

What factors motivate users to *continue* to use an Information System?

Chanissara Arjpru

PhD Principal Supervisor: *Dr. Jim Underwood*

A dissertation submitted in fulfilment of the
requirements for the award of the degree of
Doctor of Philosophy in Computing Sciences

Faculty of Engineering and Information Technology

University of Technology, Sydney, Australia

2011

CERTIFICATE OF AUTHORSHIP/ORIGINALITY

I certify that the work in this thesis has not previously been submitted for a degree nor has it been submitted as part of requirements for a degree except as fully acknowledged within the text.

I also certify that the thesis has been written by me. Any help that I have received in my research work and the preparation of the thesis itself has been acknowledged. In addition, I certify that all information sources and literature used are indicated in the thesis.

Production Note:
Signature removed prior to publication.

Acknowledgement

Thank you Dr. Jim Underwood for supervising, comforting and making me graduate.

Thank you Prof. Jie Lu for supporting me to continue pursues a PhD degree.

Thank you to all thesis examiners who provide constructive feedbacks to improve my thesis.

Thank you mom, dad & my brother who always support in every possible way.

Thank you my loving, caring & supporting Jim Ganaha who always there to convince me to believe in my potential.

Thank you to the ones who continue generously support throughout my PhD journey (Julia Prior, Dr. Mark Borman, A/Prof. Tom Hintz, Prof. Graham Winley, Dr. Denise Tolhurst, Bob Baker, Dr. Kai Riemer, Dr. Olivera Marjanovic, A/Prof. Deborah Bunker)

Thank you for those who do not giving up on me.

Table of contents

Chapter 1: Introduction.....	1
1.1 Background of continuing use studies.....	2
1.2 Objectives of the research.....	5
Chapter 2: Previous Work on Adoption and Continuing Use of Information Systems.....	8
2.1 Why is it worth studying “a continuous use of an Information System in an organisation?.....	10
2.2 Innovation Diffusion Theory (IDT) (Roger 1995).....	13
2.3 Technology Acceptance Model (TAM) (Davis, Bagozzi & Warshaw 1989).....	23
2.4 A Post-Acceptance Model of IS Continuance (Bhattacharjee 2001a).....	32
2.5 Expectation Confirmation Theory (Oliver 1980).....	36
2.6 Discontinuing use of an Information System.....	39
2.7 Motivation-Hygiene Theory (Herzberg 1966).....	42
2.8 Mandatory and Voluntary use of an Information System.....	45
2.9 Chapter Conclusion.....	48

Chapter 3: A proposed study of a Continuous Use of an Information System.....51

3.1 The respondents and system usage environment54

3.2 The interview study.....55

3.3 The survey study.....58

3.4 Ethics of the study.....62

Chapter 4: An Interview Study of User Satisfaction and User Dissatisfaction in a Continuous Use of an Information System65

4.1 The study context.....65

4.2 The demographic of interviewees.....66

4.3 Interview Questions.....67

4.4 Results: Satisfaction and Dissatisfaction.....69

4.5 Results: Confirmation of expectations86

4.6 Results: Continuing Use.....94

4.7 Results: Voluntary Usage vs. Mandatory Usage.....121

4.8 Chapter Conclusion.....125

4.9 Motivation for the survey study.....129

Chapter 5: A Survey Study of what influence the individual continuous use of an Information System	131
5.1 The survey study.....	131
5.2 The study context.....	132
5.3 The demographic of the respondents.....	156
5.4 Data Analysis.....	158
5.5 Chapter Conclusion.....	205
Chapter 6: Discussion.....	208
6.1 Two types of continuing use of the system.....	209
6.2 System usefulness	210
6.3 System ability to support an individual growth and status gained.....	211
6.4 Satisfiers versus Dissatisfiers.....	212
6.5 Voluntary use.....	216
6.6 Contributions and extensions to existing theory.....	218
6.7 Implications for practice.....	221
6.8 Limitations.....	224
6.9 Recommendations for future research.....	225
6.10 Conclusion.....	227

Abstract

The discontinued use of an Information System is shown by previous research to be a major aspect of the failure of Information Systems projects. Major reasons for the discontinued use of an Information System include inability to meet user expectations, to satisfy users and to avoid user dissatisfaction. One limitation of previous studies was that they assumed satisfaction and dissatisfaction were bipolar opposites.

The purpose of this study is to investigate the role of expectations, satisfaction and dissatisfaction on the individuals' behaviors in their continuing use of an Information System to support their job in an organization.

Our study consists of an interview study and a survey study. Both studies were conducted with employees in organizations in Australia, who were voluntarily using the system to support their job. Analysis techniques used to analyse the results were content analysis, factor analysis and regression analysis.

Five major findings were reported from our studies. First, there are two patterns of a continuous use of an Information System; a passive continuation and an active continuation. Second, system usefulness is an important factor in the employee continuing use of the system. Third, system ability to support an individual growth and the status gained by use were new factors to encourage the continuing use. Fourth, not all factors that make individuals satisfied were separated from the factors that cause dissatisfaction. Fifth, the employees'

perceptions of whether they have choice to use or not to use the system affect the ways they use the system.

The major contribution of our study is for better assisting IT implementation management with an overall aim of increasing Information Systems continuous use to support the individuals' job in an organisation.
