1 Information is correct as at 15 November 1995. The University reserves the right to vary any information described in Principal Dates for 1996 without notice.

2 HECS/Postgraduate course fees will apply after the HECS census date.
This handbook is one of 10 faculty/institute handbooks: Business; Design, Architecture and Building; Education; Engineering; Humanities and Social Sciences; International Studies; Law; Mathematical and Computing Sciences; Nursing; and Science. Each handbook provides general information about the faculty/institute as well as detailed information on the courses and subjects offered.

The handbooks are part of a suite of 13 publications which also comprise the University Calendar and the undergraduate and postgraduate student handbooks. The Calendar contains the University By-law, which all students should read. It also includes a list of the University’s courses, giving the name, abbreviation and title as indicated on the testamur. Copies of the Calendar are held in the University Library and faculty offices, and may be purchased at the Co-op Bookshop.

The student handbooks provide information on the rights and responsibilities of students and on the services and facilities available to them. They will assist you in your dealings with the University’s administration and tell you whom to contact if you have a problem or need advice. You should make sure that you read the student rules published in these handbooks. Copies of the student handbooks are provided free to students at enrolment.

Other publications providing information of a general nature are the UAC Guide and the UTS Undergraduate Studies Guide which are available from the UTS Information Service.

For information not provided in any of the publications mentioned e.g. additional information on courses, methods of assessment and book lists, you should contact the UTS Information Service or your faculty office. If in doubt, don’t hesitate to ask.

We hope you will enjoy your time as a student at UTS and wish you well in your studies.

The Faculty of Education is distinctive in its mixture of adult, vocational and teacher education areas and is, moreover, one of the largest faculties of education in Australia.

Within the overall University mission, the special mission of the Faculty of Education is to serve the community through the provision of higher education for professional practice across the full range of educational contexts—formal and informal, adult and school, vocational and general. The Faculty of Education is committed to the following values:

- promoting lifelong learning;
- interconnecting academic scholarship and research with practice;
- encouraging service and leadership to the community;
- developing the capacity for both autonomous and group learning;
- promoting education as a vehicle for social justice.
MESSAGE FROM THE DEAN

I am pleased to welcome you as a new or returning participant in the Faculty of Education.

The Faculty is unique in that it offers courses which prepare and develop students for work in the full gamut of educational provision, from school and TAFE to workplace and community education. It also caters for specialised interests in the fields of special education, music, teacher librarianship, computer-based learning, literacy and numeracy, TESOL, community education, human resource development, and Aboriginal education. In addition, the courses offered include Bachelor’s degrees, Graduate Certificates, Graduate Diplomas, Master’s degrees, and the Doctor of Education and Doctor of Philosophy degrees. Thus the Faculty recognises the need for lifelong learning and education and seeks to provide both initial and continuing opportunities for professional development.

I would like to encourage you to take subjects from the other school within the Faculty and perhaps to take subjects in other faculties of the University if the course regulations permit. This will give you a sense of belonging to the University rather than simply being confined to a single course. There are many other ways in which you can involve yourself in the life of the University, such as through the Students’ Association or through participation in the variety of clubs and activities available.

You can see from this handbook and from the UTS postgraduate and undergraduate student handbooks that the University offers a number of support services to assist you with, say, study and writing skills, or with health or welfare matters, with child care, or with any personal difficulties you may be experiencing. Try to acquaint yourself with the range of services available and use them if needed.

I hope you have a stimulating, productive and enjoyable year and that you find professional and personal fulfilment through your participation in the Faculty.

Please contact the School offices for course inquiries and general advice on your studies in the Faculty.

FACULTY OF EDUCATION

The Faculty of Education consists of two schools located on two campuses of the University.

The School of Adult Education (located at Haymarket in the City campus) provides courses of professional development for practitioners who work in industrial, commercial, public sector, welfare, school and community settings, and for vocational educators.

The School of Teacher Education is located at the Kuring-gai campus and provides pre-service courses for beginning teachers and postgraduate programs for experienced teachers.

CENTRES

The Faculty and its schools have established various centres to fulfil their aims with regard to research, consulting and professional links. Centres approved by the Vice-Chancellor are:

• Research Centre for Vocational Education and Training
• Centre for Research in Education and the Arts
• Centre for Language and Literacy
• Centre for Training and Development Services

STUDENT SUPPORT

The Faculty has possibly the most diverse student body of any faculty at UTS. Its students range from school leavers to others who are more properly regarded as professional colleagues who have entrusted the Faculty with the task of meeting their continuing professional development needs. To meet these student needs many different modes of course delivery are used. There is also the provision of formal support to students for development of their learning skills. The Study Skills Unit (at the City campus) is a student support unit serving the needs of staff and students in the Haymarket school. The Student Learning Centre (at the Kuring-gai campus) provides services for students from all faculties operating at that campus. The Educational Resources Centre (at Haymarket in the City campus) provides staff and students with audiovisual and computer facilities and training.

FELLOWSHIP

The Keith Foster Fellowship was established in 1992 to enable practitioners active in some aspect of adult or vocational education to spend time on attachment to the University. The Fellowship was established to recognise the work of Keith Foster, who retired in 1991 as an Associate Professor at UTS, having made extensive contributions to the development of adult education as an academic at UTS and its predecessors. It would be expected that Fellows would use their period at UTS to undertake a project of mutual benefit to UTS and their employer. In general, Fellowships would be from one to six months’ duration.

ELIGIBILITY FOR AUSTUDY

Austudy provides financial help to full-time students who meet its income and assets requirements. Application forms and information about Austudy eligibility are available from offices of the Student Services Unit at the City and Kuring-gai campuses. Students who receive Austudy and decide to drop subjects during the semester need to be aware that to remain eligible for Austudy they must be enrolled in a minimum of 18 credit points or have a HECS liability for the semester of .375. The only exceptions made are for students with disabilities which interfere with their studies, students who are single supporting parents or those who have been directed by the University to reduce their study load. Student Welfare Officers in the Student Services Unit can assist students who wish to apply for exceptions on these grounds.

DEVELOPMENTS IN 1996

As a result of the review of existing undergraduate courses in the School of Adult Education in 1995 the Faculty will introduce in Autumn semester 1996 a single undergraduate qualification in that School—a Bachelor of Education in Adult Education. Other new courses developed for 1996 introduction include a Bachelor of Teaching/Bachelor of Arts in International Studies in the School of Teacher Education and Graduate Certificates in Public Education; and Management Development as well as a Graduate Diploma in Vocational Education and Training in the School of Adult Education.

The Faculty will continue to deliver award or short courses either on shore or offshore for nationals of Thailand, Japan, Kuwait, Laos, Vietnam, Hong Kong and Cambodia. Practicum components of the Bachelor of Teaching in Primary Education are now conducted in Inner Mongolia as well as with the Rajabhat Institute in Thailand.

Doctor of Education
(TA96, TE96)

Course Coordinator: Paul Hager

The degree of Doctor of Education is designed to meet the needs of practitioners by providing extended advanced study for those whose background and experience are appropriate for leadership in the various sectors of education (e.g. teachers, trainers, administrators, planners, managers, and policy advisers in both school and post-school education, working in government, industrial, commercial, or community settings). Its purpose is to enhance, through advanced coursework and research, the practitioner's capacity to question, analyse, critique and develop the profession and its practices. It is a research-based degree since its purpose is to assist professionals in the field to become aware of the relationship between research and their professional activities in areas such as policy development and appraisal, innovation and administration.

The award is offered on the basis of six semesters of full-time study or its part-time equivalent. Candidates will be required to complete four compulsory semester-length subjects (nine credit points each) and an additional two elective subjects (six credit points each). They will also undertake a dissertation related to an issue or problem arising from practice. The dissertation will be 40,000-60,000 words and comprises two-thirds of the course load. Candidates who hold a Bachelor's degree the minimum period of study is six semesters full time or the part-time equivalent. For candidates who hold a Master's degree the minimum period of study is four semesters full time or the part-time equivalent. The maximum period of study is nine semesters full time or its part-time equivalent.

The four compulsory subjects in the degree are:

- 016715 Analysing Professional Practice (9cp)
- 016713 Lifelong Education, Research and Practice (9cp)
- 023999 Research Literacies (9cp)
- 016714 Dissertation Development and Appraisal (9cp)

The two elective subjects are chosen from a range of subjects at Master's or Doctoral level.

016715
ANALYSING PROFESSIONAL PRACTICE
9cp

This subject is designed to assist participants to develop a critical posture in relation to their educational practice and the sites in which they work. A relevant framework for critically analysing practice will be discussed and then applied, illustrated and refined using the students' educational sites as case studies. Participants will be required to present their own case study and maintain a portfolio of written comments on the presentations of other students.

016713
LIFELONG EDUCATION, RESEARCH AND PRACTICE
9cp

This subject explores the concepts of lifelong learning and education. The emphasis is on how a commitment to lifelong learning changes educational practice in school, post-school and non-formal educational settings. Case studies will focus on educational innovations which promote lifelong learning opportunities, particularly those innovations which develop links between the different sectors of education and between education and industry or the wider community. Lifelong learning will also be explored as an ingredient of personal work and life expertise and professional development.
023999
RESEARCH LITERACIES
9cp
This subject will enable participants to become competent, sophisticated readers of commissioned research which is intended to inform educational policies and practices. The subject has been designed to enable participants to engage in collaborative appraisal of recent research studies as well as individually to analyse and evaluate a study pertinent to their field of practice.

016714
DISSERTATION DEVELOPMENT AND APPRAISAL
9cp
This subject is designed to assist students to develop their dissertation plan. The elements of a dissertation and strategies for conducting it will be clarified and analysed (e.g. choosing an area of investigation, conducting a literature review, critiquing existing studies, identifying a problem or issue to be investigated, adopting an appropriate methodology, the concept of a ‘thesis’, planning writing tasks, obtaining feedback from others, referencing, proofreading, data analysis and interpretation). Students will be required to develop a proposal, and critique the proposals of some other students in the group.

POSTGRADUATE COURSES

Graduate Certificate in Higher Education (T050)

Offered by the Centre for Learning and Teaching via the Faculty of Education
Course Coordinator: Elizabeth Hazel

COURSE AIMS AND STRUCTURE

This course aims to provide university teachers with the necessary knowledge, skills and attitudes to develop their own teaching and assessment approaches so that they may teach effectively in a variety of contexts and with a variety of students; to monitor student learning; to assess their own teaching and to develop skills and attitudes of self-directed continuing teaching development. The course also aims to enhance participants’ understanding of higher education and the academic profession.

