ABSTRACT

This demonstration presents a novel interactive online shopping application based on visual search technologies. When users want to buy something on a shopping site, they usually have the requirement of looking for related information from other web sites. Therefore users need to switch between the web page being browsed and other websites that provide search results. The proposed application enables users to naturally search products of interest when they browse a web page, and make their even causal purchase intent easily satisfied. The interactive shopping experience is characterized by: 1) in session—it allows users to specify the purchase intent in the browsing session, instead of leaving the current page and navigating to other websites; 2) in context—the browsed web page provides implicit context information which helps infer user purchase preferences; 3) in focus—users easily specify their search interest using gesture on touch devices and do not need to formulate queries in search box; 4) natural-gesture inputs and visual-based search provides users a natural shopping experience. The system is evaluated against a data set consisting of several millions commercial product images.

Categories and Subject Descriptors

H.5.1. [Information Interfaces and Presentation (e.g. HCI)]: Multimedia Information Systems

General Terms

Algorithms, Experiments, Human Factors.

Keywords

Visual search, user interaction, online shopping, gesture

1. INTRODUCTION

Typical online shopping experience mainly contains three activities: *browsing*, *search* and *transaction*. Usually users will spend many efforts in *browsing* and *search* activities to do product research, while the step of placing order costs

* This work was performed when Shiyang Lu visited Microsoft Research Asia as a research intern.

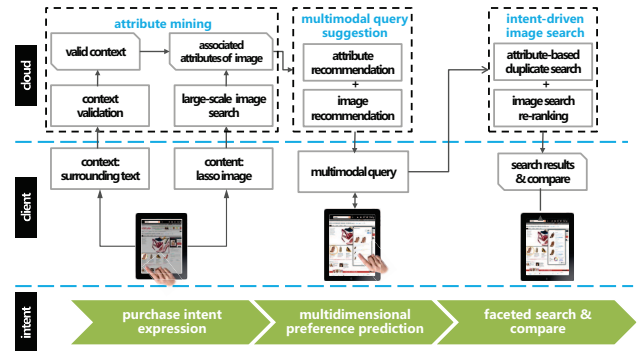

Figure 1: The architecture and process flow.

much less time. Consider the two main categories of shopping websites: 1) online shopping sites like Amazon.com; 2) product search engine like Google Product Search, users often need to frequently switch between *browsing* and *search*. For example, when a user is browsing a laptop product page on Amazon, he or she may also want to search similar products on Amazon, or the price information of the same laptop of other shopping sites. Obviously, the frequent switch between websites is not efficient, especially when touch devices like tablet PC or pad are used.

In the industrial efforts, Google recently released a new feature in Chrome, “Google Related”, to recommend relevant information during users’ browsing sessions [1]. However, users cannot specify their search intents and in many cases they have to conduct separate search. Some recent academic efforts are towards interactive search [2, 4, 5], but they do not concern the integrated browse and search behaviors.

In this demonstration, we present a novel interactive shopping application. The system involves a natural user interaction which seamlessly integrates the browse and search behaviors to promote user’s online shopping experience. The user can specify the purchase intent by selecting objects naturally using gestures (instead of the conventional query methods such as typing keywords in text box or using an input image to do search) when browsing e-commerce websites or even some ordinary Web pages, and to obtain the relevant products instantly within the same browsing session. In this work, we infer user search intent by analyzing visual properties of the user selection, with help of the context information collected from the browsed web page. The faceted search is conducted to rank candidate products.

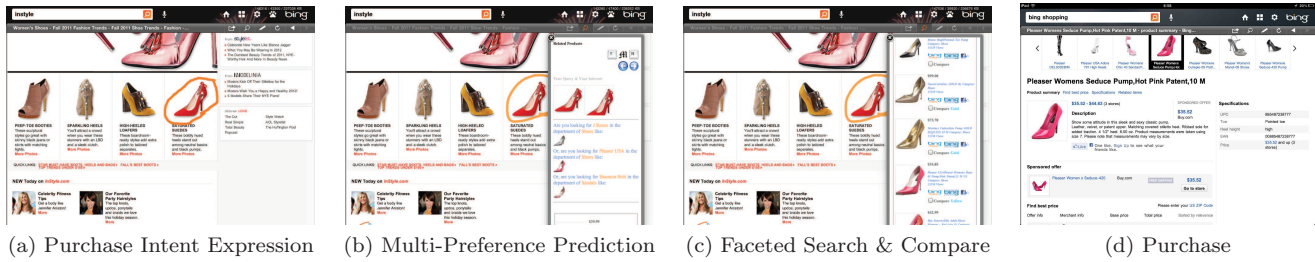

Figure 2: User interfaces of the “Browse-to-Search” system.

2. SYSTEM ARCHITECTURE

In order to capture the purchase intent, and facilitate users making further decisions, our system is designed with a three-stage process as illustrated in Fig. 1: 1) purchase intent expression allows users to select the interested product image at the client side using multi-touch gestures on Tablet PC (called “Lasso” gesture in the system). The back-end server in the cloud recognizes the selected visual content and also analyzes the surrounding context; 2) multidimensional preference prediction is accomplished through the multi-modality query suggestion strategy at the cloud which recommends the relevant product attributes with the associated images to help users designate the dominant preferences; 3) faceted search & compare performs a joint textual-visual search at the cloud side and return the most relevant products to the users for better decision-making.

3. SYSTEM IMPLEMENTATION

3.1 Purchase Intent Expression

We introduce a natural gesture by circling a region to indicate the object inside the interested image. Such intent expression method provides a unique experience as (1) users do not have to formulate a text query, which is inconvenient for a touch device; and (2) it is not necessary to upload a query image, which usually needs several steps to complete.

Then the selected visual content and the context formed by the surrounding texts are transferred to the cloud side. There are three modules to understand users’ intent: (1) *context validation* aims to extract the valid product specific attributes; (2) *large-scale image search* aims to understand the properties of the products by finding similar images from the visual perspective; and (3) *attribute mining* aims to discover attributes, such as the prices, brand names, categories, etc., by analyzing the outputs of the above two modules.

3.2 Multidimensional Preference Prediction

Multimodal query suggestion algorithm [6] runs at the cloud to analyze the multidimensional preferences of the purchase intent among the similar product images, and to suggest the most representative attributes with keywords (by *attribute recommendation*) and images (by *image recommendation*) to the users at the client side.

We use the stored associated metadata of the similar images and the extracted context to exploit the semantic attributes representing the preferences. We bound two characteristics: representativeness and divergence to ensure the suggested attributes are not only representative of the dominant preferences, but also reflect the diversity of aspects.

3.3 Faceted Search & Compare

A two-step *intent-driven image search* process is performed to search the relevant products. The first step is an attribute-based search step, which joins all the faceted aspects of the user intent, visual content and context. The second step is to re-rank the returned images and allow users to compare the products for making a decision.

4. SYSTEM DEMONSTRATION

The system is deployed as an application on iPad and running through a database with 5 million product images, which currently supports 83 product categories. Fig. 2 shows the user interface of the system. A user expresses his/her purchase intent as shown in Fig. 2(a); the preference predicted results shown as Fig. 2(b) and faceted search results shown as Fig. 2(c); Fig. 2(d) shows the linked purchase page if the user clicks the interested product.

