate
6cp
The aim of this subject is to develop the skills for planning and controlling projects. Students will also learn how to use computer tools to construct a project plan of a real project and control a simulated project. Students will understand how models for Project Management have been developed and which models are appropriate in different contexts. The model will include the ‘waterfall’ model, the incremental development model and the spiral model. Models for risk assessment and financial planning aspects of projects will also be covered. Students will understand and apply terms such as Work Breakdown Structure, Network Planning, PERT, GANTT charts, cash flow and Cost/Schedule Control Systems Criteria to their project.
Assessment: developing and presenting a project plan 40 per cent; simulating a project 10 per cent; auditing a project 10 per cent; preparation and participation in workshop 20 per cent; subject portfolio 10 per cent; computer-mediated conference participation 10 per cent.

49013
Managing Information Technology in Engineering
Postgraduate
6cp
The aim of this subject is to explore the influence of Information Technology (IT) on organisations and management and in particular engineering management. Students will critically examine both past and recent IT innovations. Issues in information technology will extend into groupware, computer-aided logistic support, decisions support systems, tools for systems engineering and communications technology including the Internet. Students will use a computer mediated conferencing tool on the Internet to participate in group project work either on or off campus. Most of the support material such as lectures will be on the Internet.
Assessment: development of IT policy and selection criteria for the IT Manager 30 per cent; library research group project 30 per cent; participating and reflection on using computer mediating conferencing tools 20 per cent; debate 20 per cent.

49095
Infrastructure Planning
Postgraduate
6cp
This subject introduces students to the complex planning requirements of large scale physical infrastructure development. It looks at the technical planning and evaluation methods available, including those associated with financial, economic and environmental criteria, and places them in a political context. A range of international case studies are discussed.
Assessment: assignments 50 per cent, examination 50 per cent.

49121
Environmental Assessment and Planning
Postgraduate
6cp
Analyses the principles of sustainable development and the expectations which they place on various aspects of human interaction
with the environment. Existing and proposed measures by governments are examined in the areas of environmental legislation, environmental economics and land-use planning in relation to sustainable development.

49122

Ecology and Sustainability
Postgraduate
6cp

This subject covers the following topics: ecological systems and processes; basic ecological principles, bio-geochemical cycles, development of ecosystems, interaction between physical ecosystems, global environmental issues such as greenhouse effect, ozone depletion, acid rain etc.; human impact on ecosystems: population growth, terrestrial ecosystems (forest and agriculture land), aquatic ecosystems (lake, river and ocean), bio-diversity; importance of sustainable development; overview of major environmental problems, their effect and remedies; air pollution, noise pollution, water pollution, soil pollution, solid and hazardous wastes; and case studies.

Assessment: assignments 30 per cent; examinations 70 per cent.

49309

Quality Planning and Analysis
Postgraduate
6cp; prerequisite: 45145 Engineering Statistics or equivalent

Develops students' understanding of the imperatives, culture, philosophy, scope, strategies and practice of total quality management. Covers problem identification, process design, continuous improvement, vendor supplies, customer service, quality auditing, the development of a quality assurance practices manual, and compliance with relevant Australian standards and supplier assessment schemes.

Assessment: formative projects 35 per cent; formative assignments 35 per cent; examination 30 per cent.

49602

Marketing Engineering Services
Postgraduate

Contact the Faculty of Engineering for further information.

5xxxx

Community Research
Undergraduate
6cp for one semester or 12cp for two semesters; prerequisite: successful completion of three full semesters of relevant undergraduate degree

A project based subject designed to develop higher level intellectual and professional skills in a multi-disciplinary, community and field-based learning situation. Coordinated through the UTS Shopfront - a University-wide facility providing the pro bono skills of the University to community groups on the basis of need. All projects undertaken must be relevant to the student's area of expertise/study and must be consistent with the justice and equity mission of the UTS Shopfront. Projects can include: standard research; policy documents; background papers; marketing plans; audio-visual products; running a workshop.
50128
**Media, Information and the Law**
*Postgraduate*
8cp
This subject examines the ways in which the media and information are regulated. Rather than examining the law in isolation, the subject looks at law making and practice in the context of broader economic, political, historical and social processes. The subject begins with a comparative critique of notions of free speech and expression in different national and international contexts. While existing law in key areas (e.g. defamation, censorship, freedom of information, copyright) is outlined, there is a strong emphasis on developing a critical and comparative understanding of legal processes, the ways in which the law works in practice and the policy issues which arise. There will be an opportunity for students to select major individual or group projects in areas of professional and intellectual interest.

54230
**Aboriginal Social and Political History**
*Undergraduate*
8cp
Examines and analyses the impact of colonialism on indigenous peoples, with particular reference to the Aboriginal inhabitants of this region. The emergence of Aboriginal social and political movements will be presented as the basis for repossession of traditional heritages in land and culture.

54231
**Aboriginal People and the Media**
*Undergraduate*
8cp; prerequisites: 015110 Aboriginal Cultures and Philosophies; 54230 Aboriginal Social and Political History
Familiarises students with the field of debate in relation to representation of Aborigines in the media, and with the productions of Aboriginal media organisations. Where possible, some written, video, film production could become part of the course assessment.

54330
**The Politics of Aboriginal History**
*Undergraduate*
8cp; prerequisites: Aboriginal Studies subjects at 100 and 200 Levels
Introduces students to the wide range of historical work by Aboriginal and non-Aboriginal people over the last three decades, and encourages students to develop skills in the critical evaluation of this work, in its political and social context. Students will enhance their knowledge of primary research materials for the field of Aboriginal history, and will develop their skills in the analysis and use of these sources.

54331
**Aboriginal Forms of Discourse**
*Undergraduate*
8cp; prerequisites: 015110 Aboriginal Cultures and Philosophies; one 200 Level subject in the Aboriginal Studies major
Familiarises students with a broad range of Aboriginal forms of discourse – novels, plays, films, oral narratives – and introduces them to methods of analysis, of both text and context, deriving from the disciplines of cultural studies and textual studies.

55080
**Information Issues**
*Undergraduate*
8cp; prerequisite: 45125 Engineering Discovery or permission of the Head of School
Develops a critical awareness of the complexity of issues surrounding information, information technology, and telecommunications; develops competency in a number of skills including locating and retrieving information existing in different media, and in sorting, recording, organising and presenting information to meet a number of different purposes.

56011
**Public Relations Strategies and Management**
*Undergraduate*
6cp; prerequisite: 56013 Public Relations Principles and Process
Applies the concepts and practices of professional public relations in critically analysing contemporary campaigns. Students develop, design and produce innovative resources for working with the media and they develop advanced research and writing skills.

56013
**Public Relations Principles and Process**
*Undergraduate*
6cp
Introduces students to the principles underlying public relations by examining the concepts and theories of professional practice
in the context of the contemporary Australian public relations industry. Students become familiar with key techniques of planning, media relations and publicity. They develop basic skills in writing for the media.

56744
Public Relations Management
Postgraduate
6cp
Assists current and potential public relations practitioners in their professional development. Examines the management of recent public relations campaigns in Australian organisations; develops the ability to set objectives, choose and implement research methods, decide strategies and construct evaluation methods suitable to particular campaigns; and approaches public relations as a specialised form of communication management.

57002
Electronic Information Systems Design
Postgraduate
8cp
Focuses on the processes and practices of information design for digital environments. Explains how information design can be used to resolve issues associated with the development of digital information products and services and their seamless interaction within a wider electronic context. Content includes: dialogue/interaction with the user; access; content structure and organisation; navigation and orientation; links; graphics and graphic elements; quality standards and procedures (e.g. ISO 9000, As/NZS 4258); evaluation and useability testing; protocols and languages; intermediation technologies; digitisation; heterogeneous, federated and distributed systems.

57004
Information Environments and Networks
Postgraduate
8cp
Introduces the information environment and its social, economic and political infrastructure. Covers ideas about data, information and knowledge; the information industry; information work in a range of organisations and agencies in the public and private sector. Examines electronic and non-electronic information networks. Considers issues in information practice, including ethics and values and the impact of government information policies on topics such as intellectual property and protection of individual privacy.

57007
Knowledge Management
Postgraduate
8cp
Introduces an understanding of the human knowledge base as a key information resource and how this can be captured, mapped and structured for effective utilisation. Content covers communication in organisations; identifying knowledge owners; capturing, mapping and creating a working knowledge base; creating/sustaining a knowledge-sharing culture; the transfer of knowledge; intellectual capital and knowledge management for competitive gain; value-added processes; transforming data, knowledge and information; the use of internetworking for knowledge collection, maintenance and utilisation; and knowledge management tools.

57023
Communicating with Publics
Postgraduate
8cp
Analyses the social construction of publics, public opinion and image creation. Studies different models of public relations practice and draws on current theories about publics, audience and media to help students develop strategies to communicate with internal and external publics. Theories of adult learning and behaviour change are introduced to provide opportunities for self-managed life-long learning as well as to gain insights into how various publics approach change. There is a strong focus on identifying the ethical implications of decisions, action and outcomes and a lively debate on approaches to motivating, persuading or empowering publics. The attitudes, images, knowledges, behaviours and issue position of various publics are studied to enable students to assess how best to communicate with them.

57024
Managing Public Relations Campaigns
Postgraduate
8cp
Explains the concept of public relations as communication management and demonstrates the contribution and relevance of public
relations to modern organisations. A range of perspectives provides thoughtful and challenging approaches to the work of a public relations practitioner. Students learn to set goals and objectives and to plan and implement campaigns for internal and external publics. They will become confident in evaluating all aspects of their work and develop competency in cost benefit analysis and the analysis of the financial implications of their work. Public relations principles are applied to examples from students' own professional practice to develop a reflective understanding of why as well as how to approach particular issues and problems.

57026
Strategic Communication and Negotiation
Postgraduate
6cp
Analyses and critiques communication campaigns and develops expertise in using strategic planning and applying it to communication management. This involves environmental scanning, stakeholder analysis and issues management. There is an emphasis on understanding consultative processes and learning effective approaches to community consultation. Develops understanding of and expertise in negotiation strategies. Techniques of negotiation and conflict are studied to enhance the development of expertise in managing different expectations and results. Students learn a practical approach to negotiating agreement and apply it to their communication and public relations work.

59320
English for Business
Undergraduate
6cp
For non-English speaking background Business students who need to develop their written language and spoken communication skills. Focuses on the critical analysis of topics relevant to Business study, the development of essay outlines, report outlines, seminar structures, and the final preparation of an essay, a report and a seminar. Offered by the ELSSA Centre.

59330
Advertising Practice
Undergraduate
6cp
An introduction to the theory and production of advertising; the concepts used; the skills and techniques applied; the organisational structure and operation of advertising agencies; and their interrelationships with other parts of the communication industry.

59333
Advertising Strategies
Undergraduate
6cp
Examination of and practice in a variety of visual and verbal persuasion methods in television, radio, print and other media. Students will be involved in individual and group presentations of solutions to various advertising problems, and gain some insight into the analysis and valuation of advertising techniques.

59635
Business and the Media
Postgraduate
6cp
Equips Accounting students with the basic skills they need to express themselves clearly, concisely and quickly. Introduces students to the priorities, prejudices and practices of the public media, and shows them how to deal more effectively with journalists. Students gain insights into their own profession, by viewing it through an outsider's prism. Other topics include: making specialised knowledge available to the wider public; journalism culture; writing to communicate; writing news releases; structure and use of language; writing succinctly; sources; what makes an executive a useful source? how do journalists find stories? how do journalists perceive business? business press; business reporting and ethics; conflicts of interest; understanding the Budget papers; how journalists interpret the figures; research and investigative techniques; computerised research; and future practices.
65014
Chemistry (Human Movement)
Undergraduate
6cp; prerequisite: HSC Chemistry would be advantageous
Involves the study of chemical concepts in relation to the human body.

