

Lie Symmetry Methods for Multidimensional Linear Parabolic PDEs and Diffusions

*A thesis submitted to
the University of Technology, Sydney
in fulfilment of the requirements of
the degree of Doctor of Philosophy*

Kelly A. Lennox

SCHOOL OF MATHEMATICAL SCIENCES
UNIVERSITY OF TECHNOLOGY, SYDNEY

November, 2010

Certificate of Authorship/ Originality

I certify that the work in this thesis has not previously been submitted for a degree nor has it been submitted as part of requirements for a degree except as fully acknowledged within the text. I also certify that the thesis has been written by me. Any help that I have received in my research work and the preparation of the thesis itself has been acknowledged. In addition, I certify that all information sources and literature used are indicated in the thesis.

Signature of Student

Production Note:

Signature removed prior to publication.

Acknowledgements

This work was carried out at the Department of Mathematics, University of Technology Sydney. My gratitude to the Australian Research Council, St George Bank, Alex Novikov and the Faculty of Science for their financial assistance. I would like to thank my family for their support over the years. I am most grateful to my supervisors, Professor Eckhard Platen and Doctor Mark Craddock. I owe special gratitude to Mark Craddock for his close supervision and support throughout my studies. Without him this thesis would not be possible.

Contents

Certificate of Authorship/ Originality	3
Acknowledgements	5
Introduction	8
1. Mathematical Preliminaries	15
1.1. Lie Symmetry Groups	15
1.2. Other Mathematical Preliminaries	30
2. Integral Transform Methods in One Dimension	53
3. Integral Transform Methods in Higher Dimensions	71
4. Expansions of Fundamental Solutions	83
5. Applications of the Theory	117
5.1. Conclusion	141
Bibliography	145