We perform the normalized discount accumulation gain (nDCG) measure [6] to evaluate our search strategy. The nDCG score of the top returned products is improved from 45.37% by the vocabulary-tree based method [3] to 75.54% by the proposed method. The subjective evaluation demonstrates the merit of the system with 73.47% satisfying scores on a 12 users feedback. We also evaluate the system latency. Averagely, it returns a satisfying result within 1.5 seconds.

5. CONCLUSIONS

We present a novel system to integrate the browse and search behaviors into one explorative lifecycle for online shopping. The system is deployed on Tablet Pad by taking the advantages of the multi-touch interfaces and the proposed interactive visual search solution. Our experimental results with both objective and subjective evaluations indicate that the system is effective and efficient in terms of search performance, user satisfaction in usability, and overall boosting in online shopping experience.

Message from the General Chairs

We are delighted to welcome you to 20th ACM International Conference on Multimedia, ACM Multimedia 2012, which is held from October 29th to November 2nd, 2012 in Nara, Japan. Welcome to Japan's ancient capital, the cradle of Japanese culture and final destination of the Silk Road.

Like the Silk Road of ancient times, multimedia today provides a medium allowing the diverse exchange of ideas across many fields including signal processing, information retrieval, machine learning, content analysis, networking, applications, human-centered systems, art and education and many more. Because of this confluence, multimedia has become one of the fastest growing and most interesting areas in Computer Science. It is again in 2012 that Nara, Japan is a final destination, this time for sharing ideas in multimedia.

ACM Multimedia is the premier conference and worldwide event bringing together multimedia experts and practitioners across academia and industry. The central feature of the conference, which continues this year as in every year since its inception, is the outstanding Technical Program. This year's conference features both oral and poster presentations covering all aspects of the multimedia field chosen through a highly selective review process. Notably, this year's conference includes special Technical Program activities recognizing the 20th anniversary of ACM Multimedia.

In addition to the Technical Program, this year's conference features a diverse range of activities including Panels, Demonstrations and Tutorials. Additionally, a wide array of Workshops brings focus on new topics for investigation. The conference features also special sessions on Brave New Ideas, a Grand Challenge contest and Open Source Software Competition and includes a Doctoral Symposium for mentoring graduate students. Finally, the conference provides a rich Multimedia Art Exhibition to stimulate artists and researchers alike to meet and discover the frontiers of multimedia artistic communication!

The 20th Anniversary Keynote Talk and 20th Anniversary Panel

This year celebrates the 20th Anniversary of ACM Multimedia, which was first initiated by the ACM SIGMM in 1993. To mark this auspicious occasion, the conference features a 20th Anniversary Keynote Talk and a 20th Anniversary Panel. These two events reflect on major milestones and achievements in multimedia as well as discuss promising ideas and directions for the future.

Innovations for this Year's Conference:

In attempt to continuously improve ACM Multimedia and ensure its vibrant role for the multimedia community, we have made a number of enhancements for this year's conference:

- The Technical Program Committee defined eleven Technical Areas for major focus for this year's conference, including introducing new Technical Areas for Multimedia Activity and Event Understanding and Social Media to reflect their growing interest and promise.
- Technical Short Papers are presented as plenary posters to make them more visible at this year's conference, which reflects the growing quality of short papers.
- Plenary sessions bring singular focus to conference activities in the morning sessions each day, and afternoon sessions are held in parallel to allow pursuit of more specialized interests at the conference.
- Workshops and Tutorials are held on separate days from the main conference in order to reduce conflict with the regular Technical Program.

- Since Workshops are important seeds for the next generation of multimedia, two complementary workshop registrations are provided for invited talks of each workshop to encourage participation of notable speakers.
- The Multimedia Art Exhibition features both invited and selected artists and is open for two weeks in the satellite venue close to the main conference with good public access, which allows stimulation broadly to visitors to Nara.
- Following the last year's precedent, Tutorials are made free for all participants.
- Recognizing that students are the lifeblood of our next generation of multimedia thinkers, this year's Student Travel Grant is greatly expanded.

We hope these innovations make for a special conference this year.

We greatly acknowledge those who have contributed to the success of ACM Multimedia 2012. We thank the many paper authors and proposal contributors for the various technical and program components. We thank the large number of volunteers, including the Organizing Committee members and Technical Program Committee members who worked very hard to create this year's outstanding conference. Every aspect of the conference was also aided by local committee members, mainly from the Kansai area in Japan, to whom we are very grateful. We thank also ACM staff and Sheridan Printing Company for their constant support.

Finally, we thank our many supporters from Japan and around the world who generously supported ACM Multimedia 2012. They include FXPAL, Google, HUAWEI, IBM Research, NTT DOCOMO, Technicolor, DeNA, HP, KDDI R&D Labs, Microsoft Research, Mitsubishi Electric, OMRON, Panasonic, SHARP, YAHOO! LABS, Facebook, foo.log, Fuji Xerox, GREE, IBM Japan, NETCOMPASS, Nikon, NTT DATA, TOSHIBA, YAHOO! JAPAN, ARUBA and CTC. Other generous support was kindly provided by JSPS, KDDI Foundation, Nara Visitors Bureau, Springer, Telecommunication Advancement Foundation.

Enjoy ACM Multimedia 2012!

Message from the Technical Program Chairs

We are very pleased to be able to present an exciting technical program at ACM Multimedia 2012 in Nara, Japan. The outcome of the work of the Technical Program Committee (TPC) is of course entirely depending on the quantity and quality of submitted papers, which was excellent in 2012. Following the guidelines of the ACM Multimedia Review Committee, the conference is structured into 11 Areas, with a two-tier TPC, a double-blind review process, and a target acceptance rate of 20% for long papers and 30% for short papers.

Based on the experience from last year's ACM Multimedia and the responses to our "Call for Areas" that we issued to the community, we selected the following Areas for ACM Multimedia 2012: (1) Media Content Analysis and Processing, (2) Multimedia Activity and Event Understanding, (3) Multimedia Search and Retrieval, (4) Mobile and Location-Based Media, (5) Social Media, (6) Multimedia Systems and Middleware, (7) Media Transport and Sharing, (8) Multimedia Security and Forensics, (9) Multimedia Authoring, Production and Consumption, (10) Multimedia Interaction and Applications, (11) Multimedia Art, Entertainment and Culture.

The two-tier TPC was staffed in a two stage process: first we invited for each area in between two to four Area Chairs, and together with the Area Chairs we invited for the 11 Areas the TPC members. The number of Area Chairs and TPC members per Area was related to the estimated numbers of submissions to the Areas. The response to the Call for Papers in form of long and short papers was overwhelming. Out of all received papers, 331 and 407 papers went through review process for full and short paper track, respectively. The distribution to the different Areas was as expected unbalanced, ranging from the most popular Areas 1 and 10 with 78 and 54 long paper submissions, to the least popular Areas 8 and 9 with 11 and 14 long paper submissions respectively. The following figure gives a full overview on the number of submission and acceptance rate per Area and per paper type.

Each submission was reviewed by at least three TPC members with very few exceptions. The authors of long papers received the reviews and wrote a rebuttal. The reviewers had an on-line discussion of the submissions, their reviews, and the rebuttal comments from the authors. Based on this on-line process, the

Area Chairs wrote a meta-review for each paper before the physical TPC meeting at IBM T. J. Watson Research Center Hawthorn on June 16 and 17.