65101
Chemistry 1C
Undergraduate
6cp; prerequisite: core of HSC 2-unit Chemistry or equivalent
Provides an introduction to some fundamental concepts in chemistry. Covers: chemicals and chemical reactions; atomic structure; periodic table; chemical bonding; enthalpy changes in chemical reactions; and the structures and properties of solids. A laboratory program complements the learning experiences in the lectures and tutorials.

65201
Chemistry 2C
Undergraduate
6cp; prerequisite: 65101 Chemistry 1C or equivalent
Builds on the foundation studies in 65101. Covers: chemical equilibrium; acid-base theory; complex ions; electrochemistry; chemical kinetics; structure and bonding in carbon chemistry; chemical reactions of carbon compounds. A laboratory program complements the learning experiences in the lectures and tutorials.

65202
Organic Chemistry 1
Undergraduate
6cp; prerequisite: 65101 Chemistry 1C or equivalent
Builds on material in Chemistry 2C. Primarily concerned with the structures and chemical actions of the common families of organic compounds. Other major topics include Stereochemistry, Infrac-red Spectroscopy. Lecture and tutorial material is completed by a closely integrated set of laboratory experiences.

65306
Analytical Chemistry 1
Undergraduate
6cp; prerequisite: 65201 Chemistry 2C or equivalent
Lecture, laboratory and computer-aided instruction components of the course cover: spectroscopic methods of analysis including ultraviolet-visible spectroscopy, nuclear magnetic resonance spectroscopy, mass spectrometry; separation techniques including solvent extraction, distillation; precipitation, and a range of chromatographic methods; volumetric techniques including acid-base, redox, non-aqueous, and potentiometric methods; and errors, calibration and interpretation of analytical data.

65307
Physical Chemistry 1
Undergraduate
6cp; prerequisite: 65201 Chemistry 2C; 33190 Mathematical Modelling for Science or HSC 2-unit Mathematics
Provides students with a working knowledge of chemical thermodynamics and optical spectroscopy which can then be applied to other subjects within the course. Introduces fundamental concepts in both spectroscopy and thermodynamics and applies these principles to problem solving situations. Lectures are complemented by tutorials and practical experiments.

65410
Chemical Safety and Legislation
Undergraduate
6cp; prerequisite: 65201 Chemistry 2C or equivalent
This subject covers the following topics: the NSW Occupational Health and Safety Act; the role of various governmental agencies; toxic effects of chemicals; classification of dangerous goods; precautionary labels and material safety data sheets; corrosives, oxidisers and explosives; compressed gases; personal protective equipment (PPE) in the laboratory; waste; good laboratory practice; good manufacturing practice; and QC/QA issues.
65411
Inorganic Chemistry 1 (Transition Metal Chemistry)
Undergraduate
6cp; prerequisite: 65201 Chemistry 2C
Topics covered include: transition metals; electron configurations and oxidation states; fundamentals of coordination chemistry; crystal field theory; spectal and magnetic properties of metal complexes; and chelating agents and applications in analytical chemistry, industrial processes and medicine.

7xxxx
Regulation and Competition Law in Tele-Media
Postgraduate
6cp
Provides a foundation for the understanding and evaluation of the manner in which telecommunications is regulated. Topics include the history of the telecommunications industry, deregulation, current regulatory regimes and a comparative analysis of regulatory frameworks in other jurisdictions.

70105
Legal Research
Undergraduate
4cp
Familiarises students with the basic tools available to engage in legal research. Includes an introduction to various paper-based resources (citation, digests etc.). Introduces students to the use of computerised systems as an aid to legal research. Deals with the major CD-ROM-based products (such as Info-One LAWPAC, diskROM/Computer Law Services, Austrom/AGIS and Wilson Index to Legal Periodicals) and on-line systems (such as Info-One and Scale). Includes a brief introduction to legal resources on the Internet.

70211
Law of Contract
Undergraduate
8cp; prerequisite: 79202 Business Law; corequisites: 70105 Legal Research; 70217 Criminal Law
Deals with the legal principles as to when promises are binding, the difficulties arising out of their interpretation, how they may become defeasible, issues relating to their performance, and how they may be discharged. Topics covered include the formation of contracts (agreement, consideration, terms), vitiating factors (capacity, mistake, misrepresentation, illegality, duress, undue influence, unconscionability), discharge by performance and non-performance of contractual obligations (breach and frustration) and contractual remedies.

70113
Legal Process and History
Undergraduate
10cp
Provides students with a sound working knowledge of the Australian legal and constitutional environment. Equips students with certain legal skills – in particular, the skills of case analysis, statutory interpretation, legal problem solving and critical analysis – which are essential to the study and practice of the law. Students will be asked to consider what is law, who makes law and how and why the law has developed in the way that it has done. Examines the institutions that make up our legal system – the legislature, the Crown and the executive, the courts and the ‘legal players’ (the judge, the jury and the legal practitioner) – and explores the principles and doctrines that underpin our legal system. Considers why our legal system is so different from that of some of our regional neighbours and evaluates the strengths and weaknesses of the common law legal system. Valuable insight into the way our legal system operates may be gained from using a historical approach and this means delving back into English, as well as Australian, legal and constitutional history. Such an approach also facilitates refinement of critical analysis skills. At the end of the subject, students should have a fully developed understanding of the Western legal tradition, the place of common law in that system and the ramifications of living under a Westminster Parliamentary system as well as a federal system.

70217
Criminal Law
Undergraduate
6cp; corequisites: 70113 Legal Process and History; 70105 Legal Research
Deals with the substantive criminal law, the doctrines and rules that define the conditions of criminal liability and some aspects of the procedural law. Australian common law doctrine and the Crimes Act 1900 (NSW) are considered. Topics include the nature of crime; doctrine of mens rea and actus reus; presumption
of innocence; offences against the person; property offences; strict, vicarious and corporate liability; complicity; criminal defences; criminal investigation and procedure; drug law.

70311
Law of Tort
Undergraduate
8cp; prerequisite: 79202 Business Law; corequisites: 70105 Legal Research; 70217 Criminal Law

Discusses the functions and aims of the tort. Examines the nature of tortious liability in the light of a selection of specific torts, namely, trespass to the person, goods and land; the action on the case for wilful injuries; conversion; negligence; nuisance; and defamation. Reference is also made to defences, vicarious liability and contribution between tortfeasors.

70516
Equity and Trusts
Undergraduate
8cp; prerequisite: 70317 Real Property; corequisite: 70417 Corporate Law

Equity is a body of rules or principles which form an appendage to the general rules of the common law. The doctrines of equity developed as a response to defects in the English common law system which had resulted in rigidity and inflexibility. A knowledge of the principles of equity is therefore crucial to a complete understanding of the law in those areas of private law, particularly property and contract, where equity intervened to modify the operation of the rules of the common law. In that sense the doctrines of equity form part of the law of contract or property. Equity also developed remedies, such as the injunction, which were unknown to the common law and which have a continuing influence in public law as well as private law.

70616
Federal Constitutional Law
Undergraduate
8cp; prerequisites: 70113 Legal Process and History; 70105 Legal Research; corequisite: 70211 Law of Contract

Examines the effect of the Australian Constitution on the legal and fiscal relationship of the Commonwealth and States. In order that students develop an understanding of the techniques of judicial review in the constitutional context, a range of powers given to the Commonwealth is examined. These include trade and commerce, corporations, taxation, and external affairs. Other areas examined are explicit and implicit restrictions of power, the questions of inconsistency and intergovernmental relations. The general role of the High Court in Australian constitutional
law is considered along with the Separation of Powers Doctrine as it relates to the independence of the Judiciary.

70617
Administrative Law
Undergraduate
8cp; prerequisite: 70616 Federal Constitutional Law
Deals with the supervision of the executive arm of government by the courts and by other statutory mechanisms. Topics include the grounds of review of administrative decisions, in particular natural justice, ultra vires, jurisdictional error and error of law; remedies available at common law upon judicial review, including the prerogative writs and equitable remedies; judicial review under the Administrative Decision (Judicial Review Act) 1976 (Cwlth); review of Commonwealth decisions under the Administrative Appeals Tribunal Act, 1976 (Cwlth); role and function of the Ombudsman; if time permits, freedom of information and privacy legislation will also be touched upon, and the role of the ICAC.

71005
Practice and Procedure
Undergraduate
4cp; corequisite: 70516 Equity and Trusts
Develops students’ understanding of the process of litigation from the commencement of proceedings through to final hearings. Topics include statements of claim in contracts and torts; defence, cross-claims and replies; equitable proceedings; particulars; discovery, inspection, interrogatories; notice of motion; drafting affidavits; subpoenas; and advocacy skills.

71116
Remedies
Undergraduate
6cp; corequisite: 70516 Equity and Trusts
Deals with the range of court-ordered remedies available to a plaintiff in civil proceedings. The more common remedies are those administered at either common law or in equity. Examines damages, equitable remedies (declaration, specific performance, injunctions, Anton Pillar orders, account, equitable damages), and statutory and common law remedies for deceptive conduct. Considers bankruptcy and insolvency.

71216
Law of Evidence
Undergraduate
6cp; prerequisite: 70516 Equity and Trusts
Deals with adjectival law and the determination of how information may be presented to the court in litigation, when such information will be admissible in evidence, and how the rules of proof are applied. The inclusionary rule of relevance, the various exclusionary rules (such as hearsay, opinion, tendency, coincidence, credibility, character, privilege), and the judicial discretion to exclude will be studied, as well as the incidence and burden of proof.

76212
Revenue Law
Undergraduate
for Bachelor of Business/Bachelor of Laws students only
6cp; prerequisites: 70617 Administrative Law; 70417 Corporate Law; 70516 Equity and Trusts
Examines the legal principles that relate to revenue law in Australia. Topics include: the structure and sources of tax law; tax policy and tax reform; income – concepts of income, income from labour, property and business, statutory extensions to the income base; deductions – general and specific deductions, substantiation; capital gains tax; fringe benefits tax; tax accounting; tax administration; and tax avoidance and ethics.

77745
Negotiation
Postgraduate
6cp; prerequisite: 79771 Dispute Resolution
Provides an understanding of the theories and processes of negotiation. Concentrates on principled negotiation as taught by the Harvard Law School’s Negotiation Project. Also utilises materials from the Project. Develops students’ skills in negotiation. Covers the use of negotiation as a process of dispute resolution and for contract formation.

77746
Advanced Mediation
Postgraduate
6cp; prerequisite: 79771 Dispute Resolution
Concentrates on the micro-skills of mediation at an advanced level. Gives students an in-depth understanding of the detail of the skills and techniques used by experienced mediators.
mediators. The skills will be further developed to an advanced level. Includes co-mediation and mediation in multiparty disputes.

77749  
**Construction Industry Dispute Resolution**  
*Postgraduate*  
*6cp; prerequisite: 79771 Dispute Resolution*  
Covers the theory and practical implications of using the newer dispute resolution processes in the construction industry. Includes dispute prevention and management. This industry is recognised as one which has attracted experimentation in resolution processes. Covers the history of these processes and their successes and failures and the place of formal and informal arbitration within the industry. Studies new initiatives and current construction industry dispute resolution programs in the USA and Australia.

77761  
**Dispute Resolution in Commerce**  
*Postgraduate*  
*6cp; prerequisite: 79771 Dispute Resolution*  
Explores the application of dispute resolution theory and practical skills to the corporate environment; the causes of conflict within a corporation; and between a corporation and the outside world. Studies the range of dispute resolution processes to ascertain their relevance and the problems in applying them to the various types of dispute that occur. Students will have the opportunity to study the impediments to changing the dispute resolution culture of an organisation, and they will be encouraged to build models for implementing change in a range of corporate environments. Explores the differences in implementation between the public and private sectors and between different sectors of the corporate/business world.

77762  
**Industrial Dispute Resolution**  
*Postgraduate*  
*6cp; prerequisite: 79771 Dispute Resolution*  
Covers the history of industrial dispute resolution in Australia. Looks at the relevance of dispute resolution to the workplace and to the relationship between unions and management. As this latter is a new area for the use of mediation and dispute resolution in Australia, the subject will seek to develop a model process for such dispute resolution, particularly in view of the introduction of enterprise bargaining and the initiative to introduce mediation/dispute resolution into the industrial relations area in NSW. Input from industry will be provided.