It is a one-year part-time course involving the equivalent of eight weeks’ full-time study spread over two semesters.

The course consists of three compulsory subjects:

01010 University Teaching and Learning
01011 The Academic Profession
01012 Student Learning and Evaluation

01010
UNIVERSITY TEACHING AND LEARNING
6cp

This subject will enable participants to develop their professional expertise by enhancing their confidence and skills in fostering educational change and their knowledge of the principles of university teaching: teaching methods, student characteristics, student learning, student learning activities, principles of assessment and evaluation of teaching. Participants will have the opportunity to become familiar with a variety of innovations in university education. They will be required to select an aspect of their own teaching on which to base a development project.

01011
THE ACADEMIC PROFESSION
3cp

This subject is intended for practising academics and is designed to provide an insight into their profession and foster an appreciation of the broader context within which university learning and teaching occur. Thus, it aims to develop an awareness of the development of the academic profession, both historically and with specific reference to Australia. The subject also aims to familiarise participants with the concept of academic culture and enable them to explore major issues, such as the relationship between teaching and research or the influence of government policy on the participants’ disciplines.

01012
STUDENT LEARNING AND EVALUATION
3cp

This subject will encourage participants to reflect upon all aspects of their teaching from the perspective of research in student learning by introducing a range of monitoring techniques and processes and methods of curriculum development. Participants will be able to use the information resulting from reflections on their teaching to modify, where appropriate, aspects of their teaching and courses.

ASSESSMENT

Participants are assessed in a variety of ways which match the objectives of the subjects. These include self-assessment, peer review and written assignments.
ATTENDANCE PATTERN
Within the part-time pattern no regular attendance pattern is envisaged. Attendance will depend on needs and the teaching timetables of the participants, but a two-hour meeting will be held about once every two weeks on average for each subject, with a day-long session to be held before the start of semester for two of the three subjects.

ADMISSION REQUIREMENTS
During the two semesters over which the course is run, applicants must be in full-time or fractional academic employment in a higher education institution. For UTS full-time and fractional staff the course may be free (through a subsidy from the University). All other participants are expected to pay full fees.

Graduate Certificate in Learning and Technology in Higher Education (T051)

Course Coordinator: Shirley Alexander

COURSE AIMS
The course aims to provide university teachers from professional or purely academic backgrounds (i.e. without formal educational qualifications) with the necessary knowledge, skills and attitudes to make informed decisions about the appropriate use of technology in university teaching and assessment in a variety of contexts and with a variety of students; to design, develop and evaluate technology-based learning programs and appropriately monitor student learning in subjects employing technology-based learning programs.

SUBJECTS

01012
STUDENT LEARNING AND EVALUATION
3cp
This subject will encourage participants to reflect upon all aspects of their teaching from the perspective of research in student learning by introducing a range of monitoring techniques and processes and methods of curriculum development. Participants will be able to use the information resulting from reflections on their teaching to modify, where appropriate, aspects of their teaching and courses.

01013
EDUCATION AND TECHNOLOGY
3cp
This subject will encourage participants to use their understanding of student learning, information design and the representation of knowledge to underpin the design of their own technology-based learning program. Participants will also have the opportunity of participating in the needs analysis and design of a project drawn from the university community.
01014
MULTIMEDIA IN LEARNING PROJECT
6cp
This subject is intended to provide an opportunity for participants to further develop their expertise in learning and technology by developing a prototype version of the technology-based learning program they have designed in Education and Technology. Participants will have the opportunity to become familiar with the use of video, animation, sound, graphics and authoring tools in the development of technology-based learning programs and will participate in the development of a project drawn from the university community.

ATTENDANCE PATTERN
During semester one of the course, attendance will depend on the needs and the teaching timetables of the participants, but a three-hour meeting will be held on average about once every two weeks for each subject, with a day-long session to be held before the start of the semester for both subjects. During the second semester, a three-hour meeting will be held each week.

ADMISSION REQUIREMENTS
Applicants must be in full- or part-time academic employment in higher education. Their qualifications or experience must be appropriate for teaching in an Australian university and they must be currently engaged in some kind of teaching at university level. Tutors are welcome to enter the program. UTS staff may be given a subsidy to cover HECS fees. All other enrollees are expected to pay full fees.

INDIVIDUAL SUBJECTS

01012
STUDENT LEARNING AND EVALUATION
Centre for Learning and Teaching
3cp; 17 hours
prerequisite: nil
corequisite: 01013 Education and Technology

Objectives
To encourage participants to reflect upon all aspects of their teaching from the perspective of research in students’ learning.

To encourage participants to use the information resulting from reflections on their teaching or on a teaching package to modify, where appropriate, aspects of their teaching and courses.

Contribution of subject objectives to the course
Ongoing development of courses involves continual monitoring of student progress, student learning and the success of teaching. This subject introduces a range of monitoring techniques and processes and methods of curriculum development, and hence contributes to the course aims of monitoring student learning and assessment of the teacher’s own teaching.

Material taught and modes of presentation
Content of this subject will include ideas from research into student learning, such as the influences of learning environments on students’ approaches to learning, and relations between learning approaches and the quality of the learning outcome. Differences between evaluation, appraisal and performance management will be addressed, and sources and methods of evaluation introduced. Participants will develop an evaluation plan and use it to evaluate a faculty technology-based learning program.

This subject will be strongly integrated with the academic work of the participants. Throughout the semester, the participant lecturers will be introduced to student learning research and evaluation methods. They will design and develop a method of data collection based on the
student learning research literature, and apply that method at some point during the semester to one of the classes they are teaching. Using those data, they will comment on the subject and their teaching and suggest ways in which changes may facilitate student learning.

Teaching will be in the form of four workshops and two seminars. The workshops will each be three-hour discussion sessions addressing the student learning research literature, evaluation methods, curriculum development and using student feedback to improve learning. The seminars will be two selected from the seminar program of the Centre for Learning and Teaching.

Assessment components
Assessment will be in two equally weighted phases. First, a report on an interview study conducted with students in the participants’ own teaching area, and second, a report on the results of an evaluation of an aspect of their teaching.

The first of these assessment tasks is designed to encourage the participants to reflect on the nature of student learning, while the second is directly related to the second aim of the subject, namely for participants to use the information resulting from reflections on their teaching to modify, where appropriate, aspects of their teaching and courses.

Texts and references

A reading list of contemporary research articles will be supplied to all participants at the commencement of the subject.
the design of a program for use by their own students.

Teaching will be in the form of six workshops/seminars. The first half day presentation/discussion group will examine the impact of technology on society in general and on education in particular. In order to embed learning of the content (the use of research on learning to design learning strategies) in authentic activity, a development project involving an academic staff member from the University will be introduced at this session. This project will be followed through a needs analysis and design in this subject, through to development and evaluation in the following subject (01014 Multimedia in Learning Project). Subsequently, four three-hour discussion sessions will address the literature in the above areas and various aspects of design which use these ideas. The case study will be referred to and discussed at each of these sessions. During the final one-day session, participants will discuss their own technology-based learning program designs.

Assessment components
Assessment will be in two equally weighted phases. First, to assess the participants' perspective of the application of research in learning to the design of technology-based learning programs, a critical appraisal of the learning strategy or strategies used in the design of an existing program will be completed. Second, participants will use the ideas about learning developed in the subject to design their own technology-based learning program. The quality of the designs and their relation to the ideas introduced in the subject form the assessment criteria.

01014
MULTIMEDIA IN LEARNING PROJECT
Centre for Learning and Teaching
6cp; 42 hours
prerequisites: 01012 Student Learning and Evaluation; 01013 Education and Technology

Objectives
- To enable participants to develop their expertise in learning and technology by participating in the development of an existing project and by enhancing the design (interface and information design, as well as storyboarding) and developing a prototype version of a technology-based learning program they have designed.
- To enable participants to have the opportunity to become familiar with the use of video, animation, sound, graphics and authoring tools in the development of technology-based learning programs.
- To enable participants to use the results of evaluation as a means of continuous improvement of technology-based learning programs.

Material taught and mode of presentation
Topics will include interface design, the use and selection of authoring tools, the use of video, sound, graphics, animation and text to enhance learning as well as implementation and evaluation issues.

Teaching will be in the form of 14 three-hour sessions. The first two sessions will be devoted to interface design and storyboarding and will include presentations, workshopping an interface design for the case study and practical work in developing storyboards. Subsequent sessions will include topics on video, sound animation, graphics and text and will follow a similar format; discussion of the appropriateness of using particular media, practical demonstration on media capture, scanning etc., group discussion of applicability of each medium to the case study and work on individual projects. During the final sessions, participants will present their project to the class.
Assessment components

There will be three assessment tasks in this subject in which students may work alone or in groups. The first will assess understanding of interface design and storyboarding as participants develop their own storyboard for peer assessment (20 per cent weighting). For the second assessment, participants will present the results of an evaluation of their designs with a target audience in the form of a written report and revised storyboards (20 per cent weighting). The final assessment will be a prototype version of the project (60 per cent weighting).

Texts and references

There is no set text for this subject. However, a reader will be developed for use by participants.

ARTICULATION WITH OTHER PROGRAMS

Articulation of this course with the Master’s program in Higher Education at the University of New South Wales has been discussed with the Course Coordinator of that program. Given the differences in the nature of the courses, no direct articulation is possible, but it has been agreed that participants who have completed the Graduate Certificate in Learning and Technology in Higher Education will be given advanced standing for the subject 01014 Multimedia in Learning Project in the Master’s program.
The School of Adult Education provides courses of initial and continuing professional development for practitioners who are responsible for the education and training of those who work in TAFE, industrial, commercial, public sector, welfare, school and community settings and the defence services.

The School offers a full range of courses leading to awards at the Advanced Diploma¹, Bachelor's, Graduate Certificate, Graduate Diploma, Master's and Doctoral level across its five core areas of operation:

- Vocational Education
- Community and Aboriginal Education
- Language and Literacy Education
- Human Resource Development
- Applied Behavioural Sciences

The School believes that the development of the professional educator has two fundamental and interrelated components. The first is to promote the development of those competencies essential for the design, implementation and evaluation of effective and worthwhile learning activities appropriate to particular settings. The second is to encourage the development of an appreciation of the broader philosophical, political, social and economic issues which shape the content of the practitioner's work. By offering a comprehensive perspective on the nature and process of the practitioner's work, the School's courses not only meet immediate practical needs, they provide a firm basis for continuing professional and personal growth.