On the first day of the TPC meeting, the Area Chairs, Technical Program Chairs, and General Chairs worked in breakout sessions and plenary sessions to select the papers to be accepted – except conflict-of-interest papers that were co-authored by Area Chairs. To seek for the fairness, no submissions were made by the General Chairs and Technical Program Chairs. For the selection process, the papers themselves, (meta-) reviews, on-line discussions and authors' rebuttal comments were considered. On the second day, the General Chairs and the TP Chairs finalized the technical program. One important part of this task was discussions and decisions for conflict-of-interest papers. The set of accepted papers results in an overall acceptance rate for long papers of 20.2% and for short papers of 31.2%. Finally, the set of 67 accepted long papers were structured into 17 oral sessions, including the Best Paper session. The Best Paper session comprises four papers from four different areas which compete for the Best Paper Award of ACM Multimedia 2012. The quality of these papers and their diversity promises that this session will be one of the highlights at the conference.

All accepted long papers were shepherded by Area Chairs or TPC members to achieve the highest possible quality for the camera-ready version of the papers. As such, we are now able to present this high quality Technical Program and want to thank all authors, TPC members, and Area Chairs for their dedication and hard work.

We hope to see you in Nara!

Message from the ACM SIGMM Chair

ACM Multimedia 2012 is a continuation of an outstanding tradition to present best innovative work in the area of multimedia systems, content, applications, and interfaces, taking a very broad view of what is happening in the multimedia area. This year's ACM Multimedia 2012 is held in Nara, Japan, October 29–November 2, and it represents a very special occasion, since it marks the 20th anniversary of the ACM International Conference Multimedia (ACM Multimedia) venue. The first ACM Multimedia conference was presented in Anaheim, California, USA, August 1–6, 1993. Since then the ACM Special Interest Group in Multimedia (SIGMM) has been a leader in the international multimedia community, annually sponsoring the worldwide premier event in the field. The ACM Multimedia Conference consistently presents the most original, intriguing and important work in its discipline.

During the ACM Multimedia 2012 conference, we celebrate the 20th anniversary of the conference with an exciting program, but especially in this 'Message from the SIGMM chair' I want to stress two important events that are specifically designed to look back, reflect and consider new multimedia opportunities:

- The Panel “**Coulda, Woulda, Shoulda: 20 Years of Multimedia Opportunities**” is moderated by Klara Nahrstedt and Malcolm Slaney, and hosts four distinguished panelists, Lawrence Rowe, Ramesh Jain, Ralf Steinmetz, and Dick Bulterman. These pioneers discuss the exciting opportunities and accomplishments they have witnessed within the multimedia community during their 20 years in the field. They also take note of opportunities missed and express their enthusiasm about those still to come (<http://www.acmmm12.org/panel-sessions/>).
- The Special Issue on the “**20th Anniversary of ACM SIGMM Multimedia**” appears in the leading multimedia journal, the ACM Transactions on Multimedia Computing, Communications and Applications (TOMMCAP) in 2013, where historical views of multimedia technologies are to be presented together with the impact of past inventions on current and future multimedia technologies. The special issue is led by the Guest Editors, Klara Nahrstedt, Rainer Lienhart and Malcolm Slaney, with extensive support from the TOMCCAP Editor-in-Chief Ralf Steinmetz (<http://tomccap.acm.org/TOMCCAP-CFP-2012-v2.pdf>).

I wish to thank many members of the SIGMM community for the interesting and innovative ideas to celebrate the ACM Multimedia 20th anniversary, but special thanks goes to Malcolm Slaney, Kiyo Aizawa, Nobory Babaguchi, John Smith, Rainer Lienhart, Mohan Kankanhalli, Ramesh Jain, Ralf Steinmetz, Lawrence Rowe, Dick Bulterman, and our ACM SIGMM coordinator, Fran Spinola.

• A Study on Making Camera Trajectory from Panorama Watching Manipulation	1165
Daisuke Ochi, Hideaki Kimata, Hajime Noto, Akira Kojima (<i>Nippon Telegraph and Telephone Corporation</i>)	
• Drive Video Summarization Based on Double Articulation Structure of Driving Behavior	1169
Kazuhiro Takenaka, Takashi Bando (<i>Denso Corporation</i>), Shogo Nagasaka, Tadahiro Taniguchi (<i>Ritsumeikan University</i>)	
• Interactive Multimodal Social Robot for Improving Quality of Care of Elderly in Australian Nursing Homes	1173
Rajiv Khosla, Mei-Tai Chu, Reza Kachouie (<i>La Trobe University</i>), Keiji Yamada, Fujita Yoshihiro, Tomoharu Yamaguchi (<i>NEC Corporation</i>)	
• Plug&Touch: A Mobile Interaction Solution for Large Display via Vision-Based Hand Gesture Detection	1177
Lei Xu, Yikai Fang, Kongqiao Wang, Jiangwei Li (<i>Nokia Research Center</i>)	
• Ulcer Detection in Wireless Capsule Endoscopy Video	1181
Yingju Chen, Jeongkyu Lee (<i>University of Bridgeport</i>)	
• Critical Gameplay: Designing Games to Critique Convention	1185
Lindsay D. Grace (<i>Miami University</i>)	
• Smooth and Efficient Crowd Transformation	1189
Mingliang Xu, Yunpeng Wu, Yangdong Ye (<i>Zhengzhou University</i>)	
• Augmented Reality Card Game Based on User-Specific Information Control	1193
Seiko Myojin, Arata Sato, Nobutaka Shimada (<i>Ritsumeikan University</i>)	
• Indoor and Outdoor Profiling of Users in Multimedia Installations	1197
Gianpaolo D'Amico, Alberto Del Bimbo, Andrea Ferracani, Lea Landucci, Daniele Pezzatini (<i>University of Florence</i>)	
• Digit Sonus: An Interactive Fingerprint Sonification	1201
Yoon Chung Han (<i>University of California, Santa Barbara</i>), Byeong-jun Han (<i>Korea University</i>)	
• Extending the Lifelog to Non-Human Subjects: Ambient Storytelling for Human-Object Relationships	1205
Joshua McVeigh-Schultz, Jen Stein, Jeff Watson, Scott Fisher (<i>University of Southern California</i>)	

Brave New Ideas Program

Session Chairs: Alejandro Jaimes (*Yahoo! Research*) and Tat-seng Chua (*National University of Singapore*)

• Situation Recognition: An Evolving Problem for Heterogeneous Dynamic Big Multimedia Data	1209
Vivek K. Singh, Mingyan Gao, Ramesh Jain (<i>University of California, Irvine</i>)	
• Distributional Semantics with Eyes: Using Image Analysis to Improve Computational Representations of Word Meaning	1219
Elia Bruni, Jasper Uijlings, Marco Baroni, Nicu Sebe (<i>University of Trento</i>)	
• Towards Indexing Representative Images on The Web	1229
Xin-Jing Wang (<i>Microsoft Research Asia</i>), Zheng Xu (<i>University of Science and Technology of China</i>), Lei Zhang (<i>Microsoft Research Asia</i>), Ce Liu (<i>Microsoft Research New England</i>), Yong Rui (<i>Microsoft Research Asia</i>)	
• Intent and Its Discontents: The User at the Wheel of the Online Video Search Engine ..	1239
Alan Hanjalic, Christoph Kofler, Martha Larson (<i>Delft University of Technology</i>)	