77763  
**Community Dispute Resolution**  
*Postgraduate*  
*6cp; prerequisite: 79771 Dispute Resolution*  
Introduces a particular application of the dispute resolution for the resolution of disputes involving the community. Gives the history of community dispute resolution in Australia. (Community Justice Centres of NSW collaborate in its teaching). Topics include dispute resolution by police in crisis, consumer complaints, disputes involving the elderly, neighbourhood and family disputes. Addresses the use of dispute resolution to cover multi-party community disputes. Gives the arguments for and against the use of mediation and other forms of dispute resolution in communities, and critiques the whole movement.

77764  
**Environmental Dispute Resolution**  
*Postgraduate*  
*6cp; prerequisite: 79771 Dispute Resolution*  
Studies the use of dispute resolution in environmental disputes and the potential for developing dispute resolution processes in this area. Examines the application of dispute resolution processes to planning issues, and matters currently dealt with by the NSW Land and Environment Court. In development of students' practical skills, explores strategies which can be used for dispute resolution in multi-party disputes, for policy development and where public interest groups are involved.

77783  
**International Commercial Dispute Resolution**  
*Postgraduate*  
*6cp*  
Covers negotiation in international commercial disputes; cross-cultural commercial negotiations; transnational aspects of arbitration; arbitration as contract; statutory regulation of arbitration; international arbitration law; negotiating with the Japanese and a Middle-Eastern country; the role of dispute resolution centres; arbitration institutions; drafting and analysing arbitration agreements. A compulsory component of the course is a three-day
skills workshop. Students cannot undertake this subject if they have already completed 77751 International Commercial Arbitration.

77801
International Trade Law
Postgraduate
6cp; prerequisite: 77885 Legal Process and Legal Research or equivalent
Topics include the sale of goods; representation overseas; finance; export credits and insurance; carriage of goods; arbitration and litigation; customs law and international trade regulation.

77802
International Economic Law
Postgraduate
6cp; prerequisite: 77885 Legal Process and Legal Research or equivalent
Develops an understanding of the law governing the international economy and relations between participants in that economy. Examines the concept of international economic law including specific resource issues such as the common heritage; the deep sea bed; Antarctica; international legal regulation of investment, finance and trade; the institutions - IMG, GATT, IBRD and the relationship between national and international economic law involving such concepts as extra-territoriality, and sovereign immunity.

77807
Economic Law in the People's Republic of China
Postgraduate
6cp; prerequisite: 77885 Legal Process and Legal Research or equivalent
Provides an in-depth understanding of China's modernisation program and its interpretation of 'Economic Law'. Topics include domestic economic contract law; foreign economic contract law; and the traditional Chinese concept of 'Contract' versus communist ideology and pragmatism.

77811
Deceptive Trade Practices and Product Liability
Postgraduate
12cp (two semesters); prerequisite: 77885 Legal Process and Legal Research or equivalent
Based on an advanced study of Parts V and VI of the Trade Practices Act (and analogous legislation), topics include deceptive trade practices; remedies; unconscionable conduct; and suppliers', service providers' and manufacturers' liability. Emphasis is placed upon recent legal developments.

77812
Restrictive Trade Practices
Postgraduate
12cp (two semesters); prerequisite: 77885 Legal Process and Legal Research or equivalent
This subject represents an advanced study of recent directions in trade practices law including monopolisation, mergers, exclusive dealing, and re-sale price maintenance.

77813
Corporate Insolvency and Restructuring
Postgraduate
6cp; prerequisite: 77885 Legal Process and Legal Research or equivalent
Comprises an advanced study of corporate insolvency law. Topics include the regulating structure; secured and unsecured creditors; reservations; liquidation; schemes of arrangement; official management; the role of directors; and foreign companies and foreign proceedings.

77838
Capital Gains Tax
Postgraduate
12cp (two semesters)
Involves an in-depth study of capital gains tax (CGT) including consideration of legislative amendments since the introduction of CGT; the effects of CGT on partnerships, trusts, companies, non-residents, and death; the 'nightmare' provisions; CGT and convertible notes; CGT and roll-over provisions; current practical problems; overseas experience; the role of the CGT Subcommittee; and ATO rulings and practice.

77839
Superannuation Law
Postgraduate
6cp; prerequisite: 77885 Legal Process and Legal Research or equivalent
Provides an overall understanding of the taxation, legal and industry matters affecting superannuation. Covers history of superannuation; overview of current situation; trust deed issues; legislative framework - ITAA and OSSA and Regs, SGL; relationship of superannuation to topical issues such as
insolvency, family law, administration of companies, and surplus.

77840
Tax Administration
Postgraduate
6cp; prerequisite: 77885 Legal Process and Legal Research or equivalent
Access to timely and relevant tax-related information is crucial to the ATO's attempts to correctly assess taxpayers and to taxpayers' attempts to resist assessments. Critically analyses the rationale for and structure of the current tax administration system, and then proceeds to a detailed analysis of the key strategic elements of that system including tax audits, self-assessment, objections and appeals, as well as collection and recovery of unpaid tax. Examines alternatives for reform.

77852
Current Issues in Corporate Law
Postgraduate
6cp; prerequisite: 77885 Legal Process and Legal Research or equivalent
Based on an advanced study of current developments and central issues in corporate law, topics include issues in corporate governance and the Corporations Law Simplification Program.

77859
Computer Law
Postgraduate
6cp
Looks at the current law and its future development to deal with new forms of intellectual property related to computing and electronic data transmission; the need for management to consider risk management of computer projects; and the problems posed by computer abuse and fraud for the legal system. Emphasises the importance of law to the development of the high technology and computer-industries for the future both nationally and internationally.

77865
Introduction to Taxation Law
Postgraduate
6cp; For MBA (Professional Accounting) students
Provides an introduction to fundamental concepts and the basic structure of taxation in Australia. Emphasises the key concepts of income and deductions, and explores practical application of these concepts to individuals, companies, trusts and partnerships. Introduces specific regimes including CGT, FBT, and international taxation. Addresses tax avoidance, administration and other current topics.

77866
Taxation of Partnerships and Trusts
Postgraduate
6cp; prerequisite: 77885 Legal Process and Legal Research or equivalent
Provides a theoretical and practical overview of the taxation of partnerships and trusts and the taxation of partners and beneficiaries in respect of their interests in those entities. Topics include the calculation of net income or losses of partnerships and trusts and the allocation of net income/losses to partners and net income to beneficiaries. Considers the impact of variations in partnership and trust interests and the application of the capital gains tax provisions to dealings with these entities.

77867
Workplace Dispute Resolution
Postgraduate
6cp; prerequisite: 79771 Dispute Resolution
Explores the applications of dispute resolution theory and practical skills in the workplace. Also explores the causes of conflict within the workplace setting and the legislative requirements for dealing with workplace disputes.

Studies the range of dispute resolution processes to ascertain their relevance and the problems encountered in applying them to the various types of disputes which occur. Also examines the impediments to changing the dispute resolution culture in the workplace. Students will be encouraged to develop dispute resolution models and design systems for implementation in both the public and private sectors.

77888
Legal Regulation of the Environment
Postgraduate
6cp; prerequisite: some knowledge of commercial law is desirable
Examines the current state of environmental regulation in Australia, focusing on NSW. Looks at the obligations and opportunities for industry pursuant to their environmental responsibility and considers the alternatives to regulation, in terms of the application of economic instruments. Particularly empha-
sises ways in which new industries can
develop within the context of environmental
regulation.

79102
Law and the Digital Economy
6cp; 1 semester; prerequisite: 79202 Business
Law; availability Electronic Business sub-major
and sub-major in Information Technology Law
and sub-major in Business Law
This subject introduces the student to the legal
issues surrounding new forms of commerce
that have emerged as a result of new commu­
ications technologies. The subject focuses on
the challenges to current legal doctrines and
categories flowing from the phenomenal
spread to digital technologies and electronic
commerce, in particular, laws and policies
surrounding regulation of communications,
intellectual property, and the law of contract
and tort. The subject aims to provide both an
insight into the challenges facing the legal
system as well as a practical guide for those
wishing to do business electronically.

79161
Introduction to Insolvency Law
Undergraduate
6cp; prerequisite: 79202 Business Law or its
equivalent
Introduces students to the history of
bankruptcy; law and practice of bankruptcy;
the purposes of bankruptcy legislation and
procedures to be followed. Compares the roles
of trustee in bankruptcy with those of
corporate liquidators.

79162
Corporate Insolvency and Administration
Undergraduate
6cp; prerequisite: 79202 Business Law or its
equivalent
Topics covered include bankruptcy admini­
stration; proof of debts; mutual credit and set­
off; secured creditors; property available to
creditors; distribution and priority of debts and
the effects of discharge from bankruptcy.

79202
Business Law
Undergraduate
4cp
Introduces students to the fundamental
requirements of law in the contemporary
business environment. Every aspect of
business is now regulated by legislation and
case law. All business decisions will naturally
have a legal dimension to them and this may
involve either a potential civil or criminal
liability. Law is a dynamic subject and is
constantly changing, and thus life-long skills
need to be attained, with a strong emphasis
on efficient research. Focuses on fundamental
legal skills followed by solid business
applications, such as contract, negligence,
trade practices, the environment and others.

79211
Law for Marketing Management
Undergraduate
6cp; prerequisite: 79202 Business Law or its
equivalent
Provides students with a sound knowledge of
the relevant federal and State laws which affect
business decisions in the field of marketing,
and with an understanding of the complex
laws regulating marketing activities. Topics
include consumer protection; product liability;
product safety and standards; intellectual
property and the regulation of competition, as
well as risk assessment and compliance
strategies.

79264
Securities Market Regulations
Undergraduate
6cp; prerequisites: 79202 Business Law or its
equivalent; 79365 Company Law or its
equivalent
Develops an understanding of the regulatory
legal and financial nature of securities markets
including the process of regulation and the
various players involved, and an understanding
of the different theoretical frameworks within
which regulations can be analysed. Topics
include the process of regulation; role of the
legal regulators; role of ethics upon the market;
regulatory theories; market manipulation;
insider trading; takeovers; information
disclosure and creative accounting.

79270
Industrial and Labour Law
Undergraduate
6cp; prerequisite: 79202 Business Law or its
equivalent
Provides students with an awareness and
understanding of the legal background to
employer/employee relations, and of the
industrial system as it operates, and is changing,
within Australia. Topics include industrial
tribunals; awards; industrial action; trade
unions and employer organisations; collective bargaining and workers' compensation.

**79365**

**Company Law**

*Undergraduate*

*6cp; prerequisite: 79202 Business Law or its equivalent*

Provides students with a sound understanding of fundamental aspects of company law as it applies to the modern business corporation. Topics include incorporation, corporate constitution, promotion and pre-incorporation, company membership, duties of controlling shareholders, the raising of equity and debt, companies in difficulty, accounts and audit, reorganisation, takeovers and investigations.

**79366**

**Banking Law**

*Undergraduate*

*6cp; prerequisite: 79202 Business Law or its equivalent*

Provides students with an understanding of the manner in which banking institutions are regulated, dealing with the changes following the deregulation of banking. Topics include a historical introduction to the law relating to banking; statutory regulation of banking; the banker/customer relationship; negotiable instruments; the provision of loans and other banking facilities.

**79403**

**Law and the Manager**

*Undergraduate*

*6cp; prerequisite: 79202 Business Law or its equivalent*

Applies a selective number of legal topics to areas of interest to both public and private sector managers and highlights a range of legal situations that directly affect managers. Topics include employment law; decision making and the legal consequences of decisions; administrative law; alternative dispute resolution; intellectual property, computers and the law.