The School is divided into five academic areas: the division of Vocational Education, the division of Community and Aboriginal Education, the division of Language and Literacy Education, the division of Human Resource Development and the division of Applied Behavioural Sciences. While each of the divisions has its own specialist subjects and research and consultancy projects, there are no hard boundaries between the divisions and they cooperate in the teaching of the School's courses and in a range of research projects. Members of the staff of the School are also the members of three Centres: the Research Centre for Vocational Education and Training (RCVET); the Centre for Language and Literacy (CLL); and the Centre for Training and Development Services (TDS).

The division of Vocational Education is the area which provides specialised courses for teachers in the TAFE sector and the armed forces. Participants in the courses enter at both undergraduate and postgraduate levels. Members of this division are engaged in a variety of research projects under the auspices of the RCVET and in other research into teaching and learning. A major initiative in 1995/6 is a research and development project into mixed mode or flexible delivery mode for the School's courses. Members of the division have interests in multimedia and computer-enhanced learning, open learning, gender in education, postgraduate pedagogy, the practicum and cooperative education, disabilities education and equity aspects of vocational education. For the last few years, in association with staff in other divisions, the division has run an undergraduate course for navy instructors in Kuwait.

Laraine Spindler is the head of this division.

The division of Community and Aboriginal Education is the centre within the School for studies in adult and community education. Many of its activities, in teaching, research and consultancy, aim to promote and support the work of local adult education providers.

Participants in the division's courses often work in evening colleges, local learning centres and many community-based services which perform an adult education role. Some of these participants are ¹ Subject to approval
entering university study for the first time as mature-age students, others as graduates, all seeking an appropriate qualification as practitioners in adult education. The division includes the largest group of Aboriginal students in the University in a significant Aboriginal community educator course taught by three Aboriginal staff members.

The main teaching strengths reflect this commitment to the professional development of practitioners and to their educational work with their often disempowered individuals or groups—the unemployed, prisoners, the aged, youth and migrants—who are clients of community-based adult education.

The division’s teaching strengths are in such areas as adult learning methodologies, program development and evaluation, research and policy, and political, historical and philosophical studies.

The division makes a significant contribution to adult education research in Australia. Besides the continuing need to document Australian practice, research projects have focused on such interests as adult learning and development, the professional development of adult educators, the adult education dimension of activism, the articulation of TAFE and university courses, vocational outcomes of Adult Community Education and a national project on the training needs of Aboriginal community adult educators. Current research is exploring the nature of negotiated learning, informal learning in the workplace, adult education and the labour movement, and the educational dimension of community work.

The division actively supports the emerging professional associations in the field through joint activities with organisations such as the Australian Association of Adult and Community Education (AAACE) and the Evening and Community Colleges Association, through seminars and conferences and through consultancy activities in training, research and policy development provided by the division’s consultancy wing. The division maintains close links with adult education colleagues in Australia and in the UK, Europe, the Americas and the Asia-Pacific region.

Associate Professor Griff Foley is the head of this division.

The division of Language and Literacy Education brings together the areas of teacher education in English as a second language (TESOL), adult basic education and languages other than English. This conjunction of teaching areas reflects an area of particular interest to the division, namely the strengthening of the language base of teachers in all of these language teaching areas.

Although numeracy does not appear in the name, the division is also committed to strengthening the language base of adult numeracy teachers. A number of research projects are under way to better inform this process.

The division is noted not only for its contribution to the postgraduate in-service training of language, literacy and adult numeracy teachers, but also for the active involvement of staff who work closely with the various client groups to improve the quality of literacy and language teaching to adults and children in Australia. For example, staff hold executive positions on a number of professional associations. Staff are also regularly asked to provide policy advice to government and to become members of policy advisory bodies. In addition, the division is currently setting up strong links with universities in South-East Asia.

All staff of the division are members of the Language and Literacy Centre, established in collaboration with the Faculty of Humanities and Social Sciences. The Centre undertakes consultancy and research and also hosts two regular research forums: Language in Education, and Numeracy.

Staff of the Centre favour a collaborative approach to research and consultancy activity. Many of the following projects are being undertaken jointly with other institutions or other parts of the University.

Recent and current funded research includes:

- Academic writing
- Development of competencies for adult basic education teachers
- Pedagogical relationships between teaching adult literacy and adult ESL

The division for Language and Literacy is also associated with the Centre for Workplace Communication and Culture (CWCC) at UTS. The CWCC is a joint centre of UTS, James Cook University and the National Languages and Literacy Institute of Australia.

Hermine Scheeres is the head of this division.

The mission of the division of Human Resource Development is to provide a range of courses at undergraduate and postgraduate level that meet the needs of trainers, human resource personnel and consultants employed in private and government enterprises. The main areas for teaching and research in the division focus on those activities that are designed to train the trainers in industry,
government departments and various kinds of organisation. Within the field, the division has interests in adult teaching and learning, program development, competency-based training and assessment, recognition of prior learning, experiential learning, workplace learning, skill formation and technological change, VET policy, lifelong learning, program evaluation and understanding the process of innovation and change, as this impacts on all of the above.

Staff in this division have developed a broad-based model of competency-based training that integrates a number of competing perspectives. Such a framework includes a commitment to examining the social, political and economic and cultural contexts in which training is occurring and a realisation that this framework needs to be expanded into higher order (or ‘key’) competencies such as critical thinking and problem solving.

Staff within the division are also involved in a range of training and consultancy activities that meet the needs for short (two- to three-day) workshops provided through the Centre for Training and Development Services, and longer-term consultancy services to industry in the field of human resource development.

This division provides a range of subjects that deal with the theory and practice of training in a variety of organisational contexts. More specifically, the field of human resource development in this School focuses on the development of competencies required by workplace trainers, training officers or consultants, training coordinators or training human resource development managers. In addition, this division has adopted a client-focused approach to course development and therefore changes in its subjects and courses will reflect some of the major technological, economic and social changes occurring in the Australian workforce today.

There are a number of research themes that can be identified with this division. Currently works in progress and recently completed research projects have focused on:

- skill formation in organisations and relationship with organisational culture;
- case studies of industry training;
- key competencies in industry training;
- management skills in the housing industry;
- models of competency standards and developing competency standards in the professions;
- the learning contract as teaching tool;
- competency-based assessment in the workplace;
- recognition of prior learning;
- informal workplace learning and action research;
- the learning organisation;
- reflection and critical reflection;
- training for total quality management and culture change;
- job seeker assessment instruments.

All these projects are carried out under the auspices of the RCVET. This Centre, formed in 1994, has generated research funding of $1.2 million.

Associate Professor Paul Hager is the head of this division.

The division of Applied Behavioural Sciences brings together staff from the disciplines of psychology and sociology. They are involved in the teaching of subjects in all the School’s courses across all the fields of practice in the School. Subject areas include communications management, interpersonal communication, psychological and sociological foundations of education, lifespan development, adult education and ageing, assessment and evaluation, skills acquisition, organisational behaviour, adolescence and adult development.

Staff in this division have recently been involved in major research and development projects on competency-based training and assessment, developing occupational classifications, credit transfer from TAFE to higher education, developing job seeker assessment instruments as well as undertaking significant scholarly activities in communication management and conflict resolution and interpersonal communication more generally.

Dr Bob Pithers is the head of this division.
UNDERGRADUATE COURSES

Bachelor of Education in Adult Education (TAll)

Course Coordinator: Ruth Cohen

This new course, introduced in 1996, provides a coherent sequence of study to fulfill the theoretical and practical requirements for people who wish to develop their knowledge and skills as an adult educator. Students elect the field of practice in which they wish to concentrate their applied learning in relation to their workplace role. The twin developmental themes underpinning this course, of the student as learner and the student as professional practitioner, enable students to select and negotiate learning tasks which are personally relevant, oriented to their current and future needs and important for their professional and personal development. The course is designed to be both flexible and responsive. Various modes of delivery and attendance patterns are available to suit the needs of students with travel, work and personal commitments. These include weekly attendance, block attendance, weekend classes, or some combination of these. Students will engage in a variety of learning activities, work with academic advisers and workplace practitioners and undertake individual and group learning projects. Practice and theory are integrated in the learning tasks, many of which are negotiated to meet the individual needs of students and to complement their workplace needs.

An important outcome of this course will be the potential for all students who meet the degree course requirements to graduate with a recognisable adult teaching qualification.

As a consequence of the introduction of this course in 1996, the Diplomas in Adult Education (Community, Aboriginal and Training), the Bachelor of Teaching in Adult Vocational Education and the current Bachelor of Education in Adult Education will not take new students. For most students still enrolled in these courses, transition to the new course could be effected in 1996, unless students elect to continue with their current course. As the diplomas are of two-year duration, and the Bachelor of Teaching students usually complete their courses in that period, most transition would be completed by the end of 1996. Students in the current Bachelor of Education in Adult Education, who decide to continue with their present course, are likely to complete in one or two years.

Students currently enrolled in the Bachelor of Education in Technical Education will complete their program by the end of 1996 and will not convert to the new course.

Note: Students enrolled in subjects during or before 1995 should consult with Sue Knights about their program of studies.

COURSE AIMS

The course promotes the development of adult educators and practitioners who:

- have a deep understanding of their own learning and a commitment to the learning of others;
- incorporate an informed professional approach which takes account of cultural and other diversity, the experience of the learners, and ethical standards for teaching and facilitating;
- understand their own workplace contexts;
- can provide effective opportunities for learning;
- are responsive to the human needs of the people with whom they work;
- can effectively design, use and evaluate a range of teaching and learning strategies;
- integrate theory and practice;
- are critically analytical;
- are aware of globalisation and understand national and international perspectives;
- promote lifelong learning;
- have the capacity to research their own practice; and
- are interested in increasing/improving the standing of the profession.
COURSE STRUCTURE

The Bachelor of Education in Adult Education is a three-year degree comprising 144 credit points.