Technical Demo Session 1

Session Chair: Hirokazu Kato (*NAIST*)

- **Face Replacement with Large-Pose Differences** 1249
Yuan Lin (*Tsinghua University*), Qian Lin, Feng Tang (*HP Labs*), Shengjin Wang (*Tsinghua University*)
- **TouchPaper: Making Print Interactive** 1251
Feng Tang, Hao Tang, Daniel R. Tretter, Qian Lin (*Hewlett-Packard Laboratories*)
- **QuickToon: A Real-Time Video Stylization and Sharing System on General Processors** 1253
Hongsheng Yang, Huanliang Sun, Jiangbo Lu (*Advanced Digital Sciences Center*)
- **Sketch2Tag: Automatic Hand-Drawn Sketch Recognition** 1255
Zhenbang Sun (*Shanghai Jiao Tong University*), Changhu Wang (*Microsoft Research Asia*), Liqing Zhang (*Shanghai Jiao Tong University*), Lei Zhang (*Microsoft Research Asia*)
- **A Rapid Flower/Leaf Recognition System** 1257
Xianbiao Qi (*Beijing University of Posts and Telecommunications*), Rong Xiao, Lei Zhang (*Microsoft Research Asia*), Chun-Guang Li, Jun Guo (*Beijing University of Posts and Telecommunications*)
- **A Tool for Automatic Cinemagraphs** 1259
Mei-Chen Yeh, Po-Yi Li (*National Taiwan Normal University*)
- **Actions Speak Louder than Words: Searching Human Action Video Based on Body Movement** 1261
Yan-Ching Lin (*Academia Sinica*), Min-Chun Hu (*Academia Sinica & National Cheng Kung University*), Wen-Huang Cheng, Yung-Huan Hsieh, Hong-Ming Chen (*Academia Sinica*)
- **Action Tutor: Real-Time Exemplar-based Sequential Movement Assessment with Kinect Sensor** 1263
Chi-Wen Chen (*National Taiwan University*), Min-Chun Hu, Wen-Huang Cheng (*Academia Sinica*), Che-Han Chang, Jui-Hsin Lai, Ja-Ling Wu (*National Taiwan University*)
- **Jiku Live: A Live Zoomable Video Streaming System** 1265
Arash Shafiei, Ngo Quang Minh Khiem, Guntur Ravindra, Mukesh Saini, Cong Pang, Wei Tsang Ooi (*National University of Singapore*)
- **Smart VideoCooking: A Multimedia Cooking Recipe Browsing Application on Portable Devices** 1267
Keisuke Doman, Cheng Ying Kuai (*Nagoya University*), Tomokazu Takahashi (*Gakuen University*), Ichiro Ide, Hiroshi Murase (*Nagoya University*)
- **Through the Looking Glass: Mirror Worlds for Augmented Awareness & Capability** 1269
Don Kimber (*FX Palo Alto Laboratory, Inc.*), Jun Shingu (*Fuji Xerox*), Jim Vaughan, David Arendash, David Lee, Maribeth Back (*FX Palo Alto Laboratory, Inc.*), Shingo Uchihashi (*Fuji Xerox*)
- **LikeLines: Collecting Timecode-Level Feedback for Web Videos Through User Interactions** 1271
Raynor Vliegndhart, Martha Larson, Alan Hanjalic (*Delft University of Technology*)
- **Exploring and Browsing Photos Through Characteristic Geographic Tag Regions** 1273
Bart Thomee, Adam Rae (*Yahoo! Research*)
- **Rapid Object Search Engine for Contextual Advertisement** 1275
Yuning Jiang, Junsong Yuan, Jingjing Meng (*Nanyang Technological University*)
- **Multi-View Video Contents Viewing System by Synchronized Multi-view Streaming Architecture** 1277
Takafumi Marutani, Kenji Mase, Toshiaki Fujii (*Nagoya University*), Tetsuya Kawamoto (*Chukyo TV Broadcasting Co. Ltd.*)
- **X-Large Virtual Workspaces for Projector Phones Through Peephole Interaction** 1279
Bonifaz Kaufmann, Martin Hitz (*Alpen-Adria-Universität Klagenfurt*)
- **Demo: Virtual Director for Live Event Broadcast** 1281
Rene Kaiser, Wolfgang Weiss (*Joanneum Research*), Malte Borsum, Axel Kochale (*Technicolor*), Marco Masetti, Valentina Zampichelli (*Softeco Sismat*)

- **Fly-through Heijo Palace Site: Historical Tourism System Using Augmented Telepresence** 1283
Fumio Okura, Masayuki Kanbara, Naokazu Yokoya (*Nara Institute of Science and Technology*)
- **Mobile Multimedia Presentation in Self-Forming Mobile Device Groups: Ad-Hoc Networks in Practice** 1285
Kevin Collins, Noel E. O'Connor, Gabriel Miro Muntean (*Dublin City University*)
- **Eyeke: What You Hear Is What You See** 1287
Takeshi Okunaka, Yoshinobu Tonomura (*Ryukoku University*)
- **System for Creating Slideshows Based on People and Their Emotions** 1289
Vassilios Vonikakis, Stefan Winkler
(*Advanced Digital Sciences Center & University of Illinois at Urbana-Champaign*)
- **gTravel: A Global Social Travel System** 1291
Richong Zhang, Xiaohui Guo, Hailong Sun, Jinpeng Huai, Xudong Liu (*Beihang University*)

Technical Demo Session 2

Session Chair: Qi Tian (*University of Texas at San Antonio*)

- **Interactive Music Video Application for Smartphones Based on Free-Viewpoint Video and Audio Rendering** 1293
Toshiharu Horiuchi, Hiroshi Sankoh, Tsuneo Kato, Sei Naito (*KDDI R&D Laboratories, Inc.*)
- **Abnormal Behavior Recognition System for ATM Monitoring by RGB-D Camera** 1295
Fan Liu, Jinhui Tang (*Nanjing University of Science and Technology*),
Ruizhen Zhao (*Beijing Jiaotong University*), Zhenmin Tang (*Nanjing University of Science and Technology*)
- **Interactive Photomosaic System Using GPU** 1297
Makoto Fujisawa, Toshiyuki Amano, Takafumi Taketomi, Goshiro Yamamoto, Yuki Uranishi, Jun Miyazaki
(*Nara Institute of Science and Technology*)
- **PhacePhinder: Harnessing Social Networks to Build Social Face Databases for Mobile Devices** 1299
Mark Bloess, Heung-Nam Kim, Abdulmotaleb El Saddik (*University of Ottawa*)
- **Real-Time Multiple Object Instances Detection** 1301
Chengli Xie, Jinqiao Wang, Yifan Zhang, Hanqing Lu (*Chinese Academy of Sciences*)
- **One Shot Learning Gesture Recognition with Kinect Sensor** 1303
Di Wu, Fan Zhu, Ling Shao (*The University of Sheffield*), Hui Zhang (*United International College*)
- **Interactive Exploration of Large Remote Image Databases** 1305
William Plant (*Aston University*), Gerald Schaefer (*Loughborough University*)
- **Scenario-Driven Interactive Panorama Video Delivery: Promptly Watch and Share Enjoyable Parts of an Event** 1307
Daisuke Ochi, Hideaki Kimata, Hajime Noto, Akira Kojima (*Nippon Telegraph and Telephone Corporation*)
- **MOGAT: A Cloud-Based Mobile Game System with Auditory Training for Children with Cochlear Implants** 1309
Yinsheng Zhou, Toni-Jan Keith P. Monserrat, Ye Wang (*National University of Singapore*)
- **A Domain-Specific Music Search Engine for Gait Training** 1311
Zhonghua Li, Ye Wang (*National University of Singapore*)
- **A Daily, Activity-Aware, Mobile Music Recommender System** 1313
Xinxi Wang, David Rosenblum, Ye Wang (*National University of Singapore*)
- **Use of Invisible Noise Signals to Prevent Privacy Invasion Through Face Recognition from Camera Images** 1315
Takayuki Yamada (*Graduate University for Advanced Studies*), Seiichi Gohshi (*Kogakuin University*),
Isao Echizen (*National Institute of Informatics*)
- **DVS: A Dynamic Multi-Video Summarization System of Sensor-Rich Videos in Geo-Space** 1317
Ying Zhang, Roger Zimmermann (*National University of Singapore*)