**79404**

**Law for Third Sector Managers**

*Undergraduate*

*4cp*

Introduces a basic understanding of the many strands of law which affect community managers in their work. Introduces the legal system. Considers areas of contract, company, taxation, employment and tort law which are relevant to community managers.

**79411**

**Advanced Companies and Securities Law**

*Undergraduate*

*6cp; prerequisites: 79202 Business Law or its equivalent; 79365 Company Law*

Examines certain selected topics in-depth with an emphasis on the practical and comprehensive treatment of topical areas, and develops an understanding of the operations of the securities market and the Australian Securities Commission. Topics could include regulation by the Corporations Law, securities regulation, the broker/client relationship, the control of improper activities relating to takeovers, investigation and market manipulations and the simplification reform program.

**79462**

**Revenue Law**

*Undergraduate*

*6cp; prerequisite: 79202 Business Law or its equivalent*

Develops students' conceptual and analytical skills and an appreciation of law as a strategic business tool. Concentrates on a study of the Australian income tax system including the Income Tax Assessment Act. Topics include the concepts of income and capital, assessable income, allowable deductions, capital gains tax, fringe benefits tax, tax accounting, trusts, partnerships, and anti-avoidance.

**79502**

**Law and Finance**

*Undergraduate*

*6cp; prerequisite: 79202 Business Law or its equivalent*

Introduces students to a number of relevant aspects of law relating to private sector financing, an area of law which has undergone dramatic changes over recent years, becoming more sophisticated, complex and diverse. Topics could include an evaluation of the different methods of secured and unsecured financing, liability for financial advice, taxation aspects of financing, and financial restructuring.
79603
International Business Law and Regulation
Undergraduate
6cp; prerequisite: 79202 Business Law or its equivalent
Introduces students to those legal rules which most directly affect traders doing business where there is an international element involved. Focuses on matters relating to the formation of contracts in international business transactions, municipal and international regulation of such transactions, resolution of disputes with regard to contracts, and international tortious liability.

79606
Advanced Revenue Law
Undergraduate
6cp; prerequisites: 79202 Business Law or its equivalent; 79462 Revenue Law
Builds on the principles developed in Revenue Law. Considers issues that are topical, controversial and important. Because of this, the content and style of the subject will change from year to year, reflecting developments and changed emphases. Topics could include capital gains tax, fringe benefit tax and salary packaging, taxation of retirement payments and superannuation funds, liability for professional negligence, tax ethics and tax agents.

79659
Advanced Commercial Law
Undergraduate
6cp; prerequisite: 79202 Business Law or its equivalent
Familiarises students with common commercial contractual obligations and their application to specific transactions in commercial practice. Topics can include sale of goods; insurance; credit; negotiable instruments; guarantees and intellectual property; agency, bailment, partnership and trusts.

79660
Environmental Law in Business
Undergraduate
6cp; prerequisite: 79202 Business Law or its equivalent
Examines environmental law issues as they relate to the business community. Topics covered include international environmental law; ESD; precautionary principle; natural resources management; pollution; waste management; liability of corporate officers; risk management; environmental audits; due diligence; taxes; and tradeable permits.

79662
Business Bankruptcy
Undergraduate
6cp; prerequisite: 79202 Business Law or its equivalent
Provides students with an appreciation of the requirements for those appointed to act as receivers and managers and alerts students to alternatives to insolvency. Topics include how and why receivers are appointed, provisions concerning reconstructions, compromise, amalgamations, and company administration.

79666
International Aspects of Australian Taxation Law
Undergraduate
6cp; prerequisites: 79202 Business Law or its equivalent; 79462 Revenue Law
Focuses on the offshore aspects of taxation. Although topics would vary from time to time, they could include an analysis of the concept of residence and source of income, taxation of offshore royalties, operation of double tax arrangements, and international tax planning.

79667
Indirect Taxation
Undergraduate
6cp; prerequisites: 79202 Business Law or its equivalent; 79462 Revenue Law
Introduces students to the policy implications raised by indirect taxes. Analyses options for reform and overseas experience with indirect tax systems and examines the basic principles of current indirect taxes in Australia and their practical implications. Topics focus on areas such as payroll tax, sales tax, land tax and stamp duty.

79668
Advanced Theory in Taxation
Undergraduate
8cp; prerequisite: admission to the Honours program
Introduces students to the current developments in tax laws. The subject is practice-oriented so that students who have taken this subject will be familiar with the relevant issues to be identified when confronted with a particular tax problem.
79701

**Stamp Duties**

*Postgraduate*

*6cp; prerequisite: basic knowledge of taxation*

Gives a general overview of stamp duty, the means by which stamp duty is imposed, and the major instruments and transactions which are subject to duty and most frequently encountered in daily practice. Topics to be covered include imposition and territorial nexus; assessment of duty and consequences of non-stamping; conveyances and transfers; oral transaction duty; goods, wares and merchandise exemption; land-owning companies and trusts; leases, hiring arrangements and loan securities; insurance and financial institutions duty.

79702

**Land Tax and Payroll Tax**

*Postgraduate*

*6cp; prerequisite: basic knowledge of taxation*

This subject is divided into two components. Land Tax canvases basic principles and more complex legal issues including general liability, practical aspects and administration and special matters such as jointly owned land, and ‘special trusts’. The second component explores complex taxation issues in relation to Payroll Tax, including issues of general liability; group employers; practical aspects and administration and other special matters such as relevant contracts and tax concessions.

79703

**Legal Aspects of Contracts Administration**

*Postgraduate*

*6cp*

Provides participants with an understanding of their contractual and legal responsibilities as managers. Also provides participants with the opportunity to improve their skills in the formulation and administration of technical specifications, purchasing and supply contracts through an enhanced knowledge and awareness of a range of issues affecting contract law.

79706

**Customs Duties/Levies**

*Postgraduate*

*6cp*

Covers a range of key issues including liability to duty; import licensing and quota; dumping and countervailing duties; bounties; drawback and ‘by-law for export’; appeal rights and excise duties.

79707

**International Taxation 2**

*Postgraduate*

*6cp; prerequisite: basic knowledge of tax law*

International tax planning is one of the key elements in any strategy of expansion. The appropriate tax advice will help avoid pitfalls. This subject will cover issues including a tax treatment of non-residents - industry provisions, royalties, sales in Australia by overseas manufacturers and merchants, ex-Australian profits; withholding tax - interpretive provisions, deemed interest, exclusions, recoupment and anti-avoidance legislation, dividends and interest and international tax avoidance; and transfer pricing - anti-avoidance legislation, key elements of Division 13, administrative provisions, and other considerations.

79708

**Contemporary Business Law**

*Postgraduate*

*6cp*

Provides students with an understanding of the legal system and a knowledge of a range of legal topics that are of practical relevance to managers. Develops a critical awareness of contemporary legal issues which are directly relevant to managers; explores the underlying legislation of the regulatory environment and how it impacts on management; provides access to the language and reasoning processes involved in the law by examining the relationship between jurisprudence (constitution, jurisdictions, government organs, the legal profession), ethics, morals, economics and relevant substantive areas of business law; and integrates common themes on legal theory and commercial practice with a number of substantive topics which directly impact on management decisions.

79711

**Advanced Industrial Law**

*Postgraduate*

*6cp; prerequisite: 79731 Industrial Law or its equivalent*

Develops students’ understanding of the collective aspects of the legal regulation of the employer/employee relationship introduced in the subject 79731 Industrial Law; instils an awareness of solutions to problems in this field attempted by other legal systems, and an understanding of current problems; develops the student’s skills in the preparation for the
presentation of cases before industrial tribunals. This subject completes the examination of industrial law in Australia. It seeks to develop an understanding of our industrial arbitration system and the regulation of wages and working conditions under awards at both the federal and State level.

79718
Advanced Taxation
Postgraduate
6cp; prerequisite: knowledge of taxation
This subject is concerned with taxation practice i.e. the application of various provisions of the *Income Tax Assessment Act*, the regulations thereunder and other revenue laws. The subject is not intended to be prescriptive, and variations will be made by the lecturer to cater for the interests of the students and to take account of current developments in revenue law. However, the subject does traverse current taxation problems affecting the business community and covers issues such as: recent amendments and case law; fundamentals of tax planning; S.51(1): advanced problems; partnerships; trusts; taxation and stamp duty problems in estate management, company distributions, losses both current and previous year; superannuation and employee benefits; foreign source income and tax havens; alienation of income; legislative and judicial techniques to minimise tax avoidance; objections and appeals; and other revenue laws.

79731
Industrial Law
Postgraduate
6cp
Provides an understanding of the matters encompassed by industrial law. Covers the common law and subsequent statute law relating to employer and employee, the legal regulation of the working conditions and pay of Australian employees at both the federal and State levels, the parameters of industrial law, and the employer/employee relationship in both the individual and collective aspects.

79733
Companies and Securities Law
Postgraduate
6cp
Presents a comprehensive overview of Australian company law, an integral part of current legal and commercial development in Australia, examining the provisions of the Corporations legislation and the principles of the common law. Emphasis is given to the role of the new regulator, the Australian Securities Commission; duties of directors; regulation of the capital markets; common investment schemes and contemporary issues. The course is designed for students engaged in a variety of professional and commercial occupations who would like to acquire and perfect a working knowledge of company law.

79741
Marketing Legislation in Australia
Postgraduate
6cp
Provides the marketing decision maker with a general perspective of the legal context of marketing with emphasis on examining the philosophy, development and application of marketing-related legislation. Legislation relevant to the marketing manager concerned with making product, price, promotion and distribution decisions will be reviewed and discussed.

79742
International Business Law
Postgraduate
6cp; prerequisite: basic understanding of law
Topics covered are: aspects of the law of the international sale of goods, aspects of the legal environment of the conduct of business abroad; international economic institutions (e.g. World Bank and IMF); GATT, Australia and its major trading partners, aspects of the anti-trust legislation and incentives to export; fiscal aspects of trade; the protection of Australian industry; foreign investment law; and the transnational corporation.

79752
Employment Legislation
Postgraduate
6cp; prerequisite: 79731 Industrial Law or equivalent
Considers in detail the main aspects of the Australian and NSW Industrial Arbitration Acts, together with special legislation concerning leave with pay, workers’ compensation, occupational health and safety, and anti-discrimination. A special component of this course is the study of the legislation and common law affecting industrial disputes.
79753
Current Issues in Industrial Law
Postgraduate
6cp; prerequisite: 79731 Industrial Law
Focuses on current developments and central issues in industrial relations law to ensure that students are familiar with state-of-the-art knowledge and practice in the field. Topics covered include current legislative changes and proposed changes, common law development, and the latest arbitration and judicial decisions.

79761
Industrial Dispute Resolution
Postgraduate
6cp; prerequisite: 79771, 77735 Dispute Resolution
Covers the history of industrial dispute resolution in Australia. Looks at the relevance of dispute resolution to the workplace and to the relationship between unions and management. As this latter is a new area for the use of mediation and dispute resolution in Australia, the subject seeks to develop a model process for such dispute resolution, particularly in view of the introduction of enterprise bargaining and the initiative to introduce mediation/dispute resolution into the industrial relations area in NSW. Input from industry will be provided.

79762
International Taxation 1
Postgraduate
6cp
Presents a comprehensive explanation of the many and important issues to be presently found within the international environment of business. The subject will place emphasis on the more important taxation issues and thus will be flexible enough to respond to issues as they arise.

79763
Contemporary Issues in Taxation
Postgraduate
6cp; prerequisite: 79718 Advanced Taxation
Examines key current issues in taxation within the Australian environment. As emphasis is placed on important contemporary issues, the course content and presentation may vary in order to respond to changes in legislation and practice.

79771
Dispute Resolution
Postgraduate
6cp
Introduces the theoretical and practical aspects of this newly developing area which is applicable to all professions, to business and to government. Gives an overview of the processes of dispute resolution which includes dispute prevention and minimisation, dispute management, dispute system design and dispute resolution. Topics covered include: an overview of dispute resolution processes in Australia; the theoretical basis of the recent movement; introduction to mediation and negotiation theory; communication skills; critiques of the ADR and its implication and introduction to dispute resolution programs in Australia. A compulsory component is a six-day skills training workshop.