Although all students will be encouraged to complete the Bachelor’s degree, the course is designed so that students in some designated fields of practice (Community Adult Education and Human Resource Development) and students in the Aboriginal block mode who complete 96 credit points of structured sequential studies may exit with an Advanced Diploma in Adult Education.

There are three major components to this course—the core subjects (48 credit points), subjects in the field of practice (56 credit points) and the electives (40 credit points). Core subjects essentially provide the theoretical base, which is then applied in the subjects in the field of practice. Electives, sub-majors, individualised projects, university majors as well as the option to enrol in subjects in other schools in the University provide a rich and diverse source for other learning. A feature of the course is the diversity of teaching and learning strategies modelled and the negotiated learning tasks which can be done for assessment purposes. Supervised field experience includes a major teaching practicum. Students who complete the degree requirements will gain a recognised teaching qualification.

1. Core subjects (48 credit points)

Core subjects provide a coherent theoretical framework covering knowledge, skills and attributes relevant to all professionals across fields of practice. Core subjects are compulsory and integrate elements related to cultural issues, respect for diversity, communication skills and skills for developing a reflective and responsive practitioner. They will deliberately contrast a range of perspectives in the area. They provide a foundational theoretical base which is then applied in the more specific settings of each field of practice and/or further developed in the electives. The 12 core subjects are:

- 015001 Language, Culture and Communication 1 (4cp)
- 015002 Adult Teaching and Learning (4cp)
- 015003 Portfolio Development (4cp)
- 015004 Language, Culture and Communication 2 (4cp)
- 015005 Psychological Perspectives on Adult Learning (4cp)
- 015006 Program Development and Needs Analysis (4cp)
- 015007 Adult Learning in Social Context (4cp)
- 015008 Assessing Learning and Evaluating Programs (4cp)
- 015009 Analysing Current Issues in Australian Education (4cp)
- 015010 Philosophical and Historical Perspectives on Adult Learning (4cp)
- 015011 Research and Inquiry (4cp)
- 015012 International Perspectives on Education (4cp)

2. Field of practice (56 credit points)

Students select one of four fields of practice specialisms offered in 1996, which are:

- Community Adult Education
- Human Resource Development
- Language, Literacy and Numeracy Education
- Vocational Education

Field of practice specialisms provide the contextual applications in which theoretical and practical learning from the core subjects can be examined, developed and applied to a specific workplace or cultural context. They feature aspects of practice which are particular to a given area of the profession. A major component is the learning themes of the supervised field experience identified as the semester’s focus. These themes complement the learnings from the core subjects, and develop the student’s role as learner and practitioner in conjunction with relevant workplace experience. The themes are:

- Semester 1 Focus on the Learner
- Semester 2 Focus on the Practitioner
- Semester 3 Focus on Programming
- Semester 4 Focus on the Workplace
- Semester 5 Focus on Organisational Context
- Semester 6 Focus on Change and Development
Supervised field experience in each field of practice includes a teaching practicum.

3. Electives (40 credit points)

Electives, sub-majors, individualised projects and university majors as well as the option to enrol in subjects in other schools in the University provide a rich and diverse source for other learning. Students may choose electives from their own or other fields of practice except for students in the Aboriginal block mode who will complete the Aboriginal major as their elective and students in Language, Literacy and Numeracy who will be required to take electives 015086, 015087, 015088, 015089, 015090 as part of their 40 credit points of electives. University majors in Aboriginal Studies and Women’s Studies are offered in this course in conjunction with the Faculty of Humanities and Social Sciences.

Students in some fields of practice (Community Adult Education and Human Resource Development) and students in the Aboriginal block mode may be able to exit with an Advanced Diploma after a structured sequence of studies of 96 credit points.

ASSESSMENT

Assessment will be criterion-referenced either ‘pass’ or ‘fail’.

ADMISSION

The Bachelor of Education in Adult Education is a 144-credit-point course which full-time students would normally complete in three years. However it is possible to extend the time to complete this course by taking fewer than the full-time number of credit points. All applicants will need to have access to an appropriate workplace for supervised work experience in their field of practice. In cases where the student is not employed in this field, opportunities for substantial supervised field experience may be negotiated with the academic adviser.

Admission will normally be on the basis of one of the following categories:
1. Higher School Certificate
2. Completion of an approved certificate or diploma course from TAFE
3. Possession of equivalent qualifications
4. Adult entrance with appropriate work experience

Applicants whose qualifications and experience differ from that described above may be considered for special admission. Study and writing skills tutorial assistance is available for students who require academic support on their entry to tertiary studies.

Exemptions through credit transfer and Recognition of Prior Learning (RPL)

This course recognises that many of the students who enrol are already considerably experienced and knowledgeable practitioners in the field. They may already have the content knowledge which is required to satisfy the requirements for the teaching qualification or they may have completed other subjects relevant to this course.

Students may apply for credit for specified or unspecified subjects on the basis of:
1. equivalent qualifications which match part of the degree in accordance with UTS rules (e.g. partial completion of a qualification from another university or TAFE college);
2. qualifications in content knowledge relating to their teaching for their field of practice e.g. a newly appointed teacher of electronics who holds TAFE qualifications in this field may claim up to 48 credit points towards the BEd in Adult Education in the field of Vocational Education, depending on the level of qualification, experience in the field (five years is usually considered appropriate) and successful completion of relevant short courses in teaching strategies or, for example, a community educator who has a welfare qualification from TAFE, considerable experience in the field, has completed a number of short courses on conflict resolution and works in the field of HIV;
3. relevant and authentic evidence through an RPL portfolio which substantiates claims for equivalence in particular subjects by demonstrating an understanding of the learning processes and achieving appropriate
learning outcomes (e.g. trainers in the field of HRD who have completed substantial and assessed ‘train the trainer’ courses);

4. equivalence in relevant university-level learning as evidenced by a RPL portfolio and used towards credit for unspecified electives (e.g. Aboriginal students who have been involved in the creation of policy documents or writing of government reports);

5. other appropriate evidence which will be evaluated on an individual basis by an appropriate staff member.

ATTENDANCE PATTERNS
Various modes of delivery and attendance patterns are available to suit the needs of students with travel, work and personal commitments. These include weekly attendance (day or evening), block attendance three times per semester, residential block three times per semester, weekend classes (five times per semester) and some evenings and weekend workshops.

Graduate Certificate in Public Education (TA64)

Academic Coordinator: John McIntyre

PARTICIPANTS
The Graduate Certificate in Public Education is a one-year part-time qualification for professionals whose work includes informing and educating the public on issues of importance through the mass media, community-based programs or other activities. Applicants will be graduates in any discipline who are working in public education or a related employment, including public relations, communications management, community education in government or non-government organisations. It is preferred that applicants be working either in a paid or voluntary capacity in an area where they can design and implement public education activities. The course is offered by four hours class attendance one night per week and three one-day weekend workshops per semester. It is possible that the course may be offered in an intensive mode of three by three day blocks per semester.

RATIONALE
Public education refers to those educational processes by which bodies of various sorts seek to inform and educate the public on issues of public importance through both mass media and community-based programs. Public education is a form of community education but also includes a significant component of public communications.

The course views professional practice in public education as drawing on four areas of expertise: the analysis of public policy and social issues; the theory and practice of public relations and communications management; theories of adult learning; and the theory and practice of informal or community-based educational work. The course is in this sense an interdisciplinary one, and will formalise and develop this knowledge-base in providing an appropriate postgraduate qualification for professionals employed in the field.

Public education can also be described in terms of the areas of public policy in which educational work is taking place, and an important function of the course will be to bring together professionals from these different areas to share insights and strategies and to contribute in a critical way to the development of the field. These areas include three levels of government activity in areas such as the labour market and employment; the electoral system; social security, health and welfare and the environment; and non-government organisations, particularly in the arts, the environment and health and welfare, whose public activities involves educational work.

AIMS
The course aims to develop the theoretical understanding and professional practice of graduates working in public education. It will:

• develop perspectives on public education drawn from policy analysis, public relations and communication management theory, adult learning and community education;

• increase knowledge of the range and extent of public education as it is evident in a range of campaigns and activities in contemporary Australian society;

• encourage the critical analysis of public education activities through appropriate case studies;

• develop participants’ strategies for conducting public education work in their professional roles.

The developing nature of the field calls for appropriate professional development for practitioners. There is a need and an opportunity to engage critically with public education practice and influence its development as a field through this course initiative.

STRUCTURE
The course is made up of four subjects, two per semester, each of six credit points, an assessment load consistent with other Graduate Certificates in the Faculty and the Master of Education in Adult Education. In the first semester, the subject
'Perspectives on Public Education' overviews the field and provides a range of theoretical perspectives on public education. The subject 'Communication Strategies for Public Policy' develops expertise in designing and evaluating public communications to target audiences. In second semester, the subject 'Adult Learning and Community Action' examines community-based public education and principles of community adult education and informal learning. The subject 'Case Studies in Public Education' comprehensively examines the range and extent of public education and promotes critical analysis of public education programs and practices.

**Autumn semester**
011001 Perspectives on Public Education (6cp)
011002 Communication Strategies for Public Policy (6cp)

**Spring semester**
011003 Adult Learning and Community Action (6cp)

**Graduate Certificate in Adult Education in Training (TA65)**

Academic Coordinator: John Garrick

**PARTICIPANTS**

This one-year part-time course is for practising trainers and adult educators who already have a degree but who have no formal qualifications in training or human resource development. This course focuses on practical skills that are embedded in current theory about learning and teaching. The course will also be offered on a postgraduate course fee basis with attendance over seven weekends during the year. The course is also available in-house to organisations providing there are sufficient participants.

**ARTICULATION**

The Graduate Certificate articulates with other courses offered by the School in the following way:

- you may apply for and enrol in the Graduate Certificate and complete the course after one year;
- if you wish once you have completed the Graduate Certificate you may apply to enter the first year of the Master of Education in Adult Education. Subjects completed in the Graduate Certificate cannot be credited towards the Master of Education in Adult Education. If accepted you may exit either at the end of that first year with a Graduate Diploma in Adult Education (Training) or at the end of the second year with a Master of Education in Adult Education.
COURSE AIMS
The aims of this course have been formulated to meet the specific needs of those practitioners who are required to develop their generic training competencies in adult teaching and learning, program development, and course assessment and evaluation.