- **Motch: An Automatic Motion Type Characterization System for Sensor-Rich Videos** 1319
Guanfeng Wang, Beomjoo Seo, Roger Zimmermann (*National University of Singapore*)
- **Hummi-Com: Humming-based Music Composition System** 1321
Tetsuro Kitahara, Syohei Kimura, Yuu Suzuki, Tomofumi Suzuki (*Nihon University*)

Technical Demo Session 3

Session Chair: Hirokazu Kato (*NAIST*)

- **Browse-to-Search** 1323
Shiyang Lu (*The University of Sydney*), Tao Mei, Jingdong Wang (*Microsoft Research Asia*),
Jian Zhang (*University of Technology*), Zhiyong Wang, David Dagan Feng (*The University of Sydney*),
Jian-Tao Sun, Shipeng Li (*Microsoft Research Asia*)
- **Scalable Similar Image Search by Joint Indices** 1325
Jing Wang (*Peking University*), Jingdong Wang (*Microsoft Research Asia*), Xian-Sheng Hua (*Microsoft Bing*),
Shipeng Li (*Microsoft Research Asia*)
- **Color Filter for Image Search** 1327
Peng Wang (*Peking University*), Dongqing Zhang (*Shanghai Jiao Tong University*),
Jingdong Wang (*Microsoft Research Asia*), Zhong Wu, Xian-Sheng Hua (*Microsoft Bing*),
Shipeng Li (*Microsoft Research Asia*)
- **StoViz : Story Visualization of TV Series** 1329
Philippe Ercolessi (*University Paul Sabatier*), Hervé Bredin (*LIMSI - CNRS*),
Christine Sénac (*University Paul Sabatier*)
- **3DME: 3D Media Express from RGB-D Images** 1331
Tam V. Nguyen, Lusong Li, Jun Tan, Shuicheng Yan (*National University of Singapore*)
- **“Hi, Magic Closet, Tell Me What to Wear!”** 1333
Si Liu, Tam V. Nguyen, Jiashi Feng (*National University of Singapore*),
Meng Wang (*Hefei University of Technology*), Shuicheng Yan (*National University of Singapore*)
- **Street-to-Shop: Cross-Scenario Clothing Retrieval via Parts Alignment and Auxiliary Set** 1335
Si Liu (*National University of Singapore & Chinese Academy of Sciences*),
Zheng Song (*National University of Singapore*), Meng Wang (*Hefei University of Technology*),
Changsheng Xu, Hanqing Lu (*Chinese Academy of Sciences*), Shuicheng Yan (*National University of Singapore*)
- **Searching for Diversified Landmarks by Photo** 1337
Junfeng Ye, Jia Chen, Zejia Chen, Yihe Zhu (*Shanghai Jiao Tong University*),
Shenghua Bao, Zhong Su (*IBM China Research Laboratory*), Yong Yu (*Shanghai Jiao Tong University*)
- **Attribute Feedback** 1339
Hanwang Zhang, Zheng-Jun Zha, Jingwen Bian, Yue Gao, Huanbo Luan, Tat-Seng Chua
(*National University of Singapore*)
- **Personal Photo Indexing** 1341
Ivan Tankoyeu, Julian Stöttinger, Javier Paniagua, Fausto Giunchiglia (*Universtiy of Trento*)
- **Guess What You Draw: Interactive Contour-based Image Retrieval on a Million-Scale Database** 1343
Rong Zhou, Liuli Chen, Liqing Zhang (*Shanghai Jiao Tong University*)
- **FashionAsk: Pushing Community Answers to Your Fingertips** 1345
Wei Zhang, Lei Pang, Chong-Wah Ngo (*City University of Hong Kong*)
- **A Fast Video Event Recognition System and Its Application to Video Search** 1347
Yu-Gang Jiang, Qi Dai, Yingbin Zheng, Xiangyang Xue (*Fudan University*),
Jie Liu, Dong Wang (*Huawei Technologies*)
- **Social and Automatic Annotation of Videos for Semantic Profiling and Content Discovery** 1349
Marco Bertini, Alberto Del Bimbo, Andrea Ferracani, Daniele Pezzatini (*Università degli Studi di Firenze*)

Multimedia Grand Challenge

Session Chairs: Marcel Worring (*University of Amsterdam*) and Yushi Jing (*Google Research*)