79794
Legal Issues for Community Managers
Postgraduate
6cp; prerequisite: 21766 Managing Community Organisations
Broadly outlines appropriate areas for community managers so that students will be aware of the following: the general operation of the legal system and the nature of legal rules; the legal methods for operating a non-profit organisation; and particular areas of law which impact on the liability and responsibility of community managers.

91429
Physiological Bases of Human Movement
Undergraduate
6cp; prerequisites: 27180 Functional Kinesiology; 65014 Chemistry (Human Movement)
Examines the structure and function of the major systems of the body. Serves as an introduction to life processes in the healthy state and the physiological bases underpinning human movement.

91518
Physiological Foundations of Health 1
Undergraduate
6cp
Introduces anatomy and physiology; levels of organisation; and homeostasis. Endocrine system – the major endocrine glands and their hormones; and hormone disorders. Integumen-
Subject descriptions

Tertiary system – skin structure and function; specific and non-specific defence mechanisms; and wound healing. Musculoskeletal system – bone structure; organisation of the axial and appendicular skeleton; joints; muscular system; muscle tissues; principal skeletal muscles; and muscles and movement. Reproductive systems and development – anatomy of male and female reproductive systems; mitosis and meiosis; formation of gametes and fertilisation; hormones and the female reproductive cycle; pregnancy; and an overview of embryonic and foetal development including development of major organ systems. Measurement – scientific notation and basic mathematics. Electricity – static electricity; electric currents; magnetism; and applications of electricity in the hospital and electrical safety. Heat and temperature – heat transfer and temperature regulation of the body. The building blocks of life – molecular and ionic compounds. Ions in the body – electrolytes, acids; bases; and salts. How atoms join together to form molecules – obeying the rules of valence; polar and non-polar bonds; forces of attraction between molecules; Hydrocarbons and lipids; and the structure of lipid bilayers.

91519
Physiological Foundations of Health 2
Undergraduate
6cp
The nerve cell; the nerve impulse and its propagation; and synaptic transmission. Nervous system organisation – the peripheral and autonomic nervous system; the segmental nature of the spinal cord; spinal and autonomic reflexes; the cranial nerves; and an introduction to main functional areas of the brain. Voluntary movement – the neural pathway; light and sound; biologically important families of carbon compounds; and chemical reactions in digestion and excretion. Gastrointestinal system – anatomy and histology of the gastrointestinal tract; digestion and its control; absorption of nutrients; the hepatic portal system; the structure of the liver and its role in metabolism; and fluids. Quantities of chemical substance – moles; solutions and their concentrations; osmosis; and fluid balance in the body tissues. Cardiovascular system – structure of blood vessels and their distribution; heart function; and blood pressure. The chemical basis for respiration and acid/base balance – chemical equilibrium, with acids and bases, pH and buffers; acidosis and alkalosis; and gases. Respiratory system – gross and fine anatomy; mechanism of breathing; gas exchange and gas transport; role of haemoglobin; and oxygen dissociation curves. Renal system – gross anatomy and histology of the kidney; waste product elimination; ultrafiltration and urine production; water and electrolyte balance; principles of absorption; metabolism and excretion of drugs and how they relate to onset and duration of action; mechanism of action and side effects of therapeutic drugs that affect organ systems; principles of anaesthesia and analgesia; interactions of drugs both beneficial and adverse; problems of toxicity, tolerance and addiction; and clinical toxicology and antidotal therapy.

91520
Pathophysiology 1
Undergraduate
6cp; prerequisite: 91519 Physiological Foundations of Health 2
Cellular homeostasis and normal cellular growth and development; diseases of the blood; the immune system and its role in resistance to disease; the main groups of microorganisms which affect humans, their epidemiology and methods of limiting their spread and controlling infection; and alterations in nutrition and metabolism.

91521
Pathophysiology 2
Undergraduate
6cp; prerequisite: 91520 Pathophysiology 1
The major classes of cardiovascular disorders and their evolution from normal control mechanisms; the major respiratory disease processes and their relationship to normal respiratory function and defence mechanisms; the major renal disorders including acute and chronic renal failure; the major types of fluid and electrolyte disturbances and their contribution to altered homeostasis; alterations in nervous system function; and basic principles of pharmacology with specific emphasis on drugs used in the treatment of cardiovascular, respiratory, renal and nervous system disorders.

92112
Health Care in Australia
Undergraduate
6cp
Examines the Australian health care system and its history. Discusses federal and State responsibilities, how health policy is made and enacted, political ideologies and health care
provision, the relationship between policy and power in health service provision. Considers the organisation and the delivery of health care services at a macro level, conflicts in resource allocation and the public vs private debate.

92113
Trends in Health Care
Undergraduate 6cp
Explores trends in both health policy and health service provision. Considers the demographic and epidemiological characteristics of the Australian population and the influence these have on health service provision; current federal and State initiatives directed at meeting the needs of identified population groups; and the role and the impact of technology.

92114
Health Services Management
Undergraduate 6cp
Explores organisational structures in health care. Considers the nature of interprofessional relationships in health care, changes in the role and function of health care managers and the nature of hospitals, their structure, funding and service provision. Government policy in health service funding, the relationship between health outcomes, bureaucracy and professional socialisation are also discussed.

92115
Health Planning and Evaluation
Undergraduate 6cp
Discusses a range of issues relating to planning and evaluating health care services including workforce planning, outcome measures in health, best practice, peer review, professional associations, and disciplinary bodies and procedures.

92775
Contemporary Issues in Health Care
Postgraduate 6cp
Expands students’ awareness and understanding of current issues and their impact within the health care system. Issues addressed have a State, national and international focus. It is anticipated that the topical issues discussed will provoke inquiry and encourage students to define their position and role as learner, practitioner, professional and leader. Provides scope for the inclusion of topical issues as they arise.

92790
Evidence-Based Practice
Postgraduate 6cp; weekly or intensive mode
Expands students’ understanding of, and commitment to, the development of evidence-based nursing practice. Develops a broad understanding of quantitative approaches to nursing research without becoming preoccupied with statistical analysis. Develops students’ ability to evaluate research findings and extract their clinical relevance.

92794
Politics, Power and Policies in Health Care
Postgraduate 6cp
Students will be given the opportunity to explore policies that affect health care from a number of perspectives. The influence and effects of the various interest groups, and the effect of differing ideologies on the process of policy making will be analysed.

92886
Qualitative Research Processes
Postgraduate 6cp; weekly or intensive mode
Develops further the students’ understanding of qualitative research. Explores issues related to the philosophical underpinnings of qualitative research; the various methodologies used; and congruence between methodology, method, analysis and dissemination of findings.

92889
Quantitative Research Design
Postgraduate 6cp; weekly or intensive mode
Continues the development of research knowledge and skills for students interested in quantitative methods, focusing on the application of more complex experimental, quasi-experimental, and correlational designs in nursing research. Deepens students’ understanding of univariate and multivariate research designs.
INTERNATIONAL STUDIES
SUBJECTS

50140
Comparative Social Change
(Faculty of Humanities and Social Sciences)
8cp; 4hpw
The aim of this subject is to provide students with an understanding of the processes of modernisation and social change in a comparative context using case studies in countries of Western Europe, Latin America, East and South-East Asia. The lectures will highlight a number of key issues, for example whether the processes of social change are universal or specific; the consequences of modernisation in and for the economy, politics, society, culture and ideology of non-Western societies; and whether the established Eurocentric analytical models are still useful in understanding the modern world. It will be emphasised that differing interpretations of modernisation flow from various relations of power which lead to a multiplicity of views on its meanings and significance.

971111, 972111, 973111, 974111
Chinese Language and Culture 1
8cp; 6hpw; prerequisite: nil
Chinese 1 aims at developing in students a survival communicative ability in basic social interactions. It teaches students Pinyin, the official transcription system, as a guide to the pronunciation of the Chinese language, and some basic structures and devices of the language. Students are expected to know about 300 Chinese characters by the end of this unit.

Chinese Language and Culture 2
8cp; 6hpw; prerequisite: Chinese 1
Chinese 2 continues to develop in students a survival communicative ability in basic social interactions. It also introduces students to some of the basic structures and devices of the language. Students are expected to know about 600-800 Chinese characters by the end of this unit.

Chinese Language and Culture 3
8cp; 6hpw; prerequisite: Chinese 2 or HSC Chinese
Chinese 3 is the entry point for students who have completed HSC 2/3 Unit Chinese and who first learnt Chinese at school in Australia.
Chinese 3 aims at further developing students' oral communicative competence in basic social interactions. More written texts will be gradually introduced to enhance the ability of students to use Chinese characters. The basic structures and devices of the language will be reinforced. Students are expected to know about 1,200 Chinese characters by the end of this unit.

**Chinese Language and Culture 4**

*8cp; 2nd semester, 6hpw; prerequisite: Chinese 3*

Chinese 4 is the second unit for students who have completed HSC 2/3 Unit Chinese.

Chinese 4 aims at further developing students' communicative competence in basic social interactions. More written texts are introduced to enhance the ability of students to use Chinese characters. The basic structures and devices of the language are also reinforced. Students are expected to know about 1,600 Chinese characters by the end of this unit.

**Chinese Language and Culture 5**

*8cp; 1st semester, 6hpw; prerequisite: Chinese 4*

Chinese 5 is the third unit for students who first learnt Chinese at school in Australia and obtained HSC-level Chinese.

Chinese 5 aims at further developing students' communicative competence in general social interactions. While reinforcing the macro-skills of reading, writing, listening and speaking, this unit will focus on practical writing skills. Students are expected to know about 2,000 Chinese characters by the end of this unit.

**Chinese Language and Culture 6**

*8cp; 6hpw; prerequisite: Chinese 5*

Chinese 6 is the fourth subject for students who have obtained HSC 2/3 Chinese with basic communicative skills and the ability to undertake In-country Study in China.

Chinese 6 aims at further developing students' communicative competence in general social interactions. While reinforcing basic structures and devices of the language, this unit will further develop students' writing skills. Students are expected to know about 2,500 Chinese characters by the end of this unit.

**Chinese Language and Culture 7**

*8cp; 4hpw; prerequisite: a working knowledge of Chinese characters as well as communicative competence in a Chinese language other than Modern Standard Chinese.*

Chinese 7 is for students who have a working knowledge of Chinese characters as well as communicative competence in a Chinese language other than Modern Standard Chinese.

This unit aims at developing communicative competence to meet students' needs in social and professional interactions where Modern Standard Chinese (also known as Mandarin, Putonghua or Guoyu) is used. Simplified characters, pronunciation, intonation and situational Chinese usages are the focus of class instruction.

**Chinese Language and Culture 8**

*8cp; 4hpw; prerequisite: Chinese 7 or equivalent*

This unit aims at developing a communicative competence at a more sophisticated level. Students are exposed to a range of Chinese texts in varied socio-cultural contexts to master Chinese for different purposes, and are provided with opportunities to further improve speaking and listening skills through discussions of the texts and making cross-cultural comparisons.

**Chinese Language and Culture 9**

*8cp; 4hpw; prerequisite: Chinese 8 or equivalent*

This unit aims at developing in students a high level of communicative competence required for understanding various electronic and published media articles, correspondence and texts related to contemporary society where Modern Standard Chinese (also known as Mandarin, Putonghua or Guoyu) is used. Students are exposed to a range of Chinese texts to master Chinese for different purposes, and are provided with opportunities to maintain speaking and listening skills through discussion of texts.

**Chinese Language and Culture 10**

*8cp; 4hpw; prerequisite: Chinese 9 or equivalent*

This unit aims at further developing in students a high level of communicative competence in reading and writing to meet students' needs in social and professional interactions where Modern Standard Chinese (also known as Mandarin, Putonghua or
Guoyu) is used. Students are exposed to a range of diverse texts of modern Chinese literature, history, language and culture to master written Chinese for different purposes, and are provided with further opportunities to maintain speaking and listening skills through discussion of the texts.