As part of this adult education course participants will be provided with opportunities to:

- apply adult learning theory and principles to training practices;
- demonstrate a basic set of presentation and training skills that are appropriate to a wide range of adult learners and learn to critique their own practices;
- expand competence as self-directed learners through the use of a learning journal, learning contracts and participation in self-directed learning groups;
- gain experience in designing, developing, implementing and evaluating training programs that are based on a competency-based model of training;
- critically evaluate existing training practices in the light of competency-based assessment models;
- facilitate workplace learning through programs or provisions that address the needs of workers in developing literacy and numeracy.

ASSESSMENT
Each subject in this course will be assessed on a ‘pass’ or ‘fail’ basis. These include learning contracts, group-based assessments of workshops, and various forms of tutorial group evaluation. Individual coursework is done primarily through negotiated learning contracts.

NOTE ON PRACTICUM
This is an essential component of the course which must be completed by each trainer as part of an assessment of training competencies in the workplace. The basic requirement is for each participant to find a person who is willing to act as a mentor or ‘cooperating trainer’. The trainer will need to be able to plan, implement and evaluate a range of training activities associated with helping adults learn, program development and evaluation. It is suggested that participants identify their cooperating trainer in the workplace as soon as practicable.

ATTENDANCE
Attendance will be one evening a week from 5.00 to 9.00 p.m. (usually Wednesday). A minimum of 85 per cent attendance is required for satisfactorily completing this course. Compulsory attendance at two weekend (Saturday) workshops per semester is also required.

COURSE STRUCTURE
The course will be offered over one year of part-time study. As part of this course all participants will be required to arrange industry-based ‘supervised practical’ experience.

Autumn semester
010123 Adult Teaching and Learning (6cp)
015147 Skills Workshop 1 (2cp)
015148 Tutorial 1 (2cp)
015149 Practicum 1 (2cp)

Spring semester
010122 Program Development, Implementation and Evaluation (6cp)

Graduate Certificate in Adult Education in Community Education (TA66)

Academic Coordinator: Michael Newman

PARTICIPANTS

This one-year part-time course is for people who already have a tertiary qualification or equivalent and who are engaged in community adult education. Such people are likely to be working as facilitators and educators with adult education centres, evening or community colleges, Aboriginal communities and organisations, outreach organisations, welfare agencies, charitable organisations, community health organisations, advice centres, or groups engaged in social and community action.

ARTICULATION

The course articulates with other courses offered by the School in the following way:

• you may apply for and enrol in the Graduate Certificate and complete the course after one year;
• if you wish, once you have completed the Graduate Certificate you may apply to enter the first year of the Master of Education in Adult Education. Subjects completed in the Graduate Certificate cannot be credited towards the Master of Education in Adult Education. If accepted you may exit either at the end of that first year with a Graduate Certificate in Adult Education in Community Education or at the end of the second year with a Master of Education in Adult Education. As a result the Graduate Certificate is designed to offer you a one-year introduction to the field of community adult education in a way that will relate to your immediate professional needs. This may be all you want. However if at the end of the course you feel you would like to continue studying community adult education as a field of academic inquiry then the opportunity is there.

COURSE AIMS

The course aims to help you become an informed and effective community adult educator. By the end of the course you should be able to:

• describe and apply relevant theory drawn from the literature on adult learning to your practice as a facilitator of adult learning in community and social action contexts;
• describe and apply relevant theory drawn from the literature relating to developing, conducting and evaluating adult education programs in a community or social action context;
• demonstrate competencies related to self direction in learning that will enable you to continue your development as community adult educators.

PROCESS

Some of the course is prescribed and some learner-directed. This means that there are opportunities for you to pool information and ideas with other participants and to tailor your study directly to your own professional, community and personal requirements.

COURSE COMPONENTS

Seminars are held on a weekday evening and are usually conducted as lecture discussions. Sessions last two hours. The seminars are used to examine the theory which informs community adult education practice. In Autumn semester the seminars are entitled ‘Adult Teaching and Learning’. You will be encouraged to examine certain adult learning principles and a number of adult learning theories. This will lead to a study of teaching and learning techniques which place an emphasis on facilitation and dialogue, and draw on the theory and practice of educators with experience in the fields of community development and social action. In Spring semester the seminars are entitled ‘Developing Community Adult Education Programs’. You will be encouraged to examine the theory and practice of designing and implementing a range of educational activities in differing kinds of community. By looking at the work of a number of adult educators, you will be
encouraged to develop your own theoretical framework to guide your practice.

Professional Skills is a composite activity requiring attendance on the same weekday evening as the seminars. Sessions last one-and-a-half hours. On alternate weeks a member of staff will lead using lectures and exercises to help you develop your facilitation and teaching skills. On the other weeks participants will be allocated into semi-autonomous study groups and asked to work on a number of learning projects which within given parameters you will be able to choose and design yourselves.

Workshops are held on four Saturdays during the year. Each study group is required to help in the design of one workshop. The workshops enable participants to supplement the content of the course and to practise planning, implementing and evaluating an educational activity.

Learning journals are kept by each participant throughout the course in order to record and reflect on their field work, community education practice and significant learning. The journals need to be completed according to a number of general criteria and sighted by a member of staff.

**ASSESSMENT**

Assessment is related to attendance, participation in all components of the course, the completion of the learning journal, and the completion of a number of learning contracts. The result of assessment is either ‘pass’ or ‘fail’.

**LEARNING CONTRACTS**

These comprise the major written work for the course. They are negotiated by each participant with a member of staff. The idea is to get away from the set assignment and to make the coursework you do directly relevant to your own professional interests and work. You are required to complete four learning contracts during the course negotiated with your study group supervisor and with the seminar leaders.

**ATTENDANCE**

Attendance is one evening a week from 5.00 to 9.00 p.m. (usually Wednesday) and four one-day workshops which are normally held on Saturdays during the semester. In addition you will need to put aside a significant amount of time to research, read and write material related to your study groups, learning contracts and learning journal. The course places some emphasis on self-direction in learning. Staff are there to offer support and advice but the process of designing and planning your own learning can be difficult at first and if you have not experienced this kind of learning program before you may need to be ready for an initial period of adjustment.

The course is offered over one year of part-time study.

SUBJECT DESCRIPTIONS

Guide to subject descriptions
The subject descriptions shown below indicate the subject code and name, and the number of credit points for the subject (e.g. 3cp). For some subjects, there may also be practical components off campus, and this is indicated in the text. Also shown are the prerequisites or corequisites, if any, the method of assessment and name of the Subject Coordinator, if known, and a brief outline of the content.

Prerequisites are subjects which must be completed before taking the subject to which they refer. Corequisites may be completed before or be taken concurrently with the subject to which they refer.

010113
EXPLORING ADULT BASIC EDUCATION PRACTICE
6cp
This subject aims to provide participants with some concepts and strategies to critique their own practice in the broader socio-cultural and political contexts in which they work. A critical perspective on taken-for-granted concepts such as pedagogy and practice are explored. Participants undertake a limited field study in their own classrooms in which they explore some aspect of the impact of the wider society on their own practice.

010117
TEACHING AND LEARNING IN ADULT LITERACY
6cp
This subject aims to provide participants with the knowledge, skills and attitudes to enable them to teach adult literacy in a variety of contexts. It provides an introduction to the relationship between language use, social identity and power relationships in our society and an understanding of the nature and development of literacy practices. Participants explore the research which supports different concepts of literacy with particular attention given to the understanding of literacy as a social construct, consisting of multiple sets of skills and practices, each determined by specific contexts and purposes. Literacy teaching and learning strategies are examined and evaluated in the light of the theory and research about literacy development.

010118
PROGRAM DEVELOPMENT, IMPLEMENTATION AND EVALUATION IN ADULT BASIC EDUCATION
6cp
This subject aims to provide participants with a framework and skills for planning, implementing and evaluating learning programs for adult literacy and numeracy students in a range of learning contexts. It also aims to provide some understanding of curriculum and its location in society.

010120
FOUNDATIONS OF ADULT EDUCATION
6cp
This subject aims to bring together the understandings about adults as learners which are central to all subjects in the course. Adult learning theory is critically considered in terms of these understandings. Different approaches to adult education are studied. Participants are encouraged to recognise the values and assumptions which guide these different approaches and from this to recognise their own guiding values and assumptions. A second area of focus is on increasing participants' awareness of the scope and future direction of adult basic education provision within Australia and overseas.

010121
LEARNING JOURNAL: RELATING ABE AND TESOL
2cp
For this subject, participants will observe experienced TESOL teachers in their teaching situations and reflect on these observations, in an effort to relate TESOL theory to the theory and practice of ABE.

GENDER AT WORK
4cp
Gender is a central organising principle of work. This subject examines patterns of women’s and men’s participation in paid work and the social, historical, economic and political factors implicated in these patterns. Segmentation in the labour market and segregation in the workplace are analysed with particular reference to gender inequalities and relations of power. Taken-for-granted assumptions about gender fundamental to the way work is organised at the wider social level and to how individual jobs are designed and examined, and various explanations for the gendered nature of work are critically evaluated. Particular emphasis is given to the experiences and meanings of work in men’s and women’s lives and to the relationship between work and gendered personal identity. The subject evaluates anti-discrimination legislation, equal employment opportunity and affirmative action program as strategic interventions aimed at de-gendering the institutions and conditions of work.

Part 1 focuses on individuals researching their own practice and doing field studies to provide evidence of the status quo of experiential education. There are two skills workshop requirements. Participants will have the opportunity to work collaboratively in small teams to design and implement a one-day experiential learning workshop and be expected to attend and participate in one other. These workshops like the group classes will take place at weekends. Participants will also be required to maintain a reflective learning journal over the period of the course to record significant learning events and critically reflect on their experience, learning skills and work practices. Assessment includes a personal workplace study, field studies, group research reports and self and peer assessment.

SCHOOL OF TEACHER EDUCATION

The School of Teacher Education, located at the Kuring-gai campus, offers both undergraduate and postgraduate courses. The undergraduate courses are designed to provide initial teacher education. The Graduate Diploma in Education courses prepare university graduates to teach in secondary schools. Other postgraduate courses provide the opportunity for qualified and experienced teachers to extend their professional skills to enable them to take on new roles. The Graduate Diploma and Master of Arts in Children’s Literature and Literacy, and the Graduate Diploma in Primary Music may also be taken by non-teachers who have a relevant first degree or its equivalent. It is also possible to enrol in individual subjects in these programs.