- **Visual-Based Transmedia Events Detection** 1351
Alexis Joly, Julien Champ (*INRIA Zenith*), Pierre Letessier (*INRA/INA*),
Nicolas Hervé, Olivier Buisson, Marie-Luce Viaud (*INA*)
- **Technicolor Challenge: An Event Classification Framework by Probabilistic Context Modeling of Multimodal Features** 1353
Hsuan-Sheng Chen, Wen-Jiin Tsai (*National Chiao-Tung University*)
- **TWIPIX: A Web Magazine Curated from Social Media** 1355
Romil Bansal, Radhika Kumaran, Diwakar Mahajan, Arpit Khurdiya, Lipika Dey, Hiranmay Ghosh
(*Tata Consultancy Services*)
- **Multimedia News Digger on Emerging Topics from Social Streams** 1357
Bing-Kun Bao (*Chinese Academy of Sciences & China -Singapore Institute of Digital Media*),
Weiqing Min, Jitao Sang, Changsheng Xu (*Chinese Academy of Sciences*)
- **Analyzing Social Media via Event Facets** 1359
Zhiyu Wang, Peng Cui (*Tsinghua University*), Lexing Xie (*Australian National University and NICTA*),
Hao Chen, Wenwu Zhu, Shiqiang Yang (*Tsinghua University*)
- **Automatic Cinemagraphs for Ranking Beautiful Scenes** 1361
Yin-Tzu Chan, Hao-Chen Hsu, Po-Yi Li, Mei-Chen Yeh (*National Taiwan Normal University*)
- **“Where is the Interestingness?” Retrieving Appealing Video Scenes by Learning Flickr-based Graded Judgments** 1363
Miriam Redi, Bernard Merialdo (*EURECOM*)
- **Scaring or Pleasing: Exploit Emotional Impact of an Image** 1365
Bing Li (*Chinese Academy of Sciences*), Songhe Feng (*Beijing Jiaotong University*),
Weihua Xiong, Weiming Hu (*Chinese Academy of Sciences*)
- **Classification of Photos Based on Good Feelings: ACM MM 2012 Multimedia Grand Challenge Submission** 1367
Mathias Lux, Mario Taschwer (*Klagenfurt University*), Oge Marques (*Florida Atlantic University*)
- **Understanding the Emotional Impact of Images** 1369
Xiaohui Wang, Jia Jia, Peiyun Hu, Sen Wu, Jie Tang, Lianhong Cai (*Tsinghua University*)
- **Emotion-Based Sequence of Family Photos** 1371
Vassilios Vonikakis, Stefan Winkler
(*Advanced Digital Sciences Center & University of Illinois at Urbana-Champaign*)
- **Evaluating User’s Energy Consumption Using Kinect Based Skeleton Tracking** 1373
Zhenbao Liu, Sicong Tang, Hongliang Qin, Shuhui Bu (*Northwestern Polytechnical University*)
- **Analysis of Dance Movements Using Gaussian Processes** 1375
Antoine Liutkus, Angélique Dremeau (*Telecom ParisTech*),
Dimitrios Alexiadis (*Hellas, Information Technologies Institute*), Slim Essid (*Telecom ParisTech*),
Petros Daras (*Hellas, Information Technologies Institute*)
- **Automatic Music Soundtrack Generation for Outdoor Videos from Contextual Sensor Information** 1377
Yi Yu, Zhijie Shen, Roger Zimmermann (*National University of Singapore*)
- **The Acousticvisual Emotion Guassians Model for Automatic Generation of Music Video** 1379
Ju-Chiang Wang (*Academia Sinica & National Taiwan University*), Yi-Hsuan Yang (*Academia Sinica*),
I-Hong Jhuo (*National Taiwan University*), Yen-Yu Lin, Hsin-Min Wang (*Academia Sinica*)
- **Automatic Music Video Generation: Cross Matching of Music and Image** 1381
Xixuan Wu (*Chinese Academy of Sciences & The Chinese University of Hong Kong*),
Bing Xu (*The Chinese University of Hong Kong*), Yu Qiao (*Chinese Academy of Sciences*),
Xiaoou Tang (*Chinese Academy of Sciences & The Chinese University of Hong Kong*)
- **MuseSync: Standing on the Shoulders of Hollywood** 1383
Cynthia C. S. Liem (*Delft University of Technology*), Alessio Bazzica (*University of Firenze*),
Alan Hanjalic (*Delft University of Technology*)

Doctoral Symposium Session 1: Best Paper Session

Session Chairs: Chong-Wah Ngo (*City University of Hong Kong*)
and Keiji Yanai (*University of Electro-Communication*)

- **People Search and Activity Mining in Large-Scale Community-Contributed Photos** 1385
Yan-Ying Chen (*National Taiwan University*)
- **Upper Body Gestures in Lecture Videos: Indexing and Correlating to Pedagogical Significance** 1389
John R. Zhang (*Columbia University*)
- **Modeling Video Viewing Behaviors for Viewer State Estimation** 1393
Ryo Yonetani (*Kyoto University*)
- **Challenges in Supporting Non-Linear and Non-Continuous Media Access in P2P Systems** 1397
Zhen Wei Zhao (*National University of Singapore*)

Doctoral Symposium 2: Oral Paper Session

Session Chairs: Chong-Wah Ngo (*City University of Hong Kong*)
and Keiji Yanai (*University of Electro-Communication*)

- **3D Photo Browsing for Future Mobile Devices** 1401
Shahrouz Yousefi (*Umeå University*)
- **Making Use of Eye Tracking Information in Image Collection Creation and Region Annotation** 1405
Tina Walber (*University of Koblenz-Landau*)
- **Investigating 3D Model and Part Information for Improving Content-Based and Attribute-Based Object Retrieval** 1409
Yen-Liang Lin (*National Taiwan University*)
- **An Adaptive Framework for Scalable Multi-View Video Coding or the H.264/AVC Standard** 1413
Hoda Roodaki (*University of Tehran*)
- **Distributed Video Coding with Improved Side Information Refinement and Parallelized Architecture Design** 1417
Yun-Chung Shen (*National Taiwan University*)

Doctoral Symposium 3: Poster Session

Session Chairs: Chong-Wah Ngo (*City University of Hong Kong*)
and Keiji Yanai (*University of Electro-Communication*)

- **Collective Search and Recommendation in Social Media** 1421
Jitao Sang (*Chinese Academy of Sciences*)
- **Semantic Awareness for Automatic Image Interpretation** 1425
Albrecht Lindner (*École Polytechnique Fédérale de Lausanne*)
- **Trajectory Signature for Action Recognition in Video** 1429
Nicolas Ballas (*CEA/Mines-ParisTech*), Bertrand Delezoide (*CEA Saclay*), Françoise Prêteux (*Mines-ParisTech*)
- **Interactive Data-Driven Search and Discovery of Temporal Behavior Patterns from Media Streams** 1433
Chreston Miller (*Virginia Tech*)
- **Spacetime Freeview Generation Using Image-Based Rendering, Relighting, and Augmented Telepresence** 1437
Fumio Okura (*Nara Institute of Science and Technology*)
- **What You See Is What You Should Get** 1441
Velibor Adzic (*Florida Atlantic University*)
- **3D Multimedia Signal Processing** 1445
Yu-Hsun Lin (*National Taiwan University*)

- **Open Source Software Competition**
Session Chair: Masanori Sano (*Japan Broadcasting Corporation*)
- **Bob: A Free Signal Processing and Machine Learning Toolbox for Researchers** 1449
André Anjos, Laurent El Shafey, Roy Wallace, Manuel Günther, Chris McCool, Sébastien Marcel
(*Idiap Research Institute*)
- **DisplayCast: A High Performance Screen Sharing System for Intranets** 1453
Surendar Chandra, Lawrence A. Rowe (*FX Palo Alto Laboratory Inc.*)
- **UltraGrid: Low-Latency High-Quality Video Transmissions on Commodity Hardware** ... 1457
Petr Holub, Jiří Matela, Martin Pulec, Martin Šrom (*CESNET z.s.p.o.*)
- **Video Hyperlinking: Libraries and Tools for Threading and Visualizing Large Video Collection** 1461
Lei Pang, Wei Zhang (*City University of Hong Kong*), Hung-Khoon Tan (*University Tunku Abdul Rahman*),
Chong-Wah Ngo (*City University of Hong Kong*)
- **XXkin – eXtensible Hand Pose and Gesture Recognition Library for Kinect** 1465
Fabrizio Pedersoli, Nicola Adami, Sergio Benini, Riccardo Leonardi (*University of Brescia*)
- **A Toolset for the Authoring, Simulation, and Rendering of Sensory Experiences** 1469
Markus Walzl, Benjamin Rainer, Christian Timmerer, Hermann Hellwagner (*Alpen-Adria-Universität Klagenfurt*)

Video Program

Session Chair: Tao Mei (*Microsoft Research Asia*)