971121, 972121, 973121, 974121
Cantonese Language and Culture A-1
8cr; 1st semester, 6hpw; prerequisite: nil
Cantonese A-1 is the first subject in the Cantonese A program. It is designed to provide students who have no prior knowledge of Cantonese with basic survival skills in language and culture, and the ability to undertake In-country Study in South China.

This subject aims at developing in students a survival communicative ability in basic social interactions. It also deals with the basic language structures and devices of Cantonese. Students will be taught the basic structures of Chinese writing and are expected to know about 150 Chinese characters by the end of the subject.

Cantonese A-1 consists of 78 hours of classroom instruction, involving many interactive group and pair-work activities. Audiovisual equipment and computers will be used to facilitate teaching and learning. A communicative approach is adopted for classroom instruction and students are expected to participate actively in all classroom activities in the process of acquiring language skills. The teaching incorporates an introduction to Cantonese culture and helps students to appreciate the wider cultural ramifications of Cantonese in various contexts.

Cantonese Language and Culture A-2
8cr; 2nd semester, 6hpw; prerequisite: Cantonese A-1
Cantonese A-2 is the second subject in the Cantonese A program. It is designed to provide students who have no prior knowledge of Cantonese with basic survival skills in language and culture, and the ability to undertake In-country Study in South China.

This subject aims at developing in students a communicative and linguistic competence in general social interactions. It also deals with the language structures and devices of Cantonese. Discourse features such as registers and polite forms will be discussed. More Cantonese vocabulary and idiomatic expressions will be introduced. Students are expected to know about 500 Chinese characters by the end of the subject.

Cantonese A-2 consists of 78 hours of classroom instruction, involving many interactive group and pair-work activities. Audiovisual equipment and computers will be used to facilitate teaching and learning. A communicative approach is adopted for classroom instruction and students are expected to participate actively in all classroom activities in the process of acquiring language skills. The teaching incorporates an introduction to Cantonese culture and helps students to appreciate the wider cultural ramifications of Cantonese in various contexts.

Cantonese Language and Culture A-3
8cr; 1st semester, 6hpw; prerequisite: Cantonese A-2
Cantonese A-3 is the third subject in the Cantonese A program. It is designed to provide students who have no prior knowledge of Cantonese with basic survival skills in language and culture, and the ability to undertake In-country Study in South China.

This subject aims at developing in students a communicative and linguistic competence in general social interactions. It also deals with the language structures and devices of Cantonese Discourse features such as registers and polite forms will be discussed. More Cantonese vocabulary and idiomatic expressions will be introduced. Students are expected to know about 500 Chinese characters by the end of the subject.

Cantonese A-3 consists of 78 hours of classroom instruction, involving many interactive group and pair-work activities. Audiovisual equipment and computers will be used to facilitate teaching and learning. A communicative approach is adopted for classroom instruction and students are expected to participate actively in all classroom activities in the process of acquiring language skills. The teaching incorporates an introduction to Cantonese culture and helps students to appreciate the wider cultural ramifications of Cantonese in various contexts.

Cantonese Language and Culture A-4
8cr; 2nd semester, 6hpw; prerequisite: Cantonese A-3
Cantonese A-4 is the last subject in the Cantonese A program. It is designed to provide students who have no prior knowledge of Cantonese with basic survival skills in language and culture, and the ability to undertake In-country Study in South China.

Cantonese A-4 consists of 78 hours of classroom instruction, involving many interactive group and pair-work activities. Audiovisual equipment and computers will be used to facilitate teaching and learning. A communicative approach is adopted for classroom instruction and students are expected to participate actively in all classroom activities in the process of acquiring language skills. The teaching incorporates an introduction to Cantonese culture and helps students to appreciate the wider cultural ramifications of Cantonese in various contexts.
This subject aims at developing in students a communicative and linguistic competence in general social interactions. It deals with the more complex language structures and devices of Cantonese. A number of Cantonese discourse features will be discussed. More Cantonese vocabulary and idiomatic expressions will be introduced. Students are expected to know about 800 Chinese characters by the end of the subject.

Cantonese A-4 consists of 78 hours of classroom instruction, involving many interactive group and pair-work activities. Audiovisual equipment and computers will be used to facilitate teaching and learning. A communicative approach is adopted for classroom instruction and students are expected to participate actively in all classroom activities in the process of acquiring language skills. The teaching incorporates an introduction to Cantonese culture and helps students to appreciate the wider cultural ramifications of Cantonese in various contexts.

Cantonese Language and Culture B-1
8cp; 1st semester, 4hpw; prerequisite: a working knowledge of one of the Chinese languages

Cantonese B-1 is the first of a two-subject language program for students who have a working knowledge of at least one Chinese language to prepare them for a year of In-country Study in South China.

This subject aims at developing the students' communicative and linguistic competence in general social interactions where Cantonese is used. The Yale romanisation for transcribing Cantonese and pronunciation will be discussed in class. Situational Cantonese usages in different contexts are the main focus of class instruction. Discourse features of Cantonese will also be discussed. The teaching incorporates an introduction to Cantonese culture and helps students to appreciate the wider cultural ramifications of Cantonese in various contexts.

This subject consists of 52 contact hours of classroom instruction, involving many interactive group and pair-work activities. Audiovisual equipment and computers will be used to facilitate teaching and learning. The teaching approach adopted is 'communicative' and students are expected to participate actively in all classroom activities in the process of acquiring language skills.

971211, 972211, 973211, 974211

Japanese Language and Culture 1
8cp; 1st semester, 6hpw; prerequisite: nil

This is the first subject in the Japanese Language and Culture program. It is designed as the first step in providing students with no prior knowledge of Japanese with the basic survival language skills and socio-cultural awareness to enable them to undertake In-country Study in Japan.

While focusing primarily on the development of speaking and listening skills, this subject also provides a working knowledge of the hiragana and katakana scripts and approximately 50 kanji. Socio-cultural aspects are integrated into the program as they relate to the need for students to learn to use the language appropriately in various social and cultural contexts.

Japanese Language and Culture 2
8cp; 2nd semester, 6hpw; prerequisite: Japanese 1

This is the second in a series of four units for students with no prior knowledge of the Japanese language. By the completion of this subject, students should be able to demonstrate
the language and socio-cultural skills required to establish and maintain relationships in social or work-related spheres, and fulfill basic survival needs in a Japanese-speaking environment.

Emphasis is given to the development of speaking and listening skills, but students will also further develop their reading and writing skills. Besides kana they will know approximately 150 kanji by the end of the unit. Socio-cultural aspects are introduced into the program as they relate to the need for students to learn to use the language appropriately in various social and cultural contexts.

Japanese Language and Culture 3
8cp; 1st semester, 6hpw; prerequisite: Japanese 2 or HSC Japanese

Japanese 3 is the third in a series of four units for students with no prior knowledge of the Japanese language, or first in a series of four units for students who have successfully completed HSC-level Japanese. By the end of the subject, students are expected to have achieved survival proficiency, and be able to satisfy survival needs and limited social needs relating to topics and situations covered.

At the end of the subject, students are expected to have developed their listening, speaking, reading and writing skills in order to be able to communicate in everyday situations, and be able to demonstrate an awareness of the social implications of language and behaviour. It is expected that students will know approximately 250 kanji by the end of the unit.

Japanese Language and Culture 4
8cp; 2nd semester, 6hpw; prerequisite: Japanese 3

Japanese 4 is the fourth in a series of four units for beginners. It is also the second in a series of four units for those who have successfully completed the 2-unit HSC course or its equivalent and aim to further develop Japanese listening, speaking, reading and writing skills. By the end of the subject, students are expected to have achieved limited social proficiency, and be able to interact in limited social, study and work contexts with Japanese speakers in Japan or Australia. They will also have learnt approximately 350 kanji.

Japanese Language and Culture 5
8cp; 1st semester, 6hpw; prerequisite: Japanese 4

Japanese 5 is the third in a series of four units in the post-HSC series, and is for those who have successfully completed either Japanese 4 or its equivalent and aim to further develop listening, speaking, reading, writing and cultural skills. By the end of the subject, students are expected to have achieved limited social proficiency, and be able to satisfy routine social and limited work demands. The emphasis is on the development of the language and cultural sensitivity required in both formal and informal situations. By the end of the subject, students are expected to be able to read and write approximately 470 kanji.

Japanese Language and Culture 6
8cp; 2nd semester, 6hpw; prerequisite: Japanese 5

Japanese 6 is the final subject in a series of four units in the post-HSC series and is for those who have successfully completed either Japanese 5 or its equivalent. By the end of this subject, students are expected to have achieved minimal vocational proficiency, and be able to speak the language with sufficient structural accuracy and vocabulary to participate effectively in many formal and informal conversations on practical, social and limited vocational topics. The emphasis is on the development of the language and cultural sensitivity required in both formal and informal situations. By the end of the subject, students should be able to read simple prose and read and write approximately 590 kanji.

Indonesian Language and Culture 1
8cp; 1st semester, 6hpw; prerequisite: nil

Indonesian 1 is the first in a series of four units for students with no prior knowledge of Indonesian. By the end of the subject, students are expected to have achieved elementary proficiency and be able to satisfy immediate needs using learnt utterances and phrases relating to the following 10 themes: self and family; direction and location; time; food and drink; buying and selling; description; archipelago and continent; travel and transport; media and the press; end love and sex.

Students are expected to develop a vocabulary of about 800-1,000 words, a knowledge of basic word-order patterns, and a familiarity with the
alphabet and pronunciation patterns. This subject prepares people to exchange basic personal information using spelling and numeracy skills for names, addresses and time references etc.; engage in brief conversations within the range of themes covered; and express immediate needs with socially appropriate phrases. Students should be able to understand a limited amount of everyday written language e.g. on signs and in menus.

**Indonesian Language and Culture 2**

8cp; 2nd semester, 6hpw; prerequisite: Indonesian 1

Indonesian 2 is the second in a series of four units for students with no prior knowledge of Indonesian. By the end of the subject, students are expected to have achieved minimum survival proficiency, and be able to satisfy basic survival needs and minimum courtesy requirements relating to the following 10 themes: health; house and home; contacts and appointments; education and study; career and occupations; city and village; religion and beliefs; personalities and biography; letters; and Australia–Indonesia relations.

Students are expected to develop a vocabulary of about 1,600–2,000 words, a knowledge of common word-order patterns and the ability to recognise common affixational patterns. This subject prepares students to make simple appointments and arrangements with people, exchange personal background information, engage in five- to ten-minute conversations on the themes covered, and express feelings, likes and dislikes. Students should be able to understand short, practical pieces of written information, such as familiar signs, commands and timetables, and develop skills for reading longer, less familiar written forms.

**Indonesian Language and Culture 3**

8cp; 1st semester, 6hpw; prerequisite: Indonesian 2 or HSC Indonesian

Indonesian 3 is the third in a series of four units for students with no prior knowledge of Indonesian, or first in a series of four units for students who have successfully completed HSC-level Indonesian. By the end of the subject, students are expected to have begun to develop minimum social proficiency, and be able to satisfy limited routine social and work demands. The subject covers the following themes: the role of women; employment/labour; employers; mainstream/marginal cultures; literature; unity and diversity (multiculturalism); the environment; and Australia–Indonesia relations.

Students are expected to have developed a vocabulary of about 3,000 words by the end of the subject, a knowledge of common word-order patterns, and the ability to recognise, predict and use common affixational patterns. This subject prepares students to engage in short conversations on familiar issues without undue hesitation and with an ability to express their opinion. Students should also be able to comprehend simple texts, such as messages, instructions and directions, and write simple formulaic letters.