Details of higher degrees, including the Doctor of Education, are given in the introductory Faculty entry.

THE STUDENT LEARNING CENTRE

The Student Learning Centre (situated on the Kuring-gai campus) serves students from all faculties. It aims to assist students to realise their academic potential by providing a free academic support unit in the areas of language and learning and mathematics and science. It also assists students to become self-reliant learners through the use of appropriate learning strategies.

Students may visit the Centre on their own initiative or on a voluntary basis when referred by academic staff.

Director, Dr Lesley Ljungdahl (330 5160). Inquiries regarding learning and language strategies to Lesley Ljungdahl or Kerry Gatliff (330 5524); inquiries regarding mathematics, science and learning to Dr Jules Harnett (330 5186).

COMPUTING FACILITIES FOR TEACHER EDUCATION STUDENTS

A new microcomputer laboratory is available for use by Teacher Education students. The new laboratory has 20 Macintosh LC2 and 10 Macintosh LC630 microcomputers. The latter type provides good multimedia capabilities, with CD-ROM drives. A wide range of software is available, and our students have access to the Internet, which gives access to e-mail and remote databases. As well, there are four workstations which are equipped with synthesiser keyboards which are MIDI-linked (Musical Instrument Digital Interface) to the computers. These synthesisers use relevant software programs from the computers so that students can develop aural acuity and notation skills at their own pace.

REFERENCING PROCEDURES

The School of Teacher Education recommends the use of the referencing procedures set out in the Faculty of Education’s Referencing Procedures Guide (Pettit and Whalan, December 1994) which is provided free of charge to all students.
UNDERGRADUATE COURSES

Bachelor of Teaching in Primary Education (TE15)

The course is a three-year full-time qualification for teaching at the K–6 level. It commenced in 1992 in place of the Diploma of Teaching. In July 1990 the NSW Parliament passed the Education Reform Bill which provides for six key learning areas in the primary school, namely English, Mathematics, Science and Technology, Human Society and its Environment, Creative and Practical Arts, and Personal Development, Health and Physical Education. In line with this Bill the whole Bachelor of Teaching and Teacher Librarianship programs were reviewed. Graduates have the option of continuing their professional preparation through entry into the Bachelor of Education course which is one year full time or two years part time.

The course structure is as follows:

- teaching studies, comprising pedagogical and curriculum studies;
- foundation studies, comprising education and general studies;
- elective studies, comprising an elective subject sequence of professional relevance and particular interest to the student.

TEACHING STUDIES

This strand is the major part of the course. It has two sub-strands, Practicum curriculum and Curriculum studies.

The Practicum curriculum consists of a sequence of six subjects, one taken each semester, aimed at fostering an understanding of how children learn and the strategies a teacher can employ to facilitate a favourable learning environment. The subjects taken are:

- 023101 Practicum 1: Introduction to Issues and Dilemmas in Primary Schooling
- 023102 Practicum 2: Promoting Learning and Learner Cooperation
- 023103 Practicum 3: Promoting Learner Interaction
- 023104 Practicum 4: Managing Learning Difficulties
- 023105 Practicum 5: Designing and Implementing Educational Programs for Learners
- 023106 Practicum 6: Providing for Individual Differences in Learners

Integrated with the Practicum curriculum is a Practicum program consisting of campus-based studies aimed at developing sound professional practices and field experiences wherein students are placed in schools and other educational settings to engage in a variety of professional interactions. The in-school field experiences are organised into five block periods, each of approximately three weeks. One of these is conducted in each semester except in Semester 5, when students undertake a community-based contract, visiting and reporting on community sites, resource centres etc. Students have the option of undertaking one of these periods in Thailand, teaching English as a second language.

The Curriculum studies sub-strand is a major element of the course. The initial subjects taken, Primary Curriculum Orientation 1 and 2, provide students with a general introduction to the range of K–6 teaching subjects. The remaining subjects are taken in Semesters 2–6. These align with the teaching subjects of the primary curriculum, examining their nature and content, and the various teaching and learning approaches most suited to each. Sequences of subjects are taken in English education; mathematics education; science and technology education; social studies education; music education; art and craft education; and personal development, health and physical education.

FOUNDATION STUDIES

This strand consists of two sub-strands, Education studies and General studies.

Education studies subjects aim to develop students who are informed, disciplined and critical analysts of formal education as a social phenomenon. The three subjects in this sub-strand are Developmental
Psychology; Social Bases of Education; and Philosophical Bases of Education. The General studies sub-strand fosters scholarly insights and understandings of a more general nature within and beyond the teaching profession. The subjects taken are Introduction to Computers in the Classroom; Australian Studies 1 and 2; and a general elective subject.

The range of general elective subjects to be offered in any one year will be provided to students at the beginning of the year. As far as possible, a student's first choice will be accommodated from the following range of subjects (not all of which will be available every year): An Asian Study: Thailand; Aspects of Australian Art; Australian Natural History; Drama in Education; Family History; Music and Society; Science and Technology in Australia; and Urban Studies.

ELECTIVE MAJOR STUDIES

The elective studies strand is a sequence of five subjects, one taken in each of Semesters 2-6. In Semester 1, students are informed about the content of each of the sequences and are assisted to choose one that is of personal interest and could be useful professionally should they wish to specialise in the area at primary level or teach it at secondary level later in their career.

The broad objective of this strand is to provide students with some scholarly expertise in a field of their choice, so they will gain insights that will both enrich their teaching and influence the way they approach all fields of human knowledge. There are such relationships between the subjects of a sequence that, by studying the five subjects, a student's understanding of the field or discipline will be deepened as well as broadened.

The elective studies sequences are: Arts Studies; Drama and the Theatre Arts; Educational Computing; English; History; Mathematics; Music Studies; Personal Development, Health and Physical Education; and Science and Technology. It is not intended that all of these will be available in any one year. The range available will be provided to students at the beginning of the year and from within that range a student's first choice will be accommodated as far as possible.

Art elective study major

Coordinator: to be advised

Art theory with associated practical work will be explored through a cross-sectional study of times and cultures culminating in a totally self-directed unit of research. This elective studies sequence is aimed at developing students' awareness of the complexities of thought processes associated with art, and ultimately improving the ability of the students to understand and appreciate art in its many forms, both as a basis for future development and for enrichment of their knowledge as classroom practitioners.

The subject sequence is as follows:

020401 Art Studies 1: Australian Art and Art of The Western World 1945 to the present and associated practical work
020402 Art Studies 2: Sculpture 1945 to the present: Australia and Western Art and associated practical work
020403 Art Studies 3: Art of the pre-Christian world and associated practical work
020404 Art Studies 4: South-East Asian Art and associated practical work
020405 Art Studies 5: Aesthetics of Art and associated practical work

Drama and Theatre Arts elective study major

Coordinator: Vere Drakeford

The disciplinary sequence in drama and theatre arts develops students' knowledge of theatre as an extremely complex institution which encompasses playwriting, directing, acting, costume, make-up, scenery, lighting, properties, management, audiences and criticism. It examines drama in terms of communication, mythos and community and the many forces which shape it as an exciting realm of creative achievement. It involves students in both the theory and practice of drama so that there will be an increasing understanding of the dramatic moment and the development of the necessary dramatic skills as students become familiar with a range of theatre techniques and styles which they may use for themselves in performance, in their teaching and in communication with others.
The subject sequence is as follows:

022401 Drama and Theatre Arts 1: Introduction to World Theatre
022402 Drama and Theatre Arts 2: Acting - the Fundamentals
022403 Drama and Theatre Arts 3: Lighting, Sound and Design
022404 Drama and Theatre Arts 4: Advanced Acting
022405 Drama and Theatre Arts 5: Dramatic Form

It should be noted that practical hours additional to the notional number of class hours may be required in all subjects.

**Educational Computing elective study major**

Coordinator: Gerry Foley

This elective studies sequence of five subjects is designed to prepare students to become teachers who will be in control of the computer technology at their disposal and who will be able to use the computer in creating a learning environment. Students will benefit both personally and professionally as they become familiar with the way in which information is collected, stored and used.

A practical approach will be implemented as two broad themes are developed. The first three subjects will examine computer technology as well as a range of application packages and programming tools. In the fourth and fifth subjects the language LOGO will help students to explore learning opportunities with an emphasis on graphics, geometry, problem solving, simulations and robotics.

The subject sequence is as follows:

021401 Educational Computing 1: Applications A
021402 Educational Computing 2: Applications B
021403 Educational Computing 3: Programming Tools
021404 Educational Computing 4: LOGO A
021405 Educational Computing 5: LOGO B

**English elective study major**

Coordinator: Rosemary Johnston

The elective studies subjects in English have been designed to broaden and deepen students' understanding of English literature. By the time they have completed all the subjects in the sequence they will have read and considered a number of significant works of literature in various genres, will have come to see how literature is both a product of, and an influence upon, the society which produces it, and will have explored the relationship between particular literary forms and prevailing social and philosophical world views.

By emphasising the social context of literature the subjects will focus attention on the forces which shape society, and will contribute to students' understanding and evaluation of contemporary society. These insights will enrich students' teaching across the curriculum. The development of insights into literature and language and the fostering of critical perception will assist students in all aspects of their professional practice in the key learning area of English.

The subject sequence is as follows:

024401 English 1: Language and Literature
024402 English 2: Form and Meaning
024403 English 3: The Victorians and After
024404 English 4: Revolution and Romanticism
024405 English 5: Elizabethans and Jacobean - the Emergence of Modern Language and Literature

**History elective study major**

Coordinator: John Atherton

The study of history is a central and indispensable means of gaining knowledge and understanding of human society. It provides not only a frame of reference essential for the understanding of one's own society, but also, uniquely, perspectives on humanity in a diversity of social environments existing through time. Within its broad compass may be studied the continuities and changes that have occurred in societies, the ways in which
cultures and their institutions have developed, the ways in which people in the past have lived and the beliefs and values held by them. Such historical knowledge contributes greatly to an increased awareness of the nature of contemporary society. It also reveals how the accumulated experience of the past is the inescapable heritage of the present.

The history sequence commences with a study of Europe from early modern times through to the 20th century. This provides a wider canvas on which the study of Australian history, from its beginnings through to the 20th century, can be presented as an instance of the transplantation of European culture in a South Pacific context. The attention of students is then turned to Asian history by selecting aspects of the Asian past which show continuities with the present – and by extension, links with multicultural Australian society.