- **A Real-Time System for Capturing HDR Videos** 1473
Benjamin Guthier, Stephan Kopf, Wolfgang Effelsberg (*University of Mannheim*)
- **High Dynamic Range (HDR) Video Image Processing for Digital Glass** 1477
Raymond Chun Hing Lo, Steve Mann, Jason Huang, Valmiki Rampersad, Tao Ai (*University of Toronto*)
- **Immersive Multiplayer Tennis with Microsoft Kinect and Body Sensor Networks** 1481
Suraj Raghuraman, Karthik Venkatraman, Zhanyu Wang, Jian Wu, Jacob Clements, Reza Lotfian,
Balakrishnan Prabhakaran, Xiaohu Guo, Roozbeh Jafari (*University of Texas at Dallas*),
Klara Nahrstedt (*University of Illinois at Urbana-Champaign*)

Multimedia Art Exhibition

Session Chairs: Tomoe Moriyama (*Museum of Contemporary Art Tokyo*) and Hideyuki Ando (*Osaka University*)

- **Optically Coupled Oscillators (OCOs) -- LED Fireflies** 1485
Munehisa Sekikawa (*The University of Tokyo*), Akinori Tsuji (*The University of Tokushima*),
Keiko Kimoto (*FIRST, JST*), Ikkyu Aihara (*RIKEN Brain Science Institute*),
Daisuke Ito, Tetsushi Ueta (*The University of Tokushima*), Kazuyuki Aihara (*The University of Tokyo*),
Hiroshi Kawakami (*FIRST, JST*)
- **ThinkingGarden** 1487
Yoshiaki Mima, Ken-ichi Kimura, Hidekatsu Yanagi (*Future University Hakodate*)
- **Empathetic Heartbeat** 1489
Hideyuki Ando (*Osaka University*), Junji Watanabe (*Nippon Telegraph and Telephone Company*),
Masahiko Sato (*TOPICS Corporation Ltd.*)
- **Participatory Art Cards & Archive System for Public Exhibition: A Case Study Through Ars Wild Card** 1491
Hideaki Ogawa, Emiko Ogawa, Manuela Naveau, Christopher Lindinger, Roland Haring, Matthew Gardiner,
Martina Mara, Horst Hörtner (*Ars Electronica Futurelab*)
- **The Silent Power - Applications of Research in Medical X-ray Combining with Photography and Digital Graphic Design** 1493
Shih-Ting Tsai, Ming-Hsiu Mia Chen (*Tatung University*),
Chi-Cheng Chang, Yu-Hung Kuo (*National Taiwan Normal University*),
Miranda Lawry (*University of Newcastle*), Yi-Shu Ting (*Chang Gung Memorial Hospital*)
- **Interactive Art “Maelstrom&Vortex”: The Body’s Speed – A Race Between Digital and Analog Speeds** 1495
He-Lin Luo, Yi-Ping Hung (*National Taiwan University*)

- **Passage+** 1497
Makato Shirose, Masahito Hirose, Kentato Oku, Masato Koide, Naoya Hirai
(*IMAGICA DIGITALSCAPE Co., Ltd.*)
- **“Yu bi Yomu”: Interactive Reading of Dynamic Text** 1499
Kazushi Maruya (*Nippon Telegraph and Telephone Corporation*), Miki Uetsuki (*Hakodate Junior College*),
Hideyuki Ando (*Osaka University*), Junji Watanabe (*Nippon Telegraph and Telephone Corporation*)
- **The New Dunites** 1501
Andres Burbano, Danny Bazo, Şölen K. DiCicco, Angus Forbes (*University of California, Santa Barbara*)

Workshops

Session Chairs: Jiebo Luo (*University of Rochester*) and Svetha Venkatesh (*Deakin University*)

- **International Workshop on Socially-Aware Multimedia (SAM’12)** 1503
Pablo Cesar (*Centrum Wiskunde & Informatica*), David A. Shamma (*Yahoo! Research*),
Doug Williams (*BT Research & Technology*), Cees G.M. Snoek (*University of Amsterdam*)
- **ACM Multimedia 2012 Workshop on Crowdsourcing for Multimedia** 1505
Kuan-Ta Chen (*Academia Sinica*), Wei-Ta Chu (*National Chung Cheng University*),
Martha Larson (*Delft University of Technology*), Wei Tsang Ooi (*National University of Singapore*)
- **Multimedia Analysis for Ecological Data** 1507
Concetto Spampinato (*University of Catania*), Vasileios Mezaris (*Centre for Research and Technology Hellas*),
Jacco van Ossenbruggen (*Centrum Wiskunde & Informatica*)
- **2nd International ACM Workshop on Music Information Retrieval with User-Centered and Multimodal Strategies (MIRUM)** 1509
Cynthia C. S. Liem (*Delft University of Technology*), Meinard Müller (*Bonn University & MPI Informatik*),
Steven K. Tjoa (*iZotope, Inc.*), George Tzanetakis (*University of Victoria*)
- **GeoMM’12: ACM International Workshop on Geotagging and Its Applications in Multimedia** 1511
Liangliang Cao (*IBM T.J. Watson Research Center*), Gerald Friedland (*International Computer Science*),
Martha Larson (*Delft University of Technology*)
- **AMVA’12: ACM International Workshop on Audio and Multimedia Methods for Large-Scale Video Analysis** 1513
Gerald Friedland (*International Computer Science Institute*), Dan Ellis (*Columbia University*),
Florian Metze (*Carnegie Mellon University*)
- **ACM International Workshop on Cloud-Based Multimedia Applications and Services for E-Health (CBMAS-EH 2012)** 1515
M. Shamim Hossain (*King Saud University*), Abdulmotaleb El Saddik (*University of Ottawa*)
- **Overview of the ACM Multimedia 2012 Workshop on Multimedia for Cooking and Eating Activities (CEA’12)** 1517
Mutsuo Sano (*Osaka Institute of Technology*), Ichiro Ide (*Nagoya University*), Yoko Yamakata (*Kyoto University*)
- **1st International ACM Workshop on User Experience in e-Learning and Augmented Technologies in Education** 1519
David Fonseca (*La Salle, Universitat Ramon Llull*), Xenophon Zabulis (*Foundation for Research and Technology*),
Naeem Ramzan (*Queen Mary University of London*), Arianit Kurti (*Linnaeus University*),
Salvatore Flavio Pileggi (*Universidad Politécnica de Valencia*), Heedong Ko (*Image Media Research Center*)
- **Personalized Access to Cultural Heritage: Multimedia by the Crowd, for the Crowd (PATCH 2012 @ ACM Multimedia)** 1521
Johan Oomen (*Netherlands Institute for Sound and Vision*), Lora Aroyo (*VU University Amsterdam*),
Stéphane Marchand-Maillet (*University of Geneva*), Jeremy Douglass (*University of California, San Diego*)
- **The Second ACM International Workshop on Interactive Multimedia on Mobile and Portable Devices** 1523
Ling Shao (*The University of Sheffield*), Caifeng Shan (*Philips Research*), Minoru Etoh (*NTT DoCoMo*)

Tutorials

Session Chairs: Susanne Boll (*University of Oldenburg*) and Changsheng Xu (*Chinese Academy of Sciences*)