**Indonesian Language and Culture 4**

8cp; 2nd semester, 6hpw; prerequisite: Indonesian 3

Indonesian 4 is the fourth in a series of four units for students with no prior knowledge of Indonesian, or second in a series of four units for students who have successfully completed HSC-level Indonesian. By the end of the subject, students are expected to have begun to develop minimum social proficiency, and be able to satisfy limited routine social and work demands. The subject covers the following themes: perceptions of the past; the origin of the New Order; aspirations; achievements; problems; political culture and participation; and class and social stratification; and gender.

Students are expected to develop a vocabulary of about 4,000 words by the end of the subject, a knowledge of common word-order patterns, and the ability to recognise, predict and use common affixational patterns. This subject prepares students to engage in short conversations on familiar issues without undue hesitation and with an ability to express their opinion. Students should also be able to discuss familiar events and topics, and give opinions without undue hesitation and with the ability to justify themselves. Students should also be able to deal with short texts and correspond with Indonesians on familiar topics.

**Indonesian Language and Culture 5**

8cp; 1st semester, 6hpw; prerequisite: Indonesian 4

Indonesian 5 is the third in a series of four units for students who have successfully completed HSC-level Indonesian. By the end of the subject, students are expected to have developed minimum social proficiency, and be able to satisfy routine social and limited work demands. The subject covers the following themes: perceptions of the past; the origin of the New Order; aspirations; achievements; problems; political culture and participation; class and social stratification; and gender.
Students completing the subject should have a vocabulary of about 5,000 words. They should have the ability to recognise and reflect on ways in which vocabulary and grammatical patterns vary in different situational contexts, and how choices in grammar and vocabulary can convey the point of view of the writer and speaker beyond the basic transmission of information. This subject prepares students to discuss a range of social topics and a limited range of work topics, and present rudimentary arguments or points of view expressed with socially appropriate phrases to limit possible misunderstanding or offence. Students should also be able to understand the general thread of articles and documents on familiar topics, and write short texts, such as letters and instructions.

**Indonesian Language and Culture 6**

*8cp; 2nd semester, 6hpw; prerequisite: Indonesian 5*

Indonesian 6 is the fourth in a series of four units for students who have successfully completed HSC-level Indonesian. By the end of the subject, students are expected to have begun to develop a minimum vocational language proficiency, and be able to satisfy all routine social and a significant range of work demands. The subject covers the following themes: social and cultural pluralism; national and economic development; science; technical and scientific development; religion and popular culture; and internationalisation.

Students should have a vocabulary of about 6,000 words by the end of the subject. They should also have the ability to vary their language appropriately in accordance with a range of social and work situations, and be able to recognise and manipulate vocabulary and grammatical patterns. This subject prepares students to be able to present arguments or points of view, with the ability to frame them in a style that is appropriate to the social, cultural and interpersonal factors present. Students should also be able to understand articles and documents on familiar topics, and write short texts, such as letters, descriptions and simple explanations.

**Thai**

Thai is offered to UTS students through the language program offered jointly by the University of Sydney and Macquarie University. The program is designed to allow complete beginners in Thai to reach a survival level that will allow them to continue their studies in Thailand. If student numbers permit, classes will be available on UTS campuses.

**971331, 972331, 973331, 974331**

**Malaysian Language and Culture 1**

*8cp; 1st semester, 6hpw; prerequisite: nil*

Malaysian 1 is the first in a series of four units for students with no prior knowledge of the language. By the end of the subject, students are expected to have achieved elementary proficiency and be able to satisfy immediate needs using learnt utterances and phrases relating to the following 10 themes: self and family; direction and location; time; food and drink; buying and selling, description; archipelago and continent; travel and transport; media and the press; and love and sex.

Students are expected to develop a vocabulary of about 800–1,000 words, a knowledge of basic word order patterns and familiarity with the alphabet and pronunciation patterns. This subject prepares people to exchange basic personal information using spelling and numeracy skills for names, addresses and time references, to engage in brief conversations within the range of themes covered, and express immediate needs with socially appropriate phrases. Students should be able to understand a limited range of everyday written language, such as signs and items and prices on menus.

**971332, 972332, 973332, 974332**

**Malaysian Language and Culture 2**

*8cp; 2nd semester, 6hpw; prerequisite: Malaysian 1*

Malaysian 2 is the second in a series of four units for students with no prior knowledge of Malaysian. By the end of the subject, students are expected to have achieved minimum survival proficiency and to be able to satisfy basic survival needs and minimum courtesy requirements relating to the following 10 themes: health; house and home; contacts and appointments; education and study; career and occupations; city and village; religion and belief; personalities and biography; letters; and Australia–Malaysia relations.

Students are expected to develop a vocabulary of about 1,600–2,000 words, a knowledge of common word order patterns and the ability to recognise common affixational patterns. This subject prepares students to make simple appointments and arrangements with people, exchange personal background information,
engage in five- to ten-minute conversations on the themes covered and express limited feelings, likes and dislikes. Students should be able to understand short practical written information, such as familiar signs, commands and timetables and develop skills for reading longer, less familiar written forms.

**Malaysian Language and Culture 3**

*8cp; 1st semester, 6hpw; prerequisite: Malaysian 2*

Malaysian 3 is the third in a series of four units for students with no prior knowledge of Malaysian, or first in a series of four for students who have prior knowledge or experience in Malaysian. By the end of the subject, students are expected to have achieved survival proficiency and be able to satisfy survival needs and limited social demands relating to the following themes: personal relations; education – young generation; students; politics; ‘pop’ culture; religion and belief; tourism and its influences; trade; economics; and business.

Students are expected to develop a vocabulary of about 3,000 words by the end of the subject, a knowledge of common word order patterns and the ability to recognise, predict and use common affixational patterns. This subject prepares students to engage in short conversations on familiar issues without undue hesitation and with a limited ability to express opinions. Students should also be able to comprehend simple texts, such as messages, instructions and directions and write simple formulaic letters.

**Malaysian Language and Culture 4**

*8cp; 2nd semester, 6hpw; prerequisite: Malaysian 3*

Malaysian 4 is the fourth in a series of four units for students with no prior knowledge of Malaysian, or second in a series of four units for students who have prior knowledge or experience of Malaysian. By the end of the subject, students are expected to have begun to develop ‘minimum social proficiency’ and be able to satisfy limited routine social and work demands demonstrating the following themes: role of women; employment/labour; employers; mainstream/marginal cultures; literature; unity and diversity (multi-culturalism); the environment; and Australia-Malaysia relations.

Students are expected to have developed a vocabulary of about 4,000 words and an ability to recognise, predict and use common word order and affixational patterns and recognise and respond to a limited range of social situations. This subject prepares students to discuss familiar events and topics and give opinions without undue hesitation and with a limited ability to justify these opinions. Students should also be able to deal with short texts and correspond with Malaysians on familiar topics.

**Malaysian Language and Culture 5**

*8cp; 1st semester, 6hpw; prerequisite: Malaysian 4*

Malaysian 5 is the third in a series of four units for students who have had prior experience of Malaysian. By the end of the subject, students are expected to have developed minimum social proficiency and be able to satisfy routine social and limited work demands. The subject covers the following themes: perceptions of the past; aspirations, achievements, problems; political culture and participation; class and social stratification; and gender.

Students completing the subject should have a vocabulary of about 5,000 words, and the ability to recognise and reflect on ways in which vocabulary and grammatical patterns vary according to situation, and how choices in grammar and vocabulary can convey the point of view of the reader and speaker beyond the basic transmission of information. This subject prepares students to discuss a range of social topics and limited range of work topics and present rudimentary arguments or points of view expressed with socially appropriate phrases to limit possible misunderstanding or offence. Students should also be able to understand the general thread of articles and documents on familiar topics and write short texts, such as letters and instructions.

**Malaysian Language and Culture 6**

*8cp; 2nd semester, 6hpw; prerequisite: Malaysian 5*

Malaysian 6 is the fourth in a series of four units for students who have had prior experience of Malaysian. By the end of the subject, students are expected to have begun to develop minimum vocational proficiency and to be able to satisfy all routine social and a significant range of work demands relating to the following themes: social and cultural pluralism; national and economic development; science; technical and scientific development; religion and popular culture; and internationalisation.
Students should have a vocabulary of about 6,000 words by the end of the subject, the ability to vary their language appropriately in accordance with a limited range of social and work situations, be able to recognise and manipulate a choice of vocabulary and grammatical patterns on a limited level and to convey certain points of view. This subject prepares students to discuss a range of social topics and limited range of work topics, to present arguments or points of view, and to frame these in a style appropriate to the social, cultural and interpersonal factors present. Students should also be able to understand articles and documents on familiar topics and write short texts, such as letters, descriptions and simple explanations.

971414/5, 972414/5, 973414/5, 974414/5

French Language and Culture
The French language programs offered through the Institute for International Studies are those taught at the University of Sydney and Macquarie University. Both universities teach the language at various levels, accommodating different levels of proficiency. The French subjects develop communicative skills in listening, speaking, reading and writing, and introduce students to literary texts. Students also learn about French culture and contemporary society.

971424/5, 972424/5, 973424/5, 974424/5

German Language and Culture
The German language programs offered through the Institute for International Studies are those taught at the University of Sydney and Macquarie University. Both universities teach the language at various levels, accommodating different levels of proficiency. The German subjects develop communicative skills in listening, speaking, reading and writing, and introduce students to literary texts. Students also learn about German culture and contemporary society.

971434/5, 972434/5, 973434/5, 974434/5

Italian Language and Culture
The Italian language programs offered through the Institute for International Studies are those taught at the University of Sydney and Macquarie University. Both universities teach the language at various levels, accommodating different levels of proficiency. The Italian subjects develop communicative skills in listening, speaking, reading and writing, and introduce students to literary texts. Students also learn about Italian culture and contemporary society.

971501, 972501, 973501, 974501

Spanish Language and Culture 1
8cp; 1st semester, 6hpw; prerequisite: nil
Spanish 1 is the first in a series of four units designed to provide students who have no prior knowledge of the Spanish language with basic survival skills in language and culture, and the ability to undertake In-country Study in Latin America or Spain.

By the end of the subject, students would be expected to have achieved ‘elementary proficiency’ and be able to satisfy immediate communication needs using expressions and phrases they have learnt that are required in basic social interaction. The program allows for the development of listening, speaking, reading and writing skills, and an understanding of the socio-cultural contexts in which the language is used. Students gain, in particular, an awareness of the background of Hispanic countries. Students also develop strategies for predicting the meaning of new expressions and anticipating ways of expressing new meanings.

Spanish 1 consists of 78 hours of classroom instruction. The approach adopted is ‘communicative’ and provides students with many opportunities to interact and use the language in various social and cultural contexts. Audiovisual equipment and computers will be used to facilitate learning.

Spanish Language and Culture 2
8cp; 2nd semester, 6hpw; prerequisite: Spanish 1
Spanish 2 is the second in a series of four units designed to provide students who have no prior knowledge of the Spanish language with basic survival skills in language and culture, and the ability to undertake In-country Study in Latin America or Spain.

By the end of the subject, students would be expected to have achieved ‘minimum survival proficiency’ in speaking, listening, reading and writing, and be able to satisfy immediate communication needs and minimum courtesy requirements in basic social interactions. Students will also develop an understanding
of the socio-cultural contexts in which the language is used and further communication strategies.

Spanish 2 consists of 78 hours of classroom instruction. The approach adopted is ‘communicative’ and provides many opportunities for the students to interact and use the language in various social and cultural contexts. Audiovisual equipment and computers will be used to facilitate learning.

**Spanish Language and Culture 3**

*8cp; 1st semester, 6hpw; prerequisite: Spanish 2 or HSC Spanish*

Spanish 3 is the third in a series of four units for students with no prior knowledge of the Spanish language, or first in a series of four units for students who have successfully completed HSC-level Spanish or its equivalent. It provides students with basic survival skills in language and culture, and the ability to undertake In-country Study in Latin America or Spain.

By the end of the subject, students would be expected to have achieved a communicative competence in speaking, listening, reading and writing skills in order to be able to satisfy all ‘survival’ needs and limited social needs. They would also be expected to have developed an awareness of the various social and cultural contexts in which the language is used. In this subject, students develop the ability to understand the general content of magazine and newspaper articles.