The history subject series thus transports a student's attention from Australia's European heritage through its particular adaptation in the Australian context to an appreciation of the diversity and achievements of Asian cultures to our north.

The subjects are as follows:

029401 History 1: Europe from early modern times to the end of the 19th century
029402 History 2: Europe in the 20th century
029403 History 3: Australia to 1900
029404 History 4: Australia in the 20th century
029405 History 5: Aspects of Asia from ancient times to the more recent past

Mathematics elective study major
 Coordinator: Graham Barnsley

The elective studies subjects in mathematics have been selected on the assumption that students electing these subjects may be expected to assume leadership roles and act as mathematics resource teachers in their schools. The subjects (and the approaches to their teaching) are therefore intended to increase students' awareness of the nature of mathematics and its applications and to improve the quality of mathematical thinking. While these objectives will also be addressed in mathematics education subjects, they will be explored in further depth and sophistication in elective studies subjects.

The subject sequence is as follows:

025401 Mathematics 1: Probability
025402 Mathematics 2: Finite Structures
025403 Mathematics 3: Graph Theory
025404 Mathematics 4: Statistics
025405 Mathematics 5: Historical Topics

Music elective study major
 Coordinator: John Lloyd

The student will be involved in three areas of study:

Musicianship studies This aspect of the elective studies in music is concerned with the establishment of a thorough grounding in the basic aural and theoretical abilities of the musician. It is concerned with an understanding of artistic trends and philosophical perspectives in relation to music. It is also concerned with music in the ethnological and educational spheres.

Practical studies The initial practical studies component is concerned with keyboard awareness in relation to the understanding of fundamental musical devices, structures and functions. Later concerns are with the development of practical skills, performance and teaching techniques and the acquisition of repertoire in the areas of percussion music, choral music, instrumental music and movement in relation to music. Also covered are basic synthesiser and computer functions in relation to composition, arranging and publication.

Applied studies A proposed study in an area of personal interest, if accepted, will be completed under supervision. A study may cover one or more semesters, but the work of each semester will be assessed separately. This unit of work will be of an applied nature such as an educational sequence of activities, a composition, a performance, an arrangement for a school ensemble or a musicological study.
The subject sequence is as follows:
026401 Music Studies 1
026402 Music Studies 2
026403 Music Studies 3
026404 Music Studies 4
026405 Music Studies 5

Personal Development, Health and Physical Education elective study major
Coordinator: Robert Lees
The personal development, health and physical education elective study is designed to give students who have a special interest in the teaching of this key learning area the appropriate learning experiences. It seeks to develop in students a commitment to a healthy lifestyle so that they might provide a role model for those they teach.

The subject sequence is as follows:
027401 Personal Health
027402 Lifestyle and Fitness
027403 Social Context of Physical Education
027404 Children and Physical Activity
027405 Motor Skill Acquisition and Analysis

Science and Technology elective study major
Coordinator: Janette Griffin
The elective studies subjects in science and technology have been developed to reflect the principles of science and technology taught in the primary school. They provide students with a solid content base from which to draw, as well as a working understanding of the processes and skills of science. The emphasis is on broadening and extending students' learning and understanding in science and technology through an integrated approach which removes traditional discipline boundaries. Each subject examines understanding about the world around us from a different perspective: the human body and how it works, the natural environment, the science and technology that we all use in everyday life, the social and historical perspective of the interrelationship between science and technology, and the planet as a whole.

In and through all of these subjects a number of issues will be continuous — the relevance of science and technology to teachers and students at the primary level; gender, cultural and environmental issues; and the importance of Australian research and development in a world context.

As they are listed here the subjects follow a developmental sequence, from science immediately relevant to the student and moving eventually to a global view. There are, however, no prerequisites which dictate a sequence of study, and therefore it is not essential that they be studied in any particular order.

The subjects are as follows:
028401 The Human Body
028402 The Australian Environment
028403 Science and Technology in Daily Life
028404 People, Technology and Science
028405 Planet Earth

Bachelor of Teaching and Bachelor of Arts in International Studies (TE18)

The combined degree in Teaching and International Studies provides UTS trainee teachers with a good grounding in a language and culture other than English, as well as professional training and education. Though the course does not concentrate exclusively on East Asia and South-East Asia, those areas are significant not least because of the Federal Government's recently adopted National Asian Languages and Studies Strategy, which intends to increase the number of school students engaged in the study of the languages and cultures of those regions.

At the same time, the combined degree has the educational goal of making students aware of a wider world by providing them with the opportunity to acquire a knowledge and understanding of another language and culture.

The Bachelor of Teaching and Bachelor of Arts in International Studies is a five-year degree in which the study of Teacher Education is integrated with a major in the language and culture of another country. Students spend the fourth year of study at a university overseas. All existing arrangements for both the Bachelor of Teaching and the Bachelor of Arts in International Studies apply equally to the combined degree program in Teaching and International Studies.

To graduate, a student is required to have completed 240 credit points of study: 144 credit points in Teacher Education and 96 credit points in International Studies.

Within the combined degree in Teaching and International Studies, students will be required to complete the usual three strands of the Bachelor of Teaching course:

- teaching studies—comprising pedagogical and curriculum studies;
- foundation studies—comprising education and general studies;
- elective studies—comprising a sequence of elective subjects of professional relevance and particular interest to the student.

The International Studies program requires undergraduates to study one major—a country or region of specialisation—over a minimum of three years. Students study language and culture for at least two years in Sydney, and this is followed by a period of study overseas. In 1996, the following majors will be offered: China, Indonesia, Japan, Latin America (Chile and Argentina), South China (Hong Kong and Guangdong), Taiwan, Thailand and Western Europe (France, Germany and Italy).

Students are admitted to the International Studies program with no guarantee of entry to a specific major, although students' preferences are taken into consideration. The Institute reserves the right to allocate student majors according to its resources and arrangements with overseas universities.

In general, the International Studies program has no prior language requirement, except for some specific majors. Students wishing to do the Western Europe major are required to have successfully completed French, German or Italian at HSC level or equivalent.

Each student's choice of a major and subjects to study in the International Studies program requires the approval of the Board of Studies of the Institute for International Studies.

In exceptional circumstances, students may, with the approval of the Board of Studies of the Institute for International Studies, vary the designated subjects in their International Studies major. A list of approved substitute subjects may be found in the Institute for International Studies Handbook.

Each of the majors within the International Studies program has a value of 96 credit points, and includes 32 credit points (four subjects) of instruction in an appropriate Language and Culture; 16 credit points (two subjects) of the study of Contemporary Society; and 48 credit points (two semesters) of study at a university or institution of higher education in a country of the major.

Students do not need to have previously studied a language and culture other than English to be able to successfully complete the program. All students are required to
complete four consecutive semesters of study of Language and Culture before proceeding to In-country Study. There are different classes available for students with different levels of language proficiency.

The Institute for International Studies makes the arrangements for students to spend two semesters of In-country Study at an institution of higher education in a country of their major. The costs of tuition and travel are borne by UTS. In most cases there will be no additional costs for students. However, those studying in countries or regions where the cost of living is high—e.g. Japan, Taiwan, Hong Kong or Western Europe—should be prepared to pay additional costs for accommodation and maintenance.

**Language and Culture**

Each individual student’s level of language proficiency when they enter the International Studies program determines what Language and Culture subjects they study. There are various levels of entry to the Language and Culture programs available, again dependent on the student’s level of ability. Most of the programs are available at the beginners’ and post-HSC levels, and some also cater to the needs of more advanced students.

In 1996, the following Language and Culture programs will be available at UTS: Cantonese, Chinese, Indonesian, Japanese, Modern Standard Chinese and Spanish. (Modern Standard Chinese is a program for students who are either complete beginners or who first learnt Chinese at school in Australia.) In addition, arrangements are in place for French, German, Hindi, Italian, Korean and Thai to be taught to students.

**Contemporary Society**

In each major of the International Studies program, students take two specific subjects which provide an introduction to the history, politics, economics and society of the country or region of their International Studies major.

The first subject is Modernisation and Globalisation, which provides an introduction to comparative social change in Western Europe, Latin America, East Asia and South-East Asia. It helps students locate the culture of their major in its intellectual, social and political contexts.

The second is Contemporary Society 2, which provides an introduction to a specific country or region in order to ensure that students gain an understanding of its political, social and economic structures, and to identify its more dynamic aspects. No prior knowledge of the culture or skills in the language concerned are required, and all teaching is conducted in English.

Students take the following pairs of subjects in Contemporary Society for each major:

- China: Modernisation and Globalisation, Contemporary China
- Indonesia: Modernisation and Globalisation, Contemporary South-East Asia
- Japan: Modernisation and Globalisation, Contemporary Japan
- Latin America: Modernisation and Globalisation, Contemporary Latin America
- South China: Modernisation and Globalisation, Chinese East Asia
- Taiwan: Modernisation and Globalisation, Chinese East Asia
- Thailand: Modernisation and Globalisation, Contemporary South-East Asia
- Western Europe: Modernisation and Globalisation, Contemporary Western Europe
In-country Study

Arrangements for students to spend two semesters of study at an institution of higher education in a country of their major have already been made or are in train. In general, within the International Studies program, the first semester is largely concerned with further language development and cultural appreciation. The second semester continues the study of language and culture but, where numbers permit, combines it with study of the student's major discipline. Therefore, assuming a group of five or more trainee teachers in the combined degree program specialise in the study of a particular country, then their second semester could be directed, through language study, at education theory and practice in that country.

In some cases, it is entirely possible that students may be able to spend their second semester of In-country Study at a specialist teacher education institution. For example, discussions are already well advanced with teacher education institutions in China and Japan which would be prepared to accept UTS students in the combined degree program.

In general, students may expect that no more costs will be incurred through undertaking a period of In-country Study as part of this degree program than are involved in living away from home in Australia. The two semesters of In-country Study are full-credit subjects at UTS for which HECS is payable. However, there are no further tuition fees and the Institute for International Studies will provide travel subsidies. Students receiving Austudy in Australia are still eligible for it while they are engaged in a period of In-country Study.

Some of the countries or regions included in the International Studies program—for instance, Japan, Hong Kong, Taiwan and Western Europe—have relatively high costs of living. Though the Institute for International Studies will assist students enrolled in a period of In-country Study in those countries with their costs, it cannot guarantee to meet all additional costs. In such cases, students need to be prepared to meet a proportion of the costs themselves.