• Message from the Tutorial Chairs	1525
Susanne Boll (<i>University of Oldenburg</i>), Changsheng Xu (<i>Chinese Academy of Sciences</i>)	
• Interacting with Image Collections: Visualisation and Browsing of Image Repositories	1527
Gerald Schaefer (<i>Loughborough University</i>)	
• Privacy Concerns in Multimedia and Their Solutions	1529
Gerald Friedland (<i>International Computer Science Institute</i>)	
• Dimensional and Continuous Analysis of Emotions for Multimedia Applications	1531
Hatice Gunes (<i>Queen Mary University of London</i>), Björn Schuller (<i>Joanneum Research</i>)	
• Dynamic Adaptive Streaming over HTTP: From Content Creation to Consumption	1533
Christian Timmerer (<i>Alpen-Adria-Universität Klagenfurt</i>), Carsten Griwodz (<i>Simula Research Laboratory</i>)	
• Multimedia Recommendation	1535
Jialie Shen (<i>Singapore Management University</i>), Meng Wang (<i>Hefei University of Technology</i>), Shuicheng Yan (<i>National University of Singapore</i>), Peng Cui (<i>Tsinghua University</i>)	
• A Human-Centered Perspective on Multimedia Data Science	1537
Alejandro Jaimes (<i>Yahoo! Research</i>)	
Author Index	1539

MM 2012 Conference Organization

General Chairs: Noboru Babaguchi (Osaka University, Japan)
Kiyoharu Aizawa (The University of Tokyo, Japan)
John Smith (IBM, USA)

Technical Program Chairs: Shin'ichi Satoh (National Institute of Informatics, Japan)
Thomas Plagemann (University of Oslo, Norway)
Xian-Sheng Hua (Microsoft, USA)
Rong Yan (Facebook, USA)

Local Arrangements Chairs: Tomio Echigo (Osaka Electro-Communication University, Japan)
Naoko Nitta (Osaka University, Japan)

Twentieth Anniversary Liaison: Ramesh Jain (University of California at Irvine, USA)
Malcolm Slaney (Yahoo! Research, USA)

Panels Chairs: Yong Rui (Microsoft Research, China)
Shih-Fu Chang (Columbia University, USA)

Brave New Ideas Program Chairs: Alejandro Jaimes (Yahoo! Research, Spain)
Tat-Seng Chua (National University of Singapore, Singapore)

Multimedia Grand Challenge Chairs: Marcel Worring (University of Amsterdam, The Netherlands)
Yushi Jing (Google Research, USA)
Go Irie (Nippon Telegraph & Telephone Corporation, Japan)

Multimedia Art Program Chairs: Tomoe Moriyama (Tokyo Museum of Contemporary Art, Japan)
Hideyuki Ando (Osaka University, Japan)
Aisling Kelliher (Arizona State University, USA)
David A. Shamma (Yahoo! Research, USA)

Technical Demonstration Chairs: Qi Tian (University of Texas at San Antonio, USA)
Hirokazu Kato (Nara Institute of Science & Technology, Japan)

Open Source Software Competition

Chairs: Daniel Gatica Perez (IDIAP Research Institute, Switzerland)
Masanori Sano (Japan Broadcasting Corporation, Japan)

Video Program Chairs: Tao Mei (Microsoft Research Asia, China)
Koichi Shinoda (Tokyo Institute of Technology, Japan)

Doctoral Symposium Chairs: Chong-Wah Ngo (City University of Hong Kong, Hong Kong)
Keiji Yanai (The University of Electro-Communications, Japan)

Tutorials Chairs: Susanne Boll (University of Oldenburg, Germany)
Changsheng Xu (Chinese Academy of Sciences, China)

Workshop Chairs: Jiebo Luo (University of Rochester, USA)
Svetha Venkatesh (Deakin University, Australia)

Industrial Liaison: Minoru Etoh (NTT Docomo, Japan)
Yoichiro Miyake (Square Enix, Japan)

Web & Social Media Chairs: Ichiro Ide (Nagoya University, Japan)
Ikki Ohmukai (National Institute of Informatics, Japan)
Duy-Dinh Le (National Institute of Informatics, Japan)
Takatsugu Hirayama (Nagoya University, Japan)

Publicity Chairs: K. Selcuk Candan (Arizona State University, USA)
Michael S. Lew (Leiden University, The Netherlands)
Mark Liao (Academia Sinica, Taiwan)
Yong Man Ro (Korea Advanced Institute of Science
& Technology, Korea)

Finance Chair: Shigeyuki Sakazawa (KDDI R&D Labs, Japan)

History Preservation Chairs: Alberto del Bimbo (Univ. of Firenze, Italy)
Sethuraman Panchanathan (Arizona State University, USA)

Publication Chairs: Hiroshi Mo (National Institute of Informatics, Japan)
Chamin Morikawa (The University of Tokyo, Japan)

SIGMM Chair: Klara Nahrstedt (University of Illinois at Urbana-Champaign, USA)

SIGMM Director of Conferences: Mohan S. Kankanhalli (National University of Singapore, Singapore)

Local Arrangements Committee: Hitoshi Habe (Kinki University, Japan)
Sei Ikeda (Osaka University, Japan)
Yoshimichi Ito (Osaka University, Japan)
Norihiko Kawai (Nara Institute of Science & Technology, Japan)
Kazuaki Kondo (Kyoto University, Japan)

[MM'12](#)**ACM Multimedia 2012**

29 Oct - Nov 2, 2012, Nara, Japan

Reviews For Paper**Track** TD:Technical Demos**Paper ID** 1163**Title** Browse-to-Search**Masked Reviewer ID:** Assigned_Reviewer_1**Review:**

Question	
Overall Rating	Definitely Accept - I would protest if it is not accepted; clearly ACM MM standards
Novelty / Originality	Moderately original
Suitability for technical demo sessions	Very suitable
Presentation of the paper	Very clear
Comments to authors	This demo proposed an application to enable users to naturally search products of interest when they browse a web page, and make their even causal purchase intent easily satisfied. The work is interesting and solid. Some relevant work should be referred to, such as "Inferring semantic concepts from community-contributed images and noisy tags".

Masked Reviewer ID: Assigned_Reviewer_2**Review:**

Question	
Overall Rating	Definitely Accept - I would protest if it is not accepted; clearly ACM MM standards
Novelty / Originality	Moderately original
Suitability for technical demo sessions	Very suitable
Presentation of the paper	Clear enough
Comments to authors	This demonstration developed a very useful system for interactive online shopping application. The system is built based on visual search technologies with many good merits, such as natural-gesture inputs, in session search, browsing and comparison. The idea is novel and the paper is well written. The system is evaluated both objectively and subjectively and the experimental results validate its effectiveness and efficiency. One minor problem: It is not clear which method is adopted as the baseline (in Section 4, paragraph 2, line 4).

Subject: ACM Multimedia 2012 Technical Demo Notification - Paper #1163

Dear Shiyang Lu:

Thank you for submitting your technical demo paper to ACM Multimedia 2012. We are pleased to inform you that your paper 1163 - "Browse-to-Search" has been ACCEPTED for publication in the Proceedings of ACM MULTIMEDIA 2012 as a Technical Demo Paper.

Once accepted, we expect one of the authors of the accepted paper to present at ACM Multimedia 2012. Each paper presented at the conference requires one of the authors to register at the conference paying the regular registration fee (not the student fee). Papers submitted without registration will not be included in the Conference Program and in the Conference Proceedings. You will receive a separate email regarding registration details.

The reviews are available at CMT: <https://cmt.research.microsoft.com/ACMMM2012>. Please login with your CMT username.

Please note that the deadline for submitting final camera ready version is *July 30, 2012*.

Regards,

ACM MM 2012 Technical Demo Chairs
Qi Tian and Hirokazu Kato