Spanish 3 consists of 78 hours of classroom instruction. The approach adopted is ‘communicative’ and provides many opportunities for the students to interact and use the language in various social and cultural contexts. Audiovisual equipment and computers will be used to facilitate learning.

**Spanish Language and Culture 4**

*8cp; 2nd semester, 6hpw; prerequisite: Spanish 3*

Spanish 4 is the fourth in a series of four units for students with no prior knowledge of the Spanish language, or second in a series of four units for students who have successfully completed Spanish 3 and HSC-level Spanish or its equivalent. It provides students with basic survival skills in language and culture, and the ability to undertake In-country Study in Latin America or Spain.

By the end of the subject, students would be expected to have begun to develop the communication skills required to satisfy limited routine social and work demands. They would also be expected to have developed an awareness of the various social and cultural contexts in which the language is used. In this subject, students learn to express opinions, discuss education, entertainment and travel, and develop the language skills and background knowledge required to find accommodation.

Spanish 4 consists of 78 hours of classroom instruction. The approach adopted is ‘communicative’ and provides many opportunities for the students to interact and use the language in various social and cultural contexts. Audiovisual equipment and computers will be used to facilitate learning.

**Spanish Language and Culture 5**

*8cp; 1st semester, 6hpw; prerequisite: Spanish 4*

Spanish 5 is the third in a series of four units designed to provide students who have successfully completed Spanish 4 and HSC-level Spanish or its equivalent with the ability to consolidate and extend their knowledge during a period of In-country Study in Latin America or Spain.

By the end of the subject, students would be expected to have achieved the communicative competence in speaking, listening, reading and writing to be able to satisfy routine social demands and limited work requirements. They would have developed an awareness of the various social and cultural contexts in which the language is used. Students learn to communicate in Spanish to compare lifestyles, university life and education, and practise interview techniques in preparation for In-country Study.

Spanish 5 consists of 78 hours of classroom instruction. The approach adopted is ‘communicative’ and provides many opportunities for the students to interact and use the language in various social and cultural contexts. There are discussions and debates on set topics. Audiovisual equipment and computers will be used to facilitate learning.

**Spanish Language and Culture 6**

*8cp; 2nd semester, 6hpw; prerequisite: Spanish 5*

Spanish 6 is the fourth in a series of four units designed to provide students who have successfully completed Spanish 5 and HSC-level Spanish or its equivalent with the ability to consolidate and extend their knowledge
during a period of In-country Study in Latin America or Spain.

By the end of the subject, students would be expected to be able to speak the language with sufficient accuracy to participate in limited formal and informal conversations on practical and social topics. Students would also be expected to be able to read and write with sufficient accuracy to meet a limited range of social and work needs. Language focuses on topics such as the economy, class and social stratification, gender roles, religion and beliefs, literature, and the arts.

Spanish 6 consists of 78 hours of classroom instruction. The approach adopted is 'communicative' and provides many opportunities for the students to interact and use the language in various social and cultural contexts. There are discussions and debates on set topics. Audiovisual equipment and computers will be used to facilitate learning.

971710, 972710, 973710, 974710

Greek

Greek is offered to UTS students through arrangements with other universities in Sydney. Students are placed in classes appropriate to their level of competence. The program focuses on furthering writing and oral skills in contemporary Greek and learning about literature, society and culture.

971734, 972734, 973734, 974734

Russian

Russian is offered to UTS students through an arrangement with Macquarie University. Students are placed in classes appropriate to their level of competence. The aim of the Russian language program is to give students a good working knowledge of modern written and spoken Russian and to enable them to express themselves in the language correctly and with reasonable facility.

976101

Chinese East Asia

8cp; 2nd semester, 4hpw

South China – Hong Kong, Taiwan and the Southern Chinese provinces of Fujian and Guangdong – is a region of global importance. It is a dynamo of economic growth for the East Asia region that has grown out of the economic integration of Hong Kong, Taiwan and South China, and is now expanding to include East China. Yet its constituent parts have developed separately in different and often inimical political systems. As a result of all of these factors, South China is likely to be of increasing importance strategically, economically and politically. This subject examines the development of Hong Kong, Taiwan and South China and their interaction. It is an introductory subject that requires no prior knowledge of the region or of any Chinese language.

976111

Contemporary China

8cp; 2nd semester, 4hpw

This subject examines the contours and dynamics of social, political and economic change in the People’s Republic of China since the death of Mao Zedong and the start of the reform era. A central theme is the emerging relationship between state and society in a state socialist system in the process of change and reform. It is an introductory subject that requires no prior knowledge of the People’s Republic of China or of any Chinese language.

976211

Contemporary Japan

8cp; 2nd semester, 4hpw

This subject provides an introduction to the dynamics of political, social and economic systems in Modern Japan. Central themes are the causes and consequences of social change and continuity in the context of Japan’s emergence as an economic superpower. In the process, it offers a general introduction to Japan’s culture. This subject requires no prior knowledge of Japan or of Japanese.

976301

Contemporary South-East Asia

8cp; 2nd semester, 4hpw

This subject provides an introduction to the countries of Indonesia, Malaysia and Thailand. The themes of modernity and identity will be examined at a political-economic level and also at the individual level. Issues which will be explored include migration patterns in the context of regional interrelationships; increasing urbanisation; legacies of colonialism; the commodification of culture and the growing impact of tourism; new creative forms in visual literary and performing arts; the beliefs about and behaviour of women in the region; and ways in which religion and social practice intersect.
976401

Contemporary Europe
8cp; 2nd semester, 5hpw
This unit is an introduction and an overview laying the groundwork for the study of contemporary Europe. It surveys present-day European Union institutions and sociopolitical developments and provides a comparative study of political and social developments in the countries of Western and Eastern Europe. It aims to provide students with an understanding of the historical background of the present-day Europe and enable them to identify major contemporary policy issues in this region of the world.

976501

Contemporary Latin America
8cp; 2nd semester, 4hpw
Latin America has been a crucible for social, political and economic change in the 19th and 20th centuries. Intense struggles for nationhood, democracy, economic modernisation, and secularisation, have all resonated in the countries of Latin America. During the middle of the 20th century Latin America’s primary concerns were focused on national self-determination, inward industrialisation, and populist authoritarian efforts to legitimise elite rule. In the late 20th century the emphasis has shifted towards economic growth, internationalisation, and pressures to improve the capacity and accountability of governments. The unit aims to prepare students with the historical background, cultural awareness and analytic skills to interpret everyday social, political and economic reality during their period of In-country study. The subject requires no prior knowledge of Latin America or Spanish.

977xxx

In-country Study 1
24cp; prerequisite: completion of 4 semesters of study in the International Studies program
As part of the International Studies combined degrees, students spend two semesters of In-country Study at a university or institution of higher education overseas. This is determined by the student’s International Studies major. The following majors are available in the International Studies program: Argentina, Australia and the Asia-Pacific Region, Chile, China, France, Germany, Greece, Indonesia, Italy, Japan, Malaysia, Mexico, Russia, South China, Spain, Taiwan, Thailand and Vietnam.

978xxx

In-country Study 2
24cp; prerequisites: 977xxx In-country Study 1; completion of 4 semesters of study in the International Studies program
As part of the International Studies combined degrees, students spend two semesters of In-country Study at a university or institution of higher education overseas. This is determined by the student’s International Studies major. The following majors are available in the International Studies program: Argentina, Australia and the Asia-Pacific Region, Chile, China, France, Germany, Greece, Indonesia, Italy, Japan, Malaysia, Mexico, Russia, South China, Spain, Taiwan, Thailand and Vietnam.
**SUBJECT EQUIVALENTS FOR BACHELOR OF BUSINESS**

For the purposes of administering rules relating to double and triple failures and for satisfying transition guidelines, these subjects are considered *materially the same.*

Mr R Lal
### STAFF LIST

**Professor and Dean of Business**  
R W Robertson, MA (UVic), FRAIPR, FATRI

**Dean's Unit**  
**Executive Assistant to Dean**  
S Johnston.

**Acting Associate Dean, Research**  
A J Veal, BA (Hons) (Econ) (Brist)

**Research Manager**  
T Tambiah, BA (Davidson College, USA), MA (Hons) (Macq)

**Associate Dean, Curriculum**  
G W Ticehurst, BSc (UNSW), DipEd, MEd (Syd), MSc, PhD (Macq)

**Executive Assistant to Associate Dean, Curriculum**  
A Whiston

**Distinguished Professor**  
D C Dunphy, BA (Cant), MEd (Syd), PhD (Harvard)

**Adjunct Professors**  
R Adler, BCom (UNSW), MEd (Macq), ACA  
A Castagna, BCom (N’cle), MBA, PhD (UNSW)  
K Foley, BCom (Hons), MCom (UNSW), PhD (ANU)  
P Fritz, AM, DipAppSc, BAppSc, DipTech (Comm) (NSWIT), MORS, MACS, FCPA  
W Hogan, BA (Auck), PhD (ANU), DSc (Hons) (N’cle)  
D H Lance, BEd (Syd), HonDUniv (UTS)

**Director of Studies (Kuala Lumpur)**  
P H R Meyer, MA, MEd (Syd), Cert ATESOL (ACL)

**Executive Director Faculty Administration**  
T L Seabrook, BA (UNSW), MA (Syd), MEd (Admin) (Hons) (UNSW)

**Executive Assistant to Executive Director Faculty Administration**  
J Keir, RGN

**Executive Services Officer**  
B Andrews, GradDipEmpRel (UTS)

**Marketing Manager**  
B Hanson, BA (Monash), MBus (Mktg) (RMIT)

**Public Relations Officer**  
P Della-Vedova, BEd (Art) (SCAE), DipArt (Ed) (NAS)

**Project Officer**  
R McGregor, BBus (UTS)

**Finance and Resources Manager**  
D Jocson, BBus (UTS), CPA, CISA

**Management Information Officer**  
A Nolan

**Facilities Manager**  
P Sztelma, BCA (W’gong)

**Facilities Coordinator**  
E Kolaric

**Facilities Assistants**  
H Li  
J Smith, BA (Comm) (UWS)

**Student Liaison Unit**  
**Student Liaison Manager**  
L Maher, BEd, GradDip (Deakin)

**Haymarket Student Office**  
**Senior Administrative Officer**  
K Warington, BBus (HRM) (CSturt)

**Student Liaison Officer**  
M Kirchner, BA (Syd)

**Course Promotions Manager**  
S Anderson

**Student Advisers**  
S Plunkett-Cole, AssDipArts (TAFE)  
A Davis

**International Student Office**  
**International Student Officer**  
S Watson, BA (Flm)

**International Student Adviser**  
B Frolchenko, BCA (W’gong)

**Kuring-gai Student Office**  
**Senior Administrative Officer**  
K Larsen, BA (UNSW)

**Faculty Graduation Officer**  
E Whitehead

**Faculty Timetable Officer**  
A Davidson, AdvCertTrg&Dev (TAFE)

**Student Advisers**  
S Ogale, BA (Macq)  
J Millins, BA (N’cle)

**Graduate School of Business Student Office**  
**Senior Administrative Officer**  
J Hudson, BA (MIHE), GradCertMgt (CQU)
Graduate Student Advisers
S King
L Luu, BCom (HRM) (UWS)
L Liggieri, BA (Syd)
L Palmer
K T Sujanto, Ass Dip (Asia-Pacific Marketing) (TAFE)

Business Computing Services Unit
Manager Computer Services
R R Lal, Grad Dip Applied Computing (USP)
Administrative Assistant
J Falvey

System Administrators
N Amalin, CNA
M O'Toole, BSc (Macq)

Computer Support/Desktop Officers
D Choo, CNA
T Fung Mak, DipEng (Hong Kong)
R Lozada, DipIT (TAFE)
D Mirkotumov, BSc (Georgia)

Help Desk Officer
B Cowan, BA (SCU)