Under normal circumstances, students can only proceed to a period of In-country Study within the International Studies program after they have successfully completed all earlier stages in the combined degree program or the postgraduate coursework degree program (whichever is applicable). Students who have not successfully completed all earlier stages may proceed to a period of In-country Study only under exceptional circumstances and with the permission of both the Dean of the faculty in which their degree is based and the Director of the Institute for International Studies.

Before students leave UTS to engage in a period of In-country Study within the International Studies program, they may be required by the Director of the Institute for International Studies to meet appropriate financial and enrolment requirements. They are also required to agree to be governed by the Institute’s code of good conduct during their period of In-country Study.

In the fifth year of their combined degree program, students could draw on and extend their in-country experience by tailoring Practicum 5, Practicum 6 and the General Elective of the Bachelor of Teaching to their area of special interest. For example, students could carry out Practicum 5 and/or Practicum 6 at a site such as an ethnic school, an Intensive Language Centre or a ‘New Arrivals’ class. This would enable the students to use and further develop their knowledge of a particular language and culture. Likewise, the General Elective could be selected on the basis of a particular interest arising from the in-country experience. For example, a student who has studied in China for two semesters might select an advanced Chinese language class or a Chinese politics subject as their General Elective.

† The general elective can be taken in any semester as required.
INTERNATIONAL STUDIES ELECTIVES

The Institute for International Studies offers electives in language studies and in the study of contemporary societies in parts of the non-English-speaking world. All subjects last for one semester and are worth eight credit points.

Language Studies

All UTS students wishing to engage in language studies as a credited part of their degree are required to enrol through the Institute for International Studies, whether the language studies are undertaken on a UTS campus or elsewhere. The Institute offers some language programs at UTS, has made arrangements with other universities for languages to be taught to UTS students, and can make special arrangements for individual students to attend specific language programs where academic needs demand.

The level of language study is determined by the language proficiency of students before entry to the UTS program. There is a range of entry levels to the various programs available. Most are available at beginners and post-HSC levels, and some at more advanced levels.

In 1996, the following programs will be available at UTS as part of the International Studies program and open to students in all faculties: Cantonese, Chinese, Indonesian, Japanese, Modern Standard Chinese and Spanish. (Modern Standard Chinese is a program for students who are either complete beginners or who first learnt Chinese at school in Australia.) In addition, arrangements are in place for French, German, Hindi, Italian, Korean and Thai to be taught to students. There are no prerequisites for entry to any language program.

Contemporary Society

The Institute for International Studies offers a series of subjects that provide an introduction to the contemporary societies, political climates, economies and cultures of the countries of East and South-East Asia, Latin America and Western Europe, which are the Institute's areas of specialisation.

In 1996, introductory subjects on the contemporary societies of China, Japan, South-East Asia, Hong Kong, Taiwan, Latin America, and Western Europe will be available.

There are no prerequisites for any of the Contemporary Society subjects in the International Studies program. All subjects are taught in English and are available as electives to all UTS students, with the permission of their faculties.

Further details of International Studies subjects may be found in the *Institute for International Studies Handbook*.

Combined degree students are required to confirm, during the University enrolment period, the subjects they intend to take for the year with the Institute at 9 Broadway (next door to the Co-op Bookshop).

The Language and Contemporary Society subjects in the International Studies program are also available as electives.

For more information on the International Studies program, telephone 330 1574, fax 330 1578 or e-mail iisinfo@uts.edu.au.
Bachelor of Education in Primary Education (TE16)

The Bachelor of Education is a one-year full-time or two-year part-time course. There are four points of entry to the program:

1. current Diploma of Teaching or Bachelor of Teaching
2. pre-1983 Diploma of Teaching
3. two-year Teacher’s Certificate
4. non-primary teaching qualification with three or more years’ experience teaching primary children

Depending on the point of entry, there are different study patterns for students in order to fulfil the requirements of the degree. Each student must complete at least nine subjects including the two compulsory subjects, The Reflective Practitioner in the School, and the Faculty-wide subject, Current Issues in Australian Education.

COURSE STRUCTURE

Credit point values are shown in brackets.

The course is divided into two strands: Strand A – the compulsory component, and Strand B – a choice of electives. A total of eight subjects must be completed, plus The Reflective Practitioner in the School.

Mode of entry into The Reflective Practitioner in the School

The Reflective Practitioner in the School is a compulsory subject for all students enrolled in the Bachelor of Education. There are two components to be completed:

1. teaching experience
2. reflective experience

The manner in which students progress towards the completion of their degree will vary depending on the mode selected within this subject.

There are four modes of operation in the subject and these are based on the level of experience of the students upon entering the Bachelor of Education course. In each mode there are two components which must be completed: a teaching component which relates to the amount of time students have taught in schools; and a reflective component in which students will engage in a program of systematic reflective inquiry on aspects of teaching and schooling relative to their teaching experience. Students should read the following descriptions to determine which mode they follow.

Mode A: Associate Teacher program – for all full-time students who have no teaching experience; involves extended teaching experience in schools.

Mode B: Part-time Teacher program – for part-time students who are beginning teachers not yet in permanent teaching positions. These students can elect to do 40 days’ continuous or 60 days’ non-continuous teaching experience or if unable to complete the required number of days in the first year, they will be able to participate in the Associate Teacher program.
Mode C: Full-time Teacher program – for part-time students who are experienced teachers in permanent teaching positions.

Mode D: Overseas Teacher program – for students who come from other countries and need to upgrade their qualifications to be able to teach in NSW.

Special arrangements will be made for qualified and experienced teachers who are not currently employed in teaching.

**Associate Teacher program**

This component of the course contains two elements which are interlinked: campus-based studies which examine a range of theoretical issues, skills and procedures which will enable the development of sound professional practices; and field experiences wherein students are placed in a school for an extended period of time in order to engage in a variety of professional interactions.

The extended field experience is for a period of eight weeks in the same school. In the first instance the student will be allocated to a school for the first two weeks of the new school year. During the second half of the first semester students will return to the same school for a further six weeks.

As associate teachers, students will be appointed to a specific class to work jointly with the class teachers and will be responsible for planning and implementing the curriculum in three key learning areas. They will also fulfil such responsibilities as determined by the school principal to ensure they are fully participating members of the school staff. For example, they will support the teachers in preparing feedback to parents regarding pupil progress, they will attend staff meetings and curriculum team meetings. They will assist in the organisation of excursions and extended field trips. They will also be required to systematically collect data which will be analysed and interpreted during the University-based second semester of the course.

**Strand B (electives)**

All subjects have a credit point value of 5cp.

POSTGRADUATE COURSES

Graduate Diploma in Education (TE51, TE56, TE58)

Coordinator: Gerry Foley

This is a one-year full-time or equivalent part-time course for graduates of universities, or those with equivalent qualifications, who wish to prepare for secondary school teaching. The course aims to produce teachers who are reflective in their practice, are able to cope with the changing nature of teaching, have interpersonal skills, are able to put current developments in learning and teaching into practice, and have a commitment to life-long learning.

Interviews are part of the selection procedure.

Students need to satisfy requirements in three strands:

**Curriculum Studies**

Elective curriculum studies are available in these secondary school key learning areas: Mathematics (TE56), Personal Development/Health/Physical Education (TE58), and Science (TE51). These subjects aim to prepare students to become effective educators in their key learning area. The link with the practicum will help students to develop the professional insights and competencies necessary for a reflective practitioner teaching in the secondary school.

Students must elect to undertake studies in the area in which they have academic qualifications at degree level. Admission to the Mathematics elective requires at least ¾ of the degree in Mathematics (preferably a full major); admission to the PDHPE elective requires a degree in Human Movement Studies or an equivalent; and admission to the Science elective requires ¾ of a degree in one Science discipline and ¼ of a degree in another, provided that Physics and/or Chemistry are included in those disciplines.

**Education Studies**

Within the context of a study of the principles and patterns of human growth and development in the secondary years, Education Studies subjects in semester 1 emphasise the ways in which learning occurs, students and teachers interact effectively and teachers best provide for special needs of students. In Education Studies subjects in semester 2, students will acquire the knowledge and skills needed to understand and respond effectively to critical educational issues and to acknowledge and respond effectively to education as a social enterprise.

**Practicum**

The Practicum component includes both campus-based and field-based experiences. Students will be introduced to professional practice in the secondary school by drawing together the theory and practice necessary for an effective educational practitioner.

SUBJECT DESCRIPTIONS

Guide to subject descriptions
The subject descriptions shown below indicate the subject number and name, the number of credit points for the subject (e.g. 3cp), the duration of the subject, indicated as semester weeks, if applicable, and the number of formal contact hours each week (e.g. 4hpw); for some subjects, there may also be practical components off-campus, and this is indicated in the text.

Also shown are the prerequisites or corequisites, if any, the method of assessment and name of the Subject Coordinator, if known, and a brief outline of the content. Prerequisites are subjects which must be completed before taking the subject to which they refer. Corequisites may be completed before or be taken concurrently with the subject to which they refer.

Please note not all elective subjects relating to individual courses will be offered every year.

Key to subject codes
A new subject numbering system is in operation from 1996. The key to subject numbers is as follows:

The Faculty of Education is represented by '0'.

The School of Teacher Education is represented by '2'.

The third number identifies the subject area as follows:
0 Art
1 Computing
2 Drama
3 Education
4 English
5 Mathematics
6 Music
7 Personal Development, Health and Physical Education
8 Science
9 Social Science

The fourth number represents the strand:
1 Practicum curriculum
2 Curriculum studies
3 General studies
4 Elective study major
5 Education studies (undergraduate)
6 Advanced education subject
7 Advanced teaching studies
8 Special education subject
9 Postgraduate subject
0 Secondary course subject

The last two numbers distinguish each subject from all others.

They will keep a journal which will take particular note of processes used for undertaking needs analyses and teacher programming and planning.

During the second half of the first semester students will return to the school to which they have been assigned for a further six weeks. As associate teachers they will be responsible for working alongside experienced teachers as junior partners. They will take responsibility for planning, implementing and evaluating learning experiences in a variety of key learning areas, one of which must be mathematics or science education, as well as acting as team members in the remaining key learning areas.
